

FEDERAL REGISTER

Vol. 82

Wednesday,

No. 11

January 18, 2017

Book 1 of 2 Books

Pages 5331–5744

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 82 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—**Executive Order 13761 of January 13, 2017****The President****Recognizing Positive Actions by the Government of Sudan and Providing for the Revocation of Certain Sudan-Related Sanctions**

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), the Trade Sanctions Reform and Export Enhancement Act of 2000 (22 U.S.C. 7201–7211) (TSRA), the Comprehensive Peace in Sudan Act of 2004, as amended (Public Law 108–497) (CPSA), the Darfur Peace and Accountability Act of 2006 (Public Law 109–344) (DPAA), and section 301 of title 3, United States Code,

I, BARACK OBAMA, President of the United States of America, find that the situation that gave rise to the actions taken in Executive Order 13067 of November 3, 1997, and Executive Order 13412 of October 13, 2006, related to the policies and actions of the Government of Sudan has been altered by Sudan's positive actions over the past 6 months. These actions include a marked reduction in offensive military activity, culminating in a pledge to maintain a cessation of hostilities in conflict areas in Sudan, and steps toward the improvement of humanitarian access throughout Sudan, as well as cooperation with the United States on addressing regional conflicts and the threat of terrorism. Given these developments, and in order to see these efforts sustained and enhanced by the Government of Sudan, I hereby order:

Section 1. Effective July 12, 2017 and provided the criteria in section 12(b) of this order are met, sections 1 and 2 of Executive Order 13067 of November 3, 1997, are revoked, and Executive Order 13412 of October 13, 2006, is revoked in its entirety. The revocation of those provisions of Executive Order 13067 and of Executive Order 13412 shall not affect any violation of any rules, regulations, orders, licenses, or other forms of administrative action under those orders during the period that those provisions were in effect.

Sec. 2. Pursuant to section 908(a)(3) of TSRA, I hereby determine that it is in the national security interest of the United States to waive, and hereby waive, the application of section 908(a)(1) of TSRA with respect to Sudan.

Sec. 3. Pursuant to section 6(d) of CPSA, I hereby determine and certify that it is in the national interest of the United States to waive, and hereby waive, the application of sections 6(a) and (b) of CPSA.

Sec. 4. The function of the President under section 6(c)(1) of CPSA is assigned to the Secretary of the Treasury.

Sec. 5. The functions of the President under section 6(c)(2) and the last sentence of section 6(d) of CPSA are assigned to the Secretary of State, except that the function of denial of entry is assigned to the Secretary of Homeland Security.

Sec. 6. The function of the President under section 8 of DPAA is assigned to the Secretary of State.

Sec. 7. The Secretary of the Treasury and the Secretary of Commerce are authorized to issue regulations, licenses, and orders, and conduct such investigations as may be necessary, to implement the provisions of section 906 of TSRA.

Sec. 8. This order is not intended to, and does not, otherwise affect the national emergency declared in Executive Order 13067 of November 3, 1997, as expanded in scope by Executive Order 13400 of April 26, 2006, which shall remain in place.

Sec. 9. This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

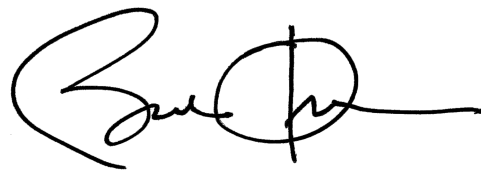

Sec. 10. On or before July 12, 2017, the Secretary of State, in consultation with the Secretary of the Treasury, the Director of National Intelligence, and the Administrator of the U.S. Agency for International Development, and based on a consideration of relevant and credible information from available sources, including nongovernmental organizations, shall provide to the President a report on whether the Government of Sudan has sustained the positive actions that gave rise to this order, including carrying out its pledge to maintain a cessation of hostilities in conflict areas in Sudan; continued improvement of humanitarian access throughout Sudan; and maintaining its cooperation with the United States on addressing regional conflicts and the threat of terrorism. As much of the report as possible, consistent with sources and methods, shall be unclassified and made public.

Sec. 11. (a) The Secretary of State, in consultation with the Secretary of the Treasury, the Director of National Intelligence, and the Administrator of the U.S. Agency for International Development, and based on a consideration of relevant and credible information from available sources, including nongovernmental organizations, shall provide to the President an updated version of the report required in section 10 of this order annually thereafter. As much of the report as possible, consistent with sources and methods, shall be unclassified and made public. To the extent a report concludes that the Government of Sudan has or has not sustained the positive actions that gave rise to this order, the Secretary of State, in consultation with the Secretary of the Treasury, the Director of National Intelligence, and the Administrator of the U.S. Agency for International Development, shall provide to the President recommendations on appropriate U.S. Government responses.

(b) Concurrent with the provision of the reports required in section 11(a) of this order, the Secretary of State, in consultation with the Secretary of the Treasury, the Director of National Intelligence, and the Administrator of the U.S. Agency for International Development, shall publish a notice in the *Federal Register* stating whether the Government of Sudan has sustained the positive actions that gave rise to this order.

Sec. 12. (a) This order is effective on January 13, 2017, except for sections 1, 4, 5, 6, and 7 of this order;

(b) Sections 1, 4, 5, 6, and 7 of this order are effective on July 12, 2017, provided that the Secretary of State, in consultation with the Secretary of the Treasury, the Director of National Intelligence, and the Administrator of the U.S. Agency for International Development, has published a notice in the *Federal Register* on or before that date, stating that the Government of Sudan has sustained the positive actions that gave rise to this order and that the Secretary of State has provided to the President the report described in section 10 of this order.

A handwritten signature in black ink, appearing to be "Donald Trump", with a large circular flourish and a horizontal line extending to the right.

THE WHITE HOUSE,
January 13, 2017.

Rules and Regulations

Federal Register

Vol. 82, No. 11

Wednesday, January 18, 2017

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 330, 332, and 337

RIN 3206-AN46

Recruitment and Selection Through Competitive Examination

AGENCY: U.S. Office of Personnel Management.

ACTION: Interim rule with request for comments.

SUMMARY: The U.S. Office of Personnel Management (OPM) is issuing an interim rule to implement the Competitive Service Act of 2015 to allow an appointing authority (*i.e.*, the head of a Federal agency or department) to share a competitive certificate with one or more appointing authorities for the purpose of making selections of qualified candidates. The intended effect of this rule is to facilitate the hiring of top talent across Federal agencies.

DATES: Interim rule effective February 17, 2017; comments must be received on or before March 20, 2017.

ADDRESSES: You may submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. All submissions received through the Portal must include the agency name and docket number or Regulation Identifier Number (RIN) for this proposed rulemaking.

You may also send, deliver, or fax comments to Kimberly A. Holden, Deputy Associate Director for Recruitment and Hiring, Employee Services, U.S. Office of Personnel Management, Room 6500 AI, 1900 E Street NW., Washington, DC 20415-9700; email at employ@opm.gov or by fax at (202) 606-4430.

FOR FURTHER INFORMATION CONTACT: Roseanna Ciarlante by telephone on (267) 932-8640, by fax at (202) 606-

4430, by TTY at (202) 418-3134, or by email at Roseanna.Ciarlante@opm.gov.

SUPPLEMENTARY INFORMATION: On March 18, 2016, the Competitive Service Act of 2015 (the “Act”) was enacted as Public Law 114-137. The Act allows an “appointing authority” to share a competitive certificate issued under delegated examining procedures with one or more “appointing authorities” to make an appointment to a position that is in the same occupational series, grade level (or equivalent), and duty location during the 240-day period beginning on the date of issuance of the certificate of eligibles.

Under current rules, an appointing authority may share a certificate *within* the bureaus and components of his or her department or agency. The current practice allows an appointing authority to expedite hiring when multiple vacancies for the same position exist throughout his or her organization. For example, suppose that the Department of Treasury headquarters human resources (HQ HR) office recruits for a Financial Management Specialist, GS-501-12, and hires two highly qualified individuals from the certificate of eligibles. Treasury’s HQ HR office may currently share the certificate with its components, like the Bureau of the Fiscal Service and the Internal Revenue Service, that have identified Financial Management Specialist vacancies that need to be filled. This current practice allows these different components with the Department to leverage the recruitment efforts already undertaken by the Department.

While the Act does not define “appointing authority” for the purpose of shared certificates, its clear purpose is to expand current practice to allow an appointing authority to share his or her certificates with an appointing authority in *other* departments or agencies, not just within the same agency (*e.g.*, the Department of Treasury will now be able to share certificates with the Department of Energy). Consistent with this purpose, in this interim rule, OPM refers to the “original hiring agency” and the “receiving agency” with respect to shared certificates, rather than using the more generic term “appointing authority.”

Congress’s purpose in enacting the Act was to help facilitate faster hiring through the sharing of talent across the Government by permitting agencies to

share resumes and select from among candidates who have competed for similar positions at another hiring agency, were assessed, and were referred by that agency. The new process will benefit agencies who may make selections from among the top rated applicants readily available, as well as applicants who through one job application may now be considered for more public service opportunities in their desired Federal occupation.

The law specifies that an appointing official can select an applicant for appointment from the certificate of another agency provided that certain conditions are met.

- The hiring agency seeking to share the certificate may share the certificate with one or more hiring agencies only if the announcement of the original position stated that the resulting certificate may be used by one or more Federal agencies, and applicants “opt-in,” electing to have their applications shared with agencies other than the agency posting the job announcement.

- An agency seeking to use another agency’s certificate must provide advance notice of the available position to its own employees, give them up to 10 days to apply, and review their qualifications before it can make a selection from the certificate from the original hiring agency.

It is plain from the Act that only the original hiring agency may “share” a certificate with any other agency. But Congress did not define precisely what it means to “share” the certificate. One possible approach is that when the original hiring agency “shares” the certificate with other agencies they must simultaneously work the certificate in a coordinated fashion, accounting for declinations, failures to respond, selections, and so on as if they were integrated arms of the same employer. (This is how the process might work when a department shares a certificate among a number of its different components.) Another possible approach is that each of the other agencies may work the certificate independently, as if the certificates had been referred from the top of a register or inventory. Neither of these approaches is compelled by the text of the statute and as such OPM has determined that the most reasonable approach, and the one that best effectuates Congress’s apparent purpose,

is the latter of the two. A shared certificate of eligibles may be used by a receiving agency independently of other receiving agencies. Each receiving agency is responsible for establishing a unique instance of a case file to document that agency's use of the certificate. This will be helpful in the event a receiving agency must later reconstruct its hiring actions. Allowing multiple agencies to use certificates independently of one another also supports the timeliest and practical implementation of these provisions and minimizes the risk of error associated with multiple agencies simultaneously working the same certificate.

However, because of the added complexity of any "sharing" of certificates, the ability to track the distribution of certificates to receiving agencies must be a feature of these provisions. Thus, whenever the original agency shares a certificate, it must maintain a record of any agencies with whom the certificate was shared. This is important in the event any errors occur which require reconstruction of all hiring actions which flow from a certificate generated by the original agency. In this scenario, if an error occurs at the original agency, the original agency is responsible solely for notifying each succeeding receiving agency that received a shared certificate of the error. Any corrective actions or reconstructions subsequent to the original agency's would be the responsibility of each receiving agency that made a selection.

How It Will Work

The original hiring agency (*i.e.*, the agency sharing the certificate) must issue a certificate in accordance with competitive examining procedures for a position it is seeking to fill. This includes public notice, rating and ranking, the application of veterans' preference, etc. The 240-day window (during which other Federal agencies may use the certificate of eligibles to select an individual) begins on the date the certificate is issued by the original hiring agency. OPM notes that the Competitive Service Act includes this 240-day window in 5 U.S.C. 3318, related to rule-of-three hiring, but does not expressly repeat this requirement in 5 U.S.C. 3319, related to hiring through category rating. However, the legislative history expresses congressional intent to apply the 240-day limitation to both hiring methods. *See* H.R. Rep. No. 114–367 (Dec. 3, 2015); S. Rep. No. 114–143 (Sept. 15, 2015). Moreover, there is no logical reason to have different expiration periods for shared certificates depending on whether the original

hiring agency chooses to hire by the rule-of-three method or the category rating method, and having two different expiration periods for shared certificates could lead to confusion. For this reason we are applying the same 240-day expiration period to shared certificates under both hiring methods.

The original hiring agency can (1) make a selection and then share the certificate with one or more receiving agencies or (2) share the certificate with one or more receiving agencies after reviewing, and deciding not to hire from, its certificate of eligible applicants. OPM notes in this regard that when an agency announces a position, examines and rates applicants, and issues a certificate of eligibles, it must do so for its own hiring needs in the first instance. An agency may not generate a certificate solely for the purpose of sharing it with another agency. That would be misleading to applicants and contrary to competitive principles.

If the original hiring agency makes a selection and shares the certificate, any pass-overs of preference eligibles or objections to other eligible candidates must be resolved by that agency before the certificate may be shared with another agency. The 240-day window cannot be extended while the pass-over of a preference eligible or objection request is being resolved; the law does not permit extensions of shared certificates.

Once the above processes have been completed, the original hiring agency may share the certificate of eligibles with one or more Federal agencies. In order to share a certificate, the Delegated Examining Unit (DEU) of the original agency may transmit the certificate to a DEU of a receiving agency. The DEU of the original agency must audit the original agency's own use of the certificate in accordance with the procedures of the Delegated Examining Operations Handbook (DEOH) before the certificate is shared.

When sharing a certificate of eligibles, the original agency must include all documentation pertaining to the creation of that certificate (*e.g.*, the job analysis, a copy of job opportunity announcement, the rating schedule, job applications, etc.) and must safeguard (*i.e.*, redact) any personally identifiable information not required by the receiving agency to use the certificate for its intended purpose. The original agency shares the certificate of eligibles in its original form, with the names of those applicants who have been selected and those who have chosen not to "opt-in" redacted, in order to retain the

original ordering of the certificate subject to these appropriate deletions.

The original agency may share a certificate in one or both of two ways: (1) Simultaneous sharing with multiple agencies; and (2) serial sharing, *i.e.*, sharing with one agency at a time.

Simultaneous Sharing. The original agency may share the certificate with one or more agencies at the same time. Each receiving agency works the certificate independently. All selections from shared certificates must be made within 240 days of the date of the issuance of the certificate by the original agency. Each receiving agency creates its own case file for audit and reconstruction purposes, documenting its compliance with the DEOH and all applicable regulations.

Serial Sharing. Another option is for the original agency to share a certificate with just one agency at a time. Under this option, the original agency shares the certificate with the first receiving agency. The first receiving agency works the certificate and makes selections within 240 days of the date of issuance of the certificate by the original agency. After sharing the certificate with the first receiving agency, the original agency may share the certificate with a second receiving agency. The second receiving agency works the certificate and makes selections within 240 days of the date of issuance of the certificate by the original agency. Each receiving agency must create its own case file for audit and reconstruction purposes, documenting its compliance with the DEOH and all applicable regulations. This process may continue to additional receiving agencies as long as this procedure is followed and all selections are made within 240 days of the date of issuance of the certificate by the original agency.

As noted above, the processes are not exclusive, *i.e.*, an agency may start with simultaneous sharing and subsequently permit additional sharing through a serial sharing scenario.

In the event that the original agency determines that an error was made on the original certificate, the original agency must notify all receiving agencies of the details of the error; receiving agencies are responsible for taking appropriate action to address any erroneous actions that may have occurred due to the error by the original agency.

The Internal Application Process

Before using a shared certificate, a receiving agency must consider its own employees for the position under the agency's merit promotion procedures. This includes considering individuals

covered under the agency's Career Transition Assistance Program (CTAP) and the agency's reemployment priority list (RPL), where applicable, as well as other individuals for which consideration is required as part of the internal selection process. *See* 5 CFR part 330, subparts B and F.

The Competitive Service Act provides for notice to a receiving agency's own employees, an internal application period of no more than 10 days, and consideration of the internal applicants before a selection can be made from this shared certificate. The law does not permit an extension of this internal application period beyond 10 days.

The law also specifies that the internal application process is subject to applicable collective bargaining obligations (to the extent consistent with law). However, the Competitive Service Act does not affect the provision of the Federal Service Labor-Management Relations Statute under which management has the right to fill a position either from among properly ranked and certified candidates for promotion or from any other appropriate source, such as a competitive certificate. *See* 5 U.S.C. 7106(a)(2)(C); 5 CFR 330.102, 335.103(b)(4).

If a receiving agency makes a selection from among its own employees (*i.e.*, under merit promotion procedures) the process ends with respect to that agency. But if the agency wishes to make a selection from the shared certificate (after first considering its own employees), it must first provide selection priority, where applicable, to individuals eligible under the Interagency Career Transition Assistance Program (ICTAP) who applied to the original job announcement. *See* 5 CFR part 330, subpart G. The agency is not required to re-advertise the position for ICTAP eligibles because the original agency has already afforded an opportunity for ICTAP eligibles to apply and be considered. This allows the agency to use a ready-made certificate of eligibles while still adhering to the provisions of part 330, subpart G.

If there are no ICTAP eligibles, a receiving agency can make a selection from the shared certificate in accordance with veterans' preference rules and the provisions governing selections under competitive examining procedures. A receiving agency may not reassess the applicants for purposes of rating/ranking. A receiving agency may seek to pass over a preference eligible, and would follow the usual rules for doing so when filling positions under competitive examining procedures.

Authorized Appointment Types

OPM is proposing to limit use of shared certificates to delegated examining for permanent and term appointments. We are excluding temporary appointments, *i.e.*, those not to exceed one year, from these provisions because of the requirement that a receiving agency must first consider individuals from within its own workforce prior to making a selection from a shared certificate. We believe it would be inefficient to undergo this process for appointments of a very short duration.

Positions may be full-time or other than full-time (*i.e.*, part-time, seasonal, on-call, and intermittent). As noted above, the original hiring agency must complete all of its actions on the certificate before it may be shared. As also was previously observed, the original hiring agency does not have to make a selection in order for the certificate to be shared. The original agency may share the certificate with one or more agencies.

Requirement for Appointment at a "Similar Grade Level"

A receiving hiring agency may select an individual from a shared certificate only for a position of the same occupational series, grade level, and duty location as the position advertised by the original hiring agency. The Act states that the shared certificate may also be used to select for a "similar grade level" to that for which the original hiring agency issued its certificate. OPM interprets the term "similar grade level" in this context to mean a corresponding rate or level of pay under an alternative pay system for a position excluded from the General Schedule. We do not interpret the term "similar grade level" to mean a higher or lower General Schedule grade than that for which the original hiring agency issued its certificate. It would not be efficient for an agency to use a certificate for higher-graded positions to select for lower-graded positions, and it would violate competitive principles to use a certificate for lower-graded positions to select for higher-graded positions (as different applicants would have competed if they had been aware that the vacancy could be filled at a higher level than advertised). For the same reasons OPM is not permitting the use of shared certificates to fill vacancies for positions with higher full performance levels.

Qualification Requirements

A receiving agency must verify through its job analysis that the

minimum qualification requirements (including use of any selective placement factors) and competencies—or knowledge, skills, and abilities (KSAs)—assessed for the original position are appropriate for the position to be filled. This verification is necessary to establish the job-relatedness and relevance of the assessment method used, consistent with 5 CFR part 300, subpart A.

Time Limit for Applicant Selection

A receiving agency may make its selection from a shared certificate within the 240-day period beginning on the date the original hiring agency issued the certificate of eligibles (not on the date on which the original hiring agency provided the certificate to the receiving agency).

Public Notice by the Original Hiring Agency

The original hiring agency must provide public notice via a job opportunity announcement posted on www.USAJOB.gov for the position being filled, in accordance with public notice requirements for filling jobs under the competitive examining process. The original announcement must indicate that the resulting list of eligible candidates may be shared with one or more other hiring agencies. Therefore, we are amending 5 CFR part 330 to require that if an agency is sharing a certificate of eligibles under part 332, the original hiring agency must provide notice in the job opportunity announcement that the resulting list of eligible candidates may be used by one or more other hiring agencies. The original hiring agency must provide an opportunity for applicants to "opt-in" to have their applications and other personal information shared with one or more other hiring agencies under these provisions. This allows the applicant to furnish advance written consent for disclosure of the information under the Privacy Act. *See* 5 U.S.C. 552a(b).

The original hiring agency may not share a certificate containing the name and personal information of an applicant unless that applicant has chosen to "opt-in" for these purposes. If an applicant chooses not to "opt-in," his/her application materials will not be shared and the applicant will receive no further consideration when a certificate of eligibles is shared with one or more hiring agencies. His or her name will be redacted on the shared certificate.

The Receiving Agency's Notice to Internal Applicants

Before making a selection from a shared certificate, a receiving agency

must notify its employees of the opportunity to apply and be considered before a selection can be made from the shared certificate and of a period of up to 10 days to apply consistent with the provisions of part 335. If the agency has RPL eligibles or CTAP eligibles, the notice must provide information about their priority.

The Receiving Agency's Notice to Shared Certificate Applicants

Before using a shared certificate, a receiving agency must notify the list of candidates of its receipt of their names and application materials and its intention of considering them for a position. A receiving agency must also inform these individuals of its obligation to consider applicants from within its own workforce who apply during the required internal application period and any other individuals the agency is required to consider (*e.g.*, individuals eligible for consideration under the CTAP or from the RPL). The notification must include the agency, position title, series, grade level (or equivalent), and duty location.

The Receiving Agency's Selection Process

Before using a shared certificate, a receiving agency must consider its own employees for the position that the original hiring agency advertised. The receiving agency must consider individuals covered under the agency's RPL or CTAP where applicable. At this point, a receiving agency either makes a selection from among its own employees under merit promotion procedures, or it may consider applicants from the certificate of eligibles shared by the original hiring agency.

If, after considering its own employees, a receiving agency wishes to make a selection from the shared certificate, it must first provide selection priority to any external applicants who applied to the original job announcement who are ICTAP eligible. If there are no ICTAP eligibles who met the well-qualified definition, a receiving agency can make a selection from the shared certificate in accordance with veterans' preference rules and the provisions governing selections under competitive examining procedures. Upon completion of the process, a receiving agency must audit the certificate.

Objections/Pass Overs

Objections to a non-preference eligible applicant and requests to pass over an individual entitled to veterans' preference must be adjudicated on a

case-by-case basis. Each case must be reviewed on its own merits. Therefore, adjudications by the original hiring agency (or the Office of Personnel Management in the case of a 30 percent or more disabled veteran) sustaining objections or granting requests to pass over do not extend to the receiving agency if a certificate is shared. A receiving agency may object to an applicant or request to pass over an individual entitled to veterans' preference on a shared certificate in accordance with the procedures outlined in the DEOH and the provisions of part 332.

Likewise, if using numerical rating, the consideration of an applicant by the original hiring agency does not count as a consideration of the applicant by a receiving agency for purposes of the three-consideration rule, 5 CFR 332.405. The three-consideration rule does not apply when using category rating.

Documentation

When sharing a certificate of eligibles, the original hiring agency must share all documentation pertaining to the creation of that certificate, including but not limited to the job analysis, testing and examination materials, the job opportunity announcement, and applications, as relevant. The original agency must safeguard any personally identifiable information not needed for effective use of the certificate by the receiving agency.

The original hiring agency and any receiving agency using a shared certificate must each maintain case file documentation for that agency's selection or selections sufficient for each agency that used the certificate to make a selection to reconstruct its own hiring actions later, if necessary. Each time a certificate is shared, each receiving agency is responsible for creating a new instance of a case file to document its use.

In the event that the original agency determines that an error was made on the original certificate, the original agency must notify all receiving agencies of the details of the error. The original hiring agency must make available, to any receiving agency that needs it, all relevant case file documents concerning the selection or selections made by the original agency, as necessary, to make full reconstruction possible. Each receiving agency would be responsible for taking appropriate action to address any erroneous actions that it took due to the error by the original agency.

Each agency is responsible for the proper selection, audit, recordkeeping, etc., of delegated examining activities.

All actions taken on competitive certificates must be documented in accordance with the DEOH and all applicable regulations.

Request for Comments

OPM welcomes recommendations on rule changes to improve the administration of the Competitive Service Act of 2015 and on implementation guidance.

Technical Amendment

OPM is also amending § 337.304 to reflect the Act's renumbering of 5 U.S.C. 3319.

Waiver of Notice of Proposed Rulemaking

Section 2(d) of Public Law 114–137, the Competitive Service Act of 2015, directs the rulemaking procedure to be followed for this rule. It states that “the Director of the Office of Personnel Management shall issue an interim final rule with comment to carry out the amendments made by this section.” Therefore the general notice of proposed rulemaking typically required for rulemaking under 5 U.S.C. 553(b) is statutorily waived for this rule.

E.O. 13563 and E.O. 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Order 12866.

Regulatory Flexibility Act

I certify that this regulation would not have a significant economic impact on a substantial number of small entities because it affects only Federal employees.

E.O. 13132, Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

E.O. 12988, Civil Justice Reform

This regulation meets the applicable standard set forth in section 3(a) and (b)(2) of Executive Order 12988.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local or tribal governments of more than \$100 million

annually. Thus, no written assessment of unfunded mandates is required.

Congressional Review Act

This action pertains to agency management, personnel and organization and does not substantially affect the rights or obligations of non-agency parties and, accordingly, is not a “rule” as that term is used by the Congressional Review Act (Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA)). Therefore, the reporting requirement of 5 U.S.C. 801 does not apply.

Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35)

This final regulatory action will not impose any additional reporting or recordkeeping requirements under the Paperwork Reduction Act.

List of Subjects

5 CFR Part 330

Armed forces reserves, District of Columbia, Government employees.

5 CFR Part 332

Government employees.

5 CFR Part 337

Government employees.

U.S. Office of Personnel Management.

Beth F. Cobert,

Acting Director.

Accordingly, OPM is amending parts 330, 332, and 337 of title 5, Code of Federal Regulations, as follows:

PART 330—RECRUITMENT, SELECTION, AND PLACEMENT (GENERAL)

■ 1. The authority citation for part 330 is revised to read as follows:

Authority: 5 U.S.C. 1104, 1302, 3301, 3302, 3304, and 3330; E.O. 10577, 3 CFR, 1954–58 Comp., p. 218; Section 330.103 also issued under 5 U.S.C. 3327; Section 330.104 also issued under sec. 2(d), Pub. L. 114–137, 130 Stat. 310; Subpart B also issued under 5 U.S.C. 3315 and 8151; Section 330.401 also issued under 5 U.S.C. 3310; Subparts F and G also issued under Presidential Memorandum on Career Transition Assistance for Federal Employees, September 12, 1995; Subpart G also issued under 5 U.S.C. 8337(h) and 8456(b).

■ 2. Add § 330.104(c) to read as follows:

§ 330.104 Requirements for vacancy announcements.

* * * * *

(c) If an agency is sharing a certificate of eligibles under part 332 of this chapter, the original hiring agency must provide notice in the job opportunity

announcement that the resulting list of eligible candidates may be used by one or more hiring agencies, and of how the applicant may opt-in to the disclosure of his or her applicant records to other hiring agencies.

PART 332—RECRUITMENT AND SELECTION THROUGH COMPETITIVE EXAMINATION

■ 3. The authority citation for part 332 is revised to read as follows:

Authority: 5 U.S.C. 1103, 1104, 1302, 2108, 3301, 3302, 3304, 3312, 3317, 3318, 3319; sec. 2(d), Pub. L. 114–137, 130 Stat. 310; E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218.

■ 4. Add § 332.408 to read as follows:

§ 332.408 Shared use of a competitive certificate.

(a) *General authority.* (1) A hiring agency may share a competitive service certificate issued under its delegated examining authority with one or more hiring agencies for a position(s) to be filled on a permanent or term basis. Positions filled on a term basis are subject to the provisions of 5 CFR part 316, subpart C. Positions may be full-time or other than full-time (*i.e.*, part-time, seasonal, on-call, and intermittent).

(2) Another Federal agency may make a selection from a certificate shared with it under paragraph (b) of this section only after it has considered individuals it is required to consider when filling positions from within its own workforce and other internal applicants under paragraph (c) of this section.

(3) All actions taken on a shared certificate must be made within the 240-day period beginning on the date the original hiring agency issued the certificate of eligibles. This period cannot be extended.

(4) The original hiring agency and any receiving agency using a shared certificate must each maintain case file documentation sufficient for each agency to reconstruct its own use of the certificate in accordance with the *Delegated Examining Operations Handbook*, and must safeguard testing and examination materials, examination results, and the names of applicants from disclosure to other persons in accordance with § 300.201 of this chapter.

(5) All actions taken on competitive certificates must be done in accordance with the *Delegated Examining Operations Handbook* and all applicable regulations in this part and part 337 of this chapter.

(6) Agencies sharing certificates must keep records of the instances of sharing

certificates and/or using shared certificates.

(b) *Requirements for the original hiring agency.* (1) A hiring agency may share a competitive certificate it has issued under § 332.402 (for traditional rating and ranking) or under 5 CFR 337.303 (for category rating) with one or more hiring agencies for use in filling a position(s) if:

(i) The original hiring agency intends to use the certificate for its own hiring;

(ii) The original hiring agency has provided notice within the job opportunity announcement for the original vacancy that the resulting list of eligible candidates may be used by one or more hiring agencies;

(iii) The original hiring agency has provided an opportunity for applicants to opt-in to have their applications and other personal information shared with one or more hiring agencies;

(iv) The original hiring agency's objections to eligibles or requests to pass over preference eligibles on the certificate under § 332.406 or § 337.304 of this chapter have been resolved by that agency's Delegated Examining Unit;

(v) The original hiring agency has either made a selection from the certificate or has made no selection from the certificate, and has documented its reason for non-selection; and

(vi) The Delegated Examining Unit of the original hiring agency has closed and audited the certificate in accordance with the procedures in the *Delegated Examining Operations Handbook*.

(2) When sharing a certificate of eligibles, the original hiring agency must share all documentation pertaining to the creation of that certificate, including but not limited to the job analysis, testing and examination materials, the job opportunity announcement, and applications, as relevant, and must safeguard any personally identifiable information not needed for effective use of the certificate by the receiving agency. The original hiring agency must share the certificate of eligibles in its original form in order to retain the original ordering of the certificate; must safeguard any personally identifiable information from unauthorized access during the transmission process; and must redact the names of applicants who did not opt-in to the shared certificate, and who therefore may not be considered by the receiving agency.

(3) The original hiring agency may share a certificate of eligibles with one or more agencies.

(4) If the original hiring agency determines that it has made an error that may affect selections by a receiving

agency or agencies, it must notify each affected receiving agency.

(c) *Requirements for the receiving agency*—(1) *Vacancies that may be filled*. A receiving agency may use a shared certificate to fill a vacancy in the same occupational series, at the same grade level (or a corresponding rate or level of pay for a position excluded from the General Schedule), with the same full performance level, and in the same duty location as was listed on the original hiring agency's certificate. If the original hiring agency's certificate is for an interdisciplinary position as described in the *Delegated Examining Operations Handbook*, the receiving agency may use it to fill an interdisciplinary position. The receiving agency must verify through its job analysis that the minimum qualification requirements (including use of any selective placement factors) and the competencies, or knowledge, skills, and abilities, that were used for the original position are appropriate for the position to be filled.

(2) *Notification to individuals who applied to the original vacancy*. Before using a shared certificate, a receiving agency must notify the list of candidates of its receipt of their names and application materials and its intention of considering them for a position. The receiving agency must also inform these individuals of its requirement to consider its own employees as well as other individuals the agency is required to consider before consideration of anyone on the shared certificate. At a minimum, the notification must include the agency, position title, series, grade level or equivalent, and duty location.

(3) *Consideration of internal candidates*. Before making a selection from a shared certificate, a receiving agency must provide notice of its intent to fill the available position(s) to its own employees and other individuals the agency is required to consider, to provide these internal candidates the opportunity to apply consistent with the provisions of part 335 of this chapter, and to review the qualifications of the internal candidates.

(i) This notice and opportunity for internal candidates to apply is subject to applicable collective bargaining obligations (to the extent consistent with law). Nothing in this paragraph affects agencies' right to fill a position from any appropriate source under §§ 330.102 and 335.103 of this chapter.

(ii) Agencies are prohibited from providing an application period any longer than 10 days for internal candidates. This time limit cannot be waived or extended.

(iii) Before considering other candidates, a receiving agency must first provide for the consideration for selection required for individuals covered under its Career Transition Assistance Program and its Reemployment Priority List under part 330, subparts B and F, of this chapter.

(4) *Selection from the shared certificate*. After considering internal candidates, a receiving agency may consider candidates referred on the shared certificate.

(i) The receiving agency must consider candidates on a shared certificate independently of the actions of any other agency with which the certificate is simultaneously shared under paragraph (b)(3) of this section.

(ii) The receiving agency may not reassess the applicants for purposes of rating/ranking.

(iii) The receiving agency must provide selection priority to individuals eligible under the Interagency Career Transition Assistance Program under part 330, subpart G, of this chapter who applied to the original job announcement.

(5) *Time limit on selection from a shared certificate*. The receiving agency has 240 days from the date the certificate was issued (in the original hiring agency) to select individuals from the shared certificate.

(6) *Limit on further sharing by the receiving agency*. The receiving agency may not share or distribute the shared certificate to another Federal agency.

PART 337—EXAMINING SYSTEM

■ 5. The authority citation for part 337 is revised to read as follows:

Authority: 5 U.S.C. 1104(a)(2), 1302, 2302, 3301, 3302, 3304, 3319, 5364; 116 Stat. 2290, sec. 1413, Pub. L. 108–136, 117 Stat. 1392, as amended by sec. 853 of Pub. L. 110–181, 122 Stat. 3; sec. 2(d), Pub. L. 114–137, 130 Stat. 310; E.O. 10577, 19 FR 7521, 3 CFR, 1954–1958 Comp., p. 218.

■ 6. Revise § 337.304 to read as follows:

§ 337.304 Veterans' preference.

In this subpart:

(a) Veterans' preference must be applied as prescribed in 5 U.S.C. 3319(b) and (c)(7);

(b) Veterans' preference points as prescribed in § 337.101 are not applied in category rating; and

(c) Sections 3319(b) and 3319(c)(7) of title 5 U.S.C. constitute veterans' preference requirements for purposes of 5 U.S.C. 2302(b)(11)(A) and (B).

BILLING CODE 6325–39–P

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 339

RIN 3206–AL14

Medical Qualification Determinations

AGENCY: U.S. Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The U.S. Office of Personnel Management (OPM) is issuing a final rule to revise its regulations for medical qualification determinations. The revised regulations update references and language; add and modify definitions; clarify coverage and applicability; address the need for medical documentation and medical examination and/or testing for an applicant or employee whose position may or may not have medical standards and/or physical requirements; and recommend the establishment of agency medical review boards. The final rule provides agencies guidance regarding medical evaluation procedures.

DATES: This rule is effective *February 17, 2017*.

FOR FURTHER INFORMATION CONTACT: Monica Butler, by telephone at (202) 606–4209; by email at employ@opm.gov; by fax at (202) 606–0864; or by TTY at (202) 418–3134.

SUPPLEMENTARY INFORMATION: On December 27, 2007, OPM issued a proposed rule at 72 FR 73282 to revise regulations on medical qualification determinations. The public comment period on the proposed rule ended February 25, 2008. OPM received written comments from four agencies, a union, and an individual pertinent to the proposed rule. A discussion of the comments is provided under the respective subpart below.

The final rule also replaces the verb “shall” with “must” for added clarity and readability. Any provisions in this part using the verb “must” have the same meaning and effect as previous provisions in this part using “shall.” The final rule also adds four authority citations to clarify the scope of applicability: (1) 5 U.S.C. 3312 Preference eligibles; physical qualifications; waiver; (2) 5 U.S.C. 3318 Competitive service; selection from certificates; (3) 5 U.S.C. 3320 Excepted service; government of the District of Columbia; selection; and (4) 5 U.S.C. 3504 Preference eligibles; retention; physical qualifications; waiver.

Summary

Background—Summary

The summary covers the basis for OPM issuance of the final rule and outlines the revisions that have been made to its regulations for medical qualification determinations.

Subpart A

Background—Subpart A

Subpart A covers general information. The proposed subpart A added wording to clarify applicability of this regulation to excepted service positions; updated references to the Rehabilitation Act of 1973, as amended (Rehabilitation Act), and to portions of the Americans with Disabilities Act (ADA) of 1990, as amended by the ADA Amendments Act of 2008 (ADAAA), that are applicable to the Federal Government through the Rehabilitation Act; added examples to the definition in § 339.104 of “medical evaluation program”; added the definition of “medical restriction,” and separated and moved definitions of “subtle incapacitation” and “sudden incapacitation.”

In response to the comments on the proposed rule, which are discussed below, we have revised subpart A to—

(1) Retain an example regarding removal of a preference eligible in § 339.101.

(2) Replace the word “suitable” with “appropriate” in § 339.102(c) to more accurately reflect the proper administrative action that an agency may render when an individual fails to meet an established condition of employment and to avoid confusion with suitability determinations.

(3) Add language to § 339.102(c) that failure of an applicant to be examined, after a tentative job offer is extended, may result in an applicant not being considered further for the position.

(4) Add language to § 339.102(c) that failure of an applicant, who received a tentative offer of employment, to provide medical documentation requested by the agency medical review officer or related hiring agency medical or human resources personnel, following a pre-placement medical examination, may result in an applicant not being considered further for the position.

(5) Add the term “applicant” where appropriate in subpart A.

(6) Revise § 339.103 to remove the phrase “to the extent consistent with” from the section in the proposed rule on compliance with disability laws and regulations. The new language clarifies that the statutory provisions of the Rehabilitation Act and the ADA apply to actions under this section.

(7) Correct the reference to the definition of “qualified individual with a disability” in § 339.103.

(8) Clarify the definitions of “medical documentation” and “medical restriction” in § 339.104.

(9) Add the definition of “medical surveillance” in § 339.104.

(10) Clarify the definition of “physical requirement” in § 339.104.

Discussion of Comments—Subpart A

Section 339.101

One agency stated that § 339.101 of the current regulation provides an example, “removal of a preference eligible employee in the excepted service under part 752,” of a situation when medical issues arise in connection with an OPM regulation that governs a particular personnel decision. The agency stated the example did not appear in the proposed rule and recommended that it be retained because the example provides clarity. OPM agrees this example assists the reader in understanding the intent of the regulation and is retaining that example in the final § 339.101.

Section 339.102

One agency proposed adding the term “physical fitness standards or testing” to § 339.102(c). The agency rationale was that this change clarifies the applicability of this provision. OPM has decided not to accept this comment. As discussed below, OPM has decided to remove the terms “physical fitness standards” and “physical fitness testing” from the final rule at this time.

One agency proposed amending the language in proposed § 339.102(c) to delete the word “suitable” and replace it with the word “indicated.” The word “suitable” was contained in the portion of the proposed rule that read failure to meet properly established medical standards or physical requirement under this part means that the applicant or employee is not qualified for the position unless a waiver or reasonable accommodation is “suitable.” The rationale of the commenter was that the word “indicated” more accurately reflected the appropriate administrative action that an agency may render when an individual fails to meet an established condition of employment. OPM agrees with the agency that the word “suitable” could lead to confusion, especially in relation to the suitability function administered by OPM pursuant to part 731 of this title. Instead of the word “indicated,” however, OPM has revised the section with the word “appropriate.” The use of the word “appropriate” makes it clear

that a waiver or a reasonable accommodation under § 339.102(c) must meet certain conditions. OPM also revised the sentence to “reasonable accommodation or a waiver is appropriate” to track the order of the citations.

OPM included an additional clarification to § 339.102(c) by adding the phrase “which may include psychological” after “medical” to the sentence noting, when there are established medical standards and/or physical requirements for the position, the failure of an applicant to be examined may result in an applicant no longer being considered for the position. OPM receives frequent inquiries from agencies relative to proper handling of such instances. This clarification will enable Federal agencies to obtain applicants’ cooperation with examination requirements in appropriate circumstances. This additional language also informs the reader of the possible scope of an agency-offered examination as well as the consequences of refusal to report. The provision now clearly states that such failure may be a basis for the agency to determine the applicant is not qualified when there are established medical (which may include psychological) standards and/or, physical requirements for the position.

OPM included an additional clarification to § 339.102(c) that failure of an applicant to provide medical documentation requested by the hiring agency medical or human resources personnel as part of a pre-placement medical examination also may result in an applicant not being considered further for the position. OPM receives inquiries from agencies relative to proper handling of such instances, and this clarification will enable Federal agencies to obtain applicant cooperation with appropriate examination requirements and prevent delays in filling critical vacancies. In addition, after a tentative job offer, agencies may request relevant documentation to determine whether there is a medical condition that will affect safe and efficient performance of the essential duties of the position. The clarifying language in this provision informs the reader of the consequences of failure to submit requested medical documentation.

Section 339.103

One agency requested that the definition of “qualified individual with a disability” in proposed § 339.103 be corrected, noting that the section misquoted 29 CFR 1630.2(r), which relates to the definition of direct threat.

OPM agrees that the proposed rule inadvertently referenced 29 CFR 1630.2(r). OPM also notes that citing to specific regulations of other agencies within this part poses a risk of future ambiguity because the text of the cited regulations are subject to change, as has occurred with the existing provisions. The final rule has been revised to reference the definition of “qualified individual with a disability” contained within the Rehabilitation Act, as amended, and the ADA, as amended as well as their implementing regulations for the Federal sector. In interpreting the meaning of these statutes, agencies can and should refer to current regulations and guidance promulgated pursuant to these Acts, see, *e.g.*, 29 CFR part 1630, as well as case law construing these Acts, in consultation with agency counsel.

One agency recommended the term “applicants” be added along with “employees” to § 339.103. The agency noted that 29 CFR 1630.13 included references to both applicants and employees. As revised, § 339.103 no longer makes reference to either employees or applicants. OPM still agrees, however, that including applicants in the final rule was appropriate and has revised the entire rule accordingly.

One agency recommended revising the language in proposed § 339.103 to remove the phrase “to the extent consistent with” from the section in the proposed rule on compliance with disability laws and regulations. The section stated “the Equal Employment Opportunity Commission (EEOC) has issued regulations covering the equal employment provisions of the ADA in 29 CFR part 1630, which must be followed to the extent consistent with the Rehabilitation Act.” The agency stated that under the Rehabilitation Act, agencies must follow the standards applied under title 1 of the ADA and the EEOC regulations reflect the ADA’s nondiscrimination standards. OPM agrees that further clarification is needed and has amended the section to refer directly to compliance with the Rehabilitation Act, the ADA, as it applies to the Federal government, and their implementing regulations for the Federal sector. This language clarifies that the statutory, non-discrimination provisions under the Rehabilitation Act and the ADA apply to actions under this section.

One agency proposed adding three citations to the language on compliance with disability laws and regulations in § 339.103. The agency concurred with the inclusion of specific sections of the EEOC’s ADA regulations within this

OPM regulation and suggested three additional citations relevant to medical qualification determinations. Two other citations, 29 CFR 1614.203(a) and 29 CFR 1614.203(b), were enforcement regulations and outside of the scope of this regulation. OPM has declined to accept this change. Upon further consideration, OPM has decided to remove all references to specific regulations of other agencies, because, as occurred with the current regulations, the outside citations changed, making the cross-references in the OPM regulations difficult to interpret. To avoid perpetuating this sort of ambiguity, OPM has decided to refer directly to compliance with the non-discrimination provisions of the Rehabilitation Act, the ADA, including the ADA Amendments Act of 2008, and their implementing regulations for the Federal sector.

An individual proposed adding clarifying language to the definition of “qualified individual with a disability” in § 339.103. The rationale of the commenter was that there may be job demands (*e.g.*, overtime work) and conditions of employment (*e.g.*, requirement of frequent travel) that are not, of themselves, essential functions of the job. OPM did not accept this comment but has revised the definition. As noted above, the meaning of “qualified individual with a disability” comes from the Rehabilitation Act, the ADA, and their implementing regulations for the Federal sector.

One agency proposed that proposed § 339.103 be revised to include a specific reference to the definition of “direct threat” contained in the EEOC’s regulations, 29 CFR 1630.2(r). The agency did not provide a supporting rationale for this revision. OPM did not adopt this suggestion because the proposed rule only inadvertently referenced 29 CFR 1630.2(r). As noted above, the final rule references the definition of “qualified individual with a disability” contained in the Rehabilitation Act, the ADA, and their implementing regulations for the Federal sector.

Section 339.104

Medical Documentation

One agency requested that OPM insert the words “as defined below” after “other appropriate practitioner” under the definition of the term “medical documentation” to alert the reader that there is a definition of the term “practitioner” in § 339.104. OPM agrees with the commenter but changed “other appropriate practitioner” to “licensed health practitioner” for clarity and

inserted the words “as these terms are defined below” in the final rule to direct the reader to the applicable definitions.

One agency requested that the words “which have been obtained” be removed from the sentence under the definition of “medical documentation” in proposed § 339.104(2). The agency rationale was that the information may not have been initially provided by the applicant or employee, but the information may still be needed by the agency. Further, if the applicant or employee does not provide the information, the agency can request the applicant to obtain it, at his/her expense, in order to be considered for the position. The agency indicated that if the definition is not changed, and the agency requests the information because it may not have been obtained, the agency will have to pay the associated costs for attaining the information. OPM agrees that this is a legitimate concern and has accepted the proposed change and deleted the term “which have been obtained” from item (2) in the definition of “medical documentation” to remove any suggestion that the agency would be expected to incur any costs associated with obtaining medical information the agency deems necessary when the agency needs to request an applicant or employee to submit additional information in order for the agency to render an informed employment decision. By changing “and” to “and/or” in the appropriate places, OPM also clarified that any, but not necessarily all, of the clinical findings listed in item (2) may need to be provided.

One agency requested that the word “and” be changed to the word “or” between (6) and (7) in the list of items contained in the definition of “medical documentation” in proposed § 339.104 where it stated “an acceptable diagnosis must include the following information, or parts of this information identified by the agency as necessary and relevant to its employment decision.” The agency rationale was that the type and amount of medical information needed in each case may differ and the regulation does not require submission of documentation meeting all of the seven listed categories in this part. OPM has revised the section to insert the words “and, either of the following:” after the text for (5) and insert the word “or” between (6) and (7) to avoid any suggestion that all seven categories of information must be submitted. OPM made a similar change to item (2), by changing “and” to “and/or” to clarify and to be consistent with the opening statement of this item “including any of the following.”

Further, the same agency stated that the section conflicted with the Rehabilitation Act limitation on medical examinations because it effectively instructs agencies to obtain substantially more medical information than may be necessary to make an employment decision. OPM agrees that clarification was needed to eliminate any suggestion that documentation meeting all seven categories must be submitted. OPM has revised the section to insert the words “and, either of the following:” after the text for (5) and insert the word “or” between (6) and (7).

One agency proposed amending the language in the definition of “medical documentation” in § 339.104 to state “such medical documentation must include as much of the following types of information as is necessary and relevant to making the job-related decision for which the information is being requested.” The agency rationale was that section 102(d)(4) of the ADA provides that an employer shall not require a medical examination or make inquiry of an employee unless such examination or inquiry is job-related and consistent with business necessity. The agency further stated any requirement for information outside of this express statutory limitation violates the Rehabilitation Act. OPM has clarified this section by revising the opening sentence to state medical documentation must contain “necessary and relevant information to enable the agency to make an employment decision.” OPM is retaining the remainder of the language in this sentence to maintain consistency with generally accepted medical practice and principle as to what constitutes an acceptable medical diagnosis. By limiting the scope of the requested information, however, to what is “necessary and relevant” the sentence also is consistent with the intent of the ADA and Rehabilitation Act with regard to the scope of an employer’s medical inquiry.

An individual proposed modifying the definition of “medical documentation” in § 339.104 to include new language that medical documentation should include copies of actual medical office or hospital records, in addition to a written statement from a physician. The rationale provided by the commenter was that a statement by a physician, written or oral, must be supported by clinical findings obtained through a medical history, physical examination, and appropriate tests and diagnostic procedures. OPM agrees with the commenter that medical documentation includes copies of related medical office

or hospital records and has amended the section to include these additional materials. Therefore, OPM further clarified the definition by stating the medical documentation must be “dated” and contain “necessary and relevant” medical information to enable the agency to make an informed employment decision.

A union proposed clarification of the definition of “medical documentation” in § 339.104. The union stated the definition leaves agencies and supervisor’s wide berth to determine what constitutes necessary or appropriate medical documentation, particularly in regards to absences. The union further stated that medical documentation for sick leave, whether extended or not, is often left to the discretion of individual supervisors. The union requested that OPM delineate the baseline for appropriate medical documentation and identify practices that should be avoided. OPM did not accept this suggestion of delineating acceptable and unacceptable forms of documentation because medical documentation needed by an agency can vary according to the situation. The modification made to the “medical documentation” definition, as noted directly above, however, now clarifies that a dated written statement from a licensed physician or practitioner should contain necessary and relevant information to enable it to make an employment decision. This revised language provides agencies with needed discretion in obtaining necessary and relevant information while preventing overly broad requests for medical records, consistent with the Rehabilitation Act and the ADA.

OPM also will seek to issue guidance from time to time as to best practices with regard to working with healthcare providers to obtain appropriate information and materials responsive to the agency’s request for information necessary and relevant to making its employment decision.

Medical Evaluation Program

One agency proposed adding examples to the definition of “medical evaluation program” in § 339.104, such as age adjusted periodic medical examinations or anthrax testing for certain employees. OPM did not adopt this suggestion because “medical evaluation program” covers a broad category of medical examination and clinical and diagnostic testing procedures.

Medical Record

An individual proposed a definition for the term “medical record” and

requested the inclusion of this new definition in § 339.104, indicating that a physician’s written statement should be supplemented with the medical history, physical examination and related testing and diagnostic procedures. The individual stated this will aid the reviewer in assessing the validity of the diagnosis and management plan for the medical or physical condition. OPM has not incorporated this proposed definition in the final rule. As noted above, the definition for medical documentation states that an agency may request necessary and relevant information to enable it to make an employment decision. OPM believes this revised definition is appropriate to allow an agency to obtain what is needed for its decision-making process while preventing overly broad requests for medical records, consistent with the Rehabilitation Act and the ADA.

Medical Restriction

One agency noted that the definition of “medical restriction” in § 339.104 as written in the proposed rule was too narrow because it only addressed physical requirements. The agency requested that the words “physical requirements” be replaced with the words “type or duration of work or activity” in order to cover both physical and medical requirements. OPM agrees with the agency proposal and has replaced the phrase “physical requirements” with the words “type or duration of work or activity” to clarify that the definition applies broadly to a variety of activities for which the individual is limited or prevented from performing due to medical conditions and/or physical limitations.

One agency requested revising the definition of “medical restriction” in § 339.104 to eliminate the phrase “operative event” or expound upon the meaning or intent for clarification purposes. OPM agrees with the proposed agency clarification and removed the term “operative event.” OPM revised the language to state that a medical restriction is a “medical determination” that an applicant or employee is limited or prevented from performing a certain type or duration of work or activity, or motion, because of a particular medical condition or physical limitation.

An individual requested modifying the definition of “medical restriction” in § 339.104 to include language that a restriction is medically warranted if the physician can support a conclusion that there is risk-avoiding or therapeutic value associated with the restriction. The rationale of the individual was that unless there is a risk-avoiding or

therapeutic value inherent in a physician's recommendation that a patient not engage in a particular kind of activity, the physician cannot justify the recommendation as medically warranted. OPM did not adopt this specific language. The modification made to the definition of "medical restriction," as noted above, clearly defines the term without the potential confusion to a reader who may not have the medical knowledge or expertise to accurately interpret and apply the language proposed by the commenter.

Medical Standard

An individual recommended replacing the term "medical standard" with "medical qualification standard" in § 339.104 as well as the remainder of the regulations. The commenter described a "medical qualification standard" as a written description of the clinical findings associated with a health status or level of fitness below which the individual would be at an unacceptable level of potential risk for injury, harm or performance failure. OPM has not adopted the term "medical qualification standard" because its intent is covered by the existing definition. OPM has, however, revised the definition of "medical standard" for clarity. As noted in the final rule, the term "medical standard" represents the minimum medical requirements necessary for an applicant or employee to perform essential job duties as a condition of employment. By referencing the phrase "condition of employment" rather than the descriptive phrase in the proposed rule, the definition makes it clear this is an agency-established qualification standard that must be met prior to appointment and/or maintained during employment for successful performance. In addition, just inserting the term "qualifications" in the title could lead to confusion with the more general employment qualifications for Federal positions.

Medical Surveillance

One agency requested adding a new definition of "medical surveillance" to § 339.104 to clarify to the reader the distinction between medical surveillance, medical evaluation program, and medical examination and to ensure uniform application. OPM agrees that a clear understanding of the different terms is important and has incorporated a definition for "medical surveillance" into § 339.104. "Medical surveillance" is the collection and analysis of health data and trends, such as injuries or illnesses, to improve and protect the health and safety of

employees. A "medical evaluation program," however, refers to an overall program of recurring medical examinations or testing, established by written agency policy, to monitor employees whose work may subject them to significant health or safety risks due to occupational or environmental exposures.

Physical Requirement

An individual commented that the definitions of "physical requirement" and "physical fitness standard" in § 339.104 were virtually identical and suggested eliminating one of the definitions to avoid redundancy. OPM did not accept the comment but, as noted earlier, has decided to withdraw references to "physical fitness standard" and "physical fitness testing" from the regulations at this time. OPM has taken the matter of appropriate definitions of the terms "physical fitness standard" and "physical fitness testing" under further consideration. OPM did revise the definition of "physical requirement" in the final rule to provide better harmony with the underlying statute. See 5 U.S.C. 3312.

Subtle Incapacitation/Sudden Incapacitation

One agency recommended inclusion of a stand-alone definition for the term "static or well stabilized" along with the stand-alone definitions of "subtle incapacitation" and "sudden incapacitation." In the alternative, the commenter recommended retaining all three terms only as part of the definition of the term "medical documentation" in § 339.104. The commenter believed that for consistency, these terms should appear in the same manner. OPM is not including a stand-alone definition for the term "static or well stabilized" and is retaining, with some modification, the stand-alone definitions for the terms "subtle incapacitation" and "sudden incapacitation." As stated in § 339.104, the term "static or well stabilized" is offered only for the purpose of clarification within the definition of "medical documentation." In this context, the term is intended to mean a medical condition that is not likely to change as a consequence of the natural progression of the condition, specifically as a result of the normal aging process, or in response to the work environment or the work itself. In contrast, the terms "subtle incapacitation" and "sudden incapacitation" remain as stand-alone definitions because they are not limited only to clarification of the definition of "medical documentation." These terms relate to the gradual or abrupt

impairment of physical or mental function and are not only medical in nature, but also relate directly to safety, performance, and/or conduct issues that may undermine the agency's commitment to maintaining a safe working environment for all employees and others. OPM revised these terms further in the final rule to make the additional related issues clear.

Subpart B

Background—Subpart B

Subpart B governs medical standards, physical requirements, and medical evaluation programs. We proposed changing the title of subpart B to clarify application of this part to medical evaluation programs. The proposed subpart B added language to clarify application of part 339 to arbitrary disqualification; added "medical surveillance" to policies agencies may establish to safeguard employee health; provided an example of an immunization program; and changed "incumbents" to "employees" to clarify § 339.205. As explained above, OPM has withdrawn the physical fitness standards and physical fitness testing from the final regulation for further consideration. Consequently, these references have been removed from the title and other parts of this section, including § 339.203.

In response to the comments on the proposed rule which are discussed below, we have revised subpart B to—

(1) Correct an erroneous reference to subpart C of part 731 of this chapter in § 339.201.

(2) Add a requirement to § 339.202 that OPM approve medical standards established by agencies prior to implementation.

(3) Provide language to § 339.202 regarding performance and behavioral and personality characteristics.

(4) Add a requirement to § 339.202 that there must be a study validating medical standards to the specific occupation.

(5) Include language in § 339.204 on established timeframes for submission of medical documentation by an applicant or employee.

(6) Re-title § 339.204 as "Waiver of standards and requirements and medical review boards."

(7) Change the term "vaccine" to "vaccination" and clarify the language relative to vaccinations in § 339.205.

(8) Change the term "candidate" to "applicant or employee" in § 339.206.

(9) Revise the reference to "substantial harm" in § 339.206 to provide that applicants and employees may be disqualified for positions based

on medical history when the condition (or recurrence) would pose a significant risk of substantial harm.

(10) Change “reasonable probability of substantial harm” in § 339.206 to the ADA and Rehabilitation Act standard of “significant risk of substantial harm.”

Discussion of Comments—Subpart B

Section 339.201

One agency stated there was a need to reference subpart B, rather than subpart C, of 5 CFR part 731 in § 339.201. The agency rationale was that subpart C relates to suitability action procedures, rather than the criteria authority used in making suitability determinations, which are covered in subpart B. After carefully considering the comment, OPM has decided to completely remove the reference to 5 CFR part 731 from 5 CFR 339.201. OPM has previously explained in four separate **Federal Register** notices that a sustained objection to an applicant, or a sustained request to pass over an applicant, is not a suitability determination. *See* 74 FR 30459 (June 26, 2009); 73 FR 51245 (Sept. 2, 2008); 73 FR 20149 (Apr. 15, 2008); 72 FR 2203 (Jan. 18, 2007). Regardless of whether a medical disqualification of an applicant is made under 5 U.S.C. 3312 or 3318, it is not a determination under 5 CFR part 731 that the applicant is unsuitable for employment in the competitive service. In fact, there is no suitability factor in 5 CFR part 731, subpart B, addressing medical disqualification. Further, as noted in 5 CFR part 339’s authority citation, the part is issued only under rule II of E.O. 10577, as amended. It is not issued under rule V thereof, which authorizes OPM to order the removal of incumbent employees on grounds of fitness, pursuant to the President’s standard-setting authority in 5 U.S.C. 3301, 3302, and 7301, and consistent with OPM’s administrative authority in 5 U.S.C. 1103(a)(5)(A) and 1302(a). Accordingly, OPM also is amending § 339.201 to delete the text concerning directed removals of appointees based on physical or mental unfitness. OPM is retaining the reference to exclusion of applicants from examinations, which falls under OPM’s authority in 5 U.S.C. 1302(a). OPM also is adding text to clarify that the procedures applicable to a medical disqualification under 5 U.S.C. 3312 or 3318 are in 5 CFR 339.306.

Section 339.202

An individual proposed adding language to § 339.202 relative to performance and human reliability demands. The rationale of the

commenter was that the need for standards is to minimize the risk of human failure, rather than to predict successful performance. OPM agrees with the commenter’s rationale but has amended the language to more plainly note the direct relationship between performance and the requirements needed to perform the duties of the position.

One agency proposed revising § 339.202 to add language regarding the requirement for OPM approval of medical standards established by agencies prior to implementation. The agency rationale was that although the current language states an agency may establish medical standards in certain circumstances, definitive language on OPM approval would provide clarity and eliminate agency questions. OPM agrees and amended the section to state that agencies are required to obtain OPM approval of all medical standards within the competitive service prior to implementation.

One agency proposed revising § 339.202 to add the requirement that there must be a study validating medical standards to that specific occupation. The agency rationale is that this section should clearly state that a medical standard for an occupation should be supported by a job analysis. OPM agrees generally with the comment and revised this section to clarify that there must be a study(ies) or evaluation(s) establishing the medical standard is job-related to one or more occupations (recognizing some medical requirements may be similar across occupations). A validation study generally is not required where there is no evidence of adverse action; therefore OPM did not wish to impose a higher legal standard here. *See* Uniform Guidelines on Employee Selection Procedures, 29 CFR part 1607. The “job-related” standard is consistent with the non-discrimination provisions under Part 300 of this title and Title VII. OPM made a similar change to the definition of physical requirement, as discussed below.

One agency stated that the language in parenthesis in § 339.202, “(i.e., where the agency has 50 percent or more of the position(s) in a particular occupation)”, is confusing and restrictive. OPM disagrees and has not amended this language. The regulation states that an agency may establish medical standards for positions that predominate in that agency and the parenthetical gives an example of what may constitute a predominance of a particular occupation.

Section 339.203

One agency proposed revising § 339.203 to clarify the difference between “physical requirements” and “physical fitness standards.” The agency rationale was to eliminate potential confusion concerning requirements when applying § 339.204, (re-titled “Waiver of Standards and Requirements and Medical Review Boards”) to § 339.203. OPM agrees with the need to avoid confusion between these terms. Consequently, as noted above, OPM has withdrawn references to “physical fitness standards or testing” from the final rule for further consideration. This provision is revised and re-titled to “Physical requirements.”

A union proposed that in relation to the physical requirements and physical fitness standards or testing in § 339.203, OPM accept the role to carry out oversight and external validation for the positions to which agencies choose to apply a physical requirements standard. As a rationale, the union cited its experience with inconsistent use of the authority granted to agencies to establish physical requirements for individual positions without OPM approval. In addition, the union proposed that OPM further expand on procedures for the validation process. The union rationale was to provide consistency throughout the government of individuals who perform essentially the same functions, but work for different agencies. OPM has not accepted these comments. As noted, OPM has withdrawn the language related to “physical fitness standards or testing” at this time. In addition, as noted in the rule, approval by OPM remains available to agencies, but is not mandatory. Further, challenges to such policies or directives can be addressed through administrative processes or grievances or through the courts.

OPM revised this section in the final rule for the reasons noted in section 202, *supra*, to clarify that there must be a study(ies) or evaluation(s) that establishes the physical requirement(s) is job-related to one or more occupations (recognizing some physical requirements may be similar across occupations).

Section 339.204

One agency proposed adding to § 339.204, the waiver provision, examples of “sufficient evidence” and “additional information” that an applicant or employee may submit or any agency may obtain with regard to waiving a medical standard or physical requirement, to ensure uniform

application and to provide clarity. OPM has not accepted this comment because the regulatory language is clear and the standards are best elucidated by case law.

One agency proposed including language in § 339.204 to state the established timeframe an applicant or employee has to provide sufficient medical evidence or that an agency has to obtain additional information prior to rendering a final decision. The agency was concerned the existing language implied that documentation could be supplied at any time, which could tax the agency administrative workload and affect and/or indefinitely extend the timeframe for rendering an employment decision. OPM agrees with the agency concerns and has clarified the language to state that an agency may establish timeframes, in writing, for submission of initial or additional information for consideration, with allowance for reasonable extensions.

A union proposed mandating review panels at agencies. The union rationale was that these review panels will assist agencies in determining appropriate accommodation of a disability or review of medical ineligibility determinations. OPM agrees that medical review boards can assist agencies in making determinations under this section and included language permitting agencies to establish medical review boards. Consequently, OPM has re-titled § 339.204 as “Waiver of standards and requirements and medical review boards.” At this time, however, OPM believes agencies should be given discretion in determining whether and how best to use medical review boards, so the creation of such boards is not mandatory. OPM plans to confer periodically with agencies regarding their use of medical review boards. OPM also will seek to issue guidance from time to time as to best practices with regard to the composition and use of medical review boards.

Section 339.205

An individual proposed replacing the term “vaccine” with “vaccination” and clarifying that the need for a medical evaluation program “must be clearly supported by the nature of the exposures incurred in the course of the work” in § 339.205. The commenter stated only that the need for these inclusions were “self-evident.” OPM agrees the term “vaccine” should be replaced with the term “vaccination” and amended the term to reflect the act of receiving a vaccine. OPM did not include the additional language above. The existing language conveys the same meaning and the commenter provided

no supporting or convincing rationale for further change.

A union commented that although § 339.205 of the proposed rule would mandate that employees be vaccinated under certain circumstances limited to work, and although this requirement may be imposed only upon written notification, only limited guidance is provided in the regulation concerning the circumstance under which such vaccinations may be compelled. In addition, the union stated that agencies should be allowed to retroactively impose an immunization requirement on an employee only if the employee was notified of the requirement prior to acceptance of the position through the vacancy announcement or position description. OPM recognizes the need for some clarification and has amended the language to clarify that any vaccinations required by this section must be FDA-approved. OPM does not otherwise accept this comment. As noted in the rule, agencies that choose to implement one or more of the programs noted in § 339.205 must have written policies or directives. Challenges to such policies or directives can be addressed through administrative processes or grievances or through the courts.

One agency recommended that the proposed language in § 339.205 be expanded to read “this may include, but is not limited to the requirement to undergo vaccination with FDA approved vaccines (e.g., for national security reasons or in order to safely carry out an agency program.” The rationale of the agency was that the modification eliminated the possibility that an applicant or employee could challenge an agency requirement to undergo a vaccination under the contention that the FDA may have licensed the vaccination, but had not “mandated” its use.” OPM agrees with the rationale of the commenter and has amended § 339.205 to state vaccinations may include FDA-approved vaccines.

One agency requested clarification of what is meant by “mandatory vaccines” in § 339.205. Further, the agency states an example would be helpful (e.g., in the event of a pandemic flu when the position does not permit the accomplishment of work at home or in isolation). OPM has not accepted this comment. OPM has included situational examples but has not included specific vaccination examples to allow flexibility to address changes in environmental, situational, and other circumstances wherein agencies determine and document the need for certain vaccinations.

Section 339.206

An individual proposed replacing the reference to reasonable probability of substantial harm in § 339.206 with a provision that applicants and employees may be disqualified for positions only if the condition(s) at issue is disqualifying “and a recurrence would pose an unacceptable risk of injury or harm to the individual or others, or would present an unacceptable risk of human failure.” The rationale provided was that the decision in this type of situation must be based on minimum/maximum criteria, not probability criteria. The commenter also noted that if a recurrence is possible and the consequences of a recurrence are unacceptable, it does not matter how small the probability. OPM recognizes the concern of the individual and based in part on this comment and another comment described below has amended the section to read that a history of a medical condition may result in medical disqualification only if the condition is itself disqualifying, “recurrence of the condition is a reasonable medical probability, and the duties of the position are such that a recurrence of the condition would pose a significant risk to the health and safety of the applicant or employee or others that cannot be eliminated or reduced by reasonable accommodation or any other agency efforts to mitigate risk.” This revised language is clearer and consistent with the ADA, as amended, and applied through the Rehabilitation Act.

One agency recommended referring to “significant risk” of substantial harm in § 339.206 instead of “reasonable probability of substantial harm” because the latter is less exacting than the ADA and Rehabilitation Act standard of “significant risk” of substantial harm. OPM disagrees with the commenter’s view as to which term is “less exacting.” OPM does agree, however, that, in order to avoid any ambiguity, § 339.206 should be consistent with the statutory language. Therefore, as discussed above, this provision has been revised.

One agency recommended changing the term “candidate” to “applicant or employee” for clarity and consistency. OPM agrees that using the phrase “applicant or employee” is clearer and should be used consistently throughout this regulation. OPM has amended § 339.206 accordingly.

One agency recommended adding an example of a disqualifying condition to § 339.206 for clarification purposes. OPM has not accepted this comment. Medical disqualifications must be made

on a case-by-case, fact-based, individualized assessment prior to reaching a conclusion as to the applicant's or employee's qualifications for a particular position.

One agency recommended inclusion of a reference in § 339.206 to recent behavioral or mental health history as a subset for disqualification. The agency requested consideration of language that an individual's previous "mental health treatment shall not be a basis for a psychiatric examination or psychological assessment unless the individual has been hospitalized within the past seven years for a mental health related condition." The agency rationale was that this seems to be an area of potential employee medical disqualifiers that does not neatly fit into a category (*i.e.* medical standard) that applies to positions with and without medical standards and physical requirements, and where an employee may pose substantial harm to himself and others. OPM is not adopting this approach to amending § 339.206. With respect to mental health histories, mental health conditions are evaluated to determine whether they are temporary, transient, transitional or self-limiting, as opposed to mental health difficulties that are chronic and ongoing with no perceivable end in sight. While behavioral traits, personality characteristics, temperaments, attitudes and biases, may be linked to mental health problems, they in and of themselves would not normally rise to a level supporting a clinical diagnosis of a mental condition. See, *e.g.* *Diagnostic and Statistical Manual of Mental Disorders (DSM)* published by the American Psychiatric Association. Moreover, medical disqualifications based on mental health must be made on a case-by-case, fact-based, individualized assessment prior to reaching a conclusion as to the applicant's or employee's qualifications for a particular position.

Subpart C

Background—Subpart C

Subpart C governs medical examinations. The proposed subpart C incorporated minor corrections in references, spelling and punctuation; added wording to clarify examinations the agency may require and provide examples of "benefits" in § 339.304; and added wording to clarify applicability of this regulation to excepted service positions when requesting a medical disqualification or a passover of a preference eligible in § 339.306.

In response to the comments on the proposed rule which are discussed below, we have revised subpart C to—

(1) Add language to § 339.301(b) regarding return to work from medically based absence in addition to reemployment from medically based absence.

(2) Revise the language in § 339.301(b)(1) to be consistent with the ADA prohibition against employers making disability inquiries or conducting medical examinations of job applicants' prior to an offer of employment.

(3) Clarify § 339.301(b)(3) to state an agency may require an individual to report for a medical examination "whenever the agency has a reasonable belief, based on objective evidence, that there is a question about an employee's continued capacity to meet the medical standards or physical requirements of a position."

(4) Add language to § 339.301(c) relative to the Federal Employees' Compensation Act.

(5) Include language in § 339.301(e) addressing vulnerability of business operation and information systems to potential threats.

(6) Add clarifying language to § 339.301(e) relative to the licensing of physicians conducting psychiatric examinations.

(7) Add language to § 339.303(a) that an agency may establish timeframes, in writing, for submission of medical documentation, with allowances for reasonable extensions dependent on the nature of the condition and the availability of qualified physicians.

(8) Add the term "applicant" to § 339.303(a).

(9) Revise § 339.303(a) and (b) to add the requirement that an applicant or employee must furnish and authorize the release of medical documentation generated as a result of a medical examination and relevant medical documentation from his or her private physician, to authorized agency representatives.

(10) Revise § 339.303(a)(2) in relation to above to further state an employee may be subject to adverse action if he or she fails or refuses to authorize release of the above referenced medical documentation.

(11) Revise the language in § 339.303(b) to address situations where medical documentation from the applicant or employee's private physician or practitioner is contradictory to, and cannot be resolved by, documentation from the examining physician or the agency medical review officer.

(12) In § 339.304, clarify when an agency is financially responsible, versus when an applicant or employee is financially responsible, for the cost of medical examinations, testing and related documentation.

(13) Removed references to "physical fitness standards or testing" from throughout this section in light of OPM's decision, as discussed earlier, to withdraw these terms for further consideration.

Discussion of Comments—Subpart C

Section 339.301

An individual proposed adding "appropriate for the purpose of obtaining and recording baseline medical information" following the term "pre-employment medical examination" in § 339.301(a). OPM did not include this language because the section is intended only to define when a routine pre-employment examination is appropriate, which is following a tentative offer of employment and only for a position with specific medical standards, physical requirements, or covered by a medical evaluation program.

An individual proposed adding language in § 339.301(b) concerning the return to work from medically based absence. The rationale provided by the individual was that if there is reason to suspect that a medical condition has caused or contributed to the failure of an employee to perform the essential functions of the position in an acceptable manner or meet the conditions of employment, including a demand for human reliability, then a complete medical evaluation may be appropriate. OPM agrees with the concerns noted by the commenter and has amended the section to include language to make clear that this provision includes employees returning to work from medically based absences.

One agency proposed revising the language in § 339.301(b)(1) to be consistent with the ADA prohibition against employers making disability inquiries or conducting medical examinations of job applicants' prior to an offer of employment. OPM agrees that revising the language would eliminate any confusion as to when disability inquiries can be made. Consequently, OPM has accepted the proposed language and amended the section to read "subsequent to a tentative offer of employment or reemployment," rather than the previous language of "prior to appointment or selection," to be more consistent with the Rehabilitation Act and ADA prohibition of disability

inquiries or medical examinations prior to a tentative job offer.

One agency proposed revising § 339.301(b)(2) to state that regularly recurring examinations are to be limited to persons in positions affecting public safety. The agency rationale was that the language in the proposed regulation was overbroad in allowing an employer to conduct medical examinations of current employees “on a regularly recurring, periodic basis after appointment.” The agency stated that the standard that the examination be job related and consistent with business necessity applies to all employer efforts to obtain medical information from employees. Further, the agency noted that there is EEOC guidance stating that any such regularly occurring examinations should be limited to persons in positions affecting public safety. OPM did not accept this comment. As noted in the provision, this section applies to positions that have “medical standards and/or physical requirements” and must be applied in a manner consistent with disability laws. Thus, OPM intends this provision to apply to all positions that may require medical examinations due to the nature of the work and/or the vulnerability of business operation and information systems to potential threats. This includes, but is not limited to, public safety positions.

One agency proposed revising § 339.301(b)(3), which, in the proposed rule, stated that an agency may require an individual to report for a medical examination “whenever there is a direct question about an employee’s continued capacity to meet the physical or medical or physical fitness requirements of a position.” The agency proposed clarifying language to define the above medical and physical components. Another agency proposed revising § 339.301(b)(3) to replace “direct question” with “reasonable belief based on objective evidence.” The agency’s rationale was that the section intended to specify the circumstances under which an agency may require an employee to undergo a medical or psychiatric examination. The agency noted that the basic rule establishing when an employee examination may be required is that the requirement must be job related and consistent with business necessity. The agency proposed revising the language to read “whenever the agency has a reasonable belief based on objective evidence, that there is a question about an employee’s capacity to meet the physical or medical or physical fitness requirements of a position.” OPM agrees with both comments that further clarification was

appropriate and amended the section. The relevant clause now reads “whenever the agency has a reasonable belief, based on objective evidence, that there is a question about an employee’s continued capacity to meet the medical standards and/or physical requirements.” An example of where this section could be triggered includes a situation where medical opinions submitted by an applicant or employee are at variance with one another or there is insufficient medical documentation.

An individual proposed clarifying the language in § 339.301(c) to state that an agency may require an employee who has applied for or is receiving continuation of pay or compensation as a result of an injury or disease “covered under the provisions of the Federal Employee’s Compensation Act (FECA)” to report for an examination to determine medical limitations that may affect placement decisions. OPM agrees and has amended the section by inserting the specific reference to FECA in order to provide more definitive guidance. An examination under FECA is ordered for compensation purposes. An examination under 5 CFR 339 is ordered to determine medical limitation that may affect job placement decisions.

One agency proposed expanding § 339.301(d) to include the term “physical fitness standards or testing” to the existing terms “medical standards” or “physical requirements” for clarification purposes. OPM declines to adopt this comment. As noted previously, OPM has withdrawn these terms from the final rule for further consideration.

One agency proposed revising § 339.301(e)(1) to address when an agency may require an employee to undergo a medical or psychiatric examination. The agency states that the basic rule is that an examination requirement for employees must be job related and consistent with business necessity. The agency recommended revising the section to read “an agency may order a psychiatric examination (including a psychological assessment) only when it has a reasonable belief, based on objective evidence, that the employee appears unable to meet the physical or mental or physical fitness requirements of a position.” OPM did not accept inclusion of the proposed additional language. The existing provision limits a psychiatric examination or psychological assessment to circumstances where there is no physical-based reason for the employment-related difficulty or where such examination/assessment is an articulated condition of employment.

One agency proposed adding language relative to potential threats to Federal Government equipment and systems. The rationale provided by the agency was in relation to situations where an individual may not be a threat to individuals, but because of the nature of the position, could be a threat to agency equipment and systems. OPM agrees that threats to infrastructure by individuals is within the scope of these regulations, and has amended § 339.301(e) to include a reference to vulnerability of business operation and information systems to potential threats to enhance understanding of the need to safeguard agency information and security systems.

An individual proposed that § 339.301(e)(1)(i) be revised to state that an agency may order a psychiatric examination including a psychological assessment only when “the physician who has performed a current general medical examination that the agency has the authority to order under this section identifies a basis upon which a psychiatric examination is medically warranted.” The individual also requested clarifying § 339.301(e)(2) relative to the licensing of physicians conducting psychiatric examinations to state that a psychiatric examination or psychological assessment must be conducted in accordance with accepted professional standards “by a licensed physician certified in psychiatry by the American Board of Psychiatry and Neurology.” The rationale of the commenter was that, if a medical qualification standard for a position includes criteria for mental status and function, and there is a reason to suspect that a medical condition has caused or contributed to failure of the employee to perform the essential functions of the position, including a demand for human reliability, then a complete medical evaluation may be appropriate. The commenter further explained that such an evaluation would begin with a complete medical examination by, most likely, a specialist in internal medicine who would determine what additional specialty evaluations are medically warranted, including a psychiatric examination. OPM declines to adopt the comment related to § 339.301(e)(1)(i). OPM believes the existing language in this section clearly states when an agency may order a psychiatric examination or psychological assessment. OPM did modify the language in § 339.301(e)(2), and included references to clarify the licensing of physicians relative to psychiatric examinations. The language now states that the examination must be

conducted by a licensed physician “certified in psychiatry by the American Board of Psychiatry and Neurology or the American Osteopathic Board of Psychiatry and Neurology,” “or by a licensed psychologist or clinical neuropsychologist.”

One agency proposed amending § 339.301(e) to provide that an individual’s previous mental health treatment will not be a basis for a psychiatric examination or psychological assessment unless the individual has been hospitalized for a mental health related condition within the past seven years. The agency stated that there “seems to be one area of potential employee medical disqualifiers that doesn’t neatly ‘fit’ into a category . . . that applies to positions with and without medical standards and physical requirements, and where an employee may pose ‘substantial harm’ to themselves and others” OPM is not adopting this approach to amending § 339.301(e). With respect to mental health histories, mental health conditions are evaluated to determine whether they are temporary, transient, transitional or self-limiting, as opposed to mental health difficulties that are chronic and on-going with no perceivable end in sight. While behavioral traits, personality characteristics, temperaments, attitudes and biases, may be linked to mental health problems, they in and of themselves would not normally rise to a level supporting a clinical diagnosis of a mental health condition. See, e.g. *Diagnostic and Statistical Manual of Mental Disorders (DSM-5;* American Psychiatric Association, 2013).

Section 339.302

An individual recommended deleting the authority to offer examinations covered in § 339.302 and retain only the section on authority to order an examination. The commenter believed there are no circumstances under which an employer needs medical information to manage an employee’s duty or employment status unless there are already medical qualification standards in place for the position. OPM has not accepted this comment. This regulation clearly distinguishes situations wherein an agency can order or offer an examination.

Section 339.303

One agency stated that, in § 339.303(a) of the proposed rule, a refusal or failure to report for a medical examination ordered by the agency could result in the agency determining that the employee is not qualified for the position. The agency proposed adding

the term “applicant” along with “employee” to § 339.303(a) as this section also applies to applicants. OPM agrees and has amended this section on medical examination procedures to make clear the application of this rule to both applicants and employees.

One agency recommended language be added to § 339.303 that states that employees must be given a reasonable amount of time to provide medical documentation, based upon the nature of the condition and the accessibility of qualified individuals. The agency rationale is that this change would afford a level of protection to the employee and takes into consideration accessibility and availability of appropriate healthcare providers. OPM agrees with the needed clarification and has amended § 339.303(a) to state that “an agency may establish timeframes, in writing, for submission of medical documentation, with allowances for reasonable extensions.”

One agency proposed adding language to § 339.303 requiring an applicant or employee to provide medical documentation generated as a result of a medical examination. The agency questioned whether an agency could find that an applicant or employee is not qualified for the position if the individual reported for the examination, but refused to authorize release of any resulting medical documentation to the agency. The agency also recommended adding the requirement that an individual must furnish and authorize release of relevant medical documentation from his or her private physician to authorized agency representatives. OPM agrees there is a need for clarification and has amended § 339.303 to state that refusal or failure by an applicant or employee to authorize release of any results from an agency ordered or offered medical examination, or the results of any previous medical treatments or evaluations relative to the identified issue, to authorized agency representatives, including the agency physician or independent medical specialists, may be a basis for disqualification for the position by the hiring agency. In addition, the employee may be subject to adverse action. Relevant medical documentation is needed in order for agency representatives, such as the agency physician or medical review officer, to render an informed medical and/or management decision relative to the health and safety of the applicant, employee, coworkers, and the public they serve.

One agency requested clarifying § 339.303(b) to address situations where

medical documentation from the applicant or employee’s private physician or practitioner is contradictory to, and cannot be resolved by, the examining physician or the agency medical review officer. OPM agrees and has amended the section to state that in situations where medical documentation of the private physician or practitioner is contradictory and cannot be resolved by the examining physician or the agency medical review officer, the agency may, at its option, pursue a third opinion from an appropriate specialist (e.g. independent medical specialist). This enables the hiring agency to make an informed management decision relative to the medical eligibility determination of an applicant or employee.

Section 339.304

Two agencies proposed revising § 339.304 to clarify circumstances where an agency is financially responsible, versus when the applicant or employee is financially responsible, for the cost of medical examinations, testing and related documentation, noting that this issue has caused confusion in the past. OPM agrees that this can be a confusing issue for managers, applicants and employees. OPM has amended the section to clearly state when an agency is responsible, and when an applicant or employee is responsible, for payment of medical examinations, related testing, and documentation.

Section 339.305

An individual proposed revising § 339.305 relative to workers compensation issues. Specifically, the individual stated the section was confusing. The individual also stated he did not understand the purpose of the communication and information interchange with the Office of Workers Compensation (OWCP) and requested to discuss the objectives further. OPM has not accepted this comment or request. This section provides that agencies must forward to OWCP copies of medical documentation and examinations of employees who are receiving or have applied for injury compensation benefits, including continuation of pay. The results of these employee evaluations are significant to the agency and to OWCP in that this information and any related periodic updates are critical to determining medical limitations that may affect job placement decisions.

The final part 339 is published in its entirety for the convenience of the reader.

E.O. 12866, Regulatory Review

This rule has been reviewed by the Office of Management and Budget in accordance with E.O. 12866.

Regulatory Flexibility Act (5 U.S.C. 601, et seq.)

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because it affects only Federal agencies and employees.

E.O. 13132, Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local or tribal governments of more than \$100 million annually. Thus, no written assessment of unfunded mandates is required.

Paperwork Reduction Act

These proposed regulations impose no new reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1995.

List of Subjects in 5 CFR Part 339

Equal employment opportunity, Government employees, Health, Individuals with disabilities.

U.S. Office of Personnel Management.

Beth F. Colbert,

Director.

■ Accordingly, OPM is revising 5 CFR part 339 to read as follows:

PART 339—MEDICAL QUALIFICATION DETERMINATIONS

■ 1. Revise part 339 to read as follows:

Subpart A—General

Sec.

- 339.101 Coverage.
- 339.102 Purpose and effect.
- 339.103 Compliance with disability laws.
- 339.104 Definitions.

Subpart B—Medical Standards, Physical Requirements, and Medical Evaluation Programs

- 339.201 Disqualification by OPM.
- 339.202 Medical standards.
- 339.203 Physical requirements
- 339.204 Waiver of standards and requirements and medical review boards.

- 339.205 Medical evaluation programs.
- 339.206 Disqualification on the basis of medical history.

Subpart C—Medical Examinations

- 339.301 Authority to require an examination.
- 339.302 Authority to offer examinations.
- 339.303 Medical examination procedures.
- 339.304 Payment for examination.
- 339.305 Records and reports.
- 339.306 Processing medical eligibility determinations.

Authority: 5 U.S.C. 1104(a), 1302(a), 3301, 3302, 3304, 3312, 3318, 3320, 3504, 5112; 39 U.S.C. 1005, Executive Order 10577, Rule II, codified as amended in 5 CFR 2.1(a).

Subpart A—General**§ 339.101 Coverage.**

This part applies to—

- (a) Applicants for and employees in competitive service positions; and
- (b) Applicants for and employees in positions excepted from the competitive service when medical issues arise in connection with an OPM regulation that governs a particular personnel action, such as removal of a preference eligible employee in the excepted service under part 752.

§ 339.102 Purpose and effect.

(a) This part defines the circumstances under which OPM permits medical documentation to be required and examinations and/or evaluations conducted to determine the nature of a medical condition that affects safe and efficient performance.

(b) Personnel decisions based wholly or in part on the review of medical documentation, as defined below, and the results of medical examinations and evaluations must be made in accordance with appropriate sections of this part.

(c) Failure to meet medical (which may include psychological) standards and/or physical requirements established under this part means that the applicant or employee is not qualified for the position, unless reasonable accommodation or a waiver is appropriate, in accordance with §§ 339.103 and 339.204. An employee's refusal to be examined or provide medical documentation, as defined below, in accordance with a proper agency order authorized under this part, constitutes a basis for appropriate disciplinary or adverse action. After a tentative job offer of employment conditioned on completion of a medical examination, an applicant's refusal to be examined or provide medical documentation, as defined below, may result in the applicant's removal from further consideration for the position.

§ 339.103 Compliance with disability laws.

(a) The Americans with Disabilities Act (ADA) of 1990, as amended by the Amendments Act of 2008 (collectively the ADA), establishes prohibitions against discrimination and the requirements for reasonable accommodation that apply to the Federal Government through the Rehabilitation Act of 1973, as amended, 29 U.S.C. 791(f). Consequently, actions under this part must comply with the non-discrimination provisions of the Rehabilitation Act, the non-discrimination provisions of the ADA, and their implementing regulations.

(b) Use of the term “qualified” in this part must comply with the Rehabilitation Act, as amended, and the ADA, as amended. Specifically, a “qualified individual with a disability” means that the individual possess the requisite skill, experience, education, and other job-related requirements of an employment position that the individual holds or seeks, and can perform the essential functions of the position with or without reasonable accommodation.

§ 339.104 Definitions.

For purposes of this part—

Accommodation means *reasonable accommodation* as described in the ADA.

Arduous or hazardous positions means positions that are dangerous or physically demanding to such a degree that an employee's medical and/or physical condition is necessarily an important consideration in determining ability to perform safely and efficiently.

Medical condition means a health impairment which results from birth, injury or disease, including mental disorder.

Medical documentation or *documentation of a medical condition* means a copy of a dated, written and signed statement, or a dated copy of actual medical office or hospital records, from a licensed physician or other licensed health practitioner, as these terms are defined below, that contains necessary and relevant information to enable the agency to make an employment decision. To be acceptable, the diagnosis or clinical impression must be justified according to established diagnostic criteria and the conclusions and recommendations must be consistent with generally accepted professional standards. The determination that the diagnosis meets these criteria is made by or in coordination with a licensed physician or, if appropriate, a practitioner of the same discipline as the one who issued the documentation. An acceptable

diagnosis must include the information identified by the agency as necessary and relevant to its employment decision. This information may include, but is not limited to, the following:

(1) The history of the medical condition(s), including references to findings from previous examinations, treatment, and responses to treatment;

(2) Clinical findings from the most recent medical evaluation, including any of the following: Findings of physical examination; results of laboratory tests; X-rays; EKGs and/or other special evaluations or diagnostic procedures; and, in the case of psychiatric examination or psychological assessment, the findings of a mental status examination and/or the results of psychological tests, if appropriate;

(3) Diagnosis, including the current clinical status;

(4) Prognosis, including plans for future treatment and an estimate of the expected date of full or partial recovery;

(5) An explanation of the impact of the medical condition(s) on overall health and activities, including the basis for any conclusion as to whether restrictions or accommodations are necessary and, if determined to be necessary, an explanation supporting that determination; and, either of the following:

(6) An explanation of the medical basis for any conclusion that indicates the likelihood that the applicant or employee will suffer sudden incapacitation or subtle incapacitation by carrying out, with or without accommodation, the tasks or duties of a specific position; or

(7) Narrative explanation of the medical basis for any conclusion that the medical condition has or has not become static or well-stabilized and the likelihood that the applicant or employee may experience sudden incapacitation or subtle incapacitation as a result of the medical condition. In this context, “static or well-stabilized” medical condition means a medical condition which is not likely to change as a consequence of the natural progression of the condition, such as a result of the normal aging process, or in response to the work environment or the work itself.

Medical evaluation program means a program of recurring medical examinations or tests established by written agency policy or directive, to safeguard the health of employees whose work may subject them or others to significant health or safety risks due to occupational or environmental exposure or demands. For example, an agency policy or directive may include

medical clearances and medical surveillance to test for occupational exposure to biological, chemical, and/or radiological hazardous agents, occupational diseases, and occupational risk.

Medical restriction is a medical determination that an applicant or employee is limited, or prevented from performing a certain type or duration of work or activity (e.g., standing and/or ability to concentrate) or motion (e.g., bending, lifting, pulling), because of a particular medical condition or physical limitation. The purpose of a medical restriction is to try to prevent aggravation, acceleration, exacerbation, or permanent worsening of the medical condition or physical limitation.

Medical standard is a written description of the minimum medical requirements necessary for an applicant or employee to perform essential job duties as a condition of employment.

Medical surveillance is the on-going systematic collection and analysis of health data to improve and protect the health and safety of employees in the workplace, and to monitor for health trends both in individual workers and in population of workers. Medical surveillance can include the tracking of occupational injuries, illnesses, hazards, and exposures, as well as laboratory and examination-based medical data, in order to identify findings that could provide an early warning of, or indicate the risk for, an occupational disease. Medical surveillance also is part of compliance with those Federal and state regulations that require medical monitoring when employees use or are exposed to certain hazardous materials.

Physical requirement is a written description of job-related physical abilities that are essential for performance of the duties of a specific position.

Physician means a licensed Doctor of Medicine or Doctor of Osteopathy, or a physician who is serving on active duty in the uniformed services and is designated by the uniformed service to conduct examinations under this part.

Practitioner means a person providing health services who is not a medical doctor, but who is certified by a national organization, licensed by a State, and/or registered as a health professional to provide the health service in question.

Subtle incapacitation means gradual, initially imperceptible impairment of physical or mental function, whether reversible or not, which is likely to result in safety, performance and/or conduct issues that may undermine the agency’s commitment to maintaining a safe working environment for all employees and others.

Sudden incapacitation means abrupt onset of loss of control of physical or mental function(s), whether reversible or not, which is likely to result in safety, performance or conduct issues that may undermine the agency’s commitment to maintaining a safe working environment for all employees and others.

Subpart B—Medical Standards, Physical Requirements, and Medical Evaluation Programs

§ 339.201 Disqualification by OPM.

OPM must review and decide upon an agency’s request to pass over a candidate, who is a preference eligible, on medical grounds pursuant to § 339.306. OPM may deny an applicant employment by reason of physical or mental unfitness for the position for which he or she has applied. An OPM decision under this section or § 339.306 is separate and distinct from a determination of disability pursuant to statutory provisions for disability retirement under the Civil Service Retirement System and the Federal Employees’ Retirement System.

§ 339.202 Medical standards.

OPM may establish and/or approve medical standards for a Governmentwide occupation (i.e., an occupation common to more than one agency) or approve revisions to its established medical standards. An individual agency may establish medical standards for positions that predominate in that agency (i.e., where the agency has 50 percent or more of the positions in a particular occupation). Such standards must be justified on the basis that the duties of the positions are arduous or hazardous, or require a certain level of health status for successful performance when the nature of the positions involves a high degree of responsibility toward the public or sensitive national security concerns. The rationale for establishing the standard must be documented and supported by a study(ies) or evaluation(s) establishing the medical standard is job-related to the occupation(s). Medical standards established by agencies must be approved by OPM prior to implementation. Standards established by OPM or an agency must be:

(a) Established by written directive and uniformly applied, and

(b) Directly related to the actual performance and requirements necessary for the performance of the duties of the position.

§ 339.203 Physical requirements.

(a) An agency may establish physical requirements for individual positions

without OPM approval when such requirements are considered essential for performance of the duties of a specific position. Physical requirements must be clearly supported by the actual duties of the position, documented in the position description, and supported by a study(ies) or evaluation(s) establishing physical requirement(s) is job-related to the occupation(s).

(b) An applicant or employee may not be disqualified arbitrarily on the basis of physical requirements or other criteria that do not relate specifically to performance of the duties of a specific position.

§ 339.204 Waiver of standards and requirements and medical review boards.

(a) An agency must waive a medical standard or physical requirement established under this part when an applicant or employee, unable to meet that standard or requirement, presents sufficient evidence that the applicant or employee, with or without reasonable accommodation, can perform the essential duties of the position without endangering the health and safety of the applicant or employee or others. Additional information obtained by the agency may be considered in determining whether a waiver is appropriate. An agency may establish timeframes, in writing, for submission of initial or additional information for consideration, with allowance for reasonable extensions.

(b) Agencies may, but are not required to, establish medical review boards to help the agency provide a case-by-case, fact-based, individualized assessment whenever an individual is found to not meet agency medical standards or physical requirements. An agency may also use a medical review board as a forum for a higher level of review within the agency when medical questions or issues arise. If established, the Board is expected to recommend administrative actions that are consistent with applicable law, as well as applicable and current medical practice standards of care, through the combined expertise of its members.

(c) The use and composition of a medical review board will be determined by the agency. Upon request, an agency will provide to OPM information regarding the composition and use of medical review boards. OPM may issue guidance from time to time as to best practices with respect to the composition and use of such boards.

§ 339.205 Medical evaluation programs.

Agencies may establish periodic medical examinations, medical surveillance, or immunization programs

by written policies or directives to safeguard the health of employees whose work may expose them or others to significant health or safety risks due to occupational or environmental exposure or demands. This may include the requirement to undergo vaccination with products approved by the Food and Drug Administration (*e.g.*, for national security reasons or in order to fulfill the duties of a position designated as national security sensitive). The need for a medical evaluation program must be clearly supported by the nature of the work. The specific positions covered must be identified and the applicants or employees notified in writing of the reasons for including the positions in the program.

§ 339.206 Disqualification on the basis of medical history.

An employee or applicant may not be disqualified for any position solely on the basis of medical history. For positions subject to medical standards and/or physical requirements, and for positions under medical evaluation programs, a history of a particular medical condition may result in medical disqualification only if the condition at issue is itself disqualifying, recurrence of the condition is based on reasonable medical judgment, and the duties of the position are such that a recurrence of the condition would pose a significant risk of substantial harm to the health and safety of the applicant or employee or others that cannot be eliminated or reduced by reasonable accommodation or any other agency efforts to mitigate risk.

Subpart C—Medical Examinations

§ 339.301 Authority to require an examination.

(a) A routine pre-employment medical examination is appropriate only for a position with specific medical standards and/or physical requirements, or that is covered by a medical evaluation program established under this part.

(b) Subject to § 339.103, an agency may require an applicant or employee who has applied for or occupies a position that has medical standards and/or physical requirements, or is covered by a medical evaluation program established under this part, to report for a medical examination:

(1) Subsequent to a tentative offer of employment or reemployment (including return to work from medically based absence on the basis of a medical condition);

(2) On a regularly recurring, periodic basis after appointment in accordance with § 339.205; or

(3) Whenever the agency has a reasonable belief, based on objective evidence, that there is a question about an employee's continued capacity to meet the medical standards or physical requirements of a position.

(c) An agency may require an employee who has applied for or is receiving continuation of pay or compensation as a result of an injury or disease covered under the provisions of the Federal Employees' Compensation Act to report for an examination to determine medical limitations that may affect job placement decisions.

(d) An agency may require an employee who is released from his or her competitive level in a reduction in force under part 351 of this chapter to undergo a relevant medical evaluation if the position to which the employee has assignment rights has medical standards and/or physical requirements, that are different from those required in the employee's current position.

(e)(1) An agency may order a psychiatric examination (including a psychological assessment) only when:

(i) The result of a current general medical examination that the agency has the authority to order under this section indicates no physical explanation for behavior or actions that may affect the safe and efficient performance of the applicant or employee, the safety of others, and/or the vulnerability of business operation and information systems to potential threats, or

(ii) A psychiatric examination or psychological assessment is part of the medical standards for a position having medical standards or required under a medical evaluation program established under this part.

(2) A psychiatric examination or psychological assessment authorized under paragraphs (e)(1) of this section must be conducted in accordance with accepted professional standards by a licensed physician certified in psychiatry by the American Board of Psychiatry and Neurology or the American Osteopathic Board of Psychiatry and Neurology, or by a licensed psychologist or clinical neuropsychologist, and may only be used to make inquiry into a person's mental fitness as it directly relates to successfully performing the duties of the position without significant risk to the applicant or employee or others, and/or to the vulnerability of business operation and information systems to potential threats.

§ 339.302 Authority to offer examinations.

An agency may, at its option, offer a medical examination (including a

psychiatric examination or psychological assessment) in situations where the agency needs additional medical documentation to make an informed management decision. This may include situations where an employee requests, for medical reasons, a change in duty status, assignment, working conditions, or any other different treatment (including reasonable accommodation or return to work on the basis of full or partial recovery from a medical condition) or where the employee has a performance or conduct problem that may require agency action. Reasons for offering an examination must be documented. When an offer of an examination has been made by an agency and the offer has been accepted by the applicant or employee, the examination must be carried out in accordance with the authorities cited in § 339.103. The results of the examination must also be used in accordance with the authorities cited in § 339.103.

§ 339.303 Medical examination procedures.

(a) When an agency requires or offers a medical or psychiatric examination or psychological assessment under this subpart, it must inform the applicant or employee in writing of its reasons for doing so, the consequences of failure to cooperate, and the right to submit medical information from his or her private physician or practitioner. A single written notification is sufficient to cover a series of regularly recurring or periodic examinations ordered under this subpart. An agency may establish timeframes, in writing, for submission of medical documentation, with allowances for reasonable extensions.

(1) Refusal or failure to report for a medical examination ordered by the agency may be a basis for a determination that the applicant or employee is not qualified for the position. In addition, an employee may be subject to adverse action.

(2) Refusal or failure on the part of an applicant or the employee to authorize release of any results from an agency ordered or offered medical examination issued in accordance with §§ 339.301 or 339.302, or the results of any previous medical treatments or evaluations relative to the identified medical issue, to authorized agency representatives, including the agency physician or medical review officer and/or independent medical specialists, may be a basis for disqualification for the position by the hiring agency. In addition, an employee may be subject to adverse action.

(b) The agency designates the examining physician or other appropriate practitioner, but must offer the applicant or employee an opportunity to submit medical documentation from his or her private physician or practitioner for consideration in the medical examination process. The agency must review and consider all such documentation supplied by the private physician or practitioner. The applicant or employee must authorize release of this documentation to all authorized agency representatives. In situations where the medical documentation of the applicant or employee's private physician or practitioner is contradictory and cannot be resolved by the examining physician or the agency physician or medical review officer, the agency may, at its option, pursue another opinion from an appropriate specialist at agency expense. An applicant or employee also may, at his or her option, pursue another opinion from an appropriate specialist at his or her expense in the event of conflicting or contradictory medical documentation.

§ 339.304 Payment for examination.

(a) An agency must pay for all medical and/or psychological and/or psychiatric examinations required or offered by the agency under this subpart, whether conducted by the agency's physician or medical review officer, an independent medical evaluation specialist (e.g., occupational audiologist) identified by the agency, or a licensed physician or practitioner chosen by the applicant or employee. This includes special evaluations or diagnostic procedures required by an agency.

(b) Following conclusion of the initial medical, psychological, and/or psychiatric examination, the agency physician or medical review officer will render a final medical determination. In certain final medical ineligibility determinations, the agency physician or medical review officer may reference supplemental medical examination, testing or documentation, which the applicant or employee may submit to the agency for consideration and further review relative to potential medical eligibility. Under these circumstances, the applicant or employee is responsible for payment of this further examination, testing and documentation.

(c) An applicant or employee must pay to obtain all relevant medical documentation from his or her private licensed physician or required practitioners in instances where no medical examination is required or

offered by the agency, but where the agency requests the applicant or employee to provide medical documentation relative to an identified medical or physical condition in question or where the agency needs medical documentation to render an informed management decision.

(d) An applicant or employee must pay for a medical examination conducted by his or her private licensed physician or practitioner where the purpose of the examination is to secure a change sought by an applicant (e.g., new employment) or by an employee (e.g., a request for change in duty status, reasonable accommodation, and/or job modification).

§ 339.305 Records and reports.

(a) Agencies will receive and maintain all medical documentation and records of examinations obtained under this part in accordance with part 293, subpart E, of this chapter.

(b) The report of an examination conducted under this subpart must be made available to the applicant or employee under the provisions of part 297 of this chapter.

(c) Agencies must forward to the Office of Workers' Compensation Programs (OWCP), Employment Standards Administration, Department of Labor, a copy of all medical documentation and reports of examinations of employees who are receiving or have applied for injury compensation benefits under 5 U.S.C. chapter 81, including continuation of pay. The agency must also report to OWCP the failure of such employees to report for examinations that the agency orders under this subpart. When the employee has applied for disability retirement, this information and any medical documentation or reports of examination must be forwarded to OPM.

§ 339.306 Processing medical eligibility determinations.

(a) In accordance with the provisions of this part, agencies are authorized to medically disqualify a nonpreference eligible. A nonpreference eligible so disqualified has a right to a higher level review of the determination within the agency.

(b) OPM must approve the sufficiency of the agency's reasons to:

(1) Medically disqualify or pass over a preference eligible in order to select a nonpreference eligible for:

(i) A competitive service position under part 332 of this chapter; or

(ii) An excepted service position in the executive branch subject to title 5, U.S. Code;

(2) Medically disqualify or pass over a 30 percent or more compensably

disabled veteran for a position in the U.S. Postal Service in favor of a nonpreference eligible;

(3) Medically disqualify a 30 percent or more compensably disabled veteran for assignment to another position in a reduction in force under § 351.702(d) of this chapter; or

(4) Medically disqualify a 30 percent or more disabled veteran for noncompetitive appointment, for example, under § 316.302(b)(4) of this chapter.

Community Reinvestment Act Regulations

AGENCY: Office of the Comptroller of the Currency, Treasury (OCC); Board of Governors of the Federal Reserve System (Board); and Federal Deposit Insurance Corporation (FDIC).

ACTION: Joint final rule; technical amendment.

SUMMARY: The OCC, the Board, and the FDIC (collectively, the Agencies) are amending their Community Reinvestment Act (CRA) regulations to adjust the asset-size thresholds used to define “small bank” or “small savings association” and “intermediate small bank” or “intermediate small savings association.” As required by the CRA regulations, the adjustment to the threshold amount is based on the annual percentage change in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). The FDIC is also amending its CRA Notice requirements to reflect two technical changes concerning the

manner in which the agency will receive public comments considered in the CRA examination process.

DATES: Effective January 18, 2017.

FOR FURTHER INFORMATION CONTACT:

OCC: Emily Boyes, Attorney, Community and Consumer Law Division, (202) 649-6350; Marta E. Stewart-Bates, Attorney, Legislative and Regulatory Activities Division, (202) 649-5490; for persons who are deaf or hard of hearing, TTY, (202) 649-5597; or Bobbie K. Kennedy, Bank Examiner, Compliance Policy Division, (202) 649-5470, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

Board: Amal S. Patel, Senior Supervisory Consumer Financial Services Analyst, (202) 912-7879; or Nikita Pastor, Senior Counsel, (202) 452-3667, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW., Washington, DC 20551.

FDIC: Patience R. Singleton, Senior Policy Analyst, Supervisory Policy Branch, Division of Depositor and Consumer Protection, (202) 898-6859; or Richard M. Schwartz, Counsel, Legal Division, (202) 898-7424, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Background and Description of the Joint Final Rule

The Agencies' CRA regulations establish CRA performance standards for small and intermediate small banks and savings associations. The CRA regulations define small and intermediate small banks and savings associations by reference to asset-size criteria expressed in dollar amounts, and they further require the Agencies to publish annual adjustments to these dollar figures based on the year-to-year change in the average of the CPI-W, not seasonally adjusted, for each 12-month period ending in November, with rounding to the nearest million. 12 CFR 25.12(u)(2), 195.12(u)(2), 228.12(u)(2), and 345.12(u)(2). This adjustment formula was first adopted for CRA purposes by the OCC, the Board, and the FDIC on August 2, 2005, effective September 1, 2005. 70 FR 44256 (Aug. 2, 2005). The Agencies noted that the CPI-W is also used in connection with other federal laws, such as the Home Mortgage Disclosure Act. *See* 12 U.S.C. 2808; 12 CFR 1003.2. On March 22, 2007, and effective July 1, 2007, the former Office of Thrift Supervision, the agency then responsible for regulating savings associations, adopted an annual

adjustment formula consistent with that of the other federal banking agencies in its CRA rule previously set forth at 12 CFR 563e. 72 FR 13429 (Mar. 22, 2007).

Pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act),¹ effective July 21, 2011, CRA rulemaking authority for federal and state savings associations was transferred from the OTS to the OCC, and the OCC subsequently republished, at 12 CFR 195, the CRA regulations applicable to those institutions.² In addition, the Dodd-Frank Act transferred responsibility for supervision of savings and loan holding companies and their non-depository subsidiaries from the OTS to the Board, and the Board subsequently amended its CRA regulation to reflect this transfer of supervisory authority.³

The threshold for small banks and small savings associations was revised most recently in December 2015 and became effective January 1, 2016. 80 FR 81162 (Dec. 29, 2015). The current CRA regulations provide that banks and savings associations that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.216 billion are small banks or small savings associations. Small banks and small savings associations with assets of at least \$304 million as of December 31 of both of the prior two calendar years and less than \$1.216 billion as of December 31 of either of the prior two calendar years are intermediate small banks or intermediate small savings associations. 12 CFR 25.12(u)(1), 195.12(u)(1), 228.12(u)(1), and 345.12(u)(1). This joint final rule revises these thresholds.

During the 12-month period ending November 2016, the CPI-W increased by 0.84 percent. As a result, the Agencies are revising 12 CFR 25.12(u)(1), 195.12(u)(1), 228.12(u)(1), and 345.12(u)(1) to make this annual adjustment. Beginning January 18, 2017, banks and savings associations that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.226 billion are small banks or small savings associations. Small banks and small savings associations with assets of at least \$307 million as of December 31 of both of the prior two calendar years and less than \$1.226 billion as of December 31 of either of the prior two calendar years are intermediate small banks or intermediate small savings associations. The Agencies also publish

¹ Public Law 111-203, 124 Stat. 1376 (2010).

² *See* OCC interim final rule, 76 FR 48950 (Aug. 9, 2011).

³ *See* Board interim final rule, 76 FR 56508 (Sept. 13, 2011).

current and historical asset-size thresholds on the Web site of the Federal Financial Institutions Examination Council at <http://www.ffiec.gov/cra/>.

The FDIC is also amending its CRA Notice requirements located at Appendix B to Part 345. The current appendix states that Regional Managers are the proper agency officials responsible for both making available, upon request, lists of the banks scheduled for CRA examination in any particular quarter and receiving any public comment regarding the CRA performance of any of those banks. Since that language was published, a technical change was made to the responsible official's title from Regional Manager to Regional Director. In addition, since the original notice requirements were written, there has been the creation of a Web page to receive public comments electronically. The amendments made in this notice reflect those two changes. The associated changes to the CRA notice requirements will compel covered institutions to print and post the revised CRA notices in their main and branch offices.

Administrative Procedure Act and Effective Date

Under 5 U.S.C. 553(b)(B) of the Administrative Procedure Act (APA), an agency may, for good cause, find (and incorporate the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

The amendments to the regulations to adjust the asset-size thresholds for small and intermediate small banks and savings associations result from the application of a formula established by a provision in the respective CRA regulations that the Agencies previously published for comment. *See* 70 FR 12148 (Mar. 11, 2005), 70 FR 44256 (Aug. 2, 2005), 71 FR 67826 (Nov. 24, 2006), and 72 FR 13429 (Mar. 22, 2007). As a result, §§ 25.12(u)(1), 195.12(u)(1), 228.12(u)(1), and 345.12(u)(1) of the Agencies' respective CRA regulations are amended by adjusting the asset-size thresholds as provided for in §§ 25.12(u)(2), 195.12(u)(2), 228.12(u)(2), and 345.12(u)(2).

Accordingly, the Agencies' rules provide no discretion as to the computation or timing of the revisions to the asset-size criteria. Furthermore, revising the FDIC's CRA Notice requirements to reflect the two referenced changes to the manner in which the agency will receive public

comments considered in the CRA examination process is a technical and non-substantive revision. For these reasons, the Agencies have determined that publishing a notice of proposed rulemaking and providing opportunity for public comment are unnecessary.

The effective date of this joint final rule is January 18, 2017. Under 5 U.S.C. 553(d)(3) of the APA, the required publication or service of a substantive rule shall be made not less than 30 days before its effective date, except, among other things, as provided by the agency for good cause found and published with the rule. Because this rule adjusts asset-size thresholds consistent with the procedural requirements of the CRA rules, the Agencies conclude that it is not substantive within the meaning of the APA's delayed effective date provision. Moreover, the Agencies find that there is good cause for dispensing with the delayed effective date requirement, even if it applied, because their current rules already provide notice that the small and intermediate small asset-size thresholds will be adjusted as of December 31 based on 12-month data as of the end of November each year.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking when a general notice of proposed rulemaking is not required. 5 U.S.C. 603 and 604. As noted previously, the Agencies have determined that it is unnecessary to publish a general notice of proposed rulemaking for this joint final rule. Accordingly, the RFA's requirements relating to an initial and final regulatory flexibility analysis do not apply.

Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) states that no agency may conduct or sponsor, nor is the respondent required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The Agencies have determined that this final rule does not create any new, or revise any existing, collections of information pursuant to the Paperwork Reduction Act. Consequently, no information collection request will be submitted to the OMB for review.

Unfunded Mandates Reform Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995 (Unfunded Mandates Act), 2 U.S.C. 1532, requires the OCC to prepare a budgetary impact statement before

promulgating any final rule for which a general notice of proposed rulemaking was published. As discussed above, the OCC has determined that the publication of a general notice of proposed rulemaking is unnecessary. Accordingly, this joint final rule is not subject to section 202 of the Unfunded Mandates Act.

List of Subjects

12 CFR Part 25

Community development, Credit, Investments, National banks, Reporting and recordkeeping requirements.

12 CFR Part 195

Community development, Credit, Investments, Reporting and recordkeeping requirements, Savings associations.

Department of the Treasury

Office of the Comptroller of the Currency

12 CFR Chapter I

For the reasons discussed in the preamble, the Office of Comptroller of the Currency amends 12 CFR parts 25 and 195, the Board of Governors of the Federal Reserve System amends part 228 of chapter II, and Board of Directors of the Federal Deposit Insurance Corporation amends part 345 of chapter III of title 12 of the Code of Federal Regulations as follows:

PART 25—COMMUNITY REINVESTMENT ACT AND INTERSTATE DEPOSIT PRODUCTION REGULATIONS

■ 1. The authority citation for part 25 continues to read as follows:

Authority: 12 U.S.C. 21, 22, 26, 27, 30, 36, 93a, 161, 215, 215a, 481, 1814, 1816, 1828(c), 1835a, 2901 through 2908, and 3101 through 3111.

■ 2. Section 25.12 is amended by revising paragraph (u)(1) to read as follows:

§ 25.12 Definitions.

* * * * *

(u) * * *

(1) *Definition. Small bank* means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.226 billion. *Intermediate small bank* means a small bank with assets of at least \$307 million as of December 31 of both of the prior two calendar years and less than \$1.226 billion as of December 31 of either of the prior two calendar years.

PART 195—COMMUNITY REINVESTMENT

■ 3. The authority citation for part 195 continues to read as follows:

Authority: 12 U.S.C. 1462a, 1463, 1464, 1814, 1816, 1828(c), 2901 through 2908, and 5412(b)(2)(B).

■ 4. Section 195.12 is amended by revising paragraph (u)(1) to read as follows:

§ 195.12 Definitions.

* * * * *

(u) * * *

(1) *Definition. Small savings association* means a savings association that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.226 billion. *Intermediate small savings association* means a small savings association with assets of at least \$307 million as of December 31 of both of the prior two calendar years and less than \$1.226 billion as of December 31 of either of the prior two calendar years.

* * * * *

Federal Reserve System

12 CFR Chapter II

PART 228—COMMUNITY REINVESTMENT (REGULATION BB)

■ 5. The authority citation for part 228 continues to read as follows:

Authority: 12 U.S.C. 321, 325, 1828(c), 1842, 1843, 1844, and 2901 *et seq.*

■ 6. Section 228.12 is amended by revising paragraph § 228.12(u)(1).

The revision is set forth below:

§ 228.12 Definitions.

* * * * *

(u) *Small bank*—(1) *Definition. Small bank* means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.226 billion. *Intermediate small bank* means a small bank with assets of at least \$307 million as of December 31 of both of the prior two calendar years and less than \$1.226 billion as of December 31 of either of the prior two calendar years.

Federal Deposit Insurance Corporation 12 CFR Chapter III

PART 345—COMMUNITY REINVESTMENT

■ 7. The authority citation for part 345 continues to read as follows:

Authority: 12 U.S.C. 1814–1817, 1819–1820, 1828, 1831u and 2901–2908, 3103–3104, and 3108(a).

■ 8. Section 345.12 is amended by revising paragraph (u)(1) to read as follows:

§ 345.12 Definitions.

* * * * *

(u) * * *

(1) *Definition. Small bank* means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.226 billion. *Intermediate small bank* means a small bank with assets of at least \$307 million as of December 31 of both of the prior two calendar years and less than \$1.226 billion as of December 31 of either of the prior two calendar years.

* * * * *

■ 9. Appendix B to part 345 is amended by revising the fourth and fifth paragraphs of section (a) and the fifth and sixth paragraphs of section (b) to read as follows:

Appendix B to Part 345—CRA Notice

(a) * *

Community Reinvestment Act Notice

* * * * *

At least 30 days before the beginning of each quarter, the FDIC publishes a nationwide list of the banks that are scheduled for CRA examination in that quarter. This list is available from the Regional Director, FDIC (address). You may send written comments about our performance in helping to meet community credit needs to (name and address of official at bank) and FDIC Regional Director. You may also submit comments electronically through the FDIC's Web site at www.fdic.gov/regulations/cra. Your letter, together with any response by us, will be considered by the FDIC in evaluating our CRA performance and may be made public.

You may ask to look at any comments received by the FDIC Regional Director. You may also request from the FDIC Regional Director an announcement of our applications covered by the CRA filed with the FDIC. We are an affiliate of (name of holding company), a bank holding company. You may request from the (title of responsible official), Federal Reserve Bank of _____ (address) an announcement of applications covered by the CRA filed by bank holding companies.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9187; Directorate Identifier 2016–NM–032–AD; Amendment 39–18777; AD 2017–01–10]

RIN 2120–AA64

Airworthiness Directives; Airbus Defense and Space S.A. (Formerly Known as Construcciones Aeronauticas, S.A.) Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Defense and Space S.A. Model C-212 airplanes. This AD was prompted by multiple reports of damaged and cracked rudder torque tube shafts. This AD requires various repetitive inspections, and corrective actions if necessary. This AD also provides a modification which terminates the repetitive inspections. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective February 22, 2017.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of February 22, 2017.

ADDRESSES: For service information identified in this final rule, contact Airbus Defense and Space, Services/Engineering Support, Avenida de Aragón 404, 28022 Madrid, Spain; telephone: +34 91 585 55 84; fax: +34 91 585 31 27; email: MTA.TechnicalService@Airbus.com. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9187.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9187; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone: 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1112; fax: 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Defense and Space S.A. Model C-212 airplanes. The NPRM published in the **Federal Register** on October 11, 2016 (81 FR 70062). The NPRM was prompted by multiple reports of damaged and cracked rudder torque tube shafts. The NPRM proposed to require repetitive general visual and high frequency eddy current (HFEC) inspections of the inner rudder torque tube shaft for cracks, deformation, and damage; repetitive detailed inspections, and HFEC inspections, if necessary, of the inner and outer rudder torque tube shaft for cracks, deformation, and damage; and corrective actions if necessary. We are issuing this AD to detect and correct damaged and cracked rudder torque tube shafts, which could lead to structural failure of the affected rudder torque tube shaft and possible reduced control of the airplane.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2016-0052, dated March 14, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Defense and Space S.A. Model C-212 airplanes. The MCAI states:

Occurrences were reported of finding a damaged and cracked rudder torque tube shaft, Part Number (P/N) 212-46237-01. Subsequent investigation determined that this damage occurred after parking of the aeroplane during a heavy wind gust, without having set the flight control surfaces in locked position.

This condition, if not detected and corrected, could lead to structural failure of the affected rudder torque tube shaft, possibly resulting in reduced control of the aeroplane.

To address this potential unsafe condition, EADS-CASA issued Alert Operators Transmission (AOT) AOT-C212-27-0001 to provide inspection instructions, and Service Bulletin (SB) SB-212-27-0058 providing modification instructions.

For the reasons described above, this [EASA] AD requires repetitive inspections of the affected rudder torque tube shaft, and introduces an optional modification [replacement], which constitutes terminating action for those repetitive inspections.

Required actions include repetitive general visual and HFEC inspections of the inner rudder torque tube shaft for cracks, deformation, and damage; repetitive detailed inspections, and HFEC inspections, if necessary, of the inner and outer rudder torque tube shaft for cracks, deformation, and damage; a

general visual inspection to verify rudder alignment if necessary; and corrective actions if necessary. Repetitive inspections are done depending on conditions (wind conditions, gust lock engagement, and rudder deviation) identified in Airbus Defense & Space Alert Operators Transmission AOT-C212-27-0001, Revision 0, dated July 15, 2015 (“AOT-C212-27-0001, Rev. 0”). Damage may include bulging, dents, peeled paint, or visible corrosion. Corrective actions include replacement of the rudder torque tube shaft with a new rudder torque tube shaft, and repair. The optional terminating action includes replacement of the rudder torque tube shaft with an improved rudder torque tube shaft. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9187.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Clarification of the Actions in Paragraph (g)(2) of the Proposed AD

Paragraph (g)(2) of the proposed AD specifies to do inspections “after the conditions” identified in paragraph 3.1.1.1 of AOT-C212-27-0001, Rev. 0. We have revised paragraph (g)(2) of the AD to clarify the inspections are done after any weather event that includes the conditions identified in paragraph 3.1.1.1 of AOT-C212-27-0001, Rev. 0.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD with the change described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 14 CFR Part 51

We reviewed the following Airbus Defense and Space service information.

- EADS CASA Service Bulletin SB-212-27-0058, dated April 25, 2014. This service information describes procedures for replacement of the rudder torque tube shaft with an improved rudder torque tube shaft.

• AOT-C212-27-0001, Rev. 0. This service information describes procedures for general visual and HFEC inspections of the inner rudder torque tube shaft for cracks, deformation, and damage; detailed inspections, and HFEC inspections, if necessary, of the inner and outer rudder torque tube shaft for

cracks, deformation, and damage; a general visual inspection to verify rudder alignment; and corrective actions, if necessary.

This service information is reasonably available because the interested parties have access to it through their normal

course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 49 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	Up to 33 work-hours × \$85 per hour = \$2,805 per inspection cycle.	\$0	Up to \$2,805 per inspection cycle.	Up to \$137,445 per inspection cycle.

ESTIMATED COSTS FOR OPTIONAL ACTIONS

Action	Labor cost	Parts cost	Cost per product
Optional modification	Up to 48 work-hours × \$85 per hour = \$4,080.	\$48,729	Up to \$52,809.

We have received no definitive data that will enable us to provide cost estimates for the on-condition actions and parts cost specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;

2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2017-01-10 Airbus Defense and Space S.A. (Formerly Known as Construcciones Aeronauticas, S.A.): Amendment 39-18777; Docket No. FAA-2016-9187; Directorate Identifier 2016-NM-032-AD.

(a) Effective Date

This AD is effective February 22, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Defense and Space S.A. (formerly known as Construcciones Aeronauticas, S.A.) Model C-212-CB, C-212-CC, C-212-CD, C-212-CE, C-212-CF, C-212-DF, and C-212-DE airplanes, certificated in any category, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight controls.

(e) Reason

This AD was prompted by multiple reports of damaged and cracked rudder torque tube shafts. We are issuing this AD to detect and correct damaged and cracked rudder torque tube shafts, which could lead to structural failure of the affected rudder torque tube shaft and possible reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections

For airplanes equipped with a rudder torque tube shaft having part number (P/N) 212-46237-01: Do the actions specified in paragraphs (g)(1) and (g)(2) of this AD.

(1) Within 30 days after the effective date of this AD: Do general visual, detailed, and high frequency eddy current (HFEC) inspections of the inner and outer surfaces of the rudder torque tube shaft, as applicable, for cracks, deformation, and damage, in accordance with the instructions of Airbus Defense & Space Alert Operators Transmission AOT-C212-27-0001, Revision 0, dated July 15, 2015 ("AOT-C212-27-0001, Rev. 0").

(2) Thereafter, before further flight after any weather event that includes the conditions identified in paragraph 3.1.1.1 of AOT-C212-27-0001, Rev. 0, do the applicable inspections identified for each condition.

(h) Corrective Actions

If, during any inspection required by paragraph (g) of this AD, any crack, deformation, or damage is found, before further flight do all applicable corrective actions, in accordance with AOT-C212-27-0001, Rev. 0. Where AOT-C212-27-0001, Rev. 0, specifies to contact Airbus for corrective action: Before further flight, accomplish corrective actions in accordance with the procedures specified in paragraph (k)(2) of this AD.

(i) Optional Modification

Modification of an airplane by replacing the rudder torque tube shaft P/N 212-46237-01 with an improved part, in accordance with the Accomplishment Instructions of EADS CASA Service Bulletin SB-212-27-0058, dated April 25, 2014, constitutes terminating action for the inspections required by paragraphs (g)(1) and (g)(2) of this AD for the modified airplane.

(j) Credit for Previous Actions

This paragraph provides credit for actions required by paragraphs (g) and (h) of this AD, if those actions were performed before the effective date of this AD using Airbus Military All Operator Letter (AOL) AOL-212-037, Revision 01, dated April 11, 2014.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Shahram Daneshmandi, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone: 425-227-1112; fax: 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or EADS CASA's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016-0052, dated March 14, 2016, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9187.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (m)(3) and (m)(4) of this AD.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) EADS CASA Service Bulletin SB-212-27-0058, dated April 25, 2014.

(ii) Airbus Defense & Space Alert Operators Transmission AOT-C212-27-0001, Revision 0, dated July 15, 2015.

(3) For service information identified in this AD, contact Airbus Defense and Space, Services/Engineering Support, Avenida de Aragón 404, 28022 Madrid, Spain; telephone: +34 91 585 55 84; fax: +34 91 585 31 27; email: MTA.TechnicalService@Airbus.com.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on January 4, 2017.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; Diamond Aircraft Industries GmbH Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Diamond Aircraft Industries GmbH Model DA 42 airplanes. This AD results from mandatory continuing

airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as an uncommanded engine shutdown during flight due to failure of the propeller regulating valve caused by hot exhaust gases escaping from fractured engine exhaust pipes. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective February 22, 2017.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of February 22, 2017.

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9317; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact Diamond Aircraft Industries GmbH, N.A. Otto-Straße 5, A-2700 Wiener Neustadt, Austria, telephone: +43 2622 26700; fax: +43 2622 26780; email: office@diamond-air.at; Internet: <http://www.diamondaircraft.com>. You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. It is also available on the Internet at <http://www.regulations.gov> by searching for Docket No. FAA-2016-9317.

FOR FURTHER INFORMATION CONTACT:

Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4144; fax: (816) 329-4090; email: mike.kiesov@faa.gov.

SUPPLEMENTARY INFORMATION:**Discussion**

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain Diamond Aircraft Industries GmbH Model DA 42 airplanes. The NPRM was published in the **Federal Register** on October 25, 2016 (81 FR 73360). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of

another country. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued AD No. 2016–0156R1, dated November 23, 2016 (referred to after this as “the MCAI”). The revised MCAI states:

Two cases were reported of uncommanded engine in-flight shutdown (IFSD) on DA 42 aeroplanes. Subsequent investigations identified these occurrences were due to failure of the propeller regulating valve, caused by hot exhaust gases coming from fractured engine exhaust pipes. The initiating cracks on the exhaust pipes were not detected during previous inspections, since those exhaust pipes are equipped with non-removable heat shields that do not allow inspection for certain sections of the exhaust pipe.

This condition, if not corrected, could lead to further cases of IFSD or overheat damage, possibly resulting in a forced landing, with consequent damage to the aeroplane and injury to occupants.

To address this potential unsafe condition, Diamond Aircraft Industries (DAI) developed an exhaust pipe without a directly attached integral heat shield that allows visual inspection over the entire exhaust pipe length. DAI issued Mandatory Service Bulletin (MSB) 42–120 and relevant Working Instruction (WI) WI–MSB 42–120, providing instructions to install the modified exhaust pipes. As an interim measure, an additional bracket was designed to hold the exhaust pipe in place in case of a pipe fracture.

Consequently, EASA issued AD 2016–0156, requiring replacement of the exhaust pipes with pipes having new design, and prohibiting (re)installation of the previous design pipes.

Since that AD was issued, cracks were identified on modified exhaust pipes during an inspection. Furthermore, it was determined that the additional brackets provide a level of safety equivalent to the modified exhaust pipes. Consequently, DAI revised MSB 42–120, allowing installation of the additional brackets as alternative to the installation of the modified exhaust pipes.

For the reasons described above, this AD is revised to reduce the Applicability, excluding certain post-mod aeroplanes, to allow only installation of the additional brackets as final solution and to remove the prohibition of reinstallation of unmodified exhaust pipes.

The MCAI can be found in the AD docket on the Internet at <https://www.regulations.gov/document?D=FAA-2016-9317-0002>.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the

public interest require adopting this AD as proposed except for the changes discussed above. We have determined that these changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

We reviewed Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42–120, dated June 24, 2016, Mandatory Service Bulletin MSB 42–120/1, dated November 10, 2016, and Work Instruction WI–MSB 42–120, dated June 24, 2016. In combination, this service information describes procedures for replacing the exhaust pipes with exhaust pipes having a new design. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section of this AD.

Costs of Compliance

We estimate that this AD will affect 130 products of U.S. registry. We also estimate that it will take the following to comply with the requirements of this AD:

It will take about 1 work-hour per product to comply with the installation of additional exhaust clamps required by this AD. The average labor rate is \$85 per work-hour. Required parts will cost about \$125 per product.

Based on these figures, we estimate the cost of this AD on U.S. operators for the installation of additional exhaust clamps to be \$27,300, or \$210 per product.

It will take about 4 work-hours per product to comply with the exhaust pipe replacement required by this AD. The average labor rate is \$85 per work-hour. Required parts will cost about \$1,990 per product.

Based on these figures, we estimate the cost of this AD on U.S. operators for the exhaust pipe replacement requirement to be \$302,900, or \$2,330 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–9317; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2017-01-12 Diamond Aircraft Industries GmbH: Amendment 39-18779; Docket No. FAA-2016-9317; Directorate Identifier 2016-CE-029-AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective February 22, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Diamond Aircraft Industries GmbH DA 42 airplanes, serial numbers 42.004 through 42.427 and 42.AC001 through 42.AC151, that have a TAE 125-02-99 or TAE 125-02-114 engine installed, are equipped with an exhaust pipe, DAI part number (P/N) D60-9078-06-01, or Technify P/Ns 52-7810-H0001 02, 52-7810-H0001 03, or 52-7810-H0001 04, and are certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 78: Engine Exhaust.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as an uncommanded engine shutdown during flight due to failure of the propeller regulating valve caused by hot exhaust gases escaping from fractured engine exhaust pipes. We are issuing this AD to prevent failure of the propeller regulating valve, which could result in forced landing with consequent damage to the airplane.

(f) Actions and Compliance

Unless already done, do one of the actions in either paragraph (f)(1) or (2) of this AD. For the purpose of this AD, if the flight hours accumulated since first installation of an affected exhaust pipe is not known, use the total hours time-in-service (TIS) accumulated on the airplane.

Note 1 to paragraph (f) of this AD: The NPRM for this AD proposed to require both the installation of clamps and the replacement of the exhaust pipes. This AD only requires one or the other.

(1) At the following compliance times, install additional exhaust pipe clamps following section III.2 of the INSTRUCTIONS section of Diamond Aircraft Industries GmbH Work Instruction WI-MSB 42-120, dated June 24, 2016, as specified in the Accomplishments/Instructions paragraph of Diamond Aircraft Industries GmbH

Mandatory Service Bulletin MSB 42-120, dated June 24, 2016, or Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42-120/1, dated November 10, 2016.

(i) If the affected exhaust pipe has 1,300 hours TIS or less since first installed on an airplane as of February 22, 2017 (the effective date of this AD): Before or upon accumulating 1,500 hours TIS since the affected exhaust pipe was first installed on an airplane.

(ii) If the affected exhaust pipe has more than 1,300 hours TIS since first installed on an airplane as of February 22, 2017 (the effective date of this AD): Within the next 200 hours TIS after February 22, 2017 (the effective date of this AD) or within the next 12 months after February 22, 2017 (the effective date of this AD), whichever occurs first.

(2) At the following compliance times, replace the exhaust pipes listed in paragraph (c) of this AD with an exhaust pipe DAI P/N D60-9078-06-01_01 or Technify P/N 52-7810-H0014 01 following section III.1 of the INSTRUCTIONS section of Diamond Aircraft Industries GmbH Work Instruction WI-MSB 42-120, dated June 24, 2016, as specified in the Accomplishments/Instructions paragraph of Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42-120, dated June 24, 2016, or Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42-120/1, dated November 10, 2016.

(i) If the affected exhaust pipe has 1,300 hours TIS or less since first installed on an airplane as of February 22, 2017 (the effective date of this AD): Before or upon accumulating 1,500 hours TIS since the affected exhaust pipe was first installed on an airplane.

(ii) If the affected exhaust pipe has more than 1,300 hours TIS since first installed on an airplane as of February 22, 2017 (the effective date of this AD): Within the next 200 hours TIS after February 22, 2017 (the effective date of this AD) or within the next 12 months after February 22, 2017 (the effective date of this AD), whichever occurs first.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4144; fax: (816) 329-4090; email: mike.kiesov@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority

(or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No. 2016-0156, dated August 2, 2016, for related information. You may examine the MCAI on the Internet at <https://www.regulations.gov/document?D=FAA-2016-9317-0002>.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42-120, dated June 24, 2016.

(ii) Diamond Aircraft Industries GmbH Mandatory Service Bulletin MSB 42-120/1, dated November 10, 2016.

(iii) Diamond Aircraft Industries GmbH Work Instruction WI-MSB 42-120, dated June 24, 2016.

(3) For Diamond Aircraft Industries GmbH service information identified in this AD, contact Diamond Aircraft Industries GmbH, N.A. Otto-Straße 5, A-2700 Wiener Neustadt, Austria, telephone: +43 2622 26700; fax: +43 2622 26780; email: office@diamond-air.at; Internet: <http://www.diamondaircraft.com>.

(4) You may view this service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. In addition, you can access this service information on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9317.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov>

www.archives.gov/federal-register/cfr/ibr-locations.html.

Issued in Kansas City, Missouri, on January 6, 2017.

Melvin Johnson,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA-2015-0831; Directorate Identifier 2014-NM-061-AD; Amendment 39-18778; AD 2017-01-11]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Model A318 and A319 series airplanes, Model A320-211, -212, -214, -231, -232, and -233 airplanes, and Model A321 series airplanes. This AD was prompted by a report of a rupture of a main landing gear (MLG) sliding tube axle. This AD requires identification of the part number and serial number of the MLG sliding tubes; inspection of affected chromium plates and sliding tube axles for damage; and replacement of the sliding tube if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective February 22, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of February 22, 2017.

ADDRESSES: For service information identified in this final rule, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for

and locating Docket No. FAA-2015-0831.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0831; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800-647-5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a supplemental notice of proposed rulemaking (SNPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Model A318 and A319 series airplanes, Model A320-211, -212, -214, -231, -232, and -233 airplanes, and Model A321 series airplanes. The SNPRM published in the **Federal Register** on June 28, 2016 (81 FR 41886) (“the SNPRM”). We preceded the SNPRM with a notice of proposed rulemaking (NPRM) that published in the **Federal Register** on April 24, 2015 (80 FR 22939) (“the NPRM”). The NPRM proposed to require an inspection to identify the part number and serial number of the MLG sliding tubes installed on the airplane; an inspection of the axle on certain MLG sliding tubes for damage; and replacement of the sliding tube if necessary. The NPRM was prompted by a report of a rupture of a MLG sliding tube axle. The SNPRM proposed to remove certain service information that does not adequately address the identified unsafe condition and revise the compliance method. We are issuing this AD to detect and correct cracks in the axle and (partial) detachment of the axle and wheel from the sliding tube, which could result in failure of an MLG. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness

Directive 2014-0058, dated March 11, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Model A318 and A319 series airplanes, Model A320-211, -212, -214, -231, -232, and -233 airplanes, and Model A321 series airplanes. The MCAI states:

A main landing gear (MLG) sliding tube axle rupture occurred in service. Investigation of the affected part showed that this failure was due to an abnormal grinding operation during overhaul by a certain maintenance and repair organization located in Singapore. A population of MLG sliding tubes was subsequently identified whose axles may have been subject to this grinding operation, which may have resulted in areas of residual stress on the axles on the MLG sliding tubes. In addition, the MSN [manufacturer serial number] of the aeroplanes which are known to have had the affected parts installed have been identified.

This condition, if not detected and corrected, could lead to cracks in the axle and (partial) detachment of axle and wheel from the sliding tube, possibly resulting in failure of a MLG with consequent damage to the aeroplane and injury to occupants.

To address this potential unsafe condition, Messier-Bugatti-Dowty, the MLG gear manufacturer, issued Service Bulletin (SB) 200-32-313 and SB 201-32-62 [both dated February 25, 2013], providing inspection instructions and criteria for removal from service of the affected MLG sliding tubes.

For the reasons described above, this [EASA] AD requires a one-time Special Detailed Inspection (SDI) of the axle on the affected MLG sliding tubes and, depending on findings, replacement of the MLG sliding tube.

The SDI includes a detailed visual inspection of the chromium plate for damage, and a Barkhausen noise inspection of the sliding tube axles for damage.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-0831.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the SNPRM or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the SNPRM for correcting the unsafe condition; and

• Do not add any additional burden upon the public than was already proposed in the SNPRM.

Related Service Information Under 1 CFR Part 51

Airbus has issued Service Bulletin A320–32–1416, including Appendix 01, dated March 10, 2014. This service information describes procedures for inspecting MLG axles and brake flanges by doing a detailed visual inspection of the chromium plates for damage, a Barkhausen noise inspection of the sliding tube axles for damage, and replacement of affected parts if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

We estimate that this AD affects 3 airplanes of U.S. registry.

We also estimate that it would take about 18 work-hours per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$4,590, or \$1,530 per product.

In addition, we estimate that any necessary on-condition actions will take about 3 work-hours, for a cost of \$255 per product. We have received no definitive data that would enable us to provide part cost estimates for the on-condition actions specified in this AD. We have no way of determining the number of aircraft that might need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in

air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2017–01–11 Airbus: Amendment 39–18778; Docket No. FAA–2015–0831; Directorate Identifier 2014–NM–061–AD.

(a) Effective Date

This AD is effective February 22, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1) through (c)(4) of this AD, certificated in any category, all manufacturer serial numbers.

(1) Airbus Model A318–111, –112, –121, and –122 airplanes.

(2) Airbus Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Airbus Model A320–211, –212, –214, –231, –232, and –233 airplanes.

(4) Airbus Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 32, Landing gear.

(e) Reason

This AD was prompted by a report of a rupture of a main landing gear (MLG) sliding tube axle. We are issuing this AD to detect and correct cracks in the axle and (partial) detachment of the axle and wheel from the sliding tube, which could result in failure of an MLG.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) MLG Sliding Tube Part Number and Serial Number Identification

Within 3 months after the effective date of this AD: Do an inspection to identify the part number and serial number of the MLG sliding tubes installed on the airplane. A review of airplane maintenance records is acceptable in lieu of this inspection if the part number and serial number of the MLG sliding tubes can be conclusively determined from that review.

(h) Identification of Airplanes Not Affected by the Requirements of Paragraph (i) of this AD

An airplane with a manufacturer serial number (MSN) not listed in figure 1 to paragraph (h) of this AD is not affected by the requirements of paragraph (i) of this AD, provided it can be determined that no MLG sliding tube having a part number and serial number listed in table 1 to paragraphs (h), (i), (k)(1), (k)(2), (l)(1), and (l)(2) of this AD has been installed on that airplane since first flight of the airplane.

FIGURE 1 TO PARAGRAPH (H) OF THIS AD

Affected Airplanes Listed by MSN

201371304	B239–2053				
201371304	B1401–2856	(m) Other FAA AD Provisions The following provisions also apply to this AD: (1) <i>Alternative Methods of Compliance (AMOCs)</i> : The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1405; fax 425–227–1149. Information may be emailed to: 9–ANM–116–AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD. (2) <i>Required for Compliance (RC)</i> : If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC. (3) <i>Contacting the Manufacturer</i> : For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature. (n) Special Flight Permits Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the airplane can be modified (if the operator elects to do so), provided the MLG remains extended throughout the flight. BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–9058; Directorate Identifier 2016–NM–024–AD; Amendment 39–18771; AD 2017–01–04]

RIN 2120–AA64

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Fokker Services B.V. Model F28 Mark 0100 airplanes. This AD was prompted by an analysis which determined that,

for certain areas of the fuselage, the current threshold of an Airworthiness Limitations Section inspection is insufficient to detect early crack development. This AD requires one time high and low frequency eddy current inspections of the affected fuselage skin for cracks, and repair if necessary. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective February 22, 2017.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of February 22, 2017.

ADDRESSES: For service information identified in this final rule, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone: +31 (0)88–6280–350; fax: +31 (0)88–6280–111; email: technicalservices@fokker.com; Internet <http://www.myfokkerfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–9058.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–9058; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1137; fax 425 227 1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would

apply to certain Fokker Services B.V. Model F28 Mark 0100 airplanes. The NPRM published in the **Federal Register** on September 8, 2016 (81 FR 62029) (“the NPRM”). The NPRM was prompted by an analysis which determined that, for certain areas of the fuselage, the current threshold of an Airworthiness Limitations Section inspection is insufficient to detect early crack development. The NPRM proposed to require one time high and low frequency eddy current inspections of the affected fuselage skin for cracks, and repair if necessary. We are issuing this AD to detect and correct cracks in the fuselage skin; such cracking could result in reduced structural integrity of the fuselage.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive Airworthiness Directive 2016–0029R1, dated November 17, 2016 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Fokker Services B.V. Model F28 Mark 0100 airplanes. The MCAI states:

A complementary fatigue and damage tolerance analysis was accomplished by the design approval holder on the traffic collision avoidance system (TCAS) antenna installation on the top of the fuselage between station (STA) 6805 and STA7305. Based on the results, it was determined that for the affected area, the current 58 000 flight cycles (FC) threshold of Airworthiness Limitations Section (ALS) inspection task 533001–00–20 and 533028–00–20 (special detailed inspection of longitudinal lap joints) is insufficient to timely detect possible crack development.

This condition, if not detected and corrected, could affect the structural integrity of the fuselage in this area.

To address this potential unsafe condition, Fokker Services published Service Bulletin (SB) SBF100–53–130 to provide inspection instructions.

Consequently, EASA issued AD 2016–0029 to require a one-time inspection of the fuselage skin around the largest TCAS antenna external doubler and of the longitudinal lap joint at stringer (STR) 37 between fuselage STA6805 and STA7305.

Since that [EASA] AD was issued, it was discovered that another ALS inspection task, 533028–00–20, is also related to this subject. This [EASA] AD is revised to clarify that the inspection threshold of both ALS inspection tasks has been re-assessed. It is expected that a repetitive inspection task will be included in the ALS, which will cover only the area close to the TCAS antenna installation. For the remainder of the affected lap joint, no change is anticipated and this will therefore continue to be inspected in accordance with the existing ALS tasks.

This [EASA] AD is still considered to be an interim action and further [EASA] AD

action may follow. More information on this subject can be found in Fokker Services All Operators Message AOF100.199#02.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2016-9058.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM or on the determination of the cost to the public.

Revised MCAI AD

Since the NPRM was issued, EASA revised 2016-0029, dated March 8, 2016. EASA AD 2016-0029R1, dated November 17, 2016, clarifies that the

inspection threshold of both ALS inspection tasks have been re-assessed. The revised MCAI did not result in a change to the NPRM. We have revised this AD to refer to EASA AD 2016-0029R1, dated November 17, 2016.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD with the change described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 1 CFR Part 51

We reviewed Fokker Service Bulletin SBF100-53-130, dated December 1, 2015. This service information describes one time high and low frequency eddy current inspections for cracks of the fuselage skin. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Costs of Compliance

We estimate that this AD affects 8 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection	1 work-hour × \$85 per hour = \$85	\$0	\$85	\$680

We have received no definitive data that will enable us to provide cost estimates for the on-condition actions specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and

responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2017-01-04 Fokker Services B.V.:

Amendment 39-18771; Docket No. FAA-2016-9058; Directorate Identifier 2016-NM 024-AD.

(a) Effective Date

This AD is effective February 22, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Fokker Services B.V. Model F28 Mark 0100 airplanes, certificated in any category, serial numbers 11244 through 11407 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by an analysis which determined that, for certain areas of the fuselage, the current threshold of an Airworthiness Limitations Section inspection is insufficient to detect early crack development. We are issuing this AD to detect and correct cracks in the fuselage skin; such cracking could result in reduced structural integrity of the fuselage.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection

Within the compliance time specified in paragraphs (g)(1) and (g)(2) of this AD, as applicable, do high and low frequency eddy current inspections for cracks in the fuselage skin around the largest traffic collision avoidance system (TCAS) antenna external doubler and of the longitudinal lap joint at

fuselage stringer STR37 between fuselage station (STA) STA6805 and STA7305, in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100–53–130, dated December 1, 2015.

(1) For airplanes having 45,000 or more total flight cycles as of the effective date of this AD, since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness: Do the high and low frequency eddy current inspections within 750 flight cycles after the effective date of this AD.

(2) For airplanes having 40,000 or more total flight cycles, but less than 45,000 total flight cycles as of the effective date of this AD, since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness: Do the high and low frequency eddy current inspections within 1,500 flight cycles after the effective date of this AD.

(h) Corrective Action

If any crack is found during any inspection required by paragraph (g) of this AD: Before further flight, repair using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Fokker B.V. Service's EASA Design Organization Approval (DOA).

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1137; fax 425–227–1149. Information may be emailed to: 9–ANM-116–AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or EASA; or Fokker Services B.V.'s EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD 2016–0029R1, dated November 17, 2016, for related information. This MCAI may be found in the AD docket on the Internet at

<http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–9058.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

BILLING CODE 4910–13–P

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 201

[Release Nos. 33–10276; 34–79749; IA–4599; IC–32414]

Adjustments to Civil Monetary Penalty Amounts

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (the “Commission”) is adopting a final rule to implement the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the “2015 Act”), which amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (the “Inflation Adjustment Act”), as previously amended by the Debt Collection Improvement Act of 1996 (the “DCIA”). The 2015 Act requires all agencies to annually adjust for inflation the civil

monetary penalties that can be imposed under the statutes administered by the agency. Pursuant to this requirement, this final rule performs the first annual adjustment for inflation of the maximum amount of civil monetary penalties administered by the Commission under the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, the Investment Advisers Act of 1940, and certain penalties under the Sarbanes-Oxley Act of 2002. This adjustment will apply to all penalties imposed after the effective date of this final rule for violations after November 2, 2015. For violations that occurred on or before November 2, 2015, the Commission is reinstating the penalty amounts in the Commission's prior penalty adjustments performed under the DCIA.

DATES: *Effective Date:* January 18, 2017.

James A. Cappoli, Assistant General Counsel, Office of the General Counsel, at (202) 551–7923, or Stephen M. Ng, Senior Counsel, Office of the General Counsel, at (202) 551–7957.

SUPPLEMENTARY INFORMATION:

I. Background

This final rule implements the 2015 Act,¹ which amended the Inflation Adjustment Act.² The Inflation Adjustment Act previously had been amended by the DCIA³ to require that each federal agency adopt regulations at least once every four years that adjust for inflation the civil monetary penalties (“CMPs”) that could be imposed under the statutes administered by the agency. Pursuant to the requirements of the DCIA, the Commission previously adopted regulations in 1996, 2001, 2005, 2009, and 2013 to adjust the maximum amount of the CMPs that could be imposed under the statutes the Commission administers.⁴

¹ Public Law 114–74 Sec. 701, 129 Stat. 599–601 (Nov. 2, 2015), codified at 28 U.S.C. 2461 note.

² Public Law 101–410, 104 Stat. 890–892 (1990), codified at 28 U.S.C. 2461 note.

³ Public Law 104–134, Title III, § 31001(s)(1), 110 Stat. 1321–373 (1996), codified at 28 U.S.C. 2461 note.

⁴ See Release Nos. 33–7361, 34–37912, IA–1596, IC–22310, dated November 1, 1996 (effective December 9, 1996), previously found at 17 CFR 201.1001 and Table I to Subpart E of Part 201; Release Nos. 33–7946, 34–43897, IA–1921, IC–24846, dated January 31, 2001 (effective February 2, 2001), previously found at 17 CFR 201.1002 and Table II to Subpart E of Part 201; Release Nos. 33–8530, 34–51136, IA–2348, IC–26748, dated February 9, 2005 (effective February 14, 2005), previously found at 17 CFR 201.1003 and Table III to Subpart E of Part 201; Release Nos. 33–9009, 34–59449, IA–2845, IC–28635, dated February 25, 2009 (effective March 3, 2009), previously found at 17

Continued

The 2015 Act replaces the inflation adjustment mechanism prescribed in the DCIA with a new mechanism for calculating the inflation-adjusted amount of CMPs. Each agency was first required to use this new mechanism to adjust the maximum amount of its CMPs⁵ in an initial “catch-up” adjustment.⁶ Pursuant to this requirement, the Commission issued an interim final rule adjusting its CMPs on June 27, 2016 (the “June 2016 interim final rule”).⁷ After performing the catch-up adjustment, each agency must now perform annual adjustments for inflation, and publish these adjustments in the **Federal Register** by January 15 of each calendar year.⁸

A CMP is defined in relevant part as any penalty, fine, or other sanction that: (1) Is for a specific amount, or has a maximum amount, as provided by federal law; and (2) is assessed or enforced by an agency in an administrative proceeding or by a federal court pursuant to federal law.⁹ This definition applies to the monetary penalty provisions contained in four statutes administered by the Commission: The Securities Act of 1933; the Securities Exchange Act of 1934 (the “Exchange Act”); the Investment Company Act of 1940; and

the Investment Advisers Act of 1940. In addition, the Sarbanes-Oxley Act of 2002 provides the Public Company Accounting Oversight Board (the “PCAOB”) authority to levy civil monetary penalties in its disciplinary proceedings pursuant to 15 U.S.C. 7215(c)(4)(D).¹⁰ The definition of a CMP in the Inflation Adjustment Act encompasses such civil monetary penalties.¹¹

II. Adjusting the Commission’s Penalty Amounts for Inflation

This final rule implements the first of the required annual adjustments under the 2015 Act for all penalties under the Securities Act, the Exchange Act, the Investment Company Act, and the Investment Advisers Act, and certain penalties under the Sarbanes-Oxley Act.

As the baseline in calculating these new penalty amounts, the Commission uses the penalty amounts in the Commission’s June 2016 interim final rule. The penalty amounts in that interim final rule used the new inflation adjustment mechanism in the 2015 Act as part of the “catch-up adjustment” required by that Act. The Commission affirms that the amounts in the June 2016 interim final rule were correct and

that the adjusted amounts were appropriate.¹²

Pursuant to the 2015 Act, the Commission now adjusts the penalty amounts in the June 2016 interim final rule by multiplying these amounts by the percentage change between the Consumer Price Index for all Urban Consumers (“CPI-U”) for October 2015, and the October 2016 CPI-U.¹³ OMB has provided its calculation of this multiplier (the “CPI-U Multiplier”) to agencies.¹⁴ After multiplying the June 2016 interim final rule amounts by this multiplier, the Commission must round all penalty amounts to the nearest dollar to determine the new inflation-adjusted penalty amounts.

For example, the CMP for certain insider trading violations by controlling persons under Exchange Act Section 21A(a)(3)¹⁵ was readjusted for inflation on August 1, 2016, to \$1,978,690. To determine the new CMP under this provision, the Commission multiplies the current CMP by the CPI-U Multiplier of 1.01636, and rounds to the nearest dollar. Thus, the new CMP for Exchange Act Section 21A(a)(3) is \$2,011,061.

Below is the Commission’s calculation of the new penalty amounts for the penalties it administers.

U.S. code citation	Civil monetary penalty description	Penalty amounts in June 2016 interim final rule	CPI-U multiplier	New adjusted penalty amounts
15 U.S.C. 77h–1(g) (Securities Act Sec. 8A(g)).	For natural person	\$8,156	1.01636	\$8,289

	For any other person/fraud	445,390	1.01636	452,677

CFR 201.1004 and Table IV to Subpart E of Part 201; and Release Nos. 33–9387, 34–68994, IA–3557, IC–30408, dated February 27, 2013 (effective March 5, 2013), previously found at 17 CFR 201.1005 and Table V to Subpart E of Part 201.

⁵ The 2015 Act also applies to minimum penalty amounts and penalty ranges. See 28 U.S.C. 2461 note Sec. 5(a). All of the statutes administered by the Commission, however, only include maximum penalty amounts. Thus, in this final rule, we only refer to the effect of the 2015 Act on maximum penalty amounts.

⁶ 28 U.S.C. 2461 note Sec. 4(b)(1); Office of Management and Budget, Implementation of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (February 24, 2016) (“2016 OMB Guidance”) at 1, available at <https://www.whitehouse.gov/sites/default/files/omb/memoranda/2016/m-16-06.pdf>.

⁹ 28 U.S.C. 2461 note Sec. 3(2).

¹⁰ 15 U.S.C. 7215(c)(4)(D).

¹¹ The Commission may by order affirm, modify, remand, or set aside sanctions, including civil monetary penalties, imposed by the PCAOB. See Section 107(c) of the Sarbanes-Oxley Act of 2002, 15 U.S.C. 7217. The Commission may enforce such orders in federal district court pursuant to Section 21(e) of the Securities Exchange Act of 1934. As a result, penalties assessed by the PCAOB in its disciplinary proceedings are penalties “enforced” by the Commission for purposes of the Inflation Adjustment Act. See *Adjustments to Civil Monetary Penalty Amounts*, Release No. 33–8530 (Feb. 4, 2005) [70 FR 7606 (Feb. 14, 2005)].

¹² The 2015 Act provided that agencies could seek approval from OMB to reduce the amount of the catch-up adjustment required by the 2015 Act (a “reduced catch-up determination”) if: (1) The otherwise required increase of the maximum amount of the CMPs administered by the agency would have a negative economic impact, or (2) the social costs of adopting the otherwise required

increase of the maximum amount of these CMPs would outweigh the benefits. See 28 U.S.C. 2461 note Sec. 4(c); 2016 OMB Guidance at 3. As part of the June 2016 interim final rule, the Commission determined that it was not necessary to seek a reduced catch-up adjustment determination, but requested comments on whether the Commission should reconsider this decision. See Release No. 33–10104 at 8. The Commission did not receive any comments on this topic and the Commission affirms its decision not to seek a reduced catch-up adjustment determination.

	For any other person	19,677,750	1.01636	19,999,678

Pursuant to the 2015 Act, the Commission has determined that the adjusted penalty amounts in this final

rule (and all penalty adjustments performed pursuant to the 2015 Act) will apply to penalties imposed after the

effective date of the adjustment for violations that occurred after November 2, 2015, the 2015 Act's enactment date.

Consistent with this determination, the Commission is reinstating the penalty amounts contained in its prior penalty adjustments under the DCIA for violations that occurred from December 10, 1996, through November 2, 2015.¹⁶

The Commission's prior penalty adjustments under the DCIA were previously included in the Code of Federal Regulations at 17 CFR 201.1001 through 1005 and Tables I through V to Subpart E. In the June 2016 interim final rule, Section 201.1001 and Table I were replaced with the new penalty amounts from the interim final rule, and Sections 201.1002 through 201.1005 and Tables II to V were removed. As part of this final rule, the information in these tables will be added back into the Code of Federal Regulations. However, for ease of reference, the information in these tables will be consolidated and included in a single section (17 CFR 201.1001(a)) and Table (Table I to Section 201.1001).

Further, each penalty adjustment performed pursuant to the 2015 Act supersedes the prior adjustments under that Act. Thus, the penalty amounts in this final rule supersede the amounts in the June 2016 interim final rule (except that for the first day this final rule is effective, the prior year's penalty amounts shall apply, *see* 28 U.S.C. 2461 note Sec. 6). Because of this, the amounts in the June 2016 interim final rule will be removed from the Code of Federal Regulations. The penalty amounts in this final rule, however, need only be published in the **Federal Register** and will not be added to the Code of Federal Regulations, in accordance with the 2015 Act and OMB guidance.¹⁷ As a result, the Commission is amending 17 CFR 201.1001 to add subsection (b) to indicate that all penalty adjustments performed under the 2015 Act will be published in the **Federal Register** and will be made available on the Commission's Web site.¹⁸ This framework will avoid the necessity of revising the Code of Federal Regulations every year to include the new inflation-adjusted penalty amounts.

¹⁶ One commenter to the June 2016 interim final rule requested that the Commission re-evaluate the application of the adjusted penalty amounts included in that interim final rule to violations that occurred before the enactment of the 2015 Act (*see* Ltr. from Wilmer Cutler Pickering Hale and Dorr LLP, Aug. 15, 2016). Our determination to apply the penalty amounts in this final rule to violations that occurred after November 2, 2015, renders the commenter's request moot. As explained below, the penalty amounts in this final rule supersede the penalty amounts in the June 2016 interim final rule.

¹⁷ 28 U.S.C. 2461 note Sec. 4(a)(2); 2017 OMB Guidance at 3.

¹⁸ The Web site will also list the penalty amounts for violations that occurred on or before November 2, 2015.

Section 201.1001(b) will also clarify that penalty adjustments performed pursuant to the 2015 Act will only apply to violations that occurred after November 2, 2015, the enactment date of the 2015 Act.

III. Procedural and Other Matters

The Commission is required by the 2015 Act to adjust the CMPs within its jurisdiction for inflation using a statutorily prescribed formula and the 2015 Act mandates that agencies perform this adjustment annually by January 15th of each year.¹⁹ The 2015 Act further provides that these annual adjustments shall be made "notwithstanding section 553 of title 5, United States Code."²⁰ In light of this Congressional mandate, the Commission is not required to provide for public notice and comment pursuant to the notice and comment provisions of the Administrative Procedure Act.²¹ Under the Regulatory Flexibility Act, a regulatory flexibility analysis is required only when an agency must publish a general notice of proposed rulemaking.²² Because public notice and comment is not required for this final rule, a regulatory flexibility analysis is not required. Further, this rule does not contain any collection of information requirements as defined by the Paperwork Reduction Act of 1995 as amended.²³

IV. Economic Analysis²⁴

The Commission is sensitive to the costs and benefits that result from its rules. This regulation merely adjusts CMPs for inflation as required by the 2015 Act. It has no impact on disclosure or compliance costs. The Commission further notes that the CMPs ordered in SEC proceedings and PCAOB disciplinary proceedings in fiscal year 2016 totaled approximately \$1.28 billion. The inflationary adjustment required by the 2015 Act results in the increase of the maximum amount of the CMPs administered by the Commission of 1.636%. Assuming that the Commission is successful in obtaining civil monetary penalties in fiscal year

2017 in similar proportion to that obtained in fiscal year 2016, the inflationary adjustment pursuant to this final rule would result in an increase in the CMPs ordered of approximately \$21 million.

This potential increase, however, overstates the effect of the rule. First, this figure represents the amount of penalties that could be potentially ordered, whereas the amount of penalties collected in any given year—the amount of penalties that would affect the economy—can be lower than the ordered amount. Second, the adjusted penalty amounts will not apply to all penalties ordered, but rather only to those penalties whose associated violations occurred after November 2, 2015. Third, penalties imposed in insider trading cases brought in district court are based on the profit gained or loss avoided as a result of the violation rather than by reference to a statutory dollar amount that is affected by this regulation.²⁵ The average annual amount of penalties obtained in insider trading cases from FY 2010 through FY 2016 is \$95.7 million. Third, in many cases where the Commission has obtained large civil monetary penalties, such penalties were calculated on the basis of the defendant's gross pecuniary gain rather than the maximum penalty dollar amount set by statute that will be adjusted by the proposed rule.²⁶ In addition, the intent of the new regulation is merely to keep pace with changes in the economy, not to impose new costs. Therefore, for the instances in which CMPs affected by this rulemaking are imposed, the Commission does not believe that adjusting civil monetary penalties pursuant to the 2015 Act will significantly affect the amount of penalties it obtains beyond that necessary to keep pace with inflation.

The benefit provided by the inflationary adjustment to the maximum CMPs is that of maintaining the level of deterrence effectuated by the CMPs, and not allowing such deterrent effect to be diminished by inflation. The costs of implementing this rule should be negligible because the only change from the current, baseline situation is determining potential penalties using a new maximum dollar amount.

²⁵ 15 U.S.C. 78u-1(a)(2).

²⁶ For example, 15 U.S.C. 77t(d)(2)(A), after adjusting for inflation as required by the 2015 Act, provides that the amount of the penalty shall not exceed the greater of \$9,054 for a natural person or \$90,535 for any other person, or the gross amount of pecuniary gain to such defendant as a result of the violation.

¹⁹ 28 U.S.C. 2461 note Sec. 4(a).

²⁰ 28 U.S.C. 2461 note Sec. 4(b)(2).

²¹ 5 U.S.C. 553(b)(3)(B). This finding also satisfies the requirements of 5 U.S.C. 808(2), allowing the amendment to become effective notwithstanding the requirement of 5 U.S.C. 801 (if a federal agency finds that notice and public comment are impractical, unnecessary or contrary to the public interest, a rule shall take effect at such time as the federal agency promulgating the rule determines).

²² 5 U.S.C. 603.

²³ 44 U.S.C. 3501 *et. seq.*

²⁴ The Commission did not receive any comments on the economic analysis in the June 2016 interim final rule.

V. Statutory Basis

The Commission is adopting these revisions to 17 CFR part 201, subpart E pursuant to the directives and authority of the Federal Civil Penalties Inflation Adjustment Act of 1990, Public Law 101-410, 104 Stat. 890-892 (1990), codified at 28 U.S.C. 2461 note, as amended.

List of Subjects in 17 CFR Part 201

Administrative practice and procedure, Claims, Confidential business information, Lawyers, Penalties, Securities.

Text of Amendment

For the reasons set forth in the preamble, part 201, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 201—RULES OF PRACTICE

Subpart E—Adjustment of Civil Monetary Penalties

- 1. The authority citation for Part 201, Subpart E continues to read as follows:

Authority: 28 U.S.C. 2461 note.

- 2. Revise 201.1001 to read as follows:

§ 201.1001 Adjustment of civil monetary penalties.

(a) For violations from December 10, 1996, through November 2, 2015: As required by the Inflation Adjustment Act of 1990, as amended by the Debt

Collection Improvement Act of 1996, the Commission has adjusted the maximum amounts of all civil monetary penalties it administers under the Securities Act of 1933, the Securities Exchange Act of 1934, the Investment Company Act of 1940, the Investment Advisers Act of 1940, and certain penalties under the Sarbanes-Oxley Act of 2002 for inflation in the releases and prior regulations listed in the footnotes to Table I. The penalty amounts provided in Table I apply to violations of these statutes that occurred from December 10, 1996, through November 2, 2015, with each column listing the penalty amounts for violations that occurred in a particular time frame. To determine the penalty amounts for violations that occurred prior to December 10, 1996, please refer to the applicable statutory text. To determine penalty amounts for violations after November 2, 2015, please refer to paragraph (b) of this section.

(b) For violations after November 2, 2015: The Federal Civil Penalties Inflation Adjustment Act, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (28 U.S.C. 2461 note), requires that civil monetary penalties be adjusted on an annual basis for inflation. Pursuant to this requirement, the maximum amounts of all civil monetary penalties under the Securities Act of 1933, the Securities Exchange Act of 1934, the

Investment Company Act of 1940, and the Investment Advisers Act of 1940, and certain penalties under the Sarbanes-Oxley Act of 2002 will be adjusted annually for inflation. Notice of these adjusted penalty amounts will be published by the Commission in the **Federal Register** on or before January 15 of each calendar year and will be available, along with the Commission's prior inflation adjustments, on the Commission's Web site at <https://www.sec.gov/enforce/civil-penalties-inflation-adjustments.htm>. The adjusted penalty amounts will apply to all penalties imposed after the effective date of the adjustment (for the first day the adjustment is effective, the prior year's penalty amounts shall apply), for violations that occurred after November 2, 2015. The adjusted penalty amount each year will be the larger of:

(1) The maximum penalty amount for the previous calendar year; or

(2) An amount adjusted for inflation, calculated by multiplying the maximum penalty amount for the previous calendar year by the percentage by which the Consumer Price Index for all Urban Consumers (CPI-U) for the month of October preceding the current calendar year exceeds the CPI-U for the month of October of the calendar year two years prior to the current calendar year, adding that amount to the amount for the previous calendar year, and rounding the total to the nearest dollar.

Department of Labor Federal Civil Penalties Inflation Adjustment Act Annual Adjustments for 2017

AGENCY: Employment and Training Administration, Office of Workers' Compensation Programs, Office of the Secretary, Wage and Hour Division,

Occupational Safety and Health Administration, Employee Benefits Security Administration, and Mine Safety and Health Administration, Department of Labor.

ACTION: Final rule.

SUMMARY: The U.S. Department of Labor (Department) is publishing this final rule to adjust for inflation the civil monetary penalties assessed or enforced in its regulations, pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990 as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Inflation Adjustment Act). The Inflation Adjustment Act requires the Department to annually adjust its civil money penalty levels for inflation no later than January 15 of each year. The Inflation Adjustment Act provides that agencies shall adjust civil monetary penalties notwithstanding Section 553 of the Administrative Procedure Act (APA). Additionally, the Inflation Adjustment Act provides a cost-of-living formula for adjustment of the civil penalties. Accordingly, this final rule sets forth the Department's 2017 annual adjustments for inflation to its civil monetary penalties, effective January 13, 2017.

DATES: This final rule is effective on January 13, 2017. As provided by the Inflation Adjustment Act, the increased penalty levels apply to any penalties assessed after the effective date of this rule.

FOR FURTHER INFORMATION CONTACT:

I. Background

On November 2, 2015, Congress enacted the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Public Law 114–74, 701 (Inflation Adjustment Act), which further amended the Federal Civil Penalties Inflation Adjustment Act of 1990 as previously amended by the 1996 Debt Collection Improvement Act (collectively, the “Prior Inflation Adjustment Act”), to improve the

effectiveness of civil monetary penalties and to maintain their deterrent effect. The Inflation Adjustment Act required agencies to: (1) Adjust the level of civil monetary penalties with an initial “catch-up” adjustment through an interim final rule (IFR); and (2) make subsequent annual adjustments for inflation. The Department is required to publish an annual inflation adjustment no later than January 15, 2017, and by January 15 of each subsequent year.

On July 1, 2016, the Department published an IFR that established the initial catch-up adjustment for civil penalties that the Department administers and requested comments. See 81 FR 43430 (DOL IFR). Nine comments were received on the Employment and Training Administration, Wage and Hour Division, Occupational Safety and Health Administration, and Employee Benefit Security Administration sections of the IFR, and are discussed below.

This rule implements the annual inflation adjustment that the

Department is required by the Inflation Adjustment Act to publish by January 15, 2017 for civil monetary penalties assessed or enforced in the Department’s regulations.¹ The Inflation Adjustment Act provides that the increased penalty levels apply to any penalties assessed after the effective date of the increase. Pursuant to the Inflation Adjustment Act, this final rule is published notwithstanding Section 553 of the APA.

II. Adjustment for 2017

The Department has undertaken a thorough review of civil penalties administered by its various components pursuant to the Inflation Adjustment Act and in accordance with guidance issued by the Office of Management and Budget.² The Department first identified the most recent penalty amount, which was the amount established by the catch-up adjustment as set forth in the IFR published on July 1, 2016.

The Department is required to calculate the annual adjustment based on the Consumer Price Index for all Urban Consumers (CPI-U). Annual

inflation adjustments are based on the percent change between the October CPI-U preceding the date of the adjustment, and the prior year’s October CPI-U; in this case, the percent change between the October 2016 CPI-U and the October 2015 CPI-U. The cost-of-living adjustment multiplier for 2017, based on the Consumer Price Index (CPI-U) for the month of October 2016, not seasonally adjusted, is 1.01636.³ In order to complete the 2017 annual adjustment, the Department multiplied the most recent penalty amount for each applicable penalty by the multiplier, 1.01636, and rounded to the nearest dollar.

As provided by the Inflation Adjustment Act, the increased penalty levels apply to any penalties assessed after the effective date of this rule.⁴ Accordingly, for penalties assessed after January 13, 2017, whose associated violations occurred after November 2, 2015, the higher penalty amounts outlined in this rule will apply. The table below demonstrates the penalty amounts that apply:

Violations occurring	Penalty assessed	Which penalty level applies
On or before November 2, 2015	On or before August 1, 2016	Pre-August 1, 2016 levels.
On or before November 2, 2015	After August 1, 2016	Pre-August 1, 2016 levels.
After November 2, 2015	After August 1, 2016, but on or before January 13, 2017.	August 1, 2016 levels.
After November 2, 2015	After January 13, 2017	January 13, 2017 levels.

III. Discussion of Public Comments

Nine organizations filed responsive comments with the Department within the public comment period for the IFR. The Department received comments from the Center for Progressive Reform (CPR); Farmworker Justice; Contractors Risk Management, Inc.; the North Carolina Department of Labor; the National Association of Heath Underwriters (NAHU); the Kentucky Labor Cabinet; the National Guestworker Alliance (NGA); the New Mexico Environment Department; and the Occupational Safety and Health State Plan Association (OSHSPA).

Comments were received on the Employment and Training Administration, Wage and Hour Division, Occupational Safety and Health Administration, and Employee Benefit Security Administration sections of the IFR. No comments were

received related to the Office of Workers’ Compensation Programs, Office of the Secretary, and Mine Safety and Health Administration sections.

The following discussion addresses the comments and the Department’s responses. The Department has reviewed and considered these comments, but found none of them required a change in the penalty levels or regulatory text.

A. Employment and Training Administration (20 CFR Part 655) and Wage and Hour Division (29 CFR Parts 500, 501, 530, 570, 578, 579, 801, 825)

In the IFR, the Department increased the civil monetary penalties enforced by Department’s Wage and Hour Division (WHD) under the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Immigration and Nationality Act (INA) (specifically, the

H–2A, D–1, and H–1B visa programs), the Fair Labor Standards Act (FLSA) (including the child labor provisions), the Employee Polygraph Protection Act, and the Family and Medical Leave Act.⁵ The civil monetary penalties authorized by the INA’s D–1 and H–1B visa programs are reflected in the Employment and Training Administration’s regulations, title 20 of the Code of Federal Regulations (CFR), but are enforced by WHD. The Department increased these civil monetary penalties pursuant to the “catch-up” adjustment formula as specified in the Inflation Adjustment Act. The Department explained each increase in the preamble to the IFR.

The Department received two comments addressing the increase of civil monetary penalties under programs administered by the WHD. Farmworker Justice, a national advocacy

¹ Civil monetary penalties under the H–2B program are addressed separately.
² M–17–11, Implementation of the 2017 annual adjustment pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec 16, 2016).

³ OMB provided the year-over-year multiplier, rounded to 5 decimal points. *Id.* at 1.
⁴ Appendix 1 consists of a table that provides ready access to key information about each penalty.
⁵ The Department also increased civil monetary penalties provisions of the Contract Work Hours

and Safety Standards Act (CWHSSA) and the Walsh-Healey Public Contracts Act (PCA), as amended. These provisions are included in regulations established by the Office of the Secretary, 29 CFR part 5 and 41 CFR part 50–201, which have been delegated to WHD for enforcement.

organization representing migrant and seasonal farmworkers, submitted a comment addressing civil monetary penalties under MSPA, H-2A, and FLSA.⁶ Farmworker Justice commented that while they were pleased that the civil monetary penalties under these programs had increased, the penalties remain “woefully inadequate to deter agricultural employers from violating labor laws and should be significantly increased.” Farmworker Justice recommended that all civil monetary penalties for these programs “be raised significantly in order to have an impact on the pervasive labor law violations in agriculture.” The National Guestworker Alliance (NGA), a membership organization representing contingent workers across labor sectors, submitted a comment addressing civil monetary penalties under the H-1B visa program.⁷ With respect to civil monetary penalties under the H-1B visa program, the NGA commented that while it supports the increases included in the IFR, “it believes that DOL should have increased the penalt[ies]” to the “150 [percent] maximum allowed under the [Inflation Adjustment Act] to help ensure employer compliance with the regulation.”

The Department agrees that civil monetary penalties serve an important role in deterring violations of the programs administered by the Department. Indeed, the Inflation Adjustment Act is intended to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. See DOL IFR, 81 FR at 43431. However, the Department increased civil monetary penalties under the H-1B, H-2A, FLSA, and MSPA programs in the IFR pursuant to the Inflation Adjustment Act’s mandatory “catch-up” adjustment formula, which is specified in the statute and is based on inflation. For this “catch-up” adjustment, the Inflation Adjustment Act required agencies to identify, for each penalty, the year and corresponding amount(s) for which the penalty amount, the maximum penalty level, or range of minimum and maximum penalties was established (*i.e.*, originally enacted by Congress or by regulation) or last adjusted other than pursuant to the Prior Inflation Adjustment Act. That amount became the basis of the “catch-

up” adjustment, subject to a cap on any penalty increase of 150 percent of the current penalty amount as of November 2015—allowing for a total new penalty of no more than 250 percent of the November 2015 penalty amount. See Inflation Adjustment Act, Sec. 701. This cap is triggered *only* where the relevant calculation results in a higher penalty amount; the Inflation Adjustment Act does not permit agencies to increase civil monetary penalties up to this cap where the specified calculation results in an increase lower than 150 percent of the November 2015 penalty amount. *Id.*

As explained in the preamble to the IFR, applying the “catch-up” formula required by the Inflation Adjustment Act, the civil monetary penalties under the FLSA, H-1B, H-2A, and MSPA were increased to the maximum amounts permissible under the Inflation Adjustment Act, none of which reached or exceeded the 150 percent cap. Accordingly, the Department may not further increase civil monetary penalties under these programs pursuant to the Inflation Adjustment Act, other than by making the subsequent annual adjustments for inflation.

B. Occupational Safety and Health Administration (29 CFR Parts 1902, 1903)

In the IFR, the Department increased the civil monetary penalties administered by the Occupational Safety and Health Administration (OSHA) to enforce provisions of the Occupational Safety & Health Act of 1970 (OSH Act), as amended, including conforming edits to the agency’s State Plan regulations. The Department increased these civil monetary penalties pursuant to the “catch-up” adjustment formula as specified in the Inflation Adjustment Act. The Department explained each increase in the preamble to the IFR. The Department received four comments related to State Plans, and four comments related to the civil penalty adjustments.

Section 18(c)(2) of the OSH Act provides that a State may assume responsibility for development and enforcement of its own occupational safety and health standards by submitting a State Plan. There were four State Plan related comments submitted in response to the DOL IFR. One was from the Occupational Safety and Health State Plan Association (OSHSPA) and three from individual State Plans (North Carolina, Kentucky and New Mexico). Responses to these four comments are discussed below.

Section 18(c)(2) of the OSH Act requires that a State Plan “provides for the development and enforcement of

safety and health standards relating to one or more safety or health issues, which standards (and the enforcement of which standards) are or will be at least as effective in providing safe and healthful employment and places of employment as the standards promulgated under section 6 which relate to the same issues. . . .” Prior to the July 1, 2016 publication of the IFR, the State Plan Indices of Effectiveness for initial approval stated that State Plans must “[p]rovide[] effective sanctions against employers who violate State standards and orders, such as those prescribed in the Act.” See 29 CFR 1902.4(c)(2)(xi) (2015). In the factors for determination of final approval status, the regulations require that, “[t]he State proposes penalties in a manner at least as effective as under the Federal program, including the proposing of penalties for first instance violations and the consideration of factors comparable to those required to be considered under the Federal program.” See 29 CFR 1902.37(b)(12).

Thus, OSHA-approved State Plans must have maximum and minimum⁸ penalty levels that are at least as effective as federal OSHA’s per Section 18 (c)(2) of the OSH Act; See 29 CFR 1902.4(c)(2)(xi); 1902.37(b)(12). It is OSHA’s long-standing position that “at least as effective,” in this context, means that State Plans must have maximum and minimum penalty levels that are at least as high as OSHA’s maximum and minimum penalty levels. Therefore, all State Plans must increase their maximum and minimum penalty levels to be at least as high as OSHA’s initial catch-up maximum and minimum penalty levels in 29 CFR 1903.15(d), and must thereafter increase these maximums and minimums based on inflation.

With the publication of the IFR, the location of OSHA’s maximum and minimum penalties was moved from Section 17 of the OSH Act to 29 CFR 1903.15(d). To make it clear where the OSHA penalty levels are located, OSHA amended 29 CFR 1902.4(c)(2)(xi) to now read that State Plans must “[p]rovide[] effective sanctions against employers who violated State standards and orders, such as those prescribed in the Act and 29 CFR 1903.15(d)” (emphasis added). This change was simply to add a reference to the new location of OSHA penalty levels, in 29 CFR 1903.15(d).

OSHSPA submitted a letter requesting that OSHA make clear that the amendment to 29 CFR 1902.4(c)(2)(xi) is

⁶ This comment also addressed civil money penalties under the Occupational Safety and Health Act (OSH Act), which is administered by the Occupational Safety and Health Administration; that portion of Farmworker Justice’s comment is addressed below.

⁷ This comment also addressed civil money penalties under the OSH Act; that portion of NGA’s comment is addressed below.

⁸ The penalties increased include the range of penalties for willful citations, which includes both a minimum and a maximum.

not intended to require State Plans to have an identical penalty structure for assessed penalties. As explained above, State Plans have long been required to have effective sanctions as prescribed in the OSH Act. The penalty levels in the OSH Act (Section 17) have historically been OSHA's maximum and minimum penalties, while OSHA's structure or practice for assessing penalties has been developed through policy and is currently contained in OSHA's Field Operations Manual. OSHA confirms that the amendment to § 1902.4(c)(2)(xi) refers only to the location of the new maximum and minimum penalty levels in 29 CFR 1903.15(d). The change to § 1902.4(c)(2)(xi) does not expand OSHA's scope of authority or control over State Plans' penalties, nor does it alter OSHA's obligation to analyze both State Plan maximum penalties and State Plan penalty assessment structures under the "at least as effective" lens.

The North Carolina Department of Labor submitted a comment that took issue with OSHA's amendment of 29 CFR 1902.4(c)(2)(xi), and was joined by Kentucky Labor Cabinet and the New Mexico Environment Department. The North Carolina State Plan contended that OSHA's amendment to 29 CFR 1902.4(c)(2)(xi) was in excess of the authority granted by the Bipartisan Budget Act of 2015's amendment to the Inflation Adjustment Act; not in conformance with the APA, 5 U.S.C. 553; and arbitrary, capricious, and an abuse of discretion.

The Inflation Adjustment Act directed OSHA to increase maximum and minimum penalties through an IFR issuing without prior notice and comment rather than a change to the OSH Act. OSHA has the inherent authority to make technical amendments to its regulations to conform to Congress's direction to increase its penalty levels. With the change to the location of penalty levels to 29 CFR 1903.15(d), OSHA needed to update the reference in 29 CFR 1902.4(c)(2)(xi) to point to both the Act and the new regulation. This change was merely the addition of a reference, or pointer, to increase clarity and transparency in the State Plan Indices of effectiveness.

The North Carolina, Kentucky and New Mexico State Plans argue that the change to 29 CFR 1902.4(c)(2)(xi) violated the APA because it was not issued through notice-and-comment rulemaking, and the good cause exception to notice-and-comment rulemaking is not applicable.

As noted by the North Carolina State Plan, the APA exception from notice and comment applies to regulations that

make minor technical amendments and non-substantive corrections. *See* p. 3. That comports with the APA language that notice and comment is not required where they are "impractical, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(3)(B). The amendment to 29 CFR 1902.4(c)(2)(xi) fits within that exception because it is a minor, technical amendment that updated the reference to the location of OSHA maximum and minimum penalty levels. It is the "at least as effective" standard in OSH Act § 18 that requires State Plans to increase their maximum and minimum penalty levels, and the amendment to 29 CFR 1902.4(c)(2)(xi) only made clear to State Plans and all other stakeholders that the maximum and minimum penalty levels that State Plans are required to be at least as effective as, are now listed under 29 CFR 1903.15(d), and are no longer in OSH Act § 17. There is no need for notice and comment on that type of "pointer" reference. *See, e.g.,* Corrections and Technical Amendments to 16 OSHA Standards, 76 FR 80735 (Dec. 27, 2011) (updating cross-reference from "Section 101(14)" of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) to "Section 103(14)" after Congress amended CERCLA). Nonetheless, DOL did accept comments on the IFR, and several State Plans took advantage of that opportunity to file comments,

Further, the State Plan comments argue that the change to 29 CFR 1902.4(c)(2)(xi) was arbitrary, capricious, and an abuse of discretion under the APA because it is not based on reasoned analysis. The North Carolina State Plan comment argues that OSHA should present current data to support the requirement that State Plans increase penalties to the level assessed by OSHA effective August 1, 2016 in order to be deemed "at least as effective." Further, the North Carolina State Plan comment emphasizes that the "at least as effective" standard does not require State Plans to have programs identical to OSHA's. New Mexico joined in arguing that assessed penalty levels and injury rates are not correlated and thus penalty levels should not be part of the "at least as effective" analysis.

In the Inflation Adjustment Act, Congress found that "(1) the power of Federal agencies to impose civil monetary penalties for violations of Federal law and regulations plays an important role in deterring violations and furthering the policy goals embodied in such laws and regulations; (2) the impact of many civil monetary penalties has been and is diminished

due to the effect of inflation." *See* 28 U.S.C. 2461 note, § 2(a). This finding is as applicable to State Plan penalties as it is to federal penalties.

The regulations that OSHA adopted (29 CFR 1903.15(d)) address only the maximum and minimum penalty levels—they do not address penalties finally assessed or the methodology involved in calculating assessed penalties. The latter are matters to be determined under the "at least as effective" standard, on a case-by-case basis with each State Plan.

OSHA has an obligation to ensure that State Plans continue to maintain maximum and minimum penalty levels that are at least as effective as OSHA's. OSHA agrees that the "at least as effective" standard does not require State Plans to be identical to OSHA. However, as acknowledged by the OSHSPA comment, historically, State Plans have matched OSHA's maximum and minimum penalties identically. In 1990, when Congress last increased OSHA's maximum and minimum penalty levels, all State Plans adopted identical penalty levels, resulting in the \$7,000/\$70,000 penalty levels in effect for 25 years for both OSHA and the State Plans. OSHA recognizes that the August 1, 2016 increase in OSHA's maximum and minimum penalty levels is complicated by the requirement that the penalties levels increase annually, based on the cost-of-living adjustment, but that does not mean that State Plans do not have to increase their maximum and minimum penalty levels. OSHA will assist the State Plans to make these necessary changes occur. OSHA's position has been and continues to be that State Plans must have maximum and minimum penalties that are at least as effective as OSHA's.

The IFR updated § 1903.15 to read in part, "After, or concurrent with, the issuance of a citation, and within a reasonable time after the termination of the inspection, the Area Director shall notify the employer by certified mail or by personal service by the Compliance Safety and Health Officer of the proposed penalty in accordance with paragraph (d) of this section, or that no penalty is being proposed." In its comments, Contractors Risk Management asked whether this means that the employer will be notified if there are no penalties proposed or no citations issued. At the closing of the inspection process, OSHA conducts a closing conference with the employer and the employee representatives to discuss the findings of the inspection. The compliance officer discusses possible courses of action an employer may take following an inspection,

which could include an informal conference with OSHA or contesting citations and proposed penalties where citations and penalties are proposed. The compliance officer also discusses consultation services and employee rights. This closing conference is held regardless of whether citations and penalties are proposed.

The IFR added § 1903.15(d) to provide the adjusted civil penalties for penalties proposed on or after August 1, 2016. Contractors Risk Management expressed concern about a case being opened before August 1, but higher penalty levied because the time OSHA takes to complete the case goes beyond August 1. The Inflation Adjustment Act mandates that the catch-up adjustment apply to any civil monetary penalty assessed after August 1, 2016, “including those whose associated violation predated such increase” See Public Law 114–74 at § 701. OSHA attempted to complete open cases prior to the August 1 conversion date. However, in some cases, citations for inspections opened prior to August 1st were not issued until after August 1, and enhanced penalties were proposed under the new rules. OSHA made every effort to inform employers, through outreach, use of our Web site, and notices to affected employers, of the changes to our penalties and the potential impact on the inspection.

The NGA commented that it supports the increases in penalties for employer violations of the OSH Act, but believes that the Department should have increased the penalties to the 150% maximum allowed under Inflation Adjustment Act to help ensure employer compliance with the law. Farmworker Justice similarly commented that civil monetary penalties under the OSH Act should be increased. The Department agrees that civil monetary penalties serve an important role in deterring violations of the programs administered by the Department. However, the Department increased civil monetary penalties under the OSH Act in the IFR pursuant to the Inflation Adjustment Act’s mandatory “catch-up” adjustment formula, which is specified in the statute and is based on inflation. For this “catch-up” adjustment, the Inflation Adjustment Act required agencies to identify, for each penalty, the year and corresponding amount(s) for which the penalty amount, the maximum penalty level, or range of minimum and maximum penalties was established (*i.e.*, originally enacted by Congress or by regulation) or last adjusted other than pursuant to the Prior Inflation Adjustment Act. That

amount became the basis of the “catch-up” adjustment, subject to a cap on any penalty increase of 150 percent of the current penalty amount as of November 2015—allowing for a total new penalty of no more than 250 percent of the November 2015 penalty amount. See Inflation Adjustment, Sec. 701. This cap is triggered *only* where the relevant calculation results in a higher penalty amount; the Inflation Adjustment Act does not permit agencies to increase civil monetary penalties up to this cap where the specified calculation results in an increase lower than 150 percent of the November 2015 penalty amount. *Id.* By applying the “catch-up” formula required by the Inflation Adjustment Act, the civil monetary penalties under the OSH Act were increased to the maximum amounts permissible under the Inflation Adjustment Act, none of which reached or exceeded the 150 percent cap.

The Center for Progressive Reform commented that it applauds the agency for adjusting the penalties to the maximum amount permitted by the Inflation Adjustment Act, but it encourages OSHA to revise its informal settlement policies. In response to the penalty adjustments mandated by Congress, OSHA revised Chapter 6 of its Field Operations Manual. In revising the guidance, OSHA wanted to be consistent with current procedures and ensure that penalties were impactful. However, we were also mindful of the impact that these changes may have had on small businesses. To offset any undue impact, OSHA created an additional size category for businesses with 1–10 employees, and now offers a reduction of 70 percent for those smallest businesses. The informal settlement policy remains the same, but OSHA is closely monitoring the influence that the new penalties have on our contest rates, etc. to see where adjustments, if needed, may be appropriate.

C. Employee Benefits Security Administration (29 CFR Part 2560, 2575, 2590)

In the IFR, the Department increased the civil monetary penalties administered by the Employee Benefits Security Administration to enforce provisions of the Employee Retirement Income Security Act of 1974, as amended, (ERISA). The Department increased these civil monetary penalties as required by the “catch-up” adjustment formula specified in the Inflation Adjustment Act. Minor modifications were made to 29 CFR 2575.3 to clarify that future inflation adjustments to ERISA civil monetary

penalties would be made by notice in the **Federal Register** without amending the code of federal regulations each year to reflect an increase in the penalty amount.

The Department received one comment letter regarding the adjustment of the ERISA civil monetary penalties under the IFR. The commenter, the National Association of Health Underwriters (NAHU), stated that “the formula used to increase penalties was fairly applied in the IFR.” NAHU, however, questioned the “decision to impose increased penalties on employers at this time” due to the increased cost of compliance and reporting responsibilities placed on group health plans by the Patient Protection and Affordable Care Act (ACA). NAHU expressed concern “that increasing the potential penalties could have a detrimental impact on an employer’s potential willingness to offer group benefits, particularly for smaller employers that have not previously offered coverage.” Most ERISA civil monetary penalties affecting group health plans are expressed in terms of “up to” or “not more than” a maximum penalty. The Department did not automatically impose the maximum penalty in the past and has no plans at this time to change its enforcement policy to maximize penalty collections following the catch-up adjustment. It is the view of the Department that neither the catch-up adjustment nor any subsequent adjustment will have the detrimental impact on group health plans suggested by NAHU. Accordingly, the unverifiable social cost of the catch-up adjustment postulated by NAHU’s comment does not outweigh the benefits of increasing the ERISA civil monetary penalties by the otherwise required amount.

Section 4(a) of the Inflation Adjustment Act states that “[n]ot later than July 1, 2016, and not later than January 15 of every year thereafter,” the head of each agency shall adjust civil monetary penalties in accordance with section 4(b). Section 4(b)(1) states that “for purposes of the first adjustment” (*i.e.*, the catch-up adjustment) the “head of each agency shall adjust the civil monetary penalties by IFR” that “shall take effect no later than August 1, 2016.” Since the operative word of the statute is “shall,” the Department did not have the discretion to delay adjustment of the ERISA civil monetary penalties beyond August 1, 2016, except as otherwise provided by section 4(c) of the Inflation Adjustment Act.

Under section 4(c), an agency could not delay or otherwise reduce the catch-up adjustment unless: (1) After

publishing a notice of proposed rulemaking in the **Federal Register**, the agency determines that the increase in the penalty or penalty range would have a negative economic impact, or that the social costs of increasing the penalty would outweigh the benefits, and (2) OMB concurred with that determination. OMB advised that an agency seeking OMB's concurrence to a reduction of the required catch-up adjustment must submit the associated notice of proposed rulemaking to the Office of Information and Regulatory Affairs (OIRA) of OMB for review by May 2, 2016.⁹ OMB also advised that its concurrence to a reduction of the catch-up adjustment would be "rare."¹⁰ The Department decided not to pursue a reduction in the increase of any of the ERISA penalties, because, in the Department's view, there was no negative economic impact or a verifiable social cost resulting from the catch-up adjustment. Since the Department did not submit the requisite notice of proposed rulemaking to OIRA by May 2, 2016, the Department arguably does not have the authority to reduce a required catch-up adjustment to an ERISA penalty under section 4(c). Even if the Department currently has the authority to reduce a catch-up adjustment under section 4(c), the one comment received by the Department regarding ERISA penalties did not provide sufficient evidence of negative economic impact or social cost for the Department to seek a reduction of the increased ERISA penalties resulting from the catch-up adjustment.

IV. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the Department consider the impact of paperwork and other information collection burdens imposed on the public. The Department has determined that this final rule does not require any collection of information.

V. Administrative Procedure Act

The Inflation Adjustment Act provides that agencies shall annually adjust civil monetary penalties for inflation notwithstanding Section 553 of the APA. Additionally, the Inflation Adjustment Act provides a nondiscretionary cost-of-living formula for annual adjustment of the civil monetary penalties. For these reasons, the requirements in sections 553(b), (c), and (d) of the APA, relating to notice

and comment and requiring that a rule be effective 30 days after publication in the **Federal Register**, are inapplicable.

VI. Executive Order 12866: Regulatory Planning and Review, and Executive Order 13563: Improving Regulation and Regulatory Review

Executive Order 12866 requires that regulatory agencies assess both the costs and benefits of significant regulatory actions. Under the Executive Order, a "significant regulatory action" is one meeting any of a number of specified conditions, including the following: Having an annual effect on the economy of \$100 million or more; creating a serious inconsistency or interfering with an action of another agency; materially altering the budgetary impact of entitlements or the rights of entitlement recipients, or raising novel legal or policy issues.

The Department has determined that this final rule is not a "significant" regulatory action and a cost-benefit and economic analysis is not required. This regulation merely adjusts civil monetary penalties in accordance with inflation as required by the Inflation Adjustment Act, and has no impact on disclosure or compliance costs. The benefit provided by the inflationary adjustment to the maximum civil monetary penalties is that of maintaining the incentive for the regulated community to comply with the laws enforced by the Department, and not allowing the incentive to be diminished by inflation.

Executive Order 13563 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility to minimize burden.

This final rule is exempt from the requirements of the APA because the Inflation Adjustment Act directed the Department to issue the annual adjustments without regard to Section 553 of the APA. In that context, Congress has already determined that any possible increase in costs is justified by the overall benefits of such adjustments. This final rule makes only the statutory changes outlined herein; thus there are no alternatives or further analysis required by E.O. 13563.

VII. Regulatory Flexibility Act and Small Business Regulatory Enforcement Fairness Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), imposes certain requirements on Federal agency rules that are subject to the notice and comment requirements of the APA, 5 U.S.C. 553(b). This final rule is exempt from the requirements of the APA because the Inflation Adjustment Act directed the Department to issue the annual adjustments without regard to Section 553 of the APA. Therefore, the requirements of the RFA applicable to notices of proposed rulemaking, 5 U.S.C. 603, do not apply to this rule. Accordingly, the Department is not required to either certify that the final rule would not have a significant economic impact on a substantial number of small entities or conduct a regulatory flexibility analysis.

VIII. Other Regulatory Considerations

A. The Unfunded Mandates Reform Act of 1995

Because the rule simply adjusts for inflation, it does not include any Federal mandate that may result in increased expenditures by State, local, or tribal governments; nor does it increase private sector expenditures by more than \$100 million annually; nor does it significantly or uniquely affect small governments. Accordingly, the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et seq.*) requires no further agency action or analysis.

B. Executive Order 13132: Federalism

Section 18 of the OSHA Act (29 U.S.C. 667) requires OSHA-approved State Plans to have standards and an enforcement program that are at least as effective as federal OSHA's standards and enforcement program. OSHA-approved State Plans must have maximum and minimum penalty levels that are at least as effective as federal OSHA's per Section 18 (c)(2) of the OSHA Act; 29 CFR 1902.4(c)(2)(xi); 1902.37(b)(12). State Plans are required to increase their penalties in alignment with OSHA's penalty increases to maintain at least as effective penalty levels.

State Plans are not required to impose monetary penalties on state and local government employers. *See* § 1956.11(c)(2)(x). Five (5) states and one territory have State Plans that cover only state and local government employees: Connecticut, Illinois, New Jersey, New York, Maine, and the Virgin Islands. Therefore, the requirements to increase the penalty levels do not apply to these State Plans. Twenty-one (21)

⁹ See, OMB Mem. M-16-06 (Feb. 24, 2016), available at <https://www.whitehouse.gov/sites/default/files/omb/memoranda/2016/m-16-06.pdf>.

¹⁰ *Id.*

states and one U.S. territory have State Plans that cover both private sector employees and state and local government employees: Alaska, Arizona, California, Hawaii, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Nevada, New Mexico, North Carolina, Oregon, Puerto Rico, South Carolina, Tennessee, Utah, Vermont, Virginia, Washington, and Wyoming. These states must increase their penalties for private-sector employers.

Other than as listed above, this final rule does not have federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Accordingly, Executive Order 13132, Federalism, requires no further agency action or analysis.

C. Executive Order 13175: Indian Tribal Governments

This final rule does not have “tribal implications” because it does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes. Accordingly, Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, requires no further agency action or analysis.

D. The Treasury and General Government Appropriations Act of 1999: Assessment of Federal Regulations and Policies on Families

This final rule will have no effect on family well-being or stability, marital commitment, parental rights or authority, or income or poverty of families and children. Accordingly, section 654 of the Treasury and General Government Appropriations Act of 1999 (5 U.S.C. 601 note) requires no further agency action, analysis, or assessment.

E. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This final rule will have no adverse impact on children. Accordingly, Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks, as amended by Executive Orders 13229 and 13296, requires no further agency action or analysis.

F. Environmental Impact Assessment

A review of this final rule in accordance with the requirements of the

National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321 *et seq.*; the regulations of the Council on Environmental Quality, 40 CFR 1500 *et seq.*; and the Departmental NEPA procedures, 29 CFR part 11, indicates that the final rule will not have a significant impact on the quality of the human environment. As a result, there is no corresponding environmental assessment or an environmental impact statement.

G. Executive Order 13211: Energy Supply

This final rule has been reviewed for its impact on the supply, distribution, and use of energy because it applies, in part, to the coal mining and uranium industries. MSHA has concluded that the adjustment of civil monetary penalties to keep pace with inflation and thus maintain the incentive for operators to maintain safe and healthful workplaces is not a significant energy action because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

This final rule has not been identified to have other impacts on energy supply. Accordingly, Executive Order 13211 requires no further Agency action or analysis.

H. Executive Order 12630: Constitutionally Protected Property Rights

This final rule will not implement a policy with takings implications. Accordingly, Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, requires no further agency action or analysis.

I. Executive Order 12988: Civil Justice Reform Analysis

This final rule was drafted and reviewed in accordance with Executive Order 12988, Civil Justice Reform. This final rule was written to provide a clear legal standard for affected conduct and was carefully reviewed to eliminate drafting errors and ambiguities, so as to minimize litigation and undue burden on the Federal court system. The Department has determined that this IFR meets the applicable standards provided in section 3 of Executive Order 12988.

List of Subjects

20 CFR Part 655

Immigration, Penalties, Labor.

20 CFR Part 702

Administrative practice and procedure, Longshore and harbor workers, Penalties, Reporting and

recordkeeping requirements, Workers' compensation.

20 CFR Part 725

Administrative practice and procedure, Black lung benefits, Coal miners, Penalties, Reporting and recordkeeping requirements.

§ 726.302(c)(6)	August 1, 2016	January 13, 2017.
§ 726.302(c)(6)	\$2,750	\$2,795.

Department of Labor

Wage and Hour Division

Title 29—Labor

PART 500—MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION

■ 9. The authority citation for part 500 continues to read as follows:

Authority: Pub. L. 97–470, 96 Stat. 2583 (29 U.S.C. 1801–1872); Secretary's Order No. 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 Note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74, 129 Stat 584.

§ 500.1 [Amended]

■ 10. In § 500.1, amend paragraph (e) by removing “\$2,355” and adding in its place “\$2,394”.

PART 501—ENFORCEMENT OF CONTRACTUAL OBLIGATIONS FOR TEMPORARY ALIEN AGRICULTURAL WORKERS ADMITTED UNDER SECTION 218 OF THE IMMIGRATION AND NATIONALITY ACT

■ 11. The authority citation for part 501 continues to read as follows:

Authority: 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1188; 28 U.S.C. 2461 Note

(Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74 at § 701.

§ 501.19 [Amended]

■ 12. In the table below, for each paragraph indicated in the left column, remove the dollar amount indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount indicated in the right column.

Paragraph	Remove	Add
§ 501.19(c) introductory text	\$1,631	\$1,658
§ 501.19(c)(1)	5,491	5,581
§ 501.19(c)(2)	54,373	55,263
§ 501.19(c)(4)	108,745	110,524
§ 501.19(d)	5,491	5,581
§ 501.19(e)	16,312	16,579
§ 501.19(f)	16,312	16,579

PART 530—EMPLOYMENT OF HOMEWORKERS IN CERTAIN INDUSTRIES

■ 13. The authority citation for part 530 continues to read as follows:

Authority: Sec. 11, 52 Stat. 1066 (29 U.S.C. 211) as amended by sec. 9, 63 Stat. 910 (29 U.S.C. 211(d)); Secretary's Order No. 01–2014

(Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at sec. 701, 129 Stat 584.

■ 14. In § 530.302, amend paragraph (a) by removing “\$989” and adding in its place “\$1,005” and revise paragraph (b) to read as follows:

§ 530.302 Amounts of civil penalties.

* * * * *

(b) The amount of civil money penalties shall be determined per affected homeworker within the limits set forth in the following schedule, except that no penalty shall be assessed in the case of violations which are deemed to be *de minimis* in nature:

Nature of violation	Penalty per affected homeworker		
	Minor	Substantial	Repeated, intentional or knowing
Recordkeeping	\$20–201	\$201–402	\$402–1,005
Monetary violations	20–201	201–402	
Employment of homeworkers without a certificate		201–402	402–1,005
Other violations of statutes, regulations or employer assurances	20–201	201–402	402–1,005

PART 570—CHILD LABOR REGULATIONS, ORDERS AND STATEMENTS OF INTERPRETATION

■ 15. The authority citation for Subpart G of part 570 continues to read as follows:

Authority: 52 Stat. 1060–1069, as amended; 29 U.S.C. 201–219; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at § 701.

§ 570.140 [Amended]

■ 16. In § 570.140, amend paragraph (b)(1) by removing “\$12,080” and adding in its place “\$12,278” and paragraph (b)(2) by removing “\$54,910” and adding in its place “\$55,808”.

PART 578—MINIMUM WAGE AND OVERTIME VIOLATIONS—CIVIL MONEY PENALTIES

■ 17. The authority citation for part 578 continues to read as follows:

Authority: Sec. 9, Pub. L. 101–157, 103 Stat. 938, sec. 3103, Pub. L. 101–508, 104 Stat. 1388–29 (29 U.S.C. 216(e)), Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), as amended by Pub. L. 104–134, section 31001(s), 110 Stat. 1321–358, 1321–373, and Pub. L. 114–74, 129 Stat 584.

§ 578.3 [Amended]

■ 18. In § 578.3, amend paragraph (a) by removing “\$1,894” and adding in its place “\$1,925”.

PART 579—CHILD LABOR VIOLATIONS—CIVIL MONEY PENALTIES

■ 19. The authority citation for part 579 continues to read as follows:

Authority: 29 U.S.C. 203(l), 211, 212, 213(c), 216; Reorg. Plan No. 6 of 1950, 64 Stat. 1263, 5 U.S.C. App; secs. 25, 29, 88 Stat. 72, 76; Secretary of Labor’s Order No. 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 Note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–7, 129 Stat 584.

§ 579.1 [Amended]

■ 20. In the table below, for each paragraph indicated in the left column, remove the dollar amount indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount indicated in the right column.

Paragraph	Remove	Add
§ 579.1(a)(1)(i)(A)	\$12,080	\$12,278
§ 579.1(a)(1)(i)(B)	54,910	55,808
§ 579.1(a)(2)	1,894	1,925

PART 801—APPLICATION OF THE EMPLOYEE POLYGRAPH PROTECTION ACT OF 1988

■ 21. The authority citation for part 801 continues to read as follows:

Authority: Pub. L. 100–347, 102 Stat. 646, 29 U.S.C. 2001–2009; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at sec. 701, 129 Stat 584.

§ 801.42 [Amended]

■ 22. In § 801.42, amend paragraph (a) by removing “\$19,787” and adding in its place “\$20,111”.

PART 825—THE FAMILY AND MEDICAL LEAVE ACT OF 1993

■ 23. The authority citation for part 825 continues to read as follows:

Authority: 29 U.S.C. 2654; 28 U.S.C. 2461 Note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74 at sec. 701.

§ 825.300 [Amended]

■ 24. In § 825.300 amend paragraph (a)(1) by removing “\$163” and adding in its place “\$166”.

Department of Labor**Occupational Safety and Health Administration****Title 29—Labor****PART 1903—INSPECTIONS, CITATIONS, AND PROPOSED PENALTIES**

■ 25. The authority citation for part 1903 continues to read as follows:

Authority: Secs. 8 and 9 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 657, 658); 5 U.S.C. 553; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990), as amended by Section 701, Pub. L. 114–74; Secretary of Labor’s Order No. 1–2012 (77 FR 3912, Jan. 25, 2012).

§ 1903.15 [Amended]

■ 26. In the table below, for each paragraph indicated in the left column, remove the dollar amount or date indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount or date indicated in the right column.

Paragraph	Remove	Add
§ 1903.15(d) introductory text	on or after August 1, 2016.	after January 13, 2017.
§ 1903.15(d)(1)	\$8,908	\$9,054.
§ 1903.15(d)(1)	124,709	126,749.
§ 1903.15(d)(2)	124,709	126,749.
§ 1903.15(d)(3)	12,471	12,675.
§ 1903.15(d)(4)	12,471	12,675.
§ 1903.15(d)(5)	12,471	12,675.
§ 1903.15(d)(6)	12,471	12,675.

Department of Labor**Employee Benefits Security Administration****Title 29—Labor****PART 2575—ADJUSTMENT OF CIVIL PENALTIES UNDER ERISA TITLE I**

■ 27. The authority citation for subpart A of 29 CFR part 2575 continues to read as follows:

Authority: Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), as amended by section 31001(s) of Pub. L. 104–134, 110 Stat. 1321–373, and section 701 of Pub. L. 114–74, 129 Stat. 584; 29 U.S.C 1059(b), 1132(c), 1135 and 1185d; and Secretary of Labor's Order 1–2011, 77 FR 1088 (January 9, 2012).

■ 28. Revise § 2575.3 to read as follows:

§ 2575.3 Subsequent adjustments to civil monetary penalties

No later than January 15, starting in 2017, and each subsequent year, the Secretary shall adjust for inflation, as required by the Inflation Adjustment Act, the civil monetary penalties described in § 2575.2 for violations occurring on or after November 2, 2015, and any future civil monetary penalties enforceable by the Secretary under title I of ERISA. The Secretary shall publish such annual adjustments in the **Federal Register** notwithstanding section 553 of the Administrative Procedure Act. Future penalties or adjustments to the amount of the penalty that are enacted by statute or regulation (other than an adjustment for inflation under the Inflation Adjustment Act) will not be adjusted for inflation in the first year those penalty levels take effect. Annual inflation adjustments shall apply to penalties assessed after the date notice of the annual inflation adjustment is published in the **Federal Register**.

Department of Labor**Mine Safety and Health Administration****Title 30—Mineral Resources****PART 100—CRITERIA AND PROCEDURES FOR PROPOSED ASSESSMENT OF CIVIL PENALTIES**

■ 29. The authority citation for part 100 continues to read as follows:

Authority: 5 U.S.C. 301; 30 U.S.C. 815, 820, 957; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at sec. 701;

■ 30. In § 100.3, amend paragraph (a)(1) introductory text by removing “\$68,300” and adding in its place “\$69,417” and in paragraph (g) by revising Table XIV—Penalty Conversion Table to read as follows:

RIN 1535–BN06

Certain Transfers of Property to Regulated Investment Companies [RICs] and Real Estate Investment Trusts [REITs]

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations effecting the repeal of the *General Utilities* doctrine by the Tax Reform Act of 1986. The final regulations address the length of time during which a RIC or a REIT may be subject to corporate level tax on certain dispositions of property. The final regulations affect RICs and REITs.

DATES: *Effective Date:* These regulations are effective January 18, 2017.

Applicability Dates: For dates of applicability, see § 1.337(d)–7(g)(2)(iii).

FOR FURTHER INFORMATION CONTACT:

Austin M. Diamond-Jones, (202) 317–5363 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to 26 CFR part 1. On June 8, 2016, the Department of the Treasury (Treasury Department) and the IRS published temporary regulations (TD 9770) under section 337(d) (temporary regulations) in the **Federal Register** (81 FR 36793) concerning certain transfers of property to regulated investment companies (RICs) and real estate investment trusts (REITs). A notice of proposed rulemaking cross-referencing the temporary regulations (REG–126452–15) (proposed regulations) was published in the **Federal Register** (81 FR 36816) on the same day. A correction to the temporary regulations was published in the **Federal Register** (81 FR 41800) on June 28, 2016. The Treasury Department and the IRS received one written comment in response to the proposed regulations. The comment requested a public hearing, and a hearing was held on November 9, 2016. After consideration of the written comment and the comments made at the public hearing, the proposed regulations are adopted in part and as amended by this Treasury decision, and the corresponding temporary regulations are removed in part. The revisions adopted by this Treasury decision are discussed below.

Summary of Comments and Explanation of Revisions

The comment requested that the temporary regulations and the proposed regulations with respect to the

recognition period be immediately withdrawn and the recognition period with respect to REITs be defined with reference to the recognition period of section 1374(d)(7), which is currently a five-year period as a result of section 127(a) of the Protecting Americans Against Tax Hikes Act of 2015 (PATH Act), enacted as Division Q of the Consolidated Appropriations Act, 2016, Public Law 114–113, 129 Stat. 2422. The comment asserted that the change to the length of the recognition period in the temporary regulations and the proposed regulations was inconsistent with Congress's intent in the PATH Act and with prior administrative guidance. On October 18, 2016, the Chairmen and Ranking Members of the Ways and Means Committee of the U.S. House of Representatives and the Finance Committee of the U.S. Senate addressed a letter to the Secretary of the Treasury stating that the recognition period in the temporary regulations and the proposed regulations was inconsistent with congressional intent and the longstanding practice of treating REITs and RICs as having the same built-in gain recognition period as S corporations, currently five years. The Chairmen and Ranking Members also asked that the temporary regulations and the proposed regulations be modified to provide that REITs, RICs and S corporations are all subject to the same five-year built-in gain recognition period in order to be consistent with congressional intent and longstanding practice.

The Treasury Department and the IRS decline to withdraw the temporary regulations and the proposed regulations relating to the recognition period but agree with the comment relating to the length of the recognition period. Accordingly, these final regulations provide that the term *recognition period* means the recognition period described in section 1374(d)(7), beginning, in the case of a conversion transaction that is a qualification of a C corporation as a RIC or a REIT, on the first day of the RIC's or the REIT's first taxable year, and, in the case of other conversion transactions, on the day the RIC or the REIT acquires the property. The final regulations will apply prospectively from February 17, 2017, but taxpayers may choose to apply the definition of recognition period in the final regulations, instead of the 10-year recognition period in the temporary regulations, for conversion transactions occurring on or after August 8, 2016, and on or before February 17, 2017.

The Treasury Department and the IRS continue to study the other issues addressed in the temporary regulations and the proposed regulations, including other issues raised by the comment, and welcome further comment on those issues.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented by Executive Order 13653. Therefore, a regulatory assessment is not required. Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that this regulation will primarily affect large corporations with a substantial number of shareholders. Accordingly, a regulatory flexibility analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding this regulation was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business, and no comments were received.

Drafting Information

The principal author of these regulations is Austin M. Diamond-Jones, Office of Associate Chief Counsel (Corporate). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.337(d)–7 is amended by revising paragraphs (b)(2)(iii) and (g)(2)(iii) to read as follows:

§ 1.337(d)–7 Tax on property owned by a C corporation that becomes property of a RIC or REIT.

* * * * *

(b) * * *
(2) * * *

(iii) *Recognition period.* For purposes of applying the rules of section 1374 and the regulations thereunder, as modified by paragraph (b) of this section, the term *recognition period* means the recognition period described in section 1374(d)(7), beginning—

(A) In the case of a conversion transaction that is a qualification of a C corporation as a RIC or a REIT, on the first day of the RIC's or the REIT's first taxable year; and

(B) In the case of other conversion transactions, on the day the RIC or the REIT acquires the property.

* * * * *

(g) * * *
(2) * * *

(iii) *Recognition period.* Paragraphs (b)(1)(ii) and (d)(2)(iii) of this section apply to conversion transactions that occur on or after August 8, 2016. Paragraph (b)(2)(iii) of this section applies to conversion transactions that occur after February 17, 2017. For conversion transactions that occurred on or after August 8, 2016 and on or before February 17, 2017, see § 1.337(d)–7T(b)(2)(iii) in effect on August 8, 2016. However, taxpayers may apply paragraph (b)(2)(iii) of this section to conversion transactions that occurred on or after August 8, 2016 and on or before February 17, 2017. For conversion transactions that occurred on or after January 2, 2002 and before August 8, 2016, see § 1.337(d)–7 as contained in 26 CFR part 1 in effect on April 1, 2016.

■ **Par. 3.** Section 1.337(d)–7T is amended by revising paragraphs (b)(1) through (3) and (g)(2)(iii) to read as follows:

§ 1.337(d)–7T Tax on property owned by a C corporation that becomes property of a RIC or REIT.

* * * * *

(b)(1) through (3) [Reserved]. For further guidance, see § 1.337(d)–7(b)(1) through (3).

* * * * *

(g) * * *
(2) * * *

(iii) [Reserved]. For further guidance, see § 1.337(d)–7(g)(2)(iii).

* * * * *

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

Approved: December 30, 2016.

Mark J. Mazur,

Assistant Secretary of the Treasury (Tax Policy).

Guidance for Determining Stock Ownership; Rules Regarding Inversions and Related Transactions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations, temporary regulations, and removal of temporary regulations.

SUMMARY: This document contains final regulations that identify certain stock of a foreign corporation that is disregarded in calculating ownership of the foreign corporation for purposes of determining whether it is a surrogate foreign corporation. These regulations also provide guidance on the effect of transfers of stock of a foreign corporation after the foreign corporation has acquired substantially all of the properties of a domestic corporation or of a trade or business of a domestic partnership. These regulations affect certain domestic corporations and partnerships (and certain parties related thereto) and foreign corporations that acquire substantially all of the properties of such domestic corporations or of the trades or businesses of such domestic partnerships. The text of the temporary regulations also serves as the text of the proposed regulations set forth in the notice of proposed rulemaking on Rules

Regarding Inversions and Related Transactions in the Proposed Rules section of this issue of the **Federal Register**.

DATES: Effective Date: These regulations are effective on January 18, 2017.

Applicability Dates: For dates of applicability, see §§ 1.7874–4(k), 1.7874–5(e), 1.7874–7T(h), and 1.7874–10T(i).

FOR FURTHER INFORMATION CONTACT: Joshua G. Rabon at (202) 317–6937 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains regulations under section 7874 of the Internal Revenue Code (Code). On September 17, 2009, the Department of the Treasury (Treasury Department) and the IRS issued Notice 2009–78 (2009–40 IRB 452), which announced that regulations would be issued under section 7874 identifying certain stock of a foreign corporation that would not be taken into account for purposes of determining the ownership percentage described in section 7874(a)(2)(B)(ii) (the 2009 notice). On January 17, 2014, temporary regulations (TD 9654) were published in the **Federal Register** (79 FR 3094) that implemented and obsoleted the 2009 notice and provided guidance with respect to subsequent transfers of stock of a foreign corporation described in section 7874(a)(2)(B)(ii) (the 2014 temporary regulations). A notice of proposed rulemaking (REG–121534–12) cross-referencing the 2014 temporary regulations was published in the same issue of the **Federal Register** (79 FR 3145) (the 2014 proposed regulations). On November 19, 2015, the Treasury Department and the IRS issued Notice 2015–79 (2015–49 IRB 775), which announced, in part, that regulations would be issued to clarify certain aspects of the 2014 temporary regulations (the 2015 notice). On April 8, 2016, the Treasury Department and the IRS published temporary regulations (TD 9761) in the **Federal Register** (81 FR 20858) that, in part, implemented the clarifications announced in the 2015 notice and provided common definitions for purposes of certain regulations under sections 367(b), 956, 7701(l), and 7874 (the 2016 temporary regulations). A notice of proposed rulemaking (REG–135734–14) cross-referencing the 2016 temporary regulations was published in the same issue of the **Federal Register** (81 FR 20588) (the 2016 proposed regulations). The 2014 temporary regulations as modified by the 2016 temporary regulations are referred to in this

preamble as the “temporary regulations.” No public hearing was requested or held on the 2014 proposed regulations or the 2016 proposed regulations; however, comments were received. All comments are available at www.regulations.gov or upon request. After consideration of the comments, the 2014 proposed regulations, as modified by the 2016 proposed regulations and as updated to reflect the common definitions in those regulations, are adopted as amended by this Treasury decision, and the corresponding temporary regulations are removed.

Summary of Comments and Explanation of Revisions

I. The Disqualified Stock Rule—General Approach

A foreign corporation (foreign acquiring corporation) generally is treated as a surrogate foreign corporation under section 7874(a)(2)(B) if, pursuant to a plan (or a series of related transactions), three conditions are satisfied. First, the foreign acquiring corporation completes, after March 4, 2003, the direct or indirect acquisition of substantially all of the properties held directly or indirectly by a domestic corporation (domestic entity acquisition). Second, after the domestic entity acquisition, at least 60 percent of the stock (by vote or value) of the foreign acquiring corporation is held by former shareholders of the domestic corporation (former domestic entity shareholders) by reason of holding stock in the domestic corporation (such percentage, the ownership percentage, and the fraction used to calculate the ownership percentage, the ownership fraction). And third, after the domestic entity acquisition, the expanded affiliated group (as defined in section 7874(c)(1)) that includes the foreign acquiring corporation (EAG) does not have substantial business activities in the foreign country in which, or under the law of which, the foreign acquiring corporation is created or organized when compared to the total business activities of the EAG. Similar provisions apply if a foreign acquiring corporation acquires substantially all of the properties constituting a trade or business of a domestic partnership. The domestic corporation or the domestic partnership described in this paragraph is referred to at times in this preamble as the “domestic entity.” For other definitions used throughout this preamble but not defined in this preamble, see § 1.7874–12T (providing common definitions for purposes of

certain regulations under sections 367(b), 956, 7701(l), and 7874).

The temporary regulations provide a rule (the disqualified stock rule) that, subject to a de minimis exception, excludes disqualified stock from the denominator of the ownership fraction. In general, disqualified stock is stock of the foreign acquiring corporation that, in a transaction related to the domestic entity acquisition, is transferred in one of two types of exchanges. See Parts II.A and B of this Summary of Comments and Explanation of Revisions for the discussion of these exchanges. However, stock is disqualified stock only to the extent that the transfer of the stock in the exchange increases the fair market value of the assets of the foreign acquiring corporation or decreases the amount of its liabilities (the net asset requirement). The disqualified stock rule thus generally prevents stock of the foreign acquiring corporation that is transferred in certain transactions that increase the net assets of the foreign acquiring corporation from inappropriately increasing the denominator of the ownership fraction and thereby diluting the ownership percentage.

Under the temporary regulations, stock may be disqualified stock regardless of whether it is, has been, or will be publicly traded. In addition, stock may be disqualified stock regardless of whether it is transferred by reason of an issuance, sale, distribution, exchange, or any other type of disposition, or whether it is transferred by the foreign acquiring corporation or another person.

One comment suggested that disqualified stock should generally include only stock transferred by reason of an issuance by the foreign acquiring corporation. According to the comment, this would generally simplify the disqualified stock rule by obviating the need for the net asset requirement, though it noted that special rules regarding hook stock would likely be needed. The final regulations do not adopt this comment. The Treasury Department and the IRS have determined that transfers other than solely by reason of an issuance can inappropriately dilute the ownership percentage. For example, see § 1.7874–4(j) *Example 6* (iii) (issuance of stock by the foreign acquiring corporation in exchange for qualified property followed by a transfer of that stock by the transferee in satisfaction of an obligation of the transferee) and § 1.7874–4(j) *Example 10* (issuance of stock followed by use of the stock to satisfy an obligation). The Treasury Department and the IRS have concluded

that addressing these transactions and other transactions (such as transactions involving hook stock) via special rules would largely negate the simplicity benefits of the approach recommended by the comment.

II. Exchanges That Give Rise to Disqualified Stock

A. Exchanges for Nonqualified Property

1. In General

Disqualified stock includes stock of the foreign acquiring corporation that, in a transaction related to the domestic entity acquisition, is transferred to a person other than the domestic entity in exchange for “nonqualified property.” Nonqualified property means (i) cash or cash equivalents, (ii) marketable securities, (iii) certain obligations (as discussed in Part II.A.3 of this Summary of Comments and Explanation of Revisions), and (iv) any other property acquired with a principal purpose of avoiding the purposes of section 7874, regardless of whether the transaction involves an indirect transfer of property described in clause (i), (ii), or (iii). This preamble refers at times to the property described in clauses (i), (ii), and (iii) of the preceding sentence collectively as “specified nonqualified property” and to the property described in clause (iv) as “avoidance property.” For this purpose, marketable securities has the meaning set forth in section 453(f)(2), except that the term does not include stock of a corporation or an interest in a partnership that becomes a member of the EAG in a transaction (or series of transactions) related to the domestic entity acquisition.

2. Different Treatment for Stock and Asset Acquisitions

Under the temporary regulations, the extent to which stock of a foreign acquiring corporation is considered transferred in exchange for nonqualified property can differ depending on the structure of a transaction. For example, if, in a transaction related to a domestic entity acquisition, the foreign acquiring corporation acquires all the stock of another foreign corporation (foreign target corporation) in exchange for stock of the foreign acquiring corporation, then such stock of the foreign acquiring corporation would normally not be considered transferred in exchange for nonqualified property, regardless of the extent to which the properties of the foreign target corporation constitute nonqualified property, unless the stock of the foreign target corporation constitutes avoidance property. However, if the transaction were instead structured so that the foreign acquiring

corporation acquires all of the properties of the foreign target corporation in exchange for stock of the foreign acquiring corporation, then such stock of the foreign acquiring corporation would be considered transferred in exchange for nonqualified property, to the extent that the properties of the foreign target corporation constitute nonqualified property. The preamble to the 2014 temporary regulations acknowledged this disparity and the decision not to harmonize the treatment of stock and asset acquisitions by, for example, applying a look-through approach to stock acquisitions. See Part C of the Explanation of Provisions section of the preamble to the 2014 temporary regulations. Nevertheless, comments requested more consistent treatment between stock and asset acquisitions, noting in particular that, when the foreign target corporation is publicly-traded, corporate and other legal considerations may dictate the structure of the transaction.

One comment suggested that this result could be achieved when a foreign acquiring corporation acquires substantially all of the properties of a foreign target corporation by viewing the two corporations as a single combined unit for purposes of the disqualified stock rule. Under this view, properties historically held by the foreign target corporation (including nonqualified property) would not represent an infusion of value into the combined group. The comment thus asserted that, regardless of the structure of the transaction, the disqualified stock rule generally should not apply to stock attributable to such properties. The comment noted, though, that if asset acquisitions were to be treated similar to stock acquisitions, there might be a heightened need for rules, in addition to the anti-abuse rule of section 7874(c)(4), to address certain related transactions in which stock of the foreign target corporation is transferred in exchange for nonqualified property.

After considering the comments, the Treasury Department and the IRS decline to adopt a rule treating certain asset acquisitions as stock acquisitions or to otherwise coordinate their treatment. The Treasury Department and the IRS have determined that stock of a foreign acquiring corporation attributable to any nonqualified property—whether acquired in a transaction related to the domestic entity acquisition or historically held—generally presents opportunities to inappropriately dilute the ownership percentage. For example, see, the passive assets rule of § 1.7874–7T. Thus,

the Treasury Department and the IRS have concluded that a look-through approach, pursuant to which stock acquisitions would be treated similar to asset acquisitions, would be the preferable approach for harmonizing the treatment, in contrast to the comments’ recommendation to treat certain assets acquisitions similar to stock acquisitions. The final regulations, however, do not implement a look-through approach out of concerns of undue complexity and administrative burden.

Another comment recommended that, if the final regulations retain different treatment for stock and asset acquisitions, working capital of a foreign target corporation should be excluded from the definition of nonqualified property. After considering this comment, the Treasury Department and the IRS have determined that providing special rules that exclude working capital from the definition of nonqualified property would result in undue complexity and administrative burden. Notably, such special rules would have limited applicability when the foreign target corporation is a parent corporation of an affiliated group—which is often the case—because, in such a structure, working capital generally would be held by subsidiaries. Accordingly, the final regulations do not adopt the comment.

3. Obligations Constituting Nonqualified Property

Under the temporary regulations, nonqualified property includes an obligation owed by (i) a member of the EAG; (ii) a former domestic entity shareholder or former domestic entity partner; or (iii) a person that owns, before or after the domestic entity acquisition, stock of (or a partnership interest in) a person described in clause (i) or (ii) or that is related (within the meaning of section 267 or 707(b)) to such a person. Comments requested several modifications to this rule.

First, a comment recommended that, if the final regulations retain different treatment for stock and asset acquisitions, they exclude certain obligations owed by a member of the EAG from the definition of nonqualified property. In particular, the comment suggested excluding intercompany obligations held by the foreign target corporation (that is, obligations owed by an affiliate of the foreign target corporation to the foreign target corporation), at least to the extent that the obligations arose in the ordinary course of the foreign target group’s cash management program. The comment noted that, in these cases, had the

foreign target corporation instead funded its affiliate through equity (rather than debt), stock of the foreign acquiring corporation transferred in exchange for the equity generally would not be disqualified stock. The comment questioned this disparate treatment.

After considering the comment, the Treasury Department and the IRS have determined that transfers of stock of a foreign acquiring corporation in exchange for intercompany obligations generally do not present opportunities to inappropriately reduce the ownership fraction. Accordingly, the final regulations exclude from the definition of nonqualified property an obligation owed by a member of the EAG if the holder of the obligation immediately before the domestic entity acquisition and any related transaction (or its successor), is a member of the EAG after the domestic entity acquisition and all related transactions. § 1.7874–4(i)(2)(iii)(A).

Another comment recommended that nonqualified property generally not include an obligation owed by a person that is only a de minimis former domestic entity shareholder or former domestic entity partner. The comment made a similar recommendation for an obligation owed by a person that, before and after the domestic entity acquisition, owns no more than a de minimis interest in any member of the EAG. The Treasury Department and the IRS agree with this comment, and the final regulations are modified accordingly. See § 1.7874–4(i)(2)(iii)(B) and (C) (providing a de minimis rule for a less than five percent ownership interest). Nevertheless, the anti-abuse rule in section 7874(c)(4) may still apply to disregard transfers of stock in exchange for such obligations.

4. Definition of Obligation

The temporary regulations define an obligation by reference to § 1.752–1(a)(4)(ii), which includes “any fixed or contingent obligation to make payment. . . . Obligations include, but are not limited to, debt obligations, environmental obligations, tort obligations, contract obligations, pension obligations, obligations under a short sale, and obligations under derivative financial instruments such as options, forward contracts, futures contracts, and swaps.”

The Treasury Department and the IRS are concerned that the reference in the temporary regulations to § 1.752–1(a)(4)(ii) may cause confusion when applied outside of a partnership setting. The final regulations thus remove the reference to § 1.752–1(a)(4)(ii) and provide that an obligation for purposes

of the disqualified stock rule includes any fixed or contingent obligation to make payment or provide value (such as through providing goods or services). § 1.7874–4(i)(3). No inference is intended regarding the treatment, under § 1.752–1(a)(4)(ii) or the temporary regulations, of a contractual agreement by a person to provide goods or services.

5. Definition of Avoidance Property

Avoidance property means any property (other than specified nonqualified property) acquired with a principal purpose of avoiding the purposes of section 7874. The 2015 notice and the 2016 temporary regulations clarified that this definition applies regardless of whether the transaction involves an indirect transfer of specified nonqualified property. One comment was received regarding this clarification.

The comment agreed with the clarification but asserted that avoidance property should not include property that meets two conditions. First, the property (or, in cases in which the property is stock or a partnership interest, the property indirectly transferred) either (i) constitutes a trade or business within the meaning of § 1.367(a)–2(d)(2), or (ii) is related to an existing business of the foreign acquiring corporation. And, second, the property is transferred without an intention to dispose of it at a later time. After considering the comment, the Treasury Department and the IRS have determined that whether property constitutes avoidance property should in all cases depend on the principal purpose for the acquisition of the property, which cannot be determined based on an exclusive set of objective factors, such as the nature of the property or holding period. In certain circumstances, property that meets the conditions described by the comment could be acquired with a principal purpose of avoiding the purposes of section 7874. Thus, the Treasury Department and the IRS have concluded that it would be inappropriate to exclude such property from the definition of avoidance property. Consequently, the final regulations do not adopt the comment.

B. Subsequent Transfers of Stock in Exchange for the Satisfaction or Assumption of an Obligation Associated With the Property Exchanged

1. In General

Disqualified stock also generally includes stock of the foreign acquiring corporation that is transferred by a person (the transferor) to another person

(the transferee) in exchange for property (the exchanged property) if, pursuant to the same plan (or series of related transactions), the transferee subsequently transfers the stock in exchange for the satisfaction or assumption of one or more obligations associated with the exchanged property (the associated obligation rule). The purpose of the rule is to ensure that the same amount of stock of the foreign acquiring corporation is included in the denominator of the ownership fraction in economically similar situations.

For example, consider a situation in which a foreign acquiring corporation (FA) intends to acquire the property of a domestic entity (DT), which holds property with a fair market value of \$100x and has a \$25x obligation that is associated with the property. The parties could structure the domestic entity acquisition using the following steps: (i) DT transfers all of its property to FA in exchange for \$75x of FA stock and FA's assumption of the \$25x associated obligation, (ii) DT distributes the \$75x of FA stock to its shareholders, and (iii) in a related transaction, FA issues \$25x of its stock to the public for cash and uses that cash to satisfy the associated obligation. Alternatively, FA could not assume the associated obligation and could thus acquire all of DT's properties in exchange for \$100x of FA stock, followed by DT using \$25x of FA stock to satisfy the \$25x associated obligation and distributing the remaining \$75x of FA stock to its shareholders in liquidation. Under the first alternative, the \$25x of FA stock issued to the public in exchange for cash (which is nonqualified property) would be excluded from the denominator of the ownership fraction. Under the second alternative, however, no FA stock would be excluded absent the associated obligation rule. Allowing a different result under the second alternative would be inappropriate because the first and second alternatives are economically similar. That is, under both alternatives, FA's value reflects the gross value of the acquired property (under the first alternative, because the amount of the associated obligation is satisfied with the cash and, under the second alternative, because FA did not assume the associated obligation), and DT's obligations have been reduced by the amount of the associated obligation. The associated obligation rule thus ensures that, as under the first alternative, \$25x of FA stock is excluded from the denominator of the ownership fraction under the second alternative. The rule serves the same

purpose when the transferee is a person other than the domestic entity.

Several comments were received regarding the purpose and effect of the associated obligation rule. First, a comment noted that the rule serves an important purpose and suggested that the final regulations retain the rule. Another comment questioned the practical significance of the rule under the temporary regulations and suggested that the final regulations remove it. In particular, the comment asserted that creditors typically require obligations to be satisfied in cash, rather than stock. Moreover, the comment stated that, under the temporary regulations, the rule might not apply if, instead of using stock of the foreign acquiring corporation to satisfy an associated obligation, the transferee sold the stock for cash and then used the cash to satisfy the obligation. One comment acknowledged, however, that a plan (or series of related transactions) to satisfy obligations of the transferee using the proceeds of the sale of stock of the foreign acquiring corporation could be subject to the anti-abuse rule under section 7874(c)(4).

After considering the comments, the Treasury Department and the IRS have determined that the associated obligation rule promotes an important policy and thus the final regulations retain the rule. The Treasury Department and the IRS also have determined that when a foreign acquiring corporation issues its stock in lieu of assuming an obligation associated with the exchanged property, the rule should not be limited to situations in which, pursuant to the same plan (or series of related transactions), the transferee uses the stock to directly satisfy the associated obligation. Rather, the Treasury Department and the IRS have concluded that the rule should generally apply if, pursuant to the same plan (or series of related transactions), the transferee uses the stock to directly or indirectly satisfy any obligation of the transferee (regardless of whether it is an associated obligation). For example, the rule should apply if the transferee sells the stock and then uses the proceeds to satisfy an amount of an obligation of the transferee equal to the amount of the associated obligation. In these cases, the transferee and the foreign acquiring corporation are in an economic position similar to the one in which they would have been had the foreign acquiring corporation assumed the associated obligation, issued stock in exchange for cash, and then used that cash to satisfy the obligation. The final regulations accordingly modify the associated

obligation rule. See § 1.7874–4(c)(1)(ii)(A). In addition, the final regulations generally limit the amount of disqualified stock arising under the associated obligation rule to the proportionate share of obligations associated with the exchanged property that, pursuant to the same plan (or series of related transactions), is not assumed by the foreign acquiring corporation. See § 1.7874–4(c)(1)(ii)(B).

2. Acquisitions of Less than Substantially All of the Property of Transferee

A comment requested a modification of the associated obligation rule so that it applies only if the transferor acquires substantially all of the property of the transferee. The comment asserted that, when the transferor acquires only a portion (rather than substantially all) of the transferee's property, it may be difficult or burdensome to determine which obligations are associated with the exchanged property.

The associated obligation rule addresses a concern that, absent the rule, a different amount of stock of a foreign acquiring corporation might be included in the denominator of the ownership fraction in economically similar scenarios. The Treasury Department and the IRS have determined that this concern may exist regardless of the portion of the transferee's property that is acquired. In addition, determinations concerning the association between obligations and property may be required under the Code for purposes other than applying the associated obligation rule. For example, see section 358(h)(2). Accordingly, the final regulations decline to adopt the comment.

3. Application of Rule When Domestic Entity Is Transferee

One comment suggested broadening the associated obligation rule to address certain cases in which the domestic entity is the transferee and the foreign acquiring corporation issues its stock in lieu of assuming any obligation of the transferee (regardless of whether it is associated with the exchanged property). For example, consider a situation in which a domestic entity (DT) has two lines of business: (i) Business A, which comprises property that, in the aggregate, has a fair market value of \$90x and no obligations associated with it, and (ii) Business B, which comprises property that, in the aggregate, has a fair market value of \$20x and \$10x of obligations associated with it. If a foreign acquiring corporation (FA) acquires only the Business A property in exchange for

\$90x of FA stock, DT might use \$10x of FA stock to satisfy the Business B associated obligations and distribute the remaining \$80x of FA stock and the \$20x of Business B property to its shareholders in liquidation. In such a case, the \$10x of FA stock would not be disqualified stock under the associated obligation rule because the transferee did not retain any obligations associated with the exchanged property (the Business A property); thus, absent special rules, the stock might inappropriately dilute the ownership percentage. The comment noted that the associated obligation rule could be modified to address such cases.

The Treasury Department and the IRS acknowledge the concern raised by the comment but decline to broaden the associated obligation rule to address it at this time. However, the Treasury Department and the IRS will monitor transactions in which the foreign acquiring corporation transfers its stock in lieu of assuming an obligation of the domestic entity and continue to study whether future guidance should broaden the rule. In addition, section 7874(c)(4) (which would disregard the transfer of the \$10x of FA stock in satisfaction of the obligation if the transfer is part of a plan a principal purpose of which is to avoid the purposes of section 7874) and § 1.7874–10T (which could cause DT's distribution of the \$20x of Business B assets to give rise to a non-ordinary course distribution, which, in turn, would cause the former domestic entity shareholders of DT to be deemed to receive additional FA stock for purpose of computing the ownership fraction) may apply to address the concern raised by the comment.

III. The De Minimis Exception

The disqualified stock rule contains a de minimis exception, which generally applies when two requirements are satisfied. First, the ownership percentage—determined without regard to the application of the disqualified stock rule, the passive assets rule of § 1.7874–7T (the passive assets rule), and the non-ordinary course distribution rule of § 1.7874–10T (the non-ordinary course distribution rule)—must be less than five (by vote and value). Second, after the domestic entity acquisition and all related transactions, former domestic entity shareholders or former domestic entity partners, in the aggregate, must own (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) less than five percent (by vote and value) of the stock of (or a partnership interest in) any member of

the EAG. When the de minimis exception applies, the disqualified stock rule does not apply and, as a result, no stock of the foreign acquiring corporation is excluded from the denominator of the ownership fraction pursuant to the rule.

The passive assets rule and the non-ordinary course distribution rule contain similar de minimis exceptions (the three exceptions collectively, the de minimis exceptions). See §§ 1.7874–7T(c) and 1.7874–10T(d). Together, the de minimis exceptions generally prevent one or more of the disqualified stock rule, the passive assets rule, and the non-ordinary course rule from causing section 7874 to apply to a domestic entity acquisition that, given minimal actual ownership continuity, largely resembles a cash purchase by the foreign acquiring corporation of the stock of (or interests in) the domestic entity.

Comments requested expanding the de minimis exceptions in several respects. First, comments requested increasing the ownership thresholds in the de minimis exceptions. One comment recommended a 20-percent threshold, noting that such a threshold would be generally consistent with the threshold in the internal group restructuring exception under § 1.7874–1(c)(2) (permitting up to 20 percent ownership by non-EAG members). The internal group restructuring exception, however, addresses different policies than the de minimis exceptions. In particular, the internal group restructuring exception addresses transactions in which there is no, or only a small, shift in ownership of a domestic entity to persons outside of a corporate group, whereas the de minimis exceptions address transactions in which there is almost a complete shift in ultimate ownership of a domestic entity. Moreover, the Treasury Department and the IRS have concluded that a five-percent threshold appropriately differentiates between domestic entity acquisitions that largely resemble a cash purchase and those that do not. Accordingly, the final regulations do not adopt the comment.

Other comments requested removing the second requirement of the de minimis exceptions or, alternatively, modifying the requirement so that it looks only to stock held by reason of holding stock (or interests) of the domestic entity. The comments noted that, particularly in cases involving a publicly-traded domestic entity or a complex ownership structure, it could be difficult or burdensome to identify each former domestic entity shareholder or former domestic entity partner

(including a de minimis former domestic entity shareholder or former domestic entity partner), as applicable, and then determine (taking into account the applicable attribution rules) the former domestic entity shareholders' or former domestic entity partners' collective ownership of the foreign acquiring corporation and each member of the EAG. Accordingly, the comment asserted that, at least in certain cases, uncertainty surrounding whether the second requirement is satisfied could result in taxpayers having to apply—and thus conduct the potentially complicated analyses required by—the disqualified stock rule, passive assets rule, and non-ordinary course distribution rule, notwithstanding that the domestic entity acquisition may largely resemble a purchase.

After considering the comment, the final regulations modify each of the de minimis exceptions to provide that the second requirement is satisfied if, after the domestic entity acquisition and all related transactions, each former domestic entity shareholder or former domestic entity partner, as applicable, owns (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) less than five percent (by vote and value) of the stock of (or a partnership interest in) each member of the EAG. § 1.7874–4(d)(1)(ii); § 1.7874–7T(c)(2); § 1.7874–10T(d)(2). The Treasury Department and the IRS have determined that limiting the second requirement to consider only the ownership of former domestic entity shareholders or former domestic entity partners (with applicable attribution rules), individually, rather than the ownership of all former domestic entity shareholders or former domestic entity partners, collectively, strikes the appropriate balance between preventing the de minimis exceptions from applying in inappropriate circumstances and addressing the practical difficulties noted in the comment.

IV. Certain Public Offerings

The preamble to the 2014 temporary regulations noted that the de minimis exception with respect to the disqualified stock rule may facilitate certain transactions that have the effect of converting a publicly traded domestic corporation into a publicly traded foreign corporation over time. For example, a buyer may contribute cash to a newly formed foreign acquiring corporation that uses such cash, along with the proceeds from borrowings and a small amount of its stock (often issued to the management of the domestic corporation), to acquire all of the stock of a publicly traded domestic

corporation in a domestic entity acquisition. After a period of time, the buyer may sell its stock of the foreign acquiring corporation pursuant to a public offering, which may have been contemplated at the time of the domestic entity acquisition. The preamble to the 2014 regulations explained that the Treasury Department and the IRS would study these transactions and requested comments on the application of section 7874 to such transactions.

A comment asserted that, given the number of non-tax contingencies between the domestic entity acquisition and the public offering, it would be inappropriate to apply the step-transaction doctrine or related principles to the transactions. Comments also suggested that these transactions do not violate the policies of section 7874 because the domestic entity acquisition is essentially a purchase by the foreign acquiring corporation of the stock of the publicly traded domestic corporation. Accordingly, comments recommended against new rules to address the transactions.

After further study and consideration of the comments, the Treasury Department and the IRS decline at this time to provide special rules to address these transactions. However, section 7874(c)(4), § 1.7874–4(d)(2) (providing that the de minimis exception does not apply to disqualified stock that is transferred with a principal purpose of avoiding the purposes of section 7874), and judicial doctrines each may apply to address the concerns raised by these transactions.

V. Additional Clarifications Requested

A. Stock Included in Numerator Also Included in Denominator

A comment requested that the Treasury Department and the IRS clarify that stock of a foreign acquiring corporation included in the numerator of the ownership fraction is also included in the denominator of the fraction, regardless of whether the stock is disqualified stock. The preamble to the temporary regulations indicated that stock described in section 7874(a)(2)(B)(ii) (by reason of stock) is never treated as disqualified stock and thus cannot be excluded from the denominator of the ownership fraction under the disqualified stock rule. See Part A of the Explanation of Provisions section of the preamble to the 2014 temporary regulations. Nevertheless, in response to the comment and for the avoidance of doubt, the final regulations clarify that by reason of stock may never

be treated as disqualified stock. See § 1.7874–4(c)(1). Accordingly, the final regulations clarify that stock of the foreign acquiring corporation included in the numerator of the ownership fraction is in all cases also included in the denominator of the fraction.

B. Treatment of partnerships

Comments requested clarification about whether an acquisition of a partnership interest is treated similarly to an acquisition of stock for purposes of the disqualified stock rule. That is, the comment asked whether stock of a foreign acquiring corporation transferred in exchange for a partnership interest is treated as stock transferred in exchange for a proportionate share of partnership assets represented by the partnership interest (a look-through approach). The Treasury Department and the IRS confirm that a partnership interest does not constitute nonqualified property unless it is a marketable security (for example, an interest in a publicly traded partnership described in § 1.7704–1(a)(1)(i)) or is avoidance property. The definition of marketable securities in the temporary regulations excludes an interest in a partnership that becomes a member of the EAG in a transaction (or series of transactions) related to the domestic entity acquisition, an exclusion that would be unnecessary if partnership interests were subject to a look-through approach. Nevertheless, in response to the comment and for the avoidance of doubt, the definition of nonqualified property is clarified to provide that an interest in a partnership is nonqualified property only to the extent it is a marketable security or avoidance property.

VI. The Subsequent Transfer Rule

The temporary regulations provide a rule (the subsequent transfer rule) pursuant to which stock of a foreign corporation that is described in section 7874(a)(2)(B)(ii) (that is, by reason of stock) does not cease to be so described as a result of any subsequent transfer of the stock by the former domestic entity shareholder or former domestic entity partner that received such stock, even if the subsequent transfer is related to the domestic entity acquisition. A comment requested adding a de minimis exception to the subsequent transfer rule, similar to the three de minimis exceptions discussed in Part III of this Summary of Comments and Explanation of Revisions. For example, the comment suggested that if, pursuant to a subsequent transfer (or series of transfers) related to the domestic entity acquisition, the former domestic entity

shareholders or former domestic entity partners, in the aggregate, dispose of all but a de minimis amount of stock of the foreign acquiring corporation, then the subsequent transfer rule should not apply. In such a case, the requested de minimis exception would provide that the stock received by the former domestic entity shareholders or former domestic entity partners would not be considered by reason of stock and thus would not be included in the numerator of the ownership fraction (though it generally would be included in the denominator of the ownership fraction).

The final regulations do not adopt the comment. The de minimis exceptions, as discussed in Part III of this Summary of Comments and Explanation of Revisions, provide relief for transactions that are in substance cash purchases by the foreign acquiring corporation of the stock of (or interests in) the domestic entity. In contrast, the subsequent transfer rule applies to ensure the application of section 7874 to transactions where a foreign corporation acquires substantially all the property (directly or indirectly) of a domestic entity in exchange for stock. The ultimate use of the stock received by the former domestic entity shareholders or former domestic entity partners is irrelevant to the three-factor test established by the statute. Accordingly, the final regulations do not adopt a de minimis exception for purposes of the subsequent transfer rule.

VII. Applicability Dates

The final regulations generally apply to domestic entity acquisitions completed on or after September 17, 2009, to the extent described in the 2009 notice. The final regulations generally apply with respect to the remainder of the proposed rules in the 2014 proposed regulations to domestic entity acquisitions completed on or after January 16, 2014. However, see § 1.7874–4(k) for certain rules that apply only to domestic entity acquisitions completed on or after the publication of the 2015 notice or these final regulations, as applicable. Similar to the 2014 temporary regulations, these regulations provide that taxpayers may elect to apply all the rules contained in these final regulations to domestic entity acquisitions completed on or after September 17, 2009, and before January 13, 2017 (transition period), if the taxpayer applies all of the rules consistently to all domestic entity acquisitions completed during the transition period.

No inference is intended as to the treatment of transactions under the law before the various applicability dates of

these regulations. For example, these transactions could be subject to challenge under applicable provisions, including under section 7874(c)(4) or judicial doctrines such as the substance-over-form doctrine.

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. The Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply because the regulations do not impose a collection of information on small entities. Pursuant to section 7805(f) of the Code, the notices of proposed rulemaking that preceded this regulation were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business. No comments were received.

Drafting Information

The principal author of these regulations is Joshua G. Rabon of the Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *
Section 1.7874–4 also issued under 26 U.S.C. 7874(c)(6) and (g).
Section 1.7874–5 also issued under 26 U.S.C. 7874(c)(6) and (g).
* * * * *

■ **Par. 2.** Section 1.7874–4 is added to read as follows:

§ 1.7874–4 Disregard of certain stock related to the domestic entity acquisition.

(a) *Scope.* This section identifies certain stock of the foreign acquiring corporation that is disregarded in determining the ownership fraction and modifies the scope of section 7874(c)(2)(B). Paragraph (b) of this section sets forth the general rule that certain stock of the foreign acquiring

corporation, and only such stock, is treated as stock described in section 7874(c)(2)(B) and therefore is excluded from the denominator of the ownership fraction. Paragraph (c) of this section identifies the stock of the foreign acquiring corporation that is subject to paragraph (b) of this section. Paragraph (d) of this section provides a de minimis exception to the application of the general exclusion rule of paragraph (b) of this section. Paragraph (e) of this section provides rules for transfers of stock of the foreign acquiring corporation in satisfaction of, or in exchange for the assumption of, one or more obligations of the transferor. Paragraph (f) of this section provides rules for certain transfers of stock of the foreign acquiring corporation involving multiple properties or obligations. Paragraph (g) of this section provides rules for the treatment of partnerships, and paragraph (h) of this section provides rules addressing the interaction of this section with the expanded affiliated group rules of section 7874(c)(2)(A) and § 1.7874-1. Paragraph (i) of this section provides definitions. Paragraph (j) of this section provides examples illustrating the application of the rules of this section. Paragraph (k) of this section provides dates of applicability.

(b) *Exclusion of disqualified stock under section 7874(c)(2)(B).* Except as provided in paragraph (d) of this section, disqualified stock (as determined under paragraph (c) of this section) is treated as stock described in section 7874(c)(2)(B) and therefore is not included in the denominator of the ownership fraction. Section 7874(c)(2)(B) shall not apply to exclude stock from the denominator of the ownership fraction that is not disqualified stock.

(c) *Disqualified stock—(1) General rule.* Except as provided in paragraph (c)(2) of this section, disqualified stock is stock of the foreign acquiring corporation (other than stock described in § 1.7874-2(f)) that is transferred in an exchange described in paragraph (c)(1)(i) or (ii) of this section that is related to the domestic entity acquisition. This paragraph (c) applies without regard to whether the stock of the foreign acquiring corporation is publicly traded at the time of the transfer or at any other time.

(i) *Exchanged for nonqualified property.* The stock is transferred to a person other than the domestic entity in exchange for nonqualified property. See *Example 1*, *Example 2*, *Example 6*, *Example 8*, and *Example 9* of paragraph (j) of this section for illustrations of the application of this paragraph (c)(1)(i).

(ii) *Exchanged for property with associated obligations—(A) General rule.* Subject to the limitation provided in paragraph (c)(1)(ii)(B) of this section, the stock is transferred by a person (transferor) to another person (transferee) in exchange for property (exchanged property) and, pursuant to the same plan (or series of related transactions), the transferee subsequently transfers such stock (or, if the transferee exchanges such stock for other property, such other property) in satisfaction of, or in exchange for the assumption of, one or more obligations of the transferee or a person related (within the meaning of section 267 or 707(b)) to the transferee. See *Example 6* and *Example 10* of paragraph (j) of this section for illustrations of the application of paragraph (c)(1)(ii) of this section.

(B) *Limitation.* The amount of stock treated as transferred in an exchange described in paragraph (c)(2)(ii)(A) of this section shall not exceed—

(1) With respect to a transferee that is the domestic entity, the proportionate share of obligations associated with the exchanged property (determined based on the fair market value of the exchanged property relative to the fair market value of all properties with which the obligations are associated) that, pursuant to the same plan (or series of related transactions), is not assumed by the transferor.

(2) With respect to any other transferee, the proportionate share of obligations associated with the exchanged property (determined based on the fair market value of the exchanged property relative to the fair market value of all properties with which the obligations are associated) that, pursuant to the same plan (or series of related transactions), is not assumed by the transferor, multiplied by a fraction, the numerator of which is the amount of exchanged property that is qualified property, and the denominator of which is the total amount of exchanged property.

(C) *Associated obligations.* For purposes of paragraph (c)(1)(ii) of this section, an obligation is associated with property if, for example, the obligation arose from the conduct of a trade or business in which the property has been used, regardless of whether the obligation is a non-recourse obligation.

(2) *Stock transferred in an exchange that does not increase the fair market value of the assets or decrease the amount of liabilities of the foreign acquiring corporation.* Stock is disqualified stock only to the extent that the transfer of the stock in the exchange increases the fair market value of the

assets of the foreign acquiring corporation or decreases the amount of its liabilities. This paragraph (c)(2) is applied to an exchange without regard to any other exchange described in paragraph (c)(1)(i) or (ii) of this section or any other transaction related to the domestic entity acquisition. See *Example 4* and *Example 7* of paragraph (j) of this section for illustrations of the application of this paragraph (c)(2).

(d) *Exception to exclusion of disqualified stock—(1) De minimis ownership.* Except as provided in paragraph (d)(2) of this section, paragraph (b) of this section does not apply if both:

(i) The ownership percentage described in section 7874(a)(2)(B)(ii), determined without regard to the application of paragraph (b) of this section and §§ 1.7874-7T(b) and 1.7874-10T(b), is less than five (by vote and value); and

(ii) After the domestic entity acquisition and all related transactions, each former domestic entity shareholder or former domestic entity partner, as applicable, owns (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) less than five percent (by vote and value) of the stock of (or a partnership interest in) each member of the expanded affiliated group. See *Example 5* of paragraph (j) of this section for an illustration of this paragraph (d).

(2) *Stock issued to avoid the purposes of section 7874.* The exception in paragraph (d)(1) of this section does not apply to disqualified stock that is transferred in a transaction (or series of transactions) related to the domestic entity acquisition with a principal purpose of avoiding the purposes of section 7874.

(e) *Satisfaction or assumption of obligations.* Except to the extent stock is treated as disqualified stock as a result of being described in paragraph (c)(1)(ii) of this section, this paragraph (e) applies if, in a transaction related to the domestic entity acquisition, stock of the foreign acquiring corporation is transferred to a person other than the domestic entity in exchange for the satisfaction or the assumption of one or more obligations of the transferor. In such a case, solely for purposes of this section, the stock of the foreign acquiring corporation is treated as if it is transferred in exchange for an amount of cash equal to the fair market value of such stock.

(f) *Transactions involving multiple properties.* For purposes of this section, if stock and other property are exchanged for qualified property and

nonqualified property, the stock is treated as transferred in exchange for the qualified property or nonqualified property, respectively, based on the relative fair market value of the property. See also § 1.7874-2(f)(2) (allocating stock of a foreign acquiring corporation between an interest in the domestic entity and other property).

(g) *Treatment of partnerships.* For purposes of this section, if one or more members of the expanded affiliated group own, in the aggregate, more than 50 percent (by value) of the interests in a partnership, such partnership is treated as a corporation that is a member of the expanded affiliated group.

(h) *Interaction with expanded affiliated group rules.* Disqualified stock that is excluded from the denominator of the ownership fraction pursuant to paragraph (b) of this section is taken into account for purposes of determining whether an entity is a member of the expanded affiliated group for purposes of applying section 7874(c)(2)(A) and § 1.7874-1(b) and determining whether a domestic entity acquisition qualifies as an internal group restructuring or results in a loss of control, as described in § 1.7874-1(c)(2) and (c)(3), respectively. However, such disqualified stock is excluded from the denominator of the ownership fraction for purposes of section 7874(a)(2)(B)(ii) regardless of whether it otherwise would be included in the denominator of the ownership fraction as a result of the application of § 1.7874-1(c). See *Example 8* and *Example 9* of paragraph (j) of this section for illustrations of the application of this paragraph (h).

(i) *Definitions.* In addition to the definitions in § 1.7874-12T, the following definitions apply for purposes of this section:

(1) *Marketable securities* has the meaning set forth in section 453(f)(2), except that the term marketable securities does not include stock of a corporation or an interest in a partnership that becomes a member of the expanded affiliated group in a transaction (or series of transactions) related to the domestic entity acquisition. See *Example 4* of paragraph (j) of this section for an illustration of this paragraph (i)(1).

(2) *Nonqualified property* is property described in paragraphs (i)(2)(i) through (iv) of this section. Thus, stock in a corporation or an interest in a partnership is nonqualified property to the extent provided in paragraph (i)(2)(ii) or (iv) of this section. Qualified property is property other than nonqualified property.

(i) Cash or cash equivalents.

(ii) *Marketable securities*, within the meaning of paragraph (i)(1) of this section.

(iii) An obligation owed by any of the following:

(A) A member of the expanded affiliated group, unless the holder of the obligation immediately before the domestic entity acquisition and any related transaction (or its successor) is a member of the expanded affiliated group after the domestic entity acquisition and all related transactions.

(B) A former domestic entity shareholder or former domestic entity partner of the domestic entity that owns (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) at least five percent (by vote or value) of the stock of, or partnership interests in, the domestic entity before the domestic entity acquisition.

(C) A person that, before or after the domestic entity acquisition, either owns (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) at least five percent (by vote or value) of the stock of (or partnership interests in) or is related (within the meaning of section 267 or 707(b)) to—

(1) A member of the expanded affiliated group; or

(2) A person described in paragraph (i)(2)(iii)(B) of this section. See *Example 6* of paragraph (j) of this section for an illustration of this paragraph (i)(2)(iii)(C)(2).

(iv) Any other property acquired with a principal purpose of avoiding the purposes of section 7874, regardless of whether the transaction involves an indirect transfer of property described in paragraph (i)(2)(i), (ii), or (iii) of this section. See *Example 2* and *Example 3* of paragraph (j) of this section for illustrations of the application of this paragraph (i)(2)(iv).

(3) An *obligation* means any fixed or contingent obligation to make a payment or provide value without regard to whether the obligation is otherwise taken into account for purposes of the Internal Revenue Code. An obligation includes, but is not limited to, a debt obligation, an environmental obligation, a tort obligation, a contract obligation (including an obligation to provide goods or services), a pension obligation, an obligation under a short sale, and an obligation under derivative financial instruments such as options, forward contracts, futures contracts, and swaps. An obligation does not include any obligation treated as stock for purposes of section 7874 (see, for example, § 1.7874-2(i), which treats certain

interests, including certain creditor claims, as stock).

(4) A *transfer* is, with respect to stock of the foreign acquiring corporation, an issuance, sale, distribution, exchange, or any other disposition of such stock.

(j) *Examples.* The following examples illustrate the application of the rules of this section. For purposes of the examples, unless otherwise indicated, assume the following facts in addition to the facts stated in the examples:

(1) FA, FMS, FS, and FT are foreign corporations, all of which have only one class of stock issued and outstanding;

(2) DMS and DT are domestic corporations;

(3) P and R are corporations that may be either domestic or foreign;

(4) PRS is a partnership with individual partners;

(5) The de minimis ownership exception in paragraph (d)(1) of this section does not apply;

(6) None of the shareholders or partners in the entities described in the examples are related persons with respect to each other;

(7) All transactions described in each example occur pursuant to the same plan;

(8) No property is acquired with a principal purpose of avoiding the purposes of section 7874;

(9) FA, FMS, FS, and FT are tax residents in the same foreign country;

(10) For purposes of determining the ownership fraction, no shares of FA stock are excluded from the denominator pursuant to § 1.7874-7T(b) (which disregards stock attributable to passive assets); and

(11) For purposes of determining the ownership fraction, no shares of FA stock are treated as received by former shareholders of DT pursuant to § 1.7874-10T(b) (which disregards certain distributions).

Example 1. Stock transferred in exchange for marketable securities—(i) Facts. Individual A wholly owns DT. PRS transfers marketable securities (within the meaning of paragraph (i)(1) of this section) to FA, a newly formed corporation, in exchange solely for 25 shares of FA stock. Then Individual A transfers all the DT stock to FA in exchange solely for 75 shares of FA stock.

(ii) *Analysis.* Under paragraph (i)(2)(ii) of this section, the marketable securities constitute nonqualified property. Accordingly, the 25 shares of FA stock transferred by FA to PRS in exchange for the marketable securities constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for the marketable securities increases the

fair market value of the assets of FA by the fair market value of the marketable securities transferred. Under paragraph (b) of this section, the 25 shares of FA stock transferred to PRS are not included in the denominator of the ownership fraction. See also section 7874(c)(4). Accordingly, the only FA stock included in the ownership fraction is the FA stock transferred to Individual A in exchange for the DT stock, and that FA stock is included in both the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 75/75.

Example 2. Stock transferred in exchange for property acquired with a principal purpose of avoiding the purposes of section 7874—(i) Facts. Individual A wholly owns DT. PRS transfers marketable securities (within the meaning of paragraph (i)(1) of this section) to FT, a newly formed corporation, in exchange solely for all the FT stock. Then PRS transfers the FT stock to FA, a newly formed corporation, in exchange solely for 25 shares of FA stock. Finally, Individual A transfers all the DT stock to FA in exchange solely for 75 shares of FA stock. FA acquires the FT stock with a principal purpose of avoiding the purposes of section 7874.

(ii) **Analysis.** Under paragraph (i)(2)(iv) of this section, the FT stock constitutes nonqualified property because a principal purpose of FA acquiring the FT stock is to avoid the purposes of section 7874. Accordingly, the 25 shares of FA stock transferred by FA to PRS in exchange for the FT stock constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for the FT stock increases the fair market value of FA's assets by the fair market value of the FT stock. Under paragraph (b) of this section, the 25 shares of FA stock transferred to PRS are not included in the denominator of the ownership fraction. Furthermore, even in the absence of paragraph (i)(2)(iv) of this section, the transfer of marketable securities to FT would be disregarded pursuant to section 7874(c)(4). Accordingly, the only FA stock included in the ownership fraction is the FA stock transferred to Individual A in exchange for the DT stock, and that FA stock is included in both the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 75/75.

Example 3. Stock transferred in exchange for property acquired with a principal purpose of avoiding the purposes of section 7874—(i) Facts. DT is a publicly traded corporation. PRS is a foreign partnership that is unrelated to DT. PRS transfers certain business assets (PRS properties) to FA, a newly formed foreign corporation, in exchange solely for 25 shares of FA stock. The shareholders of DT transfer all of their DT stock to FA in exchange solely for the remaining 75 shares of FA stock (DT acquisition). None of the PRS properties is property described in paragraph (i)(2)(i) through (iii) of this section, but FA acquires the PRS properties with a principal purpose of avoiding the purposes of section 7874.

(ii) **Analysis.** Under paragraph (i)(2)(iv) of this section, the PRS properties transferred to FA constitute nonqualified property, because FA acquires the PRS properties in a transaction related to the DT acquisition with a principal purpose of avoiding the purposes of section 7874. Accordingly, the 25 shares of FA stock transferred by FA to PRS in exchange for the PRS properties constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Paragraph (c)(2) of this section does not apply to reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for the PRS properties increases the fair market value of FA's assets by the fair market value of the PRS properties. Accordingly, pursuant to paragraph (b) of this section, the 25 shares of FA stock transferred to PRS in exchange for the PRS properties are not included in the denominator of the ownership fraction. Furthermore, even in the absence of paragraph (i)(2)(iv) of this section, the transfer of the PRS properties to FA would be disregarded pursuant to section 7874(c)(4). Therefore, the only FA stock included in the ownership fraction is the FA stock transferred to the former domestic entity shareholders of DT in exchange for their DT stock, and that FA stock is included in both the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 75/75.

Example 4. Stock transferred in exchange for stock of a foreign corporation that becomes a member of the expanded affiliated group—(i) Facts. FT, a publicly traded corporation, forms FA, and then FA forms DMS and FMS. FMS merges with and into FT, with FT surviving the merger (FMS–FT merger). Pursuant to the FMS–FT merger, the FT shareholders exchange their FT stock solely for 100 shares of FA stock and FT becomes a wholly owned subsidiary of FA. Following the FMS–FT merger, DMS merges with and into DT, also a publicly traded corporation, with DT surviving the merger (DT acquisition). Pursuant to the DT acquisition, the DT shareholders exchange their DT stock solely for the remaining 100 shares of FA stock, and DT becomes a wholly owned subsidiary of FA. After the completion of the plan, FA wholly owns FT and DT, DMS and FMS cease to exist, and the stock of FA is publicly traded.

(ii) **Analysis.** Because FT becomes a member of the expanded affiliated group that includes FA in a transaction related to the DT acquisition, the FT stock does not constitute marketable securities (within the meaning of paragraph (i)(1) of this section) and therefore does not constitute nonqualified property pursuant to paragraph (i)(2)(ii) of this section. Accordingly, no FA stock is disqualified stock described in paragraph (c)(1) of this section and therefore the FA stock transferred in exchange for the FT stock and DT stock is included in the denominator of the ownership fraction. Thus, the ownership fraction is 100/200.

(iii) **Alternative facts.** The facts are the same as in paragraph (i) of this *Example 4*, except that, instead of undertaking the FMS–FT merger, FT merges with and into FA with

FA surviving the merger (FT–FA merger). Pursuant to the FT–FA merger, the FT shareholders exchange their FT stock solely for 100 shares of FA stock. At the time of the FT–FA merger, FT does not hold nonqualified property and has no obligations. Accordingly, FA stock transferred by FA to FT in exchange for the property of FT is not disqualified stock described in paragraph (c)(1) of this section. Furthermore, pursuant to paragraph (c)(2) of this section, the 100 shares of FA stock transferred by FT to the shareholders of FT in exchange for their FT stock do not constitute disqualified stock described in paragraph (c)(1) of this section. Although the FT stock is nonqualified property (the FT stock constitutes marketable securities within the meaning of paragraph (i)(2)(ii) of this section because the stock of FT is publicly traded and FT is not a member of the expanded affiliated group that includes FA after the DT acquisition), under paragraph (c)(2) of this section, the transfer of FA stock by FT to the shareholders of FT neither increases the fair market value of the assets of FA nor decreases the liabilities of FA. Accordingly, no FA stock is disqualified stock described in paragraph (c)(1) of this section and, therefore, the FA stock transferred in exchange for the assets of FT and the DT stock is included in the denominator of the ownership fraction. Thus, the ownership fraction is 100/200.

Example 5. De minimis exception—(i) Facts. Individual A wholly owns DT. The fair market value of the DT stock is \$100x. PRS transfers \$96x of cash to FA, a newly formed corporation, in exchange solely for 96 shares of FA stock. Then Individual A transfers the DT stock to FA in exchange for \$96x of cash and 4 shares of FA stock (DT acquisition).

(ii) **Analysis.** Under paragraph (i)(2)(i) of this section, cash constitutes nonqualified property. Accordingly, the 96 shares of FA stock transferred by FA to PRS in exchange for \$96x of cash constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Furthermore, paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for \$96x of cash increases the fair market value of the assets of FA by \$96x. However, without regard to the application of paragraph (b) of this section and §§ 1.7874–7T(b) and 1.7874–10T(b), the ownership percentage described in section 7874(a)(2)(B)(ii) would be less than 5 (by vote and value), or 4 (4/100, or 4 shares of FA stock held by Individual A by reason of owning the DT stock, determined under § 1.7874–2(f)(2), over 100 shares of FA stock outstanding after the DT acquisition). Furthermore, after the DT acquisition and all related transactions, Individual A owns less than 5% (by vote and value, applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) of the stock of FA and DT (the members of the expanded affiliated group that includes FA). Accordingly, the de minimis exception in paragraph (d)(1) of this section applies and therefore paragraph (b) of this section does not apply to exclude the FA stock transferred to PRS from the

denominator of the ownership fraction. Therefore, the FA stock transferred to Individual A and PRS is included in the denominator of the ownership fraction. Thus, the ownership fraction is 4/100.

Example 6. Obligation of the expanded affiliated group satisfied with stock—(i) Facts. Individual A wholly owns DT. The stock of DT held by Individual A has a fair market value of \$75x. Individual A also holds an obligation of DT with a value and face amount of \$25x. DT holds property with a value of \$100x, and the \$25x obligation is associated with the property. FA, a newly formed corporation, transfers 100 shares of FA stock to Individual A in exchange for all the DT stock and the \$25x obligation of DT.

(ii) **Analysis.** Under paragraph (i)(2)(iii)(A) of this section, the \$25x obligation of DT constitutes nonqualified property because DT is a member of the expanded affiliated group that includes FA, and Individual A (the holder of the obligation immediately before the domestic entity acquisition and any related transaction) is not a member of the EAG after the domestic entity acquisition and all related transactions. Thus, the shares of FA stock transferred by FA to Individual A in exchange for the obligation of DT constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Under § 1.7874–2(f)(2), Individual A is treated as receiving 75 shares of FA stock in exchange for the DT stock ($100 \times \$75x / \$100x$) and 25 shares of FA stock in exchange for the obligation of DT ($100 \times \$25x / \$100x$). Thus, 25 shares of FA stock constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock for the \$25x obligation increases the fair market value of FA's assets by \$25x. Therefore, under paragraph (b) of this section, the 25 shares of FA stock transferred to Individual A in exchange for the obligation of DT are not included in the denominator of the ownership fraction. Accordingly, the only FA stock included in the ownership fraction is the 75 shares of FA stock transferred to Individual A in exchange for the DT stock, and that FA stock is included in both the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 75/75.

(iii) **Alternative facts.** The facts are the same as in paragraph (i) of this *Example 6*, except that instead of acquiring the stock of DT and the \$25x obligation of DT, FA acquires the \$100x of property from DT in exchange solely for 100 shares of FA stock. DT distributes 75 shares of FA stock to Individual A in exchange for Individual A's DT stock and transfers 25 shares of FA stock to Individual A in satisfaction of DT's obligation to Individual A, and liquidates. The 25 shares of FA stock transferred by FA to DT in exchange for the property of DT and then transferred by DT in satisfaction of DT's obligation to Individual A constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(ii) of this section. Paragraph (c)(2) of

this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(ii) of this section because the transfer of FA stock in exchange for the property of DT increases the fair market value of FA's assets by \$100x (although the amount of disqualified stock is limited to 25 shares of FA stock in this case). Therefore, under paragraph (b) of this section, the 25 shares of FA stock that constitute disqualified stock are not included in the denominator of the ownership fraction. Accordingly, only 75 shares of FA stock are included in the ownership fraction, and that FA stock is included in both the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 75/75.

Example 7. “Over-the-top” stock transfer—(i) Facts. Individual A wholly owns DT. Individual B holds all 100 outstanding shares of FA stock. Individual C acquires 20 shares of FA stock from Individual B for cash, and then FA acquires all of the stock of DT from Individual A in exchange solely for 100 shares of FA stock.

(ii) **Analysis.** Under paragraph (i)(2)(i) of this section, cash constitutes nonqualified property. Accordingly, absent the application of paragraph (c)(2) of this section, the 20 shares of FA stock transferred by Individual B to Individual C in exchange for cash would constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Nevertheless, because Individual B's sale of FA stock neither increases the assets of FA nor decreases the liabilities of FA, such FA stock is not disqualified stock by reason of paragraph (c)(2) of this section. Accordingly, paragraph (b) of this section does not apply to exclude the 20 shares of FA stock sold by Individual B to Individual C, and that FA stock is included in the denominator of the ownership fraction. The 100 shares of FA stock received by Individual A are the only shares included in the numerator of the ownership fraction. Thus, the ownership fraction is 100/200.

Example 8. Interaction with internal group restructuring rule—(i) Facts. P holds 85 shares of DT stock. The remaining 15 shares of DT stock are held by Individual A. P and Individual A transfer their shares of DT stock to FA, a newly formed corporation, in exchange for 85 and 15 shares of FA stock, respectively (DT acquisition), and PRS transfers \$75x of cash to FA in exchange for the remaining 75 shares of FA stock.

(ii) **Analysis.** Under paragraph (i)(2)(i) of this section, cash constitutes nonqualified property. Accordingly, the 75 shares of FA stock transferred by FA to PRS in exchange for \$75x of cash constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Furthermore, paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for \$75x of cash increases the fair market value of the assets of FA by \$75x. Therefore, under paragraph (b) of this section, the 75 shares of FA stock transferred to PRS are not included in the denominator of the ownership fraction. Although PRS's shares of FA stock are

excluded from the denominator of the ownership fraction under paragraph (b) of this section, under paragraph (h) of this section, such shares of FA stock nonetheless are taken into account for purposes of determining whether P is a member of the expanded affiliated group that includes FA and for purposes of determining whether the DT acquisition qualifies as an internal group restructuring. Because P holds 48.6% of the FA stock (85/175) after the DT acquisition and all transactions related to the DT acquisition, it is not a member of the expanded affiliated group that includes FA. In addition, the DT acquisition does not qualify as an internal group restructuring described in § 1.7874–1(c)(2) because P does not hold, directly or indirectly, 80% or more of the shares of FA stock (by vote and value) after the DT acquisition and all transactions related to the DT acquisition. Therefore, the FA stock held by P (along with the FA stock held by Individual A) is included in the numerator and the denominator of the ownership fraction. Thus, the ownership fraction is 100/100.

Example 9. Interaction with loss of control rule—(i) Facts. P wholly owns DT. P transfers all of its shares of DT stock to FA, a newly formed corporation, in exchange for 49 shares of FA stock (DT acquisition), and R transfers marketable securities (within the meaning of paragraph (i)(1) of this section) to FA in exchange for the remaining 51 shares of FA stock.

(ii) **Analysis.** Under paragraph (i)(2)(ii) of this section, the marketable securities constitute nonqualified property. Accordingly, the shares of FA stock transferred by FA to R in exchange for the marketable securities constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for the marketable securities increases the fair market value of the assets of FA by the fair market value of the marketable securities transferred. Therefore, under paragraph (b) of this section, the shares of FA stock transferred to R are not included in the denominator of the ownership fraction. Although under paragraph (b) of this section R's shares of FA stock are excluded from the denominator of the ownership fraction, under paragraph (h) of this section, such stock is taken into account for purposes of determining whether P or R is a member of the expanded affiliated group that includes FA. Because P holds 49% of the shares of FA stock (49/100), P is not a member of the expanded affiliated group that includes FA, and P's FA stock is included in both the numerator and the denominator of the ownership fraction. Because R holds 51% of the shares of FA stock (51/100), R is a member of the expanded affiliated group that includes FA and, before taking into account § 1.7874–1(c), R's FA stock would be excluded from the numerator and denominator of the ownership fraction under section 7874(c)(2)(A) and § 1.7874–1(b). However, the DT acquisition results in a loss of control described in § 1.7874–1(c)(3)

because P does not hold, in the aggregate, directly or indirectly, more than 50% of the shares of stock (by vote or value) of R, FA, or DT after the acquisition. Accordingly, the FA stock held by R would be included in the denominator of the ownership fraction under § 1.7874-1(c)(1). Nevertheless, the FA stock held by R is excluded from the denominator of the ownership fraction under paragraphs (b) and (h) of this section. Thus, the ownership fraction is 49/49.

(iii) *Alternative facts.* The facts are the same as in paragraph (i) of this *Example 9*, except that, in exchange for 51 shares of FA stock, R transfers marketable securities (within the meaning of paragraph (i)(1) of this section) with a value equal to that of 16 shares of FA stock and qualified property (within the meaning of paragraph (i)(2) of this section) with a value equal to that of 35 shares of FA stock. Accordingly, 16 of the 51 shares of FA stock transferred to R constitute disqualified stock described in paragraph (c)(1) of this section by reason of paragraph (c)(1)(i) of this section, and 35 of such shares do not constitute disqualified stock. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(i) of this section because the transfer of FA stock in exchange for the marketable securities increases the fair market value of the assets of FA by the fair market value of the marketable securities transferred. Therefore, under paragraph (b) of this section, 16 of the 51 shares of FA stock transferred to R are not included in the denominator of the ownership fraction. Although 16 of the 51 shares of FA stock that are transferred to R are excluded from the denominator of the ownership fraction, under paragraph (h) of this section, all 51 of R's shares of FA stock are taken into account for purposes of determining whether P or R is a member of the expanded affiliated group that includes FA. Because P holds 49% of the shares of FA stock (49/100), it is not a member of the expanded affiliated group that includes FA, and its FA stock is included in both the numerator and the denominator of the ownership fraction. Because R holds 51% of the shares of FA stock (51/100), it is a member of the expanded affiliated group that includes FA and, before taking into account § 1.7874-1(c), its FA stock is excluded from the numerator and denominator of the ownership fraction under section 7874(c)(2)(A) and § 1.7874-1(b). However, the DT acquisition results in a loss of control described in § 1.7874-1(c)(3) because P does not hold, in the aggregate, directly or indirectly, more than 50% of the shares of stock (by vote or value) of R, FA, or DT after the acquisition. Accordingly, the 51 shares of FA stock held by R would be included in the denominator of the ownership fraction under § 1.7874-1(c)(1). Nevertheless, the 16 shares of FA stock that constitute disqualified stock are excluded from the denominator of the ownership fraction under paragraphs (b) and (h) of this section. In addition, the 35 shares of FA stock received by R that do not constitute disqualified stock are included in the denominator. Thus, the ownership fraction is 49/84.

Example 10. Stock issued in lieu of assuming associated obligation—(i) Facts.

Individual A wholly owns DT. The stock of DT has a fair market value of \$100x. Individual B wholly owns FT, a foreign corporation, which conducts two businesses, Business C and Business D. Business C comprises property with a gross fair market value of \$70x and \$20x of associated obligations. Business D comprises property with a gross fair market value of \$45x and \$35x of associated obligations. Individual A transfers all of the shares of DT stock to FA, a newly formed corporation, in exchange for \$100x of FA stock (DT acquisition). In transactions related to the DT acquisition, FA acquires all of the Business C property from FT in exchange for \$70x of FA stock and then FT transfers \$30x of the FA stock to its creditors in satisfaction of \$30x of its obligations. None of the Business C property is nonqualified property.

(ii) *Analysis.* Under paragraph (c)(1) of this section by reason of paragraph (c)(1)(ii) of this section, the \$30x of FA stock transferred to FT (the transferee) in exchange for the Business C property (the exchanged property) and then transferred by FT in satisfaction of \$30x of its obligations is disqualified stock, except to the extent limited by paragraph (c)(1)(ii)(B) of this section. Under paragraph (c)(1)(ii)(B)(1) of this section, the proportionate share of obligations associated with the exchanged property that is not assumed by FA must be determined. The proportionate share of obligations associated with the exchanged property is \$20x, calculated as \$20x (the obligations associated with the Business C properties) multiplied by \$70x/\$70x (the fair market value of the exchanged property, \$70x, relative to the fair market value of all the Business C property, \$70x). The proportionate share of obligations associated with the exchanged property that is not assumed by FA is \$20x, calculated as the proportionate share of obligations associated with the exchanged property (\$20x) less the obligations assumed by FA (\$0x). Under paragraph (c)(1)(ii)(B)(2) of this section, the amount of disqualified stock is limited to the proportionate share of obligations associated with the exchanged property that is not assumed (\$20x) multiplied by a fraction, which in this case is \$70x/\$70x (the amount of exchanged property that is qualified property, \$70x, divided by the total amount of exchanged property, \$70x). Accordingly, \$20x of FA stock is disqualified stock under paragraph (c)(1) of this section by reason of paragraph (c)(1)(ii) of this section. Paragraph (c)(2) of this section does not reduce the amount of disqualified stock described in paragraph (c)(1)(ii) of this section because the transfer of the FA stock in exchange for the exchanged property increases the fair market value of FA's assets by \$70x (although the amount of disqualified stock is limited to \$20x of FA stock in this case). Therefore, under paragraph (b) of this section, the \$20x of FA stock that constitutes disqualified stock is not included in the denominator of the ownership fraction. Accordingly, only \$150x of FA stock is included in the denominator of the ownership fraction, calculated as the \$100x of FA stock received by Individual A plus the \$70x of FA stock received by FT less the \$20x of FA stock that is disqualified

stock. Thus, the ownership fraction is \$100x/\$150x. The result would be the same if, in transactions related to the DT acquisition, FT instead sold the \$30x of FA stock for \$30x cash and then transferred the cash in satisfaction of \$30x of its obligations.

(iii) *Alternative facts.* The facts are the same as in paragraph (i) of this *Example 10*, except that FA acquires only \$42x of the Business C property in exchange for \$30x of FA stock and the assumption of \$12x of the obligations associated with the Business C property. Under paragraph (c)(1) of this section by reason of paragraph (c)(1)(ii) of this section, the \$30x of FA stock transferred to FT (the transferee) in exchange for the Business C property (the exchanged property) and then transferred by FT in satisfaction of \$30x of its obligations is disqualified stock, except to the extent limited by paragraph (c)(1)(ii)(B) of this section. Under paragraph (c)(1)(ii)(B)(1) of this section, the proportionate share of obligations associated with the exchanged property that is not assumed by FA must be determined. The proportionate share of obligations associated with the exchanged property is \$12x, calculated as \$20x (the obligations associated with the Business C property) multiplied by \$42x/\$70x (the fair market value of the exchanged property, \$42x, relative to the fair market value of all the Business C property, \$70x). The proportionate share of obligations associated with the exchanged property that is not assumed by FA is \$0, calculated as the proportionate share of obligations associated with the exchanged property (\$12x) less the obligations assumed by FA (\$12x). Accordingly, as a result of the application of paragraph (c)(1)(ii)(B)(2) of this section, no FA stock is disqualified stock under paragraph (c)(1) of this section by reason of paragraph (c)(1)(ii) of this section. As a result, \$130x of FA stock is included in the denominator of the ownership fraction, calculated as the \$100x of FA stock received by Individual A plus the \$30x of FA stock received by FT. Thus, the ownership fraction is \$100x/\$130x.

(k) *Applicability dates—(1) General rule.* Except to the extent otherwise provided in paragraph (k) of this section, this section applies to domestic entity acquisitions completed on or after September 17, 2009. Paragraphs (i)(1) and (i)(2)(iv) of this section apply to domestic entity acquisitions completed on or after November 19, 2015. Paragraph (d)(1)(i) of this section applies to domestic entity acquisitions completed on or after April 4, 2016. Paragraphs (c)(1)(ii), (d)(1)(ii), (i)(2)(iii), and (i)(3) of this section apply to domestic entity acquisitions completed on or after January 13, 2017. For domestic entity acquisitions completed before November 19, 2015, see § 1.7874-4T(i)(6) and (i)(7)(iv) (the predecessors of paragraphs (i)(1) and (i)(2)(iv) of this section) as contained in 26 CFR part 1 revised as of April 1, 2016. For domestic entity acquisitions completed on or after September 22, 2014, and before April 4,

2016, see § 1.7874–4T(d)(1)(i) as contained in 26 CFR part 1 revised as of April 1, 2016. For domestic entity acquisitions completed before January 13, 2017, see § 1.7874–4T(c)(1)(ii), (d)(1)(ii), (i)(7)(iii) (the predecessor of paragraph (i)(2)(iii) of this section), and (i)(8) (the predecessor of paragraph (i)(3) of this section) as contained in 26 CFR part 1 revised as of April 1, 2016.

(2) *Transitional rules for domestic entity acquisitions completed on or after September 17, 2009, but before January 16, 2014.* For domestic entity acquisitions completed on or after September 17, 2009, but before January 16, 2014, except as provided in paragraph (k)(3) of this section, this section shall be applied with the following modifications:

(i) Nonqualified property does not include property described in paragraph (i)(2)(iii) of this section.

(ii) A transfer is limited to an issuance of stock of the foreign acquiring corporation.

(iii) The determination of whether stock of the foreign acquiring corporation is described in paragraph (c)(1) of this section is made without regard to paragraphs (c)(1)(ii), (c)(2), and (e) of this section.

(iv) Paragraphs (d) and (h) of this section do not apply.

(3) *Election for domestic entity acquisitions completed on or after September 17, 2009, and before January 13, 2017.* If, pursuant to paragraph (k)(1) or (2) of this section, a paragraph of this section would not otherwise apply to a domestic entity acquisition completed on or after September 17, 2009, and before January 13, 2017 (transition period), a taxpayer may elect to apply the paragraph if the taxpayer applies the paragraph consistently to all acquisitions completed during the transition period. The election is made by applying the paragraph to all such acquisitions on a timely filed original return (including extensions) or an amended return filed no later than six months after January 13, 2017. A separate statement or form evidencing the election need not be filed.

1.7874–4T [Removed]

■ **Par. 3.** Section 1.7874–4T is removed.

■ **Par. 4.** Section 1.7874–5 is added to read as follows:

§ 1.7874–5 Effect of certain transfers of stock related to the acquisition.

(a) *General rule.* Stock of a foreign acquiring corporation that is described in section 7874(a)(2)(B)(ii) shall not cease to be so described as a result of any subsequent transfer of the stock by the former domestic entity shareholder

or former domestic entity partner that received such stock, even if the subsequent transfer is related to the domestic entity acquisition.

(b) *Example.* The rule of this section is illustrated by the following example:

Example. (i) *Facts.* Individual A wholly owns DT, a domestic corporation. FA, a newly formed foreign corporation, acquires all of the stock of DT from Individual A in exchange solely for 100 shares of FA stock. Pursuant to a binding commitment that was entered into in connection with FA's acquisition of the DT stock, Individual A sells 25 shares of FA stock to B, an unrelated person, in exchange for cash. For federal income tax purposes, the form of the steps of the transaction is respected.

(ii) *Analysis.* Under § 1.7874–2(f)(1), the 100 shares of FA stock received by Individual A are stock of a foreign corporation (FA) that is held by reason of holding stock in a domestic corporation (DT). Accordingly, such stock is described in section 7874(a)(2)(B)(ii). Under paragraph (a) of this section, all 100 shares of FA stock retain their status as being described in section 7874(a)(2)(B)(ii), even though Individual A sells 25 of the 100 shares in connection with the acquisition described in section 7874(a)(2)(B)(i) pursuant to the binding commitment. Therefore, all 100 of the shares of FA stock are included in both the numerator and denominator of the ownership fraction.

(c) *Certain transfers involving expanded affiliated group members.* For rules addressing whether certain stock is treated as held by members of the expanded affiliated group for purposes of applying section 7874(c)(2)(A) and § 1.7874–1, see § 1.7874–6T.

(d) *Definitions.* The definitions provided in § 1.7874–12T apply for purposes of this section.

(e) *Applicability dates.* This section applies to domestic entity acquisitions that are completed on or after January 16, 2014.

§ 1.7874–5T [Removed]

■ **Par. 5.** Section 1.7874–5T is removed.

■ **Par. 6.** Section 1.7874–7T is amended by revising paragraph (c)(2) and paragraph (h) to read as follows:

§ 1.7874–7T Disregard of certain stock attributable to passive assets (temporary).

* * * * *

(c) * * *

(2) After the domestic entity acquisition and all related transactions, each former domestic entity shareholder or former domestic entity partner, as applicable, owns (applying the attribution rules of section 318(a) with the modifications described in section 304(c)(3)(B)) less than five percent (by vote and value) of the stock of (or a

partnership interest in) each member of the expanded affiliated group.

* * * * *

(h) *Applicability dates.* Except as otherwise provided in this paragraph (h), this section applies to domestic entity acquisitions completed on or after September 22, 2014. Paragraph (c)(2) of this section applies to domestic entity acquisitions completed on or after January 13, 2017, and paragraphs (c)(1), (d), and (f)(2) and (4) of this section apply to domestic entity acquisitions completed on or after April 4, 2016. Paragraphs (f)(1)(i)(A)(2) and (f)(1)(i)(D) of this section, as well as the portion of paragraph (f)(1)(i)(C) of this section relating to property that gives rise to income described in section 1297(b)(2)(B), apply to domestic entity acquisitions completed on or after November 19, 2015. However, for domestic entity acquisitions completed on or after September 22, 2014, and before April 4, 2016, taxpayers may elect to apply paragraphs (c)(1), (d), and (f)(2) and (4) of this section. For domestic entity acquisitions completed on or after September 22, 2014, and before January 13, 2017, taxpayers may elect to apply paragraph (c)(2) of this section or § 1.7874–7T(c)(2) as contained in the Internal Revenue Bulletin (IRB) 2016–20 (see https://www.irs.gov/irb/2016-20_IRB/ar05.html). In addition, for domestic entity acquisitions completed on or after September 22, 2014, and before April 4, 2016, taxpayers may elect to apply paragraph (f)(2) of this section by substituting the term “expanded affiliated group” for the term “modified expanded affiliated group.” Furthermore, for domestic entity acquisitions completed on or after September 22, 2014, and before November 19, 2015, taxpayers may elect to apply paragraphs (f)(1)(i)(A)(2) and (f)(1)(i)(D) of this section, as well as the portion of paragraph (f)(1)(i)(C) of this section relating to property that gives rise to income described in section 1297(b)(2)(B).

* * * * *

■ **Par. 7.** Section 1.7874–10T is amended by revising paragraph (d)(2) and paragraph (i) to read as follows:

§ 1.7874–10T Disregard of certain distributions (temporary).

* * * * *

(d) * * *

(2) After the domestic entity acquisition and all related transactions, each former domestic entity shareholder or former domestic entity partner, as applicable, owns (applying the attribution rules of section 318(a) with

the modifications described in section 304(c)(3)(B)) less than five percent (by vote and value) of the stock of (or a partnership interest in) each member of the expanded affiliated group.

* * * * *

(i) *Applicability date.* Except as otherwise provided in this paragraph (i), this section applies to domestic entity acquisitions completed on or after September 22, 2014. Paragraph (d)(2) of this section applies to domestic entity acquisitions completed on or after January 13, 2017, and paragraph (d)(1) of this section applies to domestic entity acquisitions completed on or after November 19, 2015. Paragraph (g) of this section applies to domestic entity acquisitions completed on or after April 4, 2016. However, for domestic entity acquisitions completed on or after

September 22, 2014, and before November 19, 2015, taxpayers may elect to apply paragraph (d)(1) of this section. For domestic entity acquisitions completed on or after September 22, 2014, and before January 13, 2017, taxpayers may elect to apply paragraph (d)(2) of this section or § 1.7874-10T(d)(2) as contained in the Internal Revenue Bulletin (IRB) 2016-20 (see https://www.irs.gov/irb/2016-20_IRB/ar05.html). In addition, for domestic entity acquisitions completed on or after September 22, 2014, and before April 4, 2016, taxpayers may elect to determine NOCDs consistently on the basis of taxable years, in lieu of 12-month periods, in a manner consistent with the principles of this section. See paragraph (h)(5) of this section.

* * * * *

■ **Par. 8.** Section 1.7874-12T is amended by revising the introductory text of paragraph (a) to read as follows:

§ 1.7874-12T Definitions (temporary).

(a) *Definitions.* Except as otherwise provided, the following definitions apply for purposes of this section and §§ 1.367(b)-4T, 1.956-2T, 1.7701(l)-4T, 1.7874-2, 1.7874-2T, 1.7874-4, 1.7874-5, and 1.7874-6T through 1.7874-11T.

* * * * *

§§ 1.7874-1, 1.7874-6T, 1.7874-7T, 1.7874-9T, and 1.7874-10T [Amended]

■ **Par. 9.** For each provision listed in the table below, removing the language in the “Remove” column and adding in its place the language in the “Add” column:

Provision	Remove	Add
§ 1.7874-1(c)(1), second sentence	§ 1.7874-4T	§ 1.7874-4
§ 1.7874-1(c)(1), second sentence	§ 1.7874-4T(h)	§ 1.7874-4(h)
§ 1.7874-6T(g), <i>Example 4</i> (iii), first sentence	§ 1.7874-4T(i)(7)	§ 1.7874-4(i)(2)
§ 1.7874-7T(b)(1), first sentence	§ 1.7874-4T(b)	§ 1.7874-4(b)
§ 1.7874-7T(c)(1)	§ 1.7874-4T(b)	§ 1.7874-4(b)
§ 1.7874-7T(f)(1)(i)	§ 1.7874-4T(i)(7)	§ 1.7874-4(i)(2)

BILLING CODE 4830-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 63

[EPA-HQ-OAR-2010-0895; 9958-01-OAR]

RIN 2060-AS90

National Emission Standards for Hazardous Air Pollutants: Ferroalloys Production

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; notice of final action on reconsideration.

SUMMARY: This action sets forth the Environmental Protection Agency's (EPA's) final decision on the issues for which it announced reconsideration on July 12, 2016, that pertain to certain aspects of the June 30, 2015, final amendments for the Ferroalloys Production source category regulated under national emission standards for hazardous air pollutants (NESHAP). The EPA is amending the rule to allow existing facilities with positive pressure baghouses to perform visible emissions monitoring twice daily as an alternative to installing and operating bag leak detection systems (BLDS) to ensure the baghouses are operating properly. In addition, this final action explains that EPA is maintaining the requirement that facilities must use a digital camera opacity technique (DCOT) method to demonstrate compliance with opacity limits. However, this final action revises

the rule such that it references the recently updated version of the DCOT method. In this action, the EPA also explains that no changes are being made regarding the rule provision that requires quarterly polycyclic aromatic hydrocarbons (PAH) emission testing for furnaces producing ferromanganese (FeMn) with an opportunity for facilities to request decreased compliance test frequency from their permitting authority after the first year. Furthermore, in this action, the EPA is denying the request for reconsideration of the PAH emission limits for both FeMn and silicomanganese (SiMn) production furnaces.

DATES: This final action is effective on January 18, 2017. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of January 18, 2017.

ADDRESSES: The EPA has established a docket for this action under Docket ID

No. EPA-HQ-OAR-2010-0895. All documents are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., confidential business information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through <http://www.regulations.gov> or in hard copy at the EPA Docket Center (EPA/DC), Room 3334, EPA WJC West Building, 1301 Constitution Ave. NW., Washington, DC 20004. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Docket Center is (202) 566-1742.

SUPPLEMENTARY INFORMATION:

Organization of this Document. The following outline is provided to aid in locating information in this preamble.

- I. General Information
 - A. Does this action apply to me?
 - B. How do I obtain a copy of this document and other related information?
 - C. Judicial Review and Administrative Reconsideration
- II. Background Information
- III. Summary of Final Action on Issues Reconsidered
 - A. Alternative Monitoring for Existing Positive Pressure Baghouses
 - B. DCOT Compliance Demonstration and Revised DCOT Test Method
 - C. Quarterly PAH Testing for Furnaces Producing FeMn
- IV. Denial of Petition for Reconsideration of FeMn and SiMn PAH Emission Limits
- V. Impacts Associated With This Final Rule
 - A. What are the air impacts?
 - B. What are the energy impacts?
 - C. What are the compliance costs?
 - D. What are the economic and employment impacts?
 - E. What are the benefits of the final standards?
- VI. Statutory and Executive Order Reviews
 - A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
 - B. Paperwork Reduction Act (PRA)
 - C. Regulatory Flexibility Act (RFA)

- D. Unfunded Mandates Reform Act (UMRA)
- E. Executive Order 13132: Federalism
- F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
- G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks
- H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
- I. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51
- J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations
- K. Congressional Review Act (CRA)

I. General Information

A. Does this action apply to me?

Regulated Entities. Categories and entities potentially regulated by this action are shown in Table 1 of this preamble.

TABLE 1—NESHAP AND INDUSTRIAL SOURCE CATEGORIES AFFECTED BY THIS FINAL ACTION

NESHAP and source category	NAICS ^a code
Ferroalloys Production	331112

^aNorth American Industry Classification System.

Table 1 of this preamble is not intended to be exhaustive, but rather to provide a guide for readers regarding entities likely to be affected by the final action for the source category listed. To determine whether your facility is affected, you should examine the applicability criteria in 40 CFR part 63, subpart XXX (National Emission Standards for Hazardous Air Pollutants: Ferroalloys Production). If you have any questions regarding the applicability of this final action to a particular entity, consult either the air permitting authority for the entity or your EPA Regional representative as listed in 40 CFR 63.13 (General Provisions).

B. How do I obtain a copy of this document and other related information?

The docket number for this final action regarding the Ferroalloys Production NESHAP (40 CFR part 63, subpart XXX) is Docket ID No. EPA-HQ-OAR-2010-0895.

In addition to being available in the docket, an electronic copy of this document will also be available on the World Wide Web (WWW). Following signature, a copy of this document will

be posted at <https://www.epa.gov/stationary-sources-air-pollution/ferromanganese-and-silicomanganese-production-national-emission>.

C. Judicial Review and Administrative Reconsideration

Under Clean Air Act (CAA) section 307(b)(1), judicial review of this final action is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit by March 20, 2017. Under CAA section 307(b)(2), the requirements established by this final rule may not be challenged separately in any civil or criminal proceedings brought by the EPA to enforce the requirements.

Section 307(d)(7)(B) of the CAA further provides that “[o]nly an objection to a rule or procedure which was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review.” This section also provides a mechanism for the EPA to reconsider the rule “[i]f the person raising an objection can demonstrate to the Administrator that it was impracticable to raise such objection within [the period for public comment] or if the grounds for such objection arose after the period for public comment (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule.” Any person seeking to make such a demonstration should submit a Petition for Reconsideration to the Office of the Administrator, U.S. EPA, Room 3000, EPA WJC Building, 1200 Pennsylvania Ave. NW., Washington, DC 20460, with a copy to both the person(s) listed in the preceding **FOR FURTHER INFORMATION CONTACT** section, and the Associate General Counsel for the Air and Radiation Law Office, Office of General Counsel (Mail Code 2344A), U.S. EPA, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

II. Background Information

The EPA published a final residual risk and technology review (RTR) rule for the Ferroalloys Production source category in the **Federal Register** on June 30, 2015 (80 FR 37366), which included, among other things, the following:

- Revisions to the emission limits for particulate matter (PM) from stacks for the electric arc furnaces, metal oxygen refining (MOR) processes, and crushing and screening operations to minimize PM emissions from these units;
- Emission limits for four previously unregulated hazardous air pollutants

(HAP): Formaldehyde, hydrogen chloride, mercury, and PAH;

- Requirements to capture process fugitive emissions using effective, enhanced local capture, and duct the captured emissions to control devices;

- An average opacity limit of 8 percent during a full furnace cycle and a maximum opacity limit of 20 percent for any two consecutive 6-minute periods to ensure effective capture and control of process fugitive emissions;

- A requirement to conduct opacity observations using the DCOT at least once per week for a full furnace cycle for each operating furnace and each MOR operation for at least 26 weeks. After 26 weeks, if all tests are compliant, facilities can decrease to monthly opacity observations;

- A requirement to use BLDS to monitor PM emissions from all furnace baghouses; and

- A requirement to conduct periodic performance testing to demonstrate compliance with the stack emission limits for the various HAP, including a requirement to conduct PAH performance testing every 3 months for furnaces producing FeMn with the opportunity to reduce to annual testing after the first year.

Following promulgation of the final rule, the EPA received two petitions for reconsideration of several provisions of the NESHAP pursuant to CAA section 307(d)(7)(B). The EPA received a petition dated August 25, 2015, from Eramet Marietta Inc. (Eramet) and a petition dated August 28, 2015, from Felman Production LLC (Felman). In the petition submitted by Eramet, the company requested the EPA reconsider the following issues: (1) The requirement to conduct PAH performance testing every 3 months for furnaces producing FeMn; (2) the requirement to demonstrate compliance weekly with shop building opacity limits using the American Society for Testing and Materials (ASTM) DCOT test method; and (3) the PAH emission limits for existing furnaces producing FeMn and SiMn. In addition, Eramet requested a stay of 90 days from the effective date of the final amendments pending completion of the reconsideration proceeding. In the petition submitted by Felman, the company stated that it supported and adopted the petition submitted by Eramet and requested reconsideration of the requirement to use BLDS to monitor emissions from positive pressure baghouses. Copies of the petitions are provided in the docket (see EPA Docket ID No. EPA-HQ-OAR-2010-0895).

On November 5, 2015, the EPA sent letters to the petitioners granting

reconsideration of two issues: The PAH testing compliance frequency issue raised by Eramet and the use of BLDS on positive pressure baghouses raised by Felman. In those letters, the EPA said it was still reviewing the other issues and intended to take final action on those when it took final action on BLDS and PAH testing frequency. The agency also stated in the letters that a proposed **Federal Register** notice would be issued initiating the reconsideration process for the issues that the EPA is granting reconsideration. The EPA published the proposed notice of reconsideration in the **Federal Register** on July 12, 2016 (81 FR 45089).

In addition to the two requirements mentioned above (*i.e.*, PAH testing frequency for furnaces producing FeMn and the use of BLDS to monitor PM emissions from positive pressure baghouses), the EPA also granted reconsideration of a third issue in the reconsideration proposal notice (81 FR 45089): the requirement to use DCOT in accordance with ASTM D7520-13 to demonstrate compliance with shop building opacity standards. However, for each of these three requirements, after further analyses, evaluation, and consideration, we explained in the reconsideration proposal notice that we continued to believe these requirements were appropriate. Therefore, we did not propose any changes to these requirements. Instead, we provided further discussion and explanation as to why we believed it was appropriate to maintain these requirements in the rule, provided additional technical information to the record, and requested comment on the three requirements for which the EPA granted reconsideration.

III. Summary of Final Action on Issues Reconsidered

After reviewing and considering all the public comments received in response to the reconsideration proposal, the EPA has decided to amend the baghouse monitoring requirements to allow existing facilities with positive pressure baghouses to perform visible emissions monitoring twice daily using Method 22 as an alternative to using BLDS. In addition, although EPA is maintaining the requirement to use DCOT to demonstrate compliance with the opacity standards, this final action amends the references to the ASTM DCOT test method in the opacity monitoring requirements to the recently updated version of the method (ASTM D7520-16). The EPA is also maintaining the quarterly PAH emission testing requirement for furnaces producing FeMn with an opportunity for facilities to request decreased compliance test

frequency from their permitting authority after the first year. Each of these issues is discussed in more detail in this section of the preamble.

A. Alternative Monitoring for Existing Positive Pressure Baghouses

In their petition for reconsideration, one petitioner (Felman) objected to the EPA's requirement to use BLDS for positive pressure baghouses. The petitioner pointed out that the EPA's own guidance¹ indicates that BLDS are not appropriate for use on a positive pressure baghouse, given the different configurations of these types of units. The petitioner commented that although the EPA stated that it had knowledge of BLDS in operation on positive pressure baghouses, the EPA did not provide any specific examples. In addition, the petitioner claimed the EPA had not evaluated the costs associated with the application of BLDS on positive pressure baghouses but instead simply estimated the cost to be comparable with BLDS for negative pressure baghouses.

In their comments on the reconsideration proposal (81 FR 45089), the petitioner stated that the EPA's supporting documents did not provide any examples of BLDS in operation on positive pressure baghouses comparable to those used at the petitioner's facility, which are low airflow and use natural-draft openings instead of stacks. The petitioner provided cost quotes from vendors of \$1.1 million to install the BLDS and make the necessary structural improvements (including a catwalk system) to support the operation of the BLDS.

In light of the petitioner's assertions, we re-evaluated the BLDS requirement for positive pressure baghouses. While we maintain that BLDS can be installed and operated on positive pressure baghouses, we agree that, due to their particular circumstances, it would be difficult to retrofit this facility based on the specific design of their positive pressure baghouses. Furthermore, we agree that installing BLDS and the associated infrastructure would not be cost effective. In our analysis for the proposal, we estimated the capital cost of installing BLDS on the three positive pressure baghouses to be \$269,100, with annualized costs of \$219,000. However, we did not include any additional costs for structural improvements to support BLDS on these baghouses. The petitioner provided a cost estimate of

¹ EPA Office of Air Quality Planning and Standards (OAQPS), Fabric Filter Bag Leak Detection Guidance, EPA-454/R-98-015, September 1997.

\$870,000 for structural improvements to install BLDS on their three baghouses. Given this additional information, we now estimate the capital costs would be about \$1.1 million, and annualized costs would be \$330,000. Because of the structural modifications needed to install BLDS, the higher annualized costs and the potential technical issues on this particular control configuration at Felman, it would be unreasonable to require BLDS as the sole method for monitoring positive pressure baghouses in this rule. Nevertheless, we believe the baghouses need to be monitored on a regular basis to ensure they are operating as intended and that there are no tears or holes in the bags. Therefore, we have revised the rule to allow for an alternative monitoring method to the BLDS requirement for positive pressure baghouses used to control emissions from an electric arc furnace. We are allowing twice daily visual monitoring of the outlet of each furnace baghouse using Method 22 for evidence of any visible emissions indicating abnormal operations as an alternative to BLDS. We believe this revision will reduce the cost burden associated with monitoring the positive pressure baghouses used to control emissions from the furnaces and avoid possible technical issues, but still provide assurance that the baghouses are functioning correctly and controlling metal HAP emissions from the furnaces. More details are available in the *Summary of Public Comments and Responses on Reconsideration of the Ferroalloys Production NESHAP Final Rule* in the docket for this rulemaking.

B. DCOT Compliance Demonstration and Revised DCOT Test Method

In the June 30, 2015, final rule (80 FR 37366), we finalized opacity standards for process fugitive emissions from the furnace buildings and required the use of DCOT and the ASTM D7520–13 test method to demonstrate compliance with the opacity standards. In their petitions for reconsideration, Eramet and Felman objected to the use of DCOT in lieu of EPA Method 9 and stated that the EPA did not propose DCOT as the only method for demonstrating compliance with the opacity standards. The petitioners argued that DCOT was an unproven substitute for EPA Method 9 to measure opacity from emission sources and that variability in plume location and orientation at the ferroalloy production buildings would make DCOT infeasible at their facilities. The petitioners also noted that the ASTM test method only applies to stack openings of 7 feet in diameter or less and that DCOT is only provided by one vendor.

In their comments on the reconsideration proposal (81 FR 45089), several commenters objected to the use of DCOT as the sole method for opacity compliance and stated that the EPA should allow the option of using EPA Method 9. The commenters argue that DCOT is limited to stationary point sources and not fugitive emissions, and they pointed out that the supporting data for DCOT are all from studies performed on stationary point sources and not long, open vent sources such as those at the Eramet facility. A few commenters had concerns with the timeliness of the opacity determinations and the accuracy of the results. The commenters were also concerned that there is currently only one vendor of DCOT and that the EPA should not choose vendors for an entire industry.

On the other hand, a few commenters were supportive of the use of the DCOT. In the opinion of one commenter, DCOT is comparable to Method 9 observations, on all shapes, sizes, types of sources, and that DCOT is configurable with all types of cameras to tailor the implementation at the shop/building level to support cost-effective and efficient observations.

Another commenter explained that strong monitoring, testing and compliance measures are an essential part of the emission standards, and that the use of these measures also increases the incentive for sources to comply with the standards. The commenter states that EPA's requirement for DCOT is consistent with an important way to implement EPA's "next generation compliance." The commenter notes that the EPA's next generation compliance policy includes, among other things, the following: (1) Use and promotion of advanced emissions/pollutant detection technology so that regulated entities, the government, and the public can more easily see pollutant discharges, environmental conditions, and noncompliance; (2) expanded transparency by making information more accessible to the public; and (3) development and use of innovative enforcement approaches (e.g., data analytics and targeting) to achieve more widespread compliance.

Other comments and responses on DCOT can be found in the *Summary of Public Comments and Responses on Reconsideration of the Ferroalloys Production NESHAP Final Rule* in the docket for this rulemaking.

Based on the information provided by the petitioners and the commenters, we re-evaluated the DCOT opacity monitoring requirement and determined that DCOT is still an appropriate method for determining opacity from

the shop buildings for this source category.

As explained in the initial proposal (76 FR 72508), supplemental proposal (79 FR 60238), and in the 2015 final rule (80 FR 37366), process fugitive emissions from the shop buildings are a significant source of risk from the production of ferroalloys. In each of these three actions, we concluded risks were unacceptable, largely driven by process fugitive emissions of air toxics metals.

To reduce risks to acceptable levels and protect the public with an ample margin of safety, in the initial proposal, we proposed facilities would need to install and operate full building enclosures to capture and control fugitive emissions. In response to the initial proposal, industry commented that full building enclosure requirement would be very costly and difficult to implement, and suggested an alternative approach using localized capture equipment to reduce fugitive emissions from the shop buildings. Modeling of the localized capture approach indicated that similar reductions in risk could be achieved, making this option more feasible and at significantly lower cost than full building enclosure. Based on these modeling results and consideration of costs and feasibility, we proposed the localized capture approach to significantly reduce fugitive emissions from the shop buildings in the supplemental proposal (79 FR 60238), and finalized this approach in the 2015 final rule (80 FR 37366). Specifically, the final rule requires facilities to install, maintain and operate a system designed to effectively capture and control process fugitive emissions. Furthermore, for this rule, opacity standards are the main compliance approach to ensure the process fugitive emissions are effectively captured and controlled on a continuous basis, and that the public is protected with ample margin of safety. Since process fugitive emissions were the main contributor to the unacceptable risks at baseline, and since opacity is the main tool to ensure these process fugitive emissions are effectively captured and controlled and that the public is protected with an ample margin of safety, we finalized requirements for the use of DCOT to demonstrate compliance with the opacity standard in the June 30, 2015, final rule (80 FR 37366).

The DCOT provides a photographic record of each of the opacity readings. In addition, the photographs are evaluated by a third party and the opacity is determined by the degree the plume reduces the transmitted light and obscures the background. While we

believe, based on validation studies, that EPA Method 9 and DCOT provide comparable opacity results, the DCOT provides better documentation, including a permanent re-analyzable photographic record of the opacity determinations, which we believe will be beneficial to both the industry and the public. There is an advantage of having better documentation in this specific case where fugitive emissions are driving the risk from the Ferroalloys Production source category. In addition, we disagree with the commenters' assertion that this methodology will not work with this source category. Fugitive emissions from this source category are emitted through roof vents at the top of the furnace buildings. Currently, the facilities in this source category use EPA Method 9 to measure opacity from the roof vents. The EPA Method 9 opacity method has procedures and requirements for determining opacity from roof vents and rectangular outlets, which are the same procedures and requirements used in the DCOT test method (ASTM D7520–16). Because the same procedures and requirements are used to measure opacity from roof vents from both these methods, we believe that opacity can be measured from this source category using the DCOT test method. Therefore, we are maintaining the requirement in the final rule that facilities in this source category must use the ASTM DCOT methodology to demonstrate compliance with the opacity standards and we are denying the petitioners' request to allow EPA Method 9 as an alternative method for determining compliance. However, we are revising the final rule language to replace the ASTM D7520–13 Standard Test Method for Determining the Opacity of a Plume in the Outdoor Ambient Atmosphere with the latest revision of the method, ASTM D7520–16. The ASTM D7520–13 method was revised by removing the stack diameter scope limitation along with editorial corrections in April 2016. We believe that this change will address the commenter's concerns specifically with the 7 foot stack diameter scope limitation in the ASTM D7520–13 method because the updated ASTM D7520–16 method has removed that limitation. However, fugitive emissions from this source category are not emitted from stacks with a diameter greater than 7 feet, but from roof vents. Therefore, we do not believe that the 7-foot diameter limitation prevented us from requiring the use of the ASTM method for measuring opacity using DCOT. As stated earlier in this section, the ASTM D7520–16 method provides

the same approach for determining opacity from nontraditional point sources such as roof vents as would EPA Method 9.

C. Quarterly PAH Testing for Furnaces Producing FeMn

In the reconsideration proposal (81 FR 45089), the EPA also reconsidered the requirement for furnaces producing FeMn to conduct PAH performance testing every 3 months with an option following the first year, to do annual performance testing. The petitioner stated that the PAH testing frequency for furnaces producing FeMn in the supplemental proposal (79 FR 60238) was every 5 years and that the quarterly testing requirement was added in the final rule. The petitioner also noted that the change in PAH testing frequency represents an increase in compliance costs of \$75,000 in the first year of implementation and an increase of \$475,000 in compliance costs over the first 5 years (assuming the facility is not granted reduced frequency of testing after the first year), in comparison to the supplemental proposal PAH testing requirement. The petitioner also argued that if the EPA believes that the PAH emissions dataset is inadequate to establish a representative and reliable MACT floor, the proper solution is to collect additional data pursuant to CAA section 114(a), rather than collecting data through compliance tests. We granted reconsideration on this issue to provide an opportunity for public comment on the PAH testing frequency for furnaces producing FeMn. A summary of the comments received on this issue and the responses are provided in the *Summary of Public Comments and Responses on Reconsideration of the Ferroalloys Production NESHAP Final Rule* available in the docket for this rulemaking.

As we stated in the reconsideration proposal (81 FR 45089), we received additional PAH test data just 3 weeks prior to the signature of the supplemental proposal (which we were not able to include in our analyses in time for signature of the supplemental proposal) and yet more data during the comment period for the supplemental proposal. This new data showed PAH emissions from furnaces producing FeMn were over 12 times higher in concentration than previous test reports submitted by the petitioner. As we explained in the reconsideration proposal, this data thus demonstrates that PAH emissions from furnaces producing FeMn are highly variable. Moreover, PAH emissions are a major source of cancer risks from these

furnaces. In the risk assessment performed for the supplemental proposal (79 FR 60238), we estimated the maximum lifetime individual cancer risk posed by actual emissions from the ferroalloys production facilities was 20-in-1 million, with PAH contributing 49 percent of the cancer risk.

Testing frequency is part of verification that the limit is met. Stack testing is an important tool used to determine a facility's compliance with both initial and on-going compliance with the CAA requirements. A highly variable set of measurements on which the limit is based leads to us to want more certainty about the source's compliance with the limit, and such certainty can be provided by more frequent testing. Because of the variability of the PAH emissions during FeMn production, we believe that the quarterly testing is appropriate for ensuring compliance with the emission limit and protecting human health.

Furthermore, as we explained in the final rule and the reconsideration proposal, we believe the quarterly testing, along with the collection of process information that a facility may choose to collect voluntarily, could provide data that would help facilities learn what factors or conditions are contributing to the quantity and variation of PAH emissions. For example, we believe the collection and analyses of information about the amounts and types of input materials, types of electrodes used, electrode consumption rates, furnace temperature, and other furnace, process, or product information may help facilities understand what factors are associated with the higher PAH emissions and could provide insight regarding how to limit these emissions. Furthermore, as we described in the preamble of the final rule (80 FR 37383), if a facility decides to apply for a decreased frequency of performance testing from their permit authority, the type of information described above could be helpful input for such an application. For these reasons, the quarterly performance testing with an opportunity after the first year for facilities to request from their permitting authority a decreased frequency to annual performance testing is appropriate for ensuring compliance with the PAH emission limit and protecting human health. The option for decreased performance testing also provides an incentive for the facilities to achieve compliance with the PAH standards. Therefore, we are not making any changes to the PAH testing frequency for furnaces producing FeMn.

IV. Denial of Petition for Reconsideration of FeMn and SiMn PAH Emission Limits

In the final rule, the EPA set PAH limits of 0.130 milligrams per dry standard cubic meter (mg/dscm) for furnaces producing SiMn and 12 mg/dscm for furnaces producing FeMn. Both petitioners requested reconsideration of these emission limits and asserted that they did not have an opportunity to comment on the limits. The petitioners were concerned that achieving these PAH emission limits may require additional controls. The petitioners also argued with how the PAH emission limits were calculated. The petitioners claimed that the EPA used a normal data distribution to determine the upper prediction limit (UPL), but the data sets have lognormal distributions. The petitioners further claim that had the EPA used a lognormal distribution, it would have resulted in higher emission limits. In addition, one petitioner argued that EPA should not have excluded a 3-hour single test run.

As stated in the preamble for the final rule (80 FR 37366), the PAH emission limits were re-evaluated in the final rule to include PAH test data that were received just prior to publication of the supplemental proposal and during the comment period for the supplemental proposal. The expanded PAH test data set was analyzed using the same statistical procedures from the EPA's UPL memorandum used to calculate the PAH emissions limits in the supplemental proposal. Using the statistical procedures from this memorandum (which describes the EPA's established procedures for calculating MACT floor limits), the PAH data sets were determined to have a normal distribution. Therefore, the UPL equation for calculating the 99-percent UPL was used to determine the PAH emission limit. The EPA had already provided adequate notice of the analyses and application of the UPL in the memorandum in the supplemental proposal (79 FR 60238). With regard to the 3-hour single test run the petitioner referred to in their reconsideration petition, we determined there were quality assurance and control issues with the laboratory analysis, and therefore did not include these data in the UPL analysis. The results of every valid 3-run test provided by the industry were below the final PAH limits for both FeMn and SiMn production. Therefore, we believe both facilities should be able to comply with these limits without the need for additional add-on controls.

Furthermore, EPA calculated the limits using well established EPA policy and procedures. At the time the EPA published the supplemental proposal (79 FR 60238, October 6, 2014), the EPA made the existing PAH emissions data and the methodologies used to calculate the limits available for public comment. The limits in the final rule were a logical outgrowth of the limits in the supplemental proposal as EPA made no changes to the methodology used to calculate the limits and simply recalculated the limits after the addition of the newly available data with the previously received data. Therefore, we have decided to deny reconsideration of the PAH emission limits for both FeMn and SiMn production furnaces. More details are available in the *Summary of Public Comments and Responses on Reconsideration of the Ferroalloys Production NESHAP Final Rule* in the docket for this rulemaking.

V. Impacts Associated With This Final Rule

We project that this rule will result in no significant changes in costs, emission reductions or benefits. Even though there are changes to the costs, these changes are small relative to the overall costs and benefits of the 2015 final rule. However, the costs for monitoring baghouses will be lower than the costs in the final rule due to the additional option provided in this action to use visible emissions monitoring to monitor positive pressure baghouses as an alternative to installing and operating a BLDS.

A. What are the air impacts?

Even though we have allowed for an alternative monitoring method to the BLDS requirement for positive pressure baghouses, we believe that this change will result in no additional emissions from the baghouses used to control emissions from the furnace. Accordingly, we believe that the final rule will not result in significant changes in emissions of any of the regulated pollutants.

B. What are the energy impacts?

The changes to the final rule are anticipated to have minimal effect on the supply, distribution or use of energy. As previously stated, we are allowing for an alternative monitoring method to the BLDS requirement for positive pressure baghouses controlling emissions from the furnace. By allowing this alternative, we anticipate slightly lower energy usage by the one facility that uses this type of baghouse.

C. What are the compliance costs?

We believe there will be no significant change in compliance costs as a result of the changes to the final rule. However, as mentioned above, we anticipate that one facility will have moderately lower compliance costs due to allowing an alternative monitoring method for positive pressure baghouses. We anticipate that the alternative monitoring method will have an annual cost of \$38,000, whereas the annual operating cost for a BLDS was estimated to be \$219,000. Overall, we anticipate the Ferroalloys Production source category will not incur significant compliance costs or savings as a result of the changes to the final rule.

D. What are the economic and employment impacts?

We believe that there will be a slight economic benefit to one of the facilities due to allowing an alternative monitoring method for positive pressure baghouses. In the reconsideration proposal, we estimated the capital cost for the installation of BLDS for each facility would be \$269,100 and annualized costs would be \$219,000. For this final action, based on information received from the company, we now estimate capital costs for the BLDS for Felman would be \$1.1 million with annualized costs of \$330,000. We believe allowing an alternative monitoring method for positive pressure baghouses in this final action will reduce the cost of complying with the final rule for this facility. However, we believe this final action will not have any impacts on the price of electricity, employment or labor markets or the U.S. economy.

E. What are the benefits of the final standards?

We do not anticipate any emission changes, and therefore there are no direct monetized benefits or disbenefits associated with the changes to this final rule.

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <http://www2.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was, therefore, not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose any new information collection burden under the PRA. OMB has previously approved the information collection activities contained in the existing regulations and has assigned OMB control number 2060–0676. This action adds an alternative monitoring requirement and a revised test method, but does not make revisions to the reporting requirements in the final rule. Therefore, this action does not change the information collection requirements previously finalized and, as a result, does not impose any additional burden on industry.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This final action will not impose any requirements on small entities. The agency has determined that neither of the companies affected by this action is considered to be a small entity.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. There are no ferroalloys production facilities that are owned or operated by tribal governments. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this

action present a disproportionate risk to children. The health risk assessments completed for the final rule are presented in the *Residual Risk Assessment for the Ferroalloys Source Category in Support of the 2015 Final Rule* document, which is available in the docket for this action (EPA–HQ–OAR–2010–0895–0281), and are discussed in Section V.G of the preamble for the final rule (80 FR 37366).

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51

This action involves technical standards. The EPA decided to use ASTM D7520–16, “Standard Test Method for Determining the Opacity of a Plume in the Outdoor Ambient Atmosphere,” for measuring opacity from the shop buildings. The ASTM D7520–16 is a method to assess opacity whereby a Digital Still Camera is used to capture a set of digital images of a plume against a contrasting background. Each image is analyzed with software that determines plume opacity by comparing a user defined portion of the plume image where opacity is being measured in comparison to the background providing the contrasting values. The Analysis Software is used to average the opacities from the series of digital images taken of the plume over a fixed period of time. The software is also used to archive the image set utilized for each opacity determination including the portion of each image selected by the operator. Each DCOT vendor shall provide training for operators of their DCOT system. The training shall include the content of the “Principles of Visual Emissions Measurements and Procedures to Evaluate those Emissions Using the Digital Camera Optical Technique (DCOT)” and a description of how to operate that specific DCOT system that passed smoke school. This standard is an acceptable alternative to EPA Method 9 and is available from the American Society for Testing and Materials, 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959. See <http://www.astm.org/>.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). This action does not affect the level of protection provided to human health or the environment because it only provides an alternative monitoring provision and revised test method that will not affect the emission standards that were finalized on June 30, 2015.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 63

Environmental protection, Administrative practice and procedures, Air pollution control, Hazardous substances, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: December 28, 2016.

Gina McCarthy,
Administrator.

For the reasons stated in the preamble, the Environmental Protection Agency is amending title 40, chapter I, part 63 of the Code of Federal Regulations (CFR) as follows:

PART 63—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES

■ 1. The authority citation for part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart A—General Provisions

- 2. Section 63.14 is amended by:
- a. Redesignating paragraphs (h)(96) through (h)(104) as (h)(97) through (h)(105), respectively; and
 - b. Adding new paragraph (h)(96).

§ 63.14 Incorporations by reference.

* * * * *

(h) * * *

(96) ASTM D7520–16, Standard Test Method for Determining the Opacity of a Plume in the Outdoor Ambient Atmosphere, approved April 1, 2016, IBR approved for §§ 63.1625(b).

* * * * *

Subpart XXX—National Emission Standards for Hazardous Air Pollutants for Ferroalloys Production: Ferromanganese and Silicomanganese

- 3. Section 63.1625 is amended by:
- a. Revising paragraphs (b)(9) introductory text, (b)(9)(i), (b)(9)(ii), and (b)(9)(v); and
- b. Revising paragraphs (d)(1)(ii) through (iv).

The revisions read as follows:

§ 63.1625 What are the performance test and compliance requirements for new, reconstructed, and existing facilities?

* * * * *

(b) * * *

(9) ASTM D7520–16 to determine opacity (incorporated by reference, see § 63.14) with the following conditions:

(i) During the digital camera opacity technique (DCOT) certification procedure outlined in Section 9.2 of ASTM D7520–16, you or the DCOT vendor must present the plumes in front of various backgrounds of color and contrast representing conditions anticipated during field use such as blue sky, trees and mixed backgrounds (clouds and/or a sparse tree stand).

(ii) You must have standard operating procedures in place including daily or other frequency quality checks to ensure the equipment is within manufacturing specifications as outlined in Section 8.1 of ASTM D7520–16.

* * * * *

(v) Use of this method does not provide or imply a certification or validation of any vendor's hardware or software. The onus to maintain and verify the certification and/or training of the DCOT camera, software and operator in accordance with ASTM D7520–16 and these requirements is on the facility, DCOT operator and DCOT vendor.

* * * * *

(d) * * *

(1) * * *

(ii) You must conduct the opacity observations according to ASTM D7520–16 (incorporated by reference, see § 63.14), for a period that includes at least one complete furnace process cycle for each furnace.

(iii) For a shop building that contains more than one furnace, you must conduct the opacity observations according to ASTM D7520–16 for a period that includes one tapping period from each furnace located in the shop building.

(iv) You must conduct the opacity observations according to ASTM D7520–16 for a 1-hour period that

includes at least one pouring for each MOR located in the shop building.

* * * * *

■ 4. Section 63.1626 is amended by:

- a. Revising paragraphs (c) introductory text and (c)(1);
- b. Redesignating paragraphs (d) through (o) as paragraphs (e) through (p), respectively;
- c. Adding new paragraph (d);
- d. Republishing the heading of redesignated paragraph (e), and revising paragraphs (e)(1), (e)(3) introductory text, (e)(4) introductory text, and (e)(4)(ii);
- e. Revising redesignated paragraph (h) introductory text;
- f. Revising redesignated paragraph (j) introductory text;
- g. Revising redesignated paragraph (k) introductory text; and
- h. Revising redesignated paragraph (p) introductory text.

The revisions and additions read as follows:

§ 63.1626 What monitoring requirements must I meet?

* * * * *

(c) For an existing positive pressure baghouse used to control emissions from an electric arc furnace that is not equipped with a bag leak detection system, you must specify in the standard operating procedures manual for inspections and routine maintenance, at a minimum, the requirements of paragraphs (c)(1) and (2) of this section.

(1) You must visually inspect the outlet of each baghouse using Method 22 on a twice daily basis (at least 4 hours apart) for evidence of any visible emissions indicating abnormal operations and must initiate corrective actions within 1 hour of any visible emissions that indicates abnormal operation. Corrective actions shall include, at a minimum, isolating, shutting down and conducting an internal inspection of the baghouse compartment that is the source of the visible emissions that indicate abnormal operations.

* * * * *

(d) For all other non-furnace baghouses that are not equipped with bag leak detection or CEMS, the procedures that you specify in the standard operating procedures manual for inspections and routine maintenance must, at a minimum, include the requirements of paragraphs (d)(1) and (2) of this section.

(1) You must observe the baghouse outlet on a daily basis for the presence of any visible emissions.

(2) In addition to the daily visible emissions observation, you must conduct the following activities:

- (i) Weekly confirmation that dust is being removed from hoppers through visual inspection, or equivalent means of ensuring the proper functioning of removal mechanisms.
- (ii) Daily check of compressed air supply for pulse-jet baghouses.
- (iii) An appropriate methodology for monitoring cleaning cycles to ensure proper operation.
- (iv) Monthly check of bag cleaning mechanisms for proper functioning through visual inspection or equivalent means.

(v) Quarterly visual check of bag tension on reverse air and shaker-type baghouses to ensure that the bags are not kinked (knead or bent) or lying on their sides. Such checks are not required for shaker-type baghouses using self-tensioning (spring loaded) devices.

(vi) Quarterly confirmation of the physical integrity of the baghouse structure through visual inspection of the baghouse interior for air leaks.

(vii) Semiannual inspection of fans for wear, material buildup and corrosion through visual inspection, vibration detectors, or equivalent means.

* * * * *

(e) *Bag leak detection system.* (1) For each baghouse used to control emissions from an electric arc furnace, you must install, operate, and maintain a bag leak detection system according to paragraphs (e)(2) through (4) of this section, unless a system meeting the requirements of paragraph (p) of this section, for a CEMS and continuous emissions rate monitoring system, is installed for monitoring the concentration of particulate matter, or an existing positive pressure baghouse used to control emissions from an electric arc furnaces that is subject to paragraph (c) of this section. You may choose to install, operate, and maintain a bag leak detection system for any other baghouse in operation at the facility according to paragraphs (e)(2) through (4) of this section.

* * * * *

(3) Each bag leak detection system must meet the specifications and requirements in paragraphs (e)(3)(i) through (viii) of this section.

* * * * *

(4) You must include in the standard operating procedures manual required by paragraph (a) of this section a corrective action plan that specifies the procedures to be followed in the case of a bag leak detection system alarm. The corrective action plan must include, at a minimum, the procedures that you

will use to determine and record the time and cause of the alarm as well as the corrective actions taken to minimize emissions as specified in paragraphs (e)(4)(i) and (ii) of this section.

* * * * *

(ii) The cause of the alarm must be alleviated by taking the necessary corrective action(s) that may include, but not be limited to, those listed in paragraphs (e)(4)(ii)(A) through (F) of this section.

* * * * *

(h) *Shop building opacity.* In order to demonstrate continuous compliance with the opacity standards in § 63.1623, you must comply with the requirements § 63.1625(d)(1) and one of the monitoring options in paragraphs (h)(1) or (2) of this section. The selected option must be consistent with that selected during the initial performance test described in § 63.1625(d)(2). Alternatively, you may use the provisions of § 63.8(f) to request approval to use an alternative monitoring method.

* * * * *

(j) *Requirements for sources using CEMS.* If you demonstrate compliance with any applicable emissions limit through use of a continuous monitoring system (CMS), where a CMS includes a continuous parameter monitoring system (CPMS) as well as a continuous emissions monitoring system (CEMS), you must develop a site-specific monitoring plan and submit this site-specific monitoring plan, if requested, at least 60 days before your initial performance evaluation (where applicable) of your CMS. Your site-specific monitoring plan must address the monitoring system design, data collection and the quality assurance and quality control elements outlined in this paragraph and in § 63.8(d). You must install, operate and maintain each CMS according to the procedures in your approved site-specific monitoring plan. Using the process described in § 63.8(f)(4), you may request approval of monitoring system quality assurance and quality control procedures alternative to those specified in paragraphs (j)(1) through (6) of this section in your site-specific monitoring plan.

* * * * *

(k) If you have an operating limit that requires the use of a CPMS, you must install, operate and maintain each continuous parameter monitoring system according to the procedures in paragraphs (k)(1) through (7) of this section.

* * * * *

(p) *Particulate Matter CEMS.* If you are using a CEMS to measure particulate matter emissions to meet requirements of this subpart, you must install, certify, operate and maintain the particulate matter CEMS as specified in paragraphs (p)(1) through (4) of this section.

* * * * *

■ 5. Section 63.1656 is amended by revising paragraphs (b)(7) introductory text, (b)(7)(i) and (ii), and (b)(7)(v) to read as follows:

§ 63.1656 Performance testing, test methods, and compliance demonstrations.

* * * * *

(b) * * *

(7) Method 9 of appendix A–4 of 40 CFR part 60 to determine opacity. ASTM D7520–16, “Standard Test Method for Determining the Opacity of a Plume in the Outdoor Ambient Atmosphere” may be used (incorporated by reference, see § 63.14) with the following conditions:

(i) During the digital camera opacity technique (DCOT) certification procedure outlined in Section 9.2 of ASTM D7520–16, the owner or operator or the DCOT vendor must present the plumes in front of various backgrounds of color and contrast representing conditions anticipated during field use such as blue sky, trees and mixed backgrounds (clouds and/or a sparse tree stand).

(ii) The owner or operator must also have standard operating procedures in place including daily or other frequency quality checks to ensure the equipment is within manufacturing specifications as outlined in Section 8.1 of ASTM D7520–16.

* * * * *

(v) Use of this approved alternative does not provide or imply a certification or validation of any vendor's hardware or software. The onus to maintain and verify the certification and/or training of the DCOT camera, software and operator in accordance with ASTM D7520–16 and these requirements is on the facility, DCOT operator and DCOT vendor.

* * * * *

[FR Doc. 2017–00156 Filed 1–17–17; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2015–0829; FRL–9956–85]

Acequinocyl; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of acequinocyl in or on multiple commodities which are identified and discussed later in this document. Interregional Project Number 4 (IR–4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective January 18, 2017. Objections and requests for hearings must be received on or before March 20, 2017, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2015–0829, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: Michael Goodis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: RDfrNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at http://www.ecfr.gov/cgi-bin/textidx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2015-0829 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before March 20, 2017. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2015-0829, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of May 19, 2016 (81 FR 31581) (FRL-9946-02), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 5E8422) by Interregional Research Project Number 4 (IR-4), Rutgers University, 500 College Rd. East, Suite 201 W, Princeton, NJ 08540. The petition requested that 40 CFR 180.599 be amended by establishing tolerances for residues of the insecticide acequinocyl in or on avocado at 0.4 parts per million (ppm); bean, dry, seed at 0.03 ppm; vegetable, cucurbit, group 9 at 0.2 ppm; tea, plucked leaves at 40 ppm; cherry subgroup 12-12A at 1.0 ppm; fruit, citrus, group 10-10 at 0.20 ppm; fruit, pome, group 11-10 at 0.40 ppm; nut, tree, group 14-12 at 0.02 ppm; and vegetable, fruiting, group 8-10 at 0.70 ppm. The petition also requested that upon establishment of the above tolerances, to remove the existing tolerances for cucumber at 0.15 ppm; melon, subgroup 9A at 0.15 ppm; cherry, sweet at 0.50 ppm; cherry, tart at 1.0 ppm; fruit, citrus, group 10 at 0.20 ppm; fruit, pome, group 11 at 0.40 ppm; nut, tree, group 14 at 0.02 ppm; pistachio at 0.02 ppm; vegetable, fruiting, group 8 at 0.70 ppm; and okra at 0.70 ppm. That document referenced a summary of the petition prepared by Arysta LifeScience, the registrant, which is available in the docket, <http://www.regulations.gov>. Comments were received on the notice of filing. EPA's response to these comments is discussed in Unit IV.C.

Based upon review of the data supporting the petition, EPA has modified the levels at which some of the tolerances are being established. The reason for these changes is explained in Unit IV.D.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section

408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for acequinocyl including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with acequinocyl follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

The target organs of acequinocyl are the liver (hepatocyte vacuolization, brown pigmented cells and perivascular inflammatory cells in liver) and hematopoietic system (hemorrhage, increased clotting factor times and increased platelet counts). There was no evidence of neurotoxicity and immunotoxicity and there was no evidence of carcinogenic potential in either the rat or mouse, or in the genotoxicity and mutagenicity studies.

In rats and rabbits, there was no evidence of increased quantitative or qualitative fetal susceptibility. In both species there were clinical signs and gross necropsy findings seen in maternal animals at similar or lower doses than those producing resorptions. In rabbits, there were increased incidences of late resorptions at the highest dose tested. In the rat two-generation reproductive toxicity study, there was evidence of apparent increased quantitative postnatal susceptibility. Offspring effects at the mid- and high-doses consisted of swollen body parts, protruding eyes, clinical signs, delays in pupil development, and increased mortality occurring mainly after weaning. No parental effects were observed up to the highest dose tested; however, hematological parameters, such as changes in partial and activated partial

thromboplastin times, were not measured in parental animals and changes in these parameters would have been expected at the same doses as offspring effects based on rat studies in the acequinocyl toxicological database. There were no effects on reproductive parameters.

Specific information on the studies received and the nature of the adverse effects caused by acequinocyl as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.regulations.gov> in the document titled “*Acequinocyl. Human Health Risk Assessment To Support the Petition for Tolerance for Residues in/on Dry Beans, Cucurbit Vegetables, Group 9, Avocado and Tea (Without U.S. Registration) and Crop Group Conversions for Citrus Fruit Group 10–10, Tree Nut Group 14–12, and Fruiting Vegetable Group 8–10*” at page 30 in docket ID number EPA–HQ–OPP–2015–0829.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any

amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/assessing-human-health-risk-pesticides>.

Since the last assessment for acequinocyl (**Federal Register** of April 13, 2016, (81 FR 21752) (FRL–9944–34)), the endpoints for acequinocyl were revisited and updated based upon the available data. An acute dietary endpoint for the general population has been selected to be consistent with current Agency practices. A summary of the updated toxicological endpoints for acequinocyl used for human risk assessment is shown in Table 1 of this unit.

TABLE 1—SUMMARY OF TOXICOLOGICAL DOSES AND ENDPOINTS FOR ACEQUINOCYL FOR USE IN HUMAN HEALTH RISK ASSESSMENT

Exposure/scenario	Point of departure and uncertainty/safety factors	RfD, PAD, LOC for risk assessment	Study and toxicological effects
Acute dietary (General population including infants and children).	NOAEL = 7.3 mg/kg/day UF _A = 10× UF _H = 10× FQPA SF = 1×	Acute RfD = 0.073 mg/kg/day. aPAD = 0.073 mg/kg/day	Reproduction and fertility effects in rats Offspring LOAEL (M/F) = 58.9 based on hemorrhagic effects, swollen body parts, protruding eyes, clinical signs, delays in pupil development and increased mortality post weaning.
Chronic dietary (All populations)	NOAEL = 2.7 mg/kg/day UF _A = 10× UF _H = 10× FQPA SF = 1×	Chronic RfD = 0.027 mg/kg/day. cPAD = 0.027 mg/kg/day LOC for MOE = 100	18-month carcinogenicity study in mice; LOAEL = 7.0 mg/kg/day based on clinical chemistry and microscopic non-neoplastic lesions (brown pigmented cells and perivascular inflammatory cells in liver).
Dermal short-term (1 to 30 days).	Dermal study NOAEL = 200 mg/kg/day. UF _A = 10× UF _H = 10× FQPA SF = 1×		28-dermal toxicity in rats. LOAEL (M/F) = 1000 mg/kg/day based on increased clotting factor times in males.
Cancer (Oral, dermal, inhalation).	Classification: Not likely to be carcinogenic to humans.		

FQPA SF = Food Quality Protection Act Safety Factor. LOAEL = lowest-observed-adverse-effect-level. LOC = level of concern. mg/kg/day = milligram/kilogram/day. MOE = margin of exposure. NOAEL = no-observed-adverse-effect-level. PAD = population-adjusted dose (a = acute, c = chronic). RfD = reference dose. UF = uncertainty factor. UF_A = extrapolation from animal to human (interspecies). UF_H = potential variation in sensitivity among members of the human population (intraspecies).

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to acequinocyl, EPA considered exposure under the petitioned-for tolerances as well as all existing acequinocyl tolerances in 40 CFR 180.599. EPA assessed dietary exposures from acequinocyl in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide,

if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure.

Such effects were identified for acequinocyl. In estimating acute dietary exposure, EPA used food consumption information from the United States Department of Agriculture (USDA) 2003–2008 National Health and Nutrition Examination Survey, What We Eat in America, (NHANES/WWEIA). As to residue levels in food, EPA assumed tolerance level residues and 100 percent

crop treated (PCT) for all proposed and registered uses.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the food consumption data from the USDA 2003–2008 NHANES/WWEIA. As to residue levels in food, EPA assumed tolerance level residues and 100 PCT for all proposed and registered uses.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that acequinocyl does not pose a cancer risk to humans. Therefore,

a dietary exposure assessment for the purpose of assessing cancer risk is unnecessary.

iv. *Anticipated residue and PCT information.* EPA did not use anticipated residue or PCT information in the dietary assessment for acequinocyl. Tolerance level residues and 100 PCT were assumed for all food commodities.

2. *Dietary exposure from drinking water.* The Agency used screening level water exposure models in the dietary exposure analysis and risk assessment for acequinocyl in drinking water. These simulation models take into account data on the physical, chemical, and fate/transport characteristics of acequinocyl. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/about-water-exposure-models-used-pesticide>.

Based on the Pesticide Root Zone Model/Exposure Analysis Modeling System (PRZM/EXAMS), Provisional Cranberry Model, and Screening Concentration in Ground Water (SCI-GROW) Model, the estimated drinking water concentrations (EDWCs) of acequinocyl for acute exposures are estimated to be 6.69 parts per billion (ppb) for surface water and 3.6×10^{-3} ppb for ground water, and for chronic exposures are estimated to be 6.69 ppb for surface water and $\geq 3.6 \times 10^{-3}$ ppb for ground water.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. For acute dietary risk assessment, the water concentration value of 6.69 ppb was used to assess the contribution to drinking water. For chronic dietary risk assessment, the water concentration of value 6.69 ppb was used to assess the contribution to drinking water.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Acequinocyl is currently registered for the following uses that could result in residential exposures: use on ornamentals for landscapes, gardens, and trees. EPA assessed residential exposure using the following assumptions: There is a potential for residential exposure associated with handler (i.e., mixing, loading and applying); however, all registered acequinocyl product labels with residential use sites (e.g., ornamentals for landscapes, gardens, and trees) require that handlers wear specific

clothing (e.g., long-sleeve shirt/long pants) and/or use personal protective equipment (PPE). Therefore, the Agency has made the assumption that these products are not for homeowner use, and has not conducted a quantitative residential handler assessment.

Only short-term post-application dermal exposure is anticipated for the registered residential uses. The quantitative exposure/risk assessment for residential post-application exposures assessed dermal exposures to adults for activities associated with gardening, dermal exposures to children (6 to <11 years old) for activities associated with playing in and around gardens and gardening, dermal exposures to adults associated with handling trees and retail plants, and dermal exposures to children (6 to <11 years old) for activities associated with playing in and around trees and retail plants.

Further information regarding EPA standard assumptions and generic inputs for residential exposures may be found at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/standard-operating-procedures-residential-pesticide>.

4. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider “available information” concerning the cumulative effects of a particular pesticide’s residues and “other substances that have a common mechanism of toxicity.”

EPA has not found acequinocyl to share a common mechanism of toxicity with any other substances, and acequinocyl does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that acequinocyl does not have a common mechanism of toxicity with other substances. For information regarding EPA’s efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA’s Web site at <http://www2.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides>.

D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the

completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There is no evidence of an increased quantitative or qualitative fetal susceptibility in rats or rabbits. In isolation, there was evidence of increased quantitative offspring susceptibility in the two-generation reproductive study; however, but the concern is low since: (1) The effects in pups are well characterized with a clear NOAEL; and (2) the effects are protected for by the selected endpoints. Therefore, there are no residual uncertainties for pre-/post-natal toxicity. Additionally, taking into consideration the full database, there would be no susceptibility to offspring since assessment of parental animals in the two-generation reproductive toxicity study were limited. If additional evaluations had been performed, including all hematological measurements, then it would be expected that effects on the hematopoietic system observed in the other oral rat studies would have been seen at the same doses eliciting offspring effects. Therefore, using a weight-of-evidence approach that puts the offspring findings in the two-generation reproductive toxicity study in context with the full toxicological database, there is no concern for susceptibility to offspring since parental toxicity would be anticipated at the same dose as offspring effects.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1x. That decision is based on the following findings:

i. The toxicity database for acequinocyl is complete.

ii. There is no indication that acequinocyl is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional UFs to account for neurotoxicity.

iii. There is no evidence of an increased quantitative or qualitative fetal susceptibility in rats or rabbits, but in isolation there was evidence of increased quantitative offspring susceptibility in the two-generation reproductive study. However, the

concern is low for the reasons outlined above in section III.D.2.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100 PCT and tolerance-level residues. EPA made conservative (protective) assumptions in the ground and surface water modeling used to assess exposure to acequinocyl in drinking water. EPA used similarly conservative assumptions to assess post-application exposure of children. These assessments will not underestimate the exposure and risks posed by acequinocyl.

E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to acequinocyl will occupy 71% of the aPAD for children 1–2 years old, the population group receiving the greatest exposure.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to acequinocyl from food and water will utilize 70% of the cPAD for children 1–2 years old, the population group receiving the greatest exposure. Based on the explanation in Unit III.C.3., regarding residential use patterns, chronic residential exposure to residues of acequinocyl is not expected.

3. *Short-term risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Acequinocyl is currently registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to acequinocyl.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded the combined short-term food, water, and

residential exposures result in aggregate MOEs of 1200 for adults and 890 for children 6–12 years old. Because EPA's level of concern for acequinocyl is a MOE of 100 or below, these MOEs are not of concern.

4. Intermediate-term risk.

Intermediate-term aggregate exposure takes into account intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

An intermediate-term adverse effect was identified; however, acequinocyl is not registered for any use patterns that would result in intermediate-term residential exposure. Intermediate-term risk is assessed based on intermediate-term residential exposure plus chronic dietary exposure. Because there is no intermediate-term residential exposure and chronic dietary exposure has already been assessed under the appropriately protective cPAD (which is at least as protective as the POD used to assess intermediate-term risk), no further assessment of intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating intermediate-term risk for acequinocyl.

5. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, acequinocyl is not expected to pose a cancer risk to humans.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to acequinocyl residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (two high-performance liquid chromatography methods with tandem mass-spectroscopy detection (HPLC/MS/MS) for determining residues in/on fruit and nut commodities (Morse Methods Meth-133 and Meth-135) is available to enforce the tolerance expression.

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: residuemethods@epa.gov.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever

possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established any MRLs for acequinocyl.

C. Response to Comments

A comment was submitted by the Center for Biological Diversity and was primarily concerned about EPA's consideration of the impacts of acequinocyl on the environment, pollinators, and endangered species. This comment is not relevant to the Agency's evaluation of safety of the acequinocyl tolerances under section 408 of the FFDCA, which requires the Agency to evaluate the potential harms to human health, not effects on the environment.

Two other comments were submitted in response to the Notice of Filing that stated, in part, that this chemical “should not be used at all in America or anywhere in the world” and that “no residue should be permitted on any food or other plant.” The Agency understands the commenter's concerns and recognizes that some individuals believe that pesticides should be banned on agricultural crops. However, the existing legal framework provided by section 408 of the FFDCA states that tolerances may be set when persons seeking such tolerances or exemptions have demonstrated that the pesticide meets the safety standard imposed by that statute. The citizens' comments appear to be directed at the underlying statute and not EPA's implementation of it; the citizens have made no contention that EPA has acted in violation of the statutory framework.

D. Revisions to Petitioned-For Tolerances

The petitioned-for tolerance of 0.4 for residues on avocado is being increased to 0.50 ppm as EPA corrected some residue levels in the field trials for degradation during storage and declared two of the trials to be replicates. The

data that EPA used in Organization for Economic Co-operation and Development (OECD) Maximum Residue Limits (MRL) Tolerance Worksheet for avocado was thus slightly different from the petitioner's data. The tolerance level of 0.15 ppm for residues in dry beans is based upon the OECD MRL tolerance worksheet. The difference is based on EPA using slightly different residue levels that were corrected for degradation during storage. The tolerance level of 0.30 ppm for residues in/on cucurbit vegetables is based upon the OECD MRL tolerance worksheet. The difference is based on EPA using slightly different residue levels that were corrected for degradation during storage. The data that EPA used in MRL tolerance spreadsheet for summer squash was slightly different from the petitioner's data. Concerning the crop group conversions, the tolerance level for residues in/on citrus fruit was modified to be harmonized with the Canadian MRL.

V. Conclusion

Therefore, tolerances are established for residues of acequinocyl, including its metabolites and degradates, in or on avocado at 0.50 ppm; bean, dry, seed at 0.15 ppm; cherry, subgroup 12–12A at 1.0 ppm; fruit, citrus, group 10–10 at 0.35 ppm; fruit, pome, group 11–10 at 0.40 ppm; nut, tree, group 14–12 at 0.02 ppm; tea, plucked leaves at 40 ppm; vegetable, cucurbit, group 9 at 0.30 ppm; and vegetable, fruiting, group 8–10 at 0.70 ppm. In addition, the existing tolerances on cherry, sweet; cherry, tart; cucumber; fruit, citrus, group 10; fruit, pome, group 11; melon, subgroup 9A; nut, tree, group 14; okra; pistachio; and vegetable, fruiting, group 8 are removed as unnecessary since they are now covered by the new tolerances.

VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled “Regulatory Planning and Review” (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled “Protection of Children from Environmental Health

Risks and Safety Risks” (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled “Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal**

Register. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 15, 2016.

Daniel J. Rosenblatt,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.599, in the table in paragraph (a);

■ a. Add alphabetically the entries “Avocado”; “Bean, dry, seed”; “Cherry, subgroup 12–12A”; “Fruit, citrus, group 10–10”; “Fruit, pome, group 11–10”; “Nut, tree, group 14–12”; “Tea, plucked leaves” (and a footnote); “Vegetable, cucurbit, group 9”; and “Vegetable, fruiting, group 8–10”; and

■ b. Remove the entries for “cherry, sweet”; “cherry, tart”; “cucumber”; “fruit, citrus, group 10”; “fruit, pome, group 11”; “melon, subgroup 9A”; “nut, tree, group 14”; “okra”; “pistachio”; and “vegetable, fruiting, group 8” from the table in paragraph (a).

The additions read as follows:

§ 180.599 Acequinocyl; tolerances for residues.

(a) * * *

Commodity	Parts per million
* * *	*
Avocado	0.50
Bean, dry, seed	0.15
* * *	*
Cherry, subgroup 12–12A	1.0
* * *	*
Fruit, citrus, group 10–10	0.35
Fruit, pome, group 11–10	0.40
* * *	*
Nut, tree, group 14–12	0.02
* * *	*
Tea, plucked leaves ¹	40
Vegetable, cucurbit, group 9	0.30
Vegetable, fruiting, group 8–10	0.70

¹ There are no U.S. registrations as of January 18, 2017 for use on tea.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Centers for Medicare & Medicaid Services****42 CFR Part 438****[CMS–2402–F]****RIN 0938–AT10****Medicaid Program; The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems****AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.**ACTION:** Final rule.

SUMMARY: This rule finalizes changes to the pass-through payment transition periods and the maximum amount of pass-through payments permitted annually during the transition periods under Medicaid managed care contract(s) and rate certification(s). This final rule prevents increases in pass-through payments and the addition of new pass-through payments beyond those in place when the pass-through payment transition periods were established, in the final Medicaid managed care regulations effective July 5, 2016.

DATES: *Effective Date:* These regulations are effective on March 20, 2017.

FOR FURTHER INFORMATION CONTACT: John Giles, (410) 786–1255.

SUPPLEMENTARY INFORMATION:**I. Background**

In the June 1, 2015 **Federal Register** (80 FR 31098), we published the “Medicaid and Children’s Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, Medicaid and CHIP Comprehensive Quality Strategies, and Revisions Related to Third Party Liability” proposed rule (“June 1, 2015 proposed rule”). As part of the actuarial soundness proposals, we proposed to define actuarially sound capitation rates as those sufficient to provide for all reasonable, appropriate, and attainable costs that are required under the terms of the contract, including furnishing of covered services and operation of the managed care plan for the duration of the contract. Among the proposals was a general rule that the state may not direct the managed care organization’s (MCO’s), prepaid

inpatient health plan’s (PIHP’s), or prepaid ambulatory health plan’s (PAHP’s) expenditures under the contract.

In the May 6, 2016 **Federal Register** (81 FR 27498), we published the “Medicaid and Children’s Health Insurance Program (CHIP) Programs; Medicaid Managed Care, CHIP Delivered in Managed Care, and Revisions Related to Third Party Liability” final rule (“May 6, 2016 final rule”), which finalized the June 1, 2015 proposed rule. In the final rule, we finalized, with some revisions, the proposal which limited state direction of payments, including pass-through payments as defined below.

In the November 22, 2016 **Federal Register** (81 FR 83777), we published the “Medicaid Program; The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems” proposed rule (“November 22, 2016 proposed rule”). This rule finalizes the November 22, 2016 proposed rule as discussed below. This final rule is consistent with the intent of the May 6, 2016 final rule to provide transition periods for states that already use pass-through payments—these transition periods allow states to implement changes to existing pass-through payments over a period of time to minimize disruption and to ensure continued financial support for safety-net providers. As we discussed in the November 22, 2016 proposed rule, this final rule is also consistent with the CMCS Informational Bulletin (CIB) concerning “The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery Systems,” which was published on July 29, 2016.

A. Summary of the Medicaid Managed Care May 6, 2016 Final Rule

We finalized a policy to limit state direction of payments, including pass-through payments, at § 438.6(c) and (d) in the May 6, 2016 final rule (81 FR 27587 through 27592). Specifically, under the final rule (81 FR 27588), we defined pass-through payments at § 438.6(a) as any amount required by the state (and considered in calculating the actuarially sound capitation rate) to be added to the contracted payment rates paid by the MCO, PIHP, or PAHP to hospitals, physicians, or nursing facilities that is not for the following purposes: A specific service or benefit provided to a specific enrollee covered under the contract; a provider payment methodology permitted under § 438.6(c)(1)(i) through (iii) for services and enrollees covered under the contract; a subcapitated payment

arrangement for a specific set of services and enrollees covered under the contract; graduate medical education (GME) payments; or federally-qualified health center (FQHC) or rural health clinic (RHC) wrap around payments. We noted that section 1903(m)(2)(A) of the Social Security Act (the Act) requires that capitation payments to managed care plans be actuarially sound; we interpret this requirement to mean that payments under the managed care contract must align with the provision of services to beneficiaries covered under the contract. We provided that these pass-through payments are not consistent with our regulatory standards for actuarially sound rates because they do not tie provider payments with the provision of services. The final rule contains a detailed description of the policy rationale (81 FR 27587 through 27592).

In an effort to provide a smooth transition for network providers, to support access for the beneficiaries they serve, and to provide states and managed care plans with adequate time to design and implement payment systems that link provider reimbursement with services covered under the contract or associated quality outcomes, we finalized transition periods related to pass-through payments for the specified provider types to which states make most pass-through payments under Medicaid managed care programs: Hospitals, physicians, and nursing homes (81 FR 27590 through 27592). As finalized, § 438.6(d)(2) and (3) provide a 10-year transition period for hospitals, subject to limitations on the amount of pass-through payments. For MCO, PIHP, or PAHP contracts beginning on or after July 1, 2027, states will not be permitted to require pass-through payments for hospitals. The final rule also provides a 5-year transition period for pass-through payments to physicians and nursing facilities. For MCO, PIHP, or PAHP contracts beginning on or after July 1, 2022, states will not be permitted to require pass-through payments for physicians or nursing facilities. These transition periods provide states, network providers, and managed care plans significant time and flexibility to integrate current pass-through payment arrangements into allowable payment structures under actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c).

As finalized in the May 6, 2016 final rule, § 438.6(d) limits the amount of pass-through payments to hospitals as a percentage of the “base amount,” which is defined in paragraph (a) and

calculated under rules in paragraph (d)(2). Section 438.6(d)(3) specifies a schedule for the phased reduction of the base amount, limiting the amount of pass-through payments to hospitals. For contracts beginning on or after July 1, 2017, the state may require pass-through payments to hospitals under the contract up to 100 percent of the base amount, as defined in the final rule. For subsequent contract years (contracts beginning on or after July 1, 2018 through contracts beginning on or after July 1, 2026), the portion of the base amount available for pass-through payments decreases by 10 percentage points per year. For contracts beginning on or after July 1, 2027, no pass-through payments to hospitals are permitted. The May 6, 2016 final rule noted that nothing would prohibit a state from eliminating pass-through payments to hospitals before contracts beginning on or after July 1, 2027. However, the final rule provided for a phased reduction in the percentage of the base amount that can be used for pass-through payments, because a phased transition would support the development of permissible and accountable payment approaches while mitigating any disruption to states and providers.

We believe that states will be able to more easily transition existing pass-through payments to physicians and nursing facilities to payment structures linked to services covered under the contract compared to the transition necessary for similar payments to hospitals. Consequently, the May 6, 2016 final rule, in § 438.6(d)(5), provided a shorter time period for eliminating pass-through payments to physicians and nursing facilities and did not prescribe a limit or phased reduction in these payments; states have the option to eliminate these payments immediately or phase down these payments over the 5 year transition period if they prefer. As noted in the May 6, 2016 final rule, the distinction between hospitals and nursing facilities and physicians was also based on the comments from stakeholders during the public comment period (81 FR 27590).

B. Questions About the May 6, 2016 Final Rule

Since publication of the May 6, 2016 final rule, we have received inquiries about states' ability to integrate new or increased pass-through payments into Medicaid managed care contracts. As explained in the CMCS Informational Bulletin (CIB) published on July 29, 2016,¹ adding new or increased pass-

through payments for hospitals, physicians, or nursing facilities complicates the required transition of these pass-through payments to permissible provider payment models.

The transition periods under the May 6, 2016 final rule provide states, network providers, and managed care plans significant time and flexibility to move existing pass-through payment arrangements (that is, those in effect when the final rule was published) into different, permissible payment structures under actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c). We did not intend for states, after the May 6, 2016 final rule was published, to begin additional or new pass-through payments, or to increase existing pass-through payments; such actions are contrary to and undermine the policy goal of eliminating pass-through payments. We proposed in the November 22, 2016 proposed rule and finalize here that we will not permit a pass-through payment amount to exceed the lesser of the amounts calculated under paragraph (d)(3) of this final rule. For states to add new or to increase existing pass-through payments is inconsistent with longstanding CMS policy, the proposal made in the June 1, 2015 proposed rule, and the May 6, 2016 final rule, which reflects the general policy goal to effectively and efficiently transition away from pass-through payments.

Under the May 6, 2016 final rule, we provided a delayed compliance deadline for § 438.6(c) and (d); we will enforce compliance with § 438.6(c) and (d) no later than the rating period for Medicaid managed care contracts beginning on or after July 1, 2017. Our exercise of enforcement discretion in this respect was not intended to create new opportunities for states to add or increase existing pass-through payments before July 1, 2017. This delay was intended to address concerns articulated by commenters, among them states and providers, that an abrupt end to directed pass-through payments could cause damaging disruption to safety-net providers. As discussed in the May 6, 2016 final rule and this final rule, pass-through payments are inconsistent with our interpretation and implementation of the statutory requirement for actuarially sound capitation rates because pass-through payments do not

tie provider payments to the provision of services under the contract (81 FR 27588). A distinguishing characteristic of a pass-through payment is that a managed care plan is contractually required by the state to pay providers an amount that is disconnected from the amount, quality, or outcomes of services delivered to enrollees under the contract during the rating period of the contract. When managed care plans only serve as a conduit for passing payments to providers independent of delivered services, such payments reduce managed care plans' ability to control expenditures, effectively use value-based purchasing strategies, implement provider-based quality initiatives, and generally use the full capitation payment to manage the care of enrollees. The May 6, 2016 final rule made clear our position on these payments and our intent that they be eliminated from Medicaid managed care delivery systems, except for the directed payment models permitted by § 438.6(c), or the payments excluded from the definition of a pass-through payment in § 438.6(a), such as FQHC wrap payments.

The transition periods provided under § 438.6(d) are for states to identify existing pass-through payments and begin either tying such payments directly to services and utilization covered under the contract or eliminating them completely in favor of other support mechanisms for providers that comply with the requirements in § 438.6(c). The transition periods for current pass-through payments minimize disruption to local health care systems and interruption of beneficiary access by permitting a gradual step down from current levels of pass-through payments: (1) At the schedule and subject to the limit announced in the May 6, 2016 final rule for hospitals under § 438.6(d)(3); and (2) at a schedule adopted by the state for physicians and nursing facilities under § 438.6(d)(5). By providing states, network providers, and managed care plans significant time and flexibility to integrate current pass-through payment arrangements into different payment structures (including enhanced fee schedules or the other approaches consistent with § 438.6(c)) and into actuarially sound capitation rates, we intended to address comments that the June 1, 2015 proposed rule would be unnecessarily disruptive and endanger safety-net provider systems that states have developed for Medicaid.

Questions from states following the May 6, 2016 final rule indicated that the transition period and delayed enforcement date have caused some

¹ The Use of New or Increased Pass-Through Payments in Medicaid Managed Care Delivery

Systems; available at <https://www.medicaid.gov/federal-policy-guidance/downloads/cib072916.pdf>. CMCS also noted in this CIB that it intended to further address in future rulemaking the issue of adding new or increased pass-through payments to managed care contracts.

confusion regarding our intent for increased and new pass-through payments for contracts prior to July 1, 2017, because the final rule did not explicitly prohibit such additions or increases. While we assumed such a prohibition was implicit in the May 6, 2016 final rule, as our discussion of § 438.6(d) made clear that pass-through payments were to be discontinued, we believe that this additional rulemaking is necessary to clarify this issue in light of the recent questions. Under this final rule, we are linking pass-through payments permitted during the transition period to the aggregate amounts of pass-through payments that were in place at the time the May 6, 2016 final rule became effective on July 5, 2016, which is consistent with the intent under the May 6, 2016 final rule to phase out pass-through payments under Medicaid managed care contracts.

II. Provisions of the Proposed Regulations and Analysis of and Responses to Public Comments

We received 46 timely comments from the public, including comments from hospitals, hospital associations, state Medicaid agencies, Medicaid managed care plans, and other healthcare providers and associations. The following sections, arranged by subject area, are a summary of the comments we received. In response to the November 22, 2016 proposed rule, some commenters chose to raise issues that were beyond the scope of our proposals. In this final rule, we are not summarizing or responding to those comments.

We proposed to revise § 438.6(d) to better effectuate the intent of the May 6, 2016 final rule. In the November 22, 2016 proposed rule, we first proposed to limit the availability of the transition periods in § 438.6(d)(3) and (5) (that is, the ability to continue pass-through payments for hospitals, physicians, or nursing facilities) to states that can demonstrate that they had such pass-through payments in either: (A) Managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016, and that were submitted for our review and approval on or before July 5, 2016; or (B) if the managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016 had not been submitted to us on or before July 5, 2016, the managed care contract(s) and rate certification(s) for a rating period before July 5, 2016 that had been most recently submitted to us for review and approval as of July 5, 2016.

Second, we proposed to prohibit retroactive adjustments or amendments

to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in § 438.6(a). In the proposed rule, we noted that we would not permit a pass-through payment amount to exceed the lesser of the amounts calculated under paragraph (d)(3).

Third, we proposed to establish a new maximum amount of permitted pass-through payments for each year of the transition period. For hospitals, a state would be limited (in the total amount of permissible pass-through payments) during each year of the transition period to the lesser of either: (A) The percentage of the base amount applicable to that contract year; or (B) the pass-through payment amount identified in proposed paragraph (d)(1)(i). Thus, the amount of pass-through payments identified by the state in order to satisfy proposed paragraph (d)(1)(i) would be compared to the amount representing the applicable percentage of the base amount that is calculated for each year of the transition period. For pass-through payments to physicians and nursing facilities, we also proposed to limit the amount of pass-through payments during the transition period to the amount of pass-through payments to physicians and nursing facilities under the contract and rate certification identified in proposed paragraph (d)(1)(i).

In making these comparisons to the pass-through payments under the managed care contract(s) in effect for the rating period covering July 5, 2016 as identified in proposed paragraph (d)(1)(i)(A), or the rating period before July 5, 2016 as identified in proposed paragraph (d)(1)(i)(B), we noted that we would look at total pass-through payment amounts for the specified provider types. Past aggregate amounts of hospital pass-through payments will be used in determining the maximum amount for hospital pass-through payments during the transition period; past aggregate amounts of physician pass-through payments will be used in determining the maximum amount for physician pass-through payments during the transition period; and past aggregate amounts of nursing facility pass-through payments will be used in determining the maximum amount for nursing facility pass-through payments during the transition period.

Under the November 22, 2016 proposed rule, the aggregate amounts of pass-through payments in each provider category would be used to set applicable limits for the provider type during the transition period, without regard to the specific provider(s) that received a pass-

through payment. For example, if the pass-through payments in the contract identified under paragraph (d)(1)(i) were to 5 specific hospitals, the aggregate amount of pass-through payments to those hospitals would be relevant in establishing the limit during the transition period, but different hospitals could be the recipients of pass-through payments during the transition. We requested comment on our proposed approach as a whole, as well as our specific proposals to amend the existing regulation text and revise paragraph (d)(1) (adding new (d)(1)(i) and (ii)), revise paragraph (d)(3) (adding new (d)(3)(i) and (ii)), and revise paragraph (d)(5).

A. General Comments

Comment: Some commenters stated concerns with the overall proposal and stated that the current proposal would limit state flexibility for pass-through payments beyond what was finalized in the May 6, 2016 final rule; these commenters recommended that we not finalize the November 22, 2016 proposed rule and recommended that we ensure that states continue to have the flexibility permitted in the May 6, 2016 final rule for pass-through payments in Medicaid managed care programs.

Response: We do not agree with commenters that states should have more flexibility in this area than this final rule provides. We believe that this final rule flows from the intent of the May 6, 2016 final rule to phase out pass-through payments under Medicaid managed care contracts and ensure that the transition periods be used by states that had pass-through payments in their MCO, PIHP, or PAHP contracts when we finalized the May 6, 2016 final rule. While we recognize that the regulation text finalized in the May 6, 2016 final rule was not explicit on this point and have taken steps to amend this final rule here to rectify that, this final rule is consistent with the policy and goals of the May 6, 2016 final rule in adopting transition periods. This final regulation maintains the significant time and flexibility provided to states, network providers, and managed care plans during the transition periods to move existing pass-through payment arrangements (those in effect when the May 6, 2016 final rule was published) into different, permissible payment structures under actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c) that tie managed care payments to services and utilization (and outcomes) covered under the contract.

Comment: Some commenters recommended that we not finalize this rule and that we not further restrict or limit pass-through payments beyond what was included in the May 6, 2016 final rule to support safety-net providers that provide care to Medicaid managed care enrollees. These commenters stated that states and providers have already begun to plan for the transition periods beginning in July 2017 and that additional constraints will add significant burden on safety-net providers.

Response: We do not agree that the proposed provisions, finalized here, restrict or limit states from continuing to use pass-through payments to support safety-net providers that provide care to Medicaid managed care enrollees during the transition periods adopted in the May 6, 2016 final rule. The May 6, 2016 final rule provided transition periods designed and finalized to enable *affected* providers, states, and managed care plans—meaning those that already had pass-through payments in place—to transition away from existing pass-through payments and limit disruption to safety-net providers. We believe such payments can be transitioned into permissible and accountable payment models that are tied to covered services, value-based payment structures, or delivery system reform initiatives without undermining access for Medicaid managed care enrollees. This rule flows from and reinforces the intent of the May 6, 2016 final rule by ensuring that the transition periods are used by states that had pass-through payments in their MCO, PIHP, or PAHP contracts when we finalized the May 6, 2016 final rule. These are the states for which we were concerned, based on the comments to the June 1, 2015 proposed rule, that an abrupt end to pass-through payments could be disruptive to their health care delivery system and safety-net providers. While we recognize that the regulation text finalized in the May 6, 2016 final rule was not explicit on this point and have taken steps to amend this final rule here to rectify that, this final rule is consistent with the policy and goals of the May 6, 2016 final rule in adopting transition periods.

If states do not currently have pass-through payments in their managed care contracts, we believe that the transition periods are unnecessary to avoid disruption. States that do not have pass-through payments in their managed care contracts that wish to pursue delivery system and provider payment initiatives are already in a strong position to design and implement allowable payment structures under actuarially sound capitation rates, including enhanced fee

schedules or the other approaches consistent with § 438.6(c) that tie managed care payments to services and utilization covered under the contract.

We understand that states and providers have already begun to plan for the transition periods beginning in July 2017, but we do not believe that this rule will create substantially more constraints or add significant burden on safety-net providers. Under the May 6, 2016 final rule, we did not intend to permit or encourage states to add new pass-through payments or to ramp-up pass-through payments in ways that are not consistent with the elimination of pass-through payments during the transition periods. Adding new or increased pass-through payments would substantially complicate the required transition away from pass-through payments, potentially creating more disruption for safety-net providers by increasing dependence on these payments and then compressing the actual amount of time available to eliminate them.

Comment: Some commenters recommended that the proposed rule not be finalized until the new administration has the opportunity to review and ensure that the policy in the November 22, 2016 proposed rule is consistent with the new administration's Medicaid policy and goals. These commenters stated that such an approach is congruent with the general practice and policy that significant new rules should not be issued shortly before a change in the administration.

Response: A delay in finalizing this rule is contrary to our goals and policy so we do not accept this recommendation. This final rule flows from and reinforces the intent of the May 6, 2016 final rule to phase out pass-through payments under Medicaid managed care contracts; any delay would undermine the goals of that rule and make the transition to an actuarially sound approach more difficult. We discussed in the June 1, 2015 proposed rule, the May 6, 2016 final rule, the July 29, 2016 CIB, and the November 22, 2016 proposed rule the rationale for our position that pass-through payments are not consistent with our regulatory standards for actuarially sound rates; specifically, because they do not tie provider payments with the provision of services. While we recognize that the regulation text finalized in the May 6, 2016 final rule was not explicit on the point that this final rulemaking addresses (for example, that the transition periods were not for the initial adoption of and then elimination of new or increased pass-through

payments), this final rule is consistent with the policy and goals of the May 6, 2016 final rule in adopting transition periods. This final rule is congruent with established and published policy guidance, is not a new policy being implemented at the last minute, and is timely as states prepare for the July 1, 2017 implementation date.

In addition to comments on the proposal generally, we received comments about specific provisions in the proposal. We address and respond to those comments below.

B. Comments on § 438.6(d)(1)

We proposed to revise paragraph (d)(1) to clarify that a state may continue to require an MCO, PIHP, or PAHP to make pass-through payments (as defined in § 438.6(a)) to network providers that are hospitals, physicians, or nursing facilities under the contract, provided the requirements of paragraph (d) are met. We proposed retaining the regulation text that provides explicitly that states may not require MCOs, PIHPs, or PAHPs to make pass-through payments other than those permitted under paragraph (d). We received the following comments in response to our proposal to revise § 438.6(d)(1).

Comment: Some commenters recommended that we remove the regulation text that provides explicitly that states may not require MCOs, PIHPs, or PAHPs to make pass-through payments other than those permitted under paragraph (d); these commenters recommended that we reconsider the pass-through payment policy finalized in the May 6, 2016 final rule.

Response: Since commenters did not raise any new issues for our consideration in paragraph (d)(1), we do not agree with commenters that we should remove the regulation text that provides explicitly that states may not require MCOs, PIHPs, or PAHPs to make pass-through payments other than those permitted under paragraph (d). The May 6, 2016 final rule provided a detailed description of the policy rationale (81 FR 27587 through 27592) for why we established pass-through payment transition periods and limited pass-through payments to hospitals, physicians, and nursing facilities, and this policy rationale has not changed. With the proposal to amend the regulation text to more explicitly reflect our intent for the transition periods and the limits on pass-through payments, we did not intend to revisit our rationale for establishing the pass-through payment transition periods. We continue to believe that pass-through payments are not consistent with the statutory

requirements that capitation rates be actuarially sound.

After considering the comments, we are finalizing § 438.6(d)(1) as proposed without revision.

C. Comments on § 438.6(d)(1)(i)

Under proposed paragraph (d)(1)(i), a state would be able to use the transition period for pass-through payments to hospitals, physicians, or nursing facilities only if the state can demonstrate that it had pass-through payments for hospitals, physicians, or nursing facilities, respectively, in *both* the managed care contract(s) *and* rate certification(s) that meet the requirements in either proposed paragraph (d)(1)(i)(A) or (B).

We proposed in paragraph (d)(1)(i)(A) that the managed care contract(s) and rate certification(s) must be for the rating period that includes July 5, 2016 and have been submitted for our review and approval on or before July 5, 2016. If the state had not yet submitted MCO, PIHP, or PAHP contract(s) and rate certification(s) for the rating period that includes July 5, 2016, we proposed in paragraph (d)(1)(i)(B) that the state must demonstrate that it required the MCO, PIHP, or PAHP to make pass-through payments for a rating period before July 5, 2016 in the managed care contract(s) and rate certification(s) that were most recently submitted for our review and approval as of July 5, 2016.

We proposed to use the date July 5, 2016 for the purpose of identifying the pass-through payments in managed care contract(s) and rate certification(s) that are eligible for the pass-through payment transition period because it is consistent with the intent of the May 6, 2016 final rule that the transition period be used by states that had pass-through payments in their MCO, PIHP, or PAHP contracts when that rule was finalized. The transition period was intended to address concerns, articulated in the comments to the June 1, 2015 proposed rule, that an abrupt end to pass-through payments could be disruptive to state health care delivery systems and safety-net providers. We noted in the November 22, 2016 proposed rule that limiting the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule facilitates elimination of these types of payments. We did not intend for the May 6, 2016 final rule to incentivize or encourage states to add new pass-through payments, as we believe that these payments are inconsistent with actuarially sound rates. We received the following comments in response to our proposal to revise § 438.6(d)(1)(i),

including new paragraphs (d)(1)(i)(A) and (B).

Comment: Some commenters recommended that we not finalize paragraph (d)(1)(i) because this new provision will be administratively burdensome on states and has the potential to delay our approval of managed care contracts and rate certifications. Other commenters recommended that we add regulatory text to address scenarios in which states had not submitted managed care contracts or rate certifications to us by July 5, 2016, but states had already executed contracts with their managed care plans. These commenters recommended that we permit states to produce these executed contracts and allow these states to use these managed care contracts and rate certifications for the purpose of the transition period.

Response: We believe that the requirements under § 438.6(d)(1)(i) will not be significantly more burdensome on states and will not cause delays in the approval of managed care contracts and rate certifications. To the contrary, we believe that the proposed requirements under § 438.6(d)(1)(i) will streamline the process for documenting and demonstrating pass-through payments and will facilitate a quicker approval process because the pass-through payments will be more transparently identified. In addition, we currently review and work with states on managed care contracts and rates, and because pass-through payments exist today, any additional burden to state or federal governments should be minimal.

We also do not agree that additional regulatory text is necessary to address scenarios in which states had not submitted managed care contracts or rate certifications to us by July 5, 2016, but states had already executed contracts with their managed care plans. As proposed in § 438.6(d)(1)(i), we will permit states to demonstrate pass-through payments in two ways: (1) Pass-through payments for hospitals, physicians, or nursing facilities were in managed care contracts *and* rate certifications for the rating period that includes July 5, 2016 and were submitted for our review and approval before July 5, 2016; or (2) if the managed care contracts and rate certifications for the rating period that includes July 5, 2016 had not been submitted to us on or before July 5, 2016, pass-through payments for hospitals, physicians, or nursing facilities were in managed care contracts *and* rate certifications for a rating period before July 5, 2016 that had been most recently submitted for our review and approval as of July 5,

2016. We believe these requirements strike the appropriate balance between administrative simplicity and flexibility.

Comment: Some commenters recommended that we withdraw this proposal. These commenters stated that establishing value-based payment arrangements, delivery system reform, minimum fee schedules, and payment rate increases require substantial time and attention. These commenters believed that the fact that some states had established pass-through payments before the effective date of the May 6, 2016 final rule (July 5, 2016) should not preclude other states from receiving similar reasonable flexibilities to implement permissible payment arrangements under Medicaid managed care.

Response: We do not agree with commenters that we should withdraw this proposal. While we understand that establishing value-based payment arrangements, delivery system reform, minimum fee schedules, and payment rate increases require substantial time and attention, we see no rationale to provide transition periods for states to phase out and transition away from pass-through payments if they have not previously implemented such payments. Unlike states that already have pass-through payments in place and need to reverse those actions, states that have not already used such pass-through payments are starting from a clean slate in terms of adopting payment mechanisms and systems described in § 438.6(c). To permit new and increased pass-through payments is contrary to the policy adopted in the May 6, 2016 final rule of eliminating pass-through payments and is not consistent with our regulatory standards for actuarially sound rates. Further, encouraging or enabling states to add or increase such pass-through payments during the transition periods only exacerbates the challenges of eliminating them and transitioning to actuarially sound rates, or establishing value-based payment arrangements, delivery system reform, and fee schedule and payment rate reforms. For states with existing pass-through payments, the transition periods provide significant time and flexibility to integrate existing pass-through payment arrangements into permissible payment structures that tie provider payments to the provision of services (or outcomes) under the contract. For states that currently do not have pass-through payments in their managed care contracts that wish to pursue delivery system and provider payment initiatives, we believe such states are already in a better and superior position to design and

implement allowable payment structures within actuarially sound capitation rates, including enhanced fee schedules or the other approaches consistent with § 438.6(c) that tie managed care payments to services and utilization covered under the contract.

Comment: Some commenters did not agree with the use of the July 5, 2016 date and characterized the use of that date as finalizing a rule that applies retroactively. These commenters stated that the use of the July 5, 2016 date and retroactive rulemaking is not consistent with the intent of notice and comment rulemaking under the Administrative Procedure Act (APA) and makes it impossible for states and providers to plan for the potential impact of such rulemaking. Some commenters recommended that we withdraw the proposed rule immediately and stated that our proposals would significantly and retroactively change the compliance date for the pass-through payment phase-down and would effectively move-up the start of the phase-out period a full year from July 1, 2017 to July 5, 2016. These commenters stated that such a change in the compliance date would result in substantial new payment restrictions with little time for states and hospitals to make adjustments. These commenters stated concern that further limiting pass-through payments could adversely affect hospitals and the patients they serve.

Response: This final rule will not and does not apply retroactively to July 5, 2016, and we have followed all notice and comment procedures for rulemaking under the APA. This final rule only affects future action of states and does not penalize or invalidate past actions taken by states, which is permissible rulemaking.² We provided our detailed rationale in the proposed rule for using the July 5, 2016 date; we are only using the July 5, 2016 date for the purpose of identifying the pass-through payments in managed care contracts and rate certifications that are eligible for the pass-through payment transition period. That date was chosen because it is consistent with our intent that the transition period be used by states that had pass-through payments

in their MCO, PIHP, or PAHP contracts when we finalized that rule. Limiting the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule (July 5, 2016) supports the policy goal of eliminating these types of payments, while ensuring that an abrupt end to pass-through payments will not be disruptive to state health care delivery systems and safety-net providers. Using this past date as the point by which to determine eligibility for the transition period eliminates the possibility that the transition period itself encourages states to create new or increase pass-through payments.

For commenters concerned about compliance dates, we want to clarify that this rule does not change the original compliance date for § 438.6(d) from the May 6, 2016 final rule. We will still enforce compliance with the requirements in § 438.6(d) no later than the rating period for Medicaid managed care contracts beginning on or after July 1, 2017. As discussed in the November 22, 2016 proposed rule and this final rule, our exercise of enforcement discretion in permitting delayed compliance of the May 6, 2016 final rule with § 438.6(d) was not intended to create new opportunities for states to add or increase existing pass-through payments either before or after July 1, 2017. This delay was intended to address concerns articulated by commenters, among them states and providers, that an abrupt end to directed pass-through payments could cause damaging disruption to safety-net providers. The delay was also intended to give states and managed care plans time to appropriately address any contract or rate issues needed to implement and comply with § 438.6(d). This final rule amends the parameters for the transition periods that begin with rating periods for contracts starting on or after July 1, 2017. As that date is still several months in the future, this final rule is not retroactive.

We understand the need for states and providers to have adequate time to make adjustments in complying with the requirements at § 438.6(d)—that is why the May 6, 2016 final rule provided transition periods to phase-down pass-through payments. We agree and noted in the May 6, 2016 final rule (81 FR 27589) and the November 22, 2016 proposed rule (81 FR 83782) that the transition from one payment structure to another often requires robust provider and stakeholder engagement, agreement on approaches to care delivery and payment, establishing systems for measuring outcomes and quality, planning efforts to implement changes,

and evaluating the potential impact of change on Medicaid financing mechanisms. However, for states that do not currently have pass-through payments in their managed care contracts, transition periods are unnecessary. States that do not have pass-through payments in their managed care contracts that wish to pursue delivery system and provider payment initiatives can design and implement allowable payment structures under actuarially sound capitation rates tying managed care payments to services and utilization covered under the contract without concern that modifying existing pass-through payments could potentially undermine access for Medicaid managed care enrollees or adversely impact hospitals.

Comment: Some commenters stated that for many states, the capitation rates and contracts submitted as of or prior to July 5, 2016 were for prior rating periods when both enrollment numbers and the cost of providing care would be substantially less than the total enrollments and costs for current and future rating periods. These commenters stated that the limitation on setting pass-through payments based on a prior submitted date (July 5, 2016) of capitation rates and contracts deviates from the longstanding practice of states making retroactive adjustments and amendments to actuarially sound capitation rates. These commenters stated that the setting of an aggregate pass-through payment amount limit based on capitation rates and contracts submitted by states as of July 5, 2016 has the added effect of speeding up the transition periods established under the May 6, 2016 final rule and that states should be provided additional time to submit for our approval new managed care capitation rates, including pass-through payments, because states and providers had no notice prior to this cutoff date; some of these commenters recommended that we modify the rule to allow the use of the most recent rate year for demonstrating previous pass-through payments.

Response: We understand that for some states, the capitation rates and contracts submitted as of or prior to July 5, 2016 would be for prior rating periods; it is for this reason that under the proposed requirements in § 438.6(d)(1)(i), we permitted states to demonstrate pass-through payments in the two ways described in paragraphs (d)(1)(i)(A) and (B).

We do not believe that the limitation on setting pass-through payments based on a prior submitted date deviates from the practice of retroactive amendments

² Here, the rule only affects future action and limits future choices available to states. Retroactive rules “alter[] the past legal consequences of past actions.” *Bowen v. Georgetown Univ. Hosp.*, 488 U.S. 204, 219, 109 S. Ct. 468 (1988) (Scalia, J., concurring) (emphasis in original). When an agency takes action to alter the future effect but not the past legal consequences of an activity, the agency has not taken a retroactive action; similarly, when agency action upsets expectations for future activity that are based on prior law, it has not taken a retroaction action. *Mobile Relay Assocs. v. F.C.C.*, 457 F.3d 1, 10–11 (D.C. Cir. 2006).

to capitation rates. Under this final rule, we are not generally restricting states from adjusting or amending their actuarially sound capitation rates; the requirements for retroactive adjustments to capitation rates are specified at § 438.7(c)(2) and those requirements are not changed with this final rule. Since we will enforce compliance with the requirements of § 438.7(c)(2) for rating periods for contracts beginning July 1, 2017, we also note that before the May 6, 2016 final rule, states were permitted to adjust and amend actuarially sound capitation rates retroactively under § 438.6(c)(1). This final rule does not change these policies in permitting states to adjust and amend actuarially sound capitation rates retroactively.

Under paragraph (d)(1)(ii), as proposed and as finalized, we will not approve a retroactive adjustment or amendment to managed care contracts and rate certifications to add new pass-through payments or increase existing pass-through payments, as defined in § 438.6(a). This limit only applies to retroactive adjustments to capitation rates related to new or increased pass-through payments; other retroactive adjustments to rates are not affected by this final rule. The existing policy permitting states flexibility to make other changes in capitation rates, subject to the limits on filing claims for FFP under 45 CFR 95.7 and, for contracts for rating periods after July 1, 2017, subject to the requirements in § 438.7(c)(2), remains in effect for all other changes to capitation rates.

We also do not agree that this proposal has the added effect of speeding up the transition periods established under the May 6, 2016 final rule. We indicated in the proposed rule that we did not intend to speed up the rate of a state's phase down of pass-through payments; rather, the proposed rule intended only to prevent increases in pass-through payments and the addition of new pass-through payments beyond what was already in place when the pass-through payment limits and transition periods were finalized in the May 6, 2016 final rule. The length of the transition periods remains the same under this final rule: 10 years for hospital pass-through payments and 5 years for physician and nursing facility pass-through payments. States that were reliant on and using pass-through payments at the time we finalized the May 6, 2016 final rule will continue to be eligible for the full transition periods under this final rule. Further, this final rule will permit states to continue pass-through payments in the same amount as before the beginning of the transition period, unless and until, that amount

exceeds the percentage of the base amount available for the applicable year of the transition period for hospital pass-through payments. Our amendments to § 438.6(d) only serve to prevent states from adding new pass-through payments, or increasing the total amount of pass-through payments, in the Medicaid managed care context.

We also do not agree that states should be provided additional time to submit new managed care capitation rates to include new or increased pass-through payments, because such an approach is contrary to our policy goal of eliminating pass-through payments. We believe that limiting the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule (July 5, 2016) supports the policy goal of eliminating these types of payments, while ensuring that an abrupt end to already existing pass-through payments will not be disruptive to state health care delivery systems and safety-net providers. Using the date of July 5, 2016 as the point by which to determine eligibility for the transition period eliminates concern that the transition period itself encourages states to create new or increase pass-through payments despite our policy concerns that such payments are inconsistent with actuarial soundness and may compromise a managed care plan's ability to effectively direct care and implement quality improvement strategies.

Comment: Some commenters recommended that we include specific regulatory text at § 438.6(d)(1)(i) to also specify that in order to use a transition period described under paragraph (d), a state must demonstrate that it had pass-through payments for hospitals, physicians, or nursing facilities "in managed care contracts and rate certifications for the rating period beginning before October 1, 2016, regardless of the date of submission to CMS, if the state can demonstrate that funding for the pass-through payment was approved by the state's legislature prior to July 5, 2016, and that corresponding supplemental payments were made under Medicaid fee-for-service (FFS) or section 1115 demonstration programs for at least 10 consecutive years prior to July 5, 2016." These commenters stated that this language would ensure that a specific pass-through payment would meet the criteria under the proposed rule.

Response: We understand the commenters' concerns regarding a specific pass-through payment that was recently approved by their state legislature; however, including the commenters' suggested regulatory text at

§ 438.6(d)(1)(i) would not comport with our policy goals. The pass-through payment transition periods included in the May 6, 2016 final rule were intended to be used by states that already had pass-through payments in place and would face significant disruption if immediate compliance with § 438.6(c) were required. Under the proposed rule and this final rule, we are linking pass-through payments permitted during the transition period to the aggregate amounts of pass-through payments that were in place at the time the May 6, 2016 final rule became effective on July 5, 2016, which is consistent with the intent under the May 6, 2016 final rule to eliminate pass-through payments but provide a transition period to limit disruption to safety net providers. Changing our proposal to include "managed care contracts and rate certifications for the rating period beginning before October 1, 2016 regardless of the date of submission to CMS" is not consistent with the rationale in the May 6, 2016 final rule or the November 22, 2016 proposed rule and would permit certain new or increased pass-through payments beyond those already in place at the time the May 6, 2016 final rule became effective on July 5, 2016.

Further, we do not believe that we should allow new or increased pass-through payments for states with corresponding supplemental payments that were made under Medicaid FFS or section 1115 demonstration programs prior to July 5, 2016. As we have described throughout this rule, pass-through payments are not consistent with our regulatory standards for actuarially sound rates because they do not tie provider payments with the provision of services. For states with supplemental payments that were made under Medicaid FFS or section 1115 demonstration programs prior to July 5, 2016, we believe that as part of a state's transition to a managed care delivery system, the state needs to integrate such FFS supplemental payments into allowable payment structures that tie managed care payments to services and utilization covered under the contract. Integrating the FFS supplemental payments into allowable payment structures at the time of the transition will ensure that the state can hold managed care plans accountable for the cost and quality of services delivered under the contract.

After considering the comments, we are finalizing § 438.6(d)(1)(i) as proposed without revision.

D. Comments on § 438.6(d)(1)(ii)

We proposed in paragraph (d)(1)(ii) that we would not approve a retroactive adjustment or amendment to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in § 438.6(a). We noted that we would not permit a pass-through payment amount for hospitals to exceed the lesser of the amounts calculated under paragraph (d)(3) in the proposed rule. We also proposed, in paragraph (d)(5), that pass-through payment amounts to physicians and nursing facilities would be limited to the amount in place in the managed care contracts and rate certifications submitted pursuant to paragraph (d)(1)(i). We proposed paragraph (d)(1)(ii) to prevent states from undermining the policy goal of limiting the use of the transition period to states that had pass-through payments in effect as of the effective date of the May 6, 2016 final rule. This proposed change also aligns with the policy rationale under the May 6, 2016 final rule and the July 29, 2016 CMCS Informational Bulletin (CIB) by prohibiting new or increased pass-through payments in Medicaid managed care contract(s), notwithstanding the adjustments to the base amount permitted in § 438.6(d)(2). We received the following comments in response to our proposal to revise § 438.6(d)(1)(ii).

Comment: Some commenters recommended that we address scenarios in which states are already paying pass-through payments through their managed care plans and were currently in the process of amending managed care contracts and rate certifications when the proposed rule was issued; these commenters recommended that we permit such retroactive adjustments and amendments. Some commenters provided that states have historically implemented retroactive rate adjustments to capitation rates and processed routine adjustments and amendments every year; these commenters recommended that we permit these adjustments and amendments and address how such routine activities would fit with this rule. Other commenters recommended that we permit retroactive adjustments and amendments through July 1, 2017 to account for potential increases in pass-through payments that were put into place before this rule was issued.

Response: We do not agree that additional regulatory text is needed to address scenarios in which states are already paying pass-through payments through their managed care plans and

were in the process of amending managed care contracts and rate certifications at the time of the May 6, 2016 final rule or the November 22, 2016 proposed rule. It is unclear to us what standard we could use to implement this recommendation while preventing new or increased pass-through payments. We note that § 438.6(d)(1)(ii), as proposed and as finalized here, will not be a barrier to the approval of retroactive changes to managed care contracts and rate certifications when the retroactive change does not purport to add or increase a pass-through payment to hospitals, physicians, or nursing facilities. Therefore, states that were in the process of amending contracts or rates for other purposes should not be affected by § 438.6(d)(1)(ii).

States will need to meet the requirements in § 438.6(d)(1)(i) in order to use a transition period described in § 438.6(d). That means that states must be able to demonstrate pass-through payments in managed care contracts and rate certifications under the requirements in proposed § 438.6(d)(1)(i)(A) and (B). For commenters concerned about general adjustments and amendments unrelated to new or increased pass-through payments, this rule does not impact those routine activities that states undertake each year; the requirements in § 438.6(d)(1)(ii), as proposed and finalized here, only limit retroactive adjustments and amendments intended to add new pass-through payments or increase existing pass-through payments defined in § 438.6(a). Without this provision limiting retroactive changes to pass-through payments, a state could retroactively change a prior, submitted managed care contract and rate certification to increase or add pass-through payments and eliminate the restrictions on the use of the transition periods that were proposed in the November 22, 2016 proposed rule and finalized in this rule. Further, the adjustments to the base amount under § 438.6(d)(2) are still permitted upon finalization of this rule; therefore, the base amount will be calculated annually and increases in Medicaid and Medicare FFS rates will be taken into account even though a smaller percentage of the base amount will be available for pass-through payments. However, we would not permit a pass-through payment amount to exceed the lesser of the amounts calculated under paragraph (d)(3) in this rule. We are not generally restricting states from adjusting or amending their actuarially sound capitation rates that are unrelated to

new or increased pass-through payments; the general requirements for retroactive adjustments to capitation rates are specified at § 438.7(c)(2) and those requirements are not changed with this final rule. Only contract actions to add or increase pass-through payments on a retroactive basis will be denied under § 438.6(d)(1)(ii); other retroactive rate changes will be evaluated and approved pursuant to other applicable rules adopted prior to this rulemaking.

Finally, we do not believe that we should permit retroactive adjustments and amendments through July 1, 2017 to account for potential increases in pass-through payments that were put into place before this rule. This approach is not consistent with our policy, which has been discussed in the May 6, 2016 final rule and throughout this final rule, to eliminate pass-through payments, which are inconsistent with our regulatory standards for actuarially sound capitation rates.

After considering the comments, we are finalizing § 438.6(d)(1)(ii) as proposed without revision.

E. Comments on § 438.6(d)(3)

In paragraph (d)(3), we proposed to amend the cap on the amount of pass-through payments to hospitals that may be incorporated into managed care contract(s) and rate certification(s) during the transition period for hospital payments, which will apply to rating periods for contract(s) beginning on or after July 1, 2017. Specifically, we proposed to revise § 438.6(d)(3) to require that the limit on pass-through payments each year of the transition period be the lesser of: (A) The sum of the results of paragraphs (d)(2)(i) and (ii),³ as modified under the schedule in this paragraph (d)(3); or (B) the total dollar amount of pass-through payments to hospitals identified by the state in the managed care contract(s) and rate certification(s) used to meet the requirement in paragraph (d)(1)(i). This proposed language would limit the amount of pass-through payments each contract year to the lesser of the calculation adopted in the May 6, 2016 final rule (the “base amount”), as decreased each successive year under

³ The portion of the base amount calculated in § 438.6(d)(2)(i) is analogous to performing UPL calculations under a FFS delivery system, using payments from managed care plans for Medicaid managed care hospital services in place of the state's payments for FFS hospital services under the state plan. The portion of the base amount calculated in § 438.6(d)(2)(ii) takes into account hospital services and populations included in managed care during the rating period that includes pass-through payments which were in FFS two years prior.

the schedule in this paragraph (d)(3), or the total dollar amount of pass-through payments to hospitals identified by the state in managed care contract(s) and rate certification(s) described in paragraph (d)(1)(i). For example, if a state had \$10 million in pass-through payments to hospitals in the contract and rate certification used to meet the requirement in paragraph (d)(1)(i), that \$10 million figure would be compared each year to the base amount as reduced on the schedule described in this paragraph (d)(3); the lower number would be used to limit the total amount of pass-through payments to hospitals allowed for that specific contract year.

We noted that this proposed language would prevent increases of aggregate pass-through payments for hospitals during the transition period beyond what was already in place when the pass-through payment limits and transition periods were finalized in the May 6, 2016 final rule. We also noted that our proposal was not intended to speed up the rate of a state's phase down of pass-through payments; rather, the proposed rule intended to prevent increases in pass-through payments and the addition of new pass-through payments beyond what was already in place when the pass-through payment limits and transition periods were finalized given that this was the final rule's intent.

In addition, we proposed to amend paragraph (d)(3) to provide that states must meet the requirements in paragraph (d)(1)(i) to make pass-through payments for hospitals during the transition period. We noted that this additional text was necessary to be consistent with our intent, explained above, for the proposed revisions to paragraph (d)(1). As in the May 6, 2016 final rule, we noted that pass-through payments to hospitals must be phased out no longer than on the 10-year schedule, beginning with rating periods for contracts that start on or after July 1, 2017. We proposed to add the phrase "rating periods" to be consistent with our approach in the May 6, 2016 final rule; we made this revision throughout proposed paragraphs (d)(3) and (d)(5). We received the following comments in response to our proposal to revise § 438.6(d)(3), including new paragraphs (d)(3)(i) and (ii).

Comment: Some commenters recommended that we not finalize proposed paragraph (d)(3). Some commenters recommended that we permit increases in pass-through payments over the 10-year transition period to give states the maximum amount of flexibility in phasing down pass-through payments for hospitals.

Some commenters recommended that we permit new or increased pass-through payments for states that are currently in the process of moving hospital FFS supplemental payments into managed care, or that we provide states that had received federal approval to transition to managed care before this rule, the opportunity to implement their managed care programs using the pass-through payment transition periods and amounts established in the May 6, 2016 final rule. Some commenters similarly recommended that we permit new or increased pass-through payments for states with Medicaid state plan approved UPL payments for hospitals as of July 5, 2016 and allow such states to utilize the transition periods and amounts outlined in the May 6, 2016 final rule.

Response: We do not agree with commenters that we should not finalize proposed paragraph (d)(3). We have explained throughout this rule our rationale to prevent increases of pass-through payments for hospitals during the transition period beyond what was already in place when the pass-through payment limits and transition periods were finalized in the May 6, 2016 final rule.

We also do not believe that we should permit increased pass-through payments through the 10-year transition period. The 10-year transition period provides states with significant flexibility and time to phase down existing pass-through payments for hospitals. We believe that we should not allow new or increased pass-through payments for states that are currently in the process of moving hospital FFS supplemental payments into managed care, and that we should not permit new or increased pass-through payments for states with Medicaid state plan approved UPL payments for hospitals as of July 5, 2016. As we have reiterated throughout this rule, pass-through payments are not consistent with our regulatory standards for actuarially sound rates because they do not tie provider payments with the provision of services. When pass-through payments guarantee a portion of a provider's payment and divorce the payment from service delivery, there is little accountability for the payment and it is more challenging for managed care plans to negotiate provider contracts with incentives focused on outcomes and managing individuals' overall care. Consequently, for states that are currently in the process of moving hospital FFS supplemental payments into managed care, we believe that integrating the FFS supplemental payments into allowable payment structures at the time of the transition

will facilitate a state's ability to hold managed care plans accountable for the cost and quality of services delivered under the contract. To date, we have already provided technical assistance to states who are seeking to implement these types of allowable payment structures and remain available to provide future technical assistance. We will work with states to integrate FFS supplemental payments into allowed payment structures as states undertake transitions to managed care.

Comment: Some commenters recommended that we withdraw all caps and limits on the "base amount" for hospitals and allow states the flexibility to adjust pass-through payment amounts to reflect significant programmatic changes and increases in the managed care population. These commenters provided that if the base amount increases from one year to the next, the "total dollar amount" limit should also be permitted to increase at the same percentage. Some commenters similarly recommended a "per-member per-month" (PMPM) basis rather than a total dollar amount limitation on the maximum amount of pass-through payments for hospitals. Other commenters stated the concern that this proposed rule is effectively limiting the maximum amount of pass-through payments to the amount in place prior to the final rule's compliance date and would give state Medicaid programs and hospitals no time to transition these payments.

Response: We do not agree that we should withdraw all caps and limits on the base amount for hospitals, and we do not agree that the "total dollar amount" limit should be permitted to increase, or that we should permit PMPM increases, as these approaches could have the effect of permitting increased pass-through payments for hospitals, which would be counter to our stated policy goals. We believe that adopting these recommendations would complicate the required transition of pass-through payments to permissible provider payment models and delay the development of permissible and accountable payment approaches that are based on the utilization and delivery of services or the quality and outcomes of services. We also note that states can implement allowed payment structures to reflect significant programmatic changes and increases in the managed care population.

In the June 1, 2015 proposed rule and the May 6, 2016 final rule, we discussed how the payment structures permitted under § 438.6(c) tied payments to services while permitting states to reward quality in the provision of

services, assure minimum payment rates, or develop delivery system reform. One advantage of using an allowed payment mechanism to address changes in the managed care population is that such a structure would allow states and managed care plans to link payments to significant programmatic changes. Linking provider payments to utilization and outcomes under a managed care plan's control facilitates a state's ability to hold managed care plans accountable for the quality, utilization, and cost of care provided to beneficiaries.

We agree with commenters that this final rule limits the maximum amount of pass-through payments to the amount in place on the effective date of the May 6, 2016 final rule (July 5, 2016). However, we do not agree that this final rule eliminates the transition period for existing pass-through payments. This final rule does not change the transition periods established under the May 6, 2016 final rule. This final rule provides a new maximum amount of pass-through payments for hospitals in order to prevent new or increased pass-through payments. States that were reliant on and using pass-through payments at the time we finalized the May 6, 2016 final rule will continue to be eligible for the full transition periods under this final rule. This final rule does not accelerate the transition period for states compared to the May 6, 2016 final rule.

Comment: Some commenters stated that § 438.6(d) of the May 6, 2016 final rule allowed for specific calculations and adjustments to the base amount to determine the upper limit of pass-through payments for hospitals. These commenters stated that § 438.6(d) allowed states to account for changes in the demographics, service mix, enrollment, and utilization of Medicaid managed care beneficiaries beginning July 1, 2017. These commenters stated concerns that the proposed rule eliminates these flexibilities by artificially limiting "the total dollar amount" of pass-through payments without accounting for the permitted adjustments in the May 6, 2016 final rule.

Response: We understand commenters' concerns regarding the base amount calculations and permitted adjustments at § 438.6(d)(2) in the May 6, 2016 final rule. This final rule does not modify the adjustments to the base amount permitted under § 438.6(d)(2); however, this final rule does not permit a pass-through payment amount to exceed the lesser of the amounts calculated under paragraph (d)(3) in this final rule, as we believe such a

flexibility could have the effect of permitting increased pass-through payments for hospitals. We believe that increasing pass-through payments will complicate the required transition of pass-through payments to permissible provider payment models and delay the development of permissible and accountable payment approaches that are based on the utilization and delivery of services or the quality and outcomes of services.

Under § 438.6(d)(2), states can account for changes in the demographics, service mix, enrollment, and utilization in their Medicaid managed care programs (see 81 FR 27591). States can also account for changes in the demographics, service mix, enrollment, and utilization through permissible payment mechanisms. One advantage of using an allowed payment mechanism to address changes in the managed care population (such as demographics, service mix, enrollment, or utilization) is that such a structure would allow states and managed care plans to link new and increased funding to the corresponding increase in services that result from the programmatic changes or increased population. Linking provider payments to utilization and outcomes under a managed care plan's control facilitates a state's ability to hold managed care plans accountable for the quality, utilization, and cost of care provided to beneficiaries. Therefore, we do not agree that the proposed rule, which is finalized here, eliminates these flexibilities. Also, as described throughout this final rule, the "total dollar amount" limit for pass-through payments was established under paragraphs (d)(3) and (d)(5) for hospitals, physicians, and nursing facilities because we did not intend states to begin additional or new pass-through payments, or to increase existing pass-through payments.

After considering the comments, we are finalizing § 438.6(d)(3) as proposed without revision.

F. Comments on § 438.6(d)(5)

We proposed to revise § 438.6(d)(5) to be consistent with the proposed revisions in § 438.6(d)(1)(i) and to limit the total dollar amount of pass-through payments that is available each contract year for physicians and nursing facilities. We noted that we were not proposing to implement a phase-down for pass-through payments to physicians or nursing facilities. We proposed that for states that meet the requirements in paragraph (d)(1)(i), rating periods for contracts beginning on or after July 1, 2017 through rating periods for

contracts beginning on or after July 1, 2021, may continue to require pass-through payments to physicians or nursing facilities under the MCO, PIHP, or PAHP contract; such pass-through payments may be no more than the total dollar amount of pass-through payments for each category identified in the managed care contracts and rate certifications used to meet the requirement in paragraph (d)(1)(i). We proposed to add the phrase "rating periods" to be consistent with our approach in the May 6, 2016 final rule; we made this revision throughout proposed paragraphs (d)(3) and (d)(5). We received the following comments in response to our proposal to revise § 438.6(d)(5).

Comment: Some commenters recommended that we not finalize the "total dollar amount" limit on pass-through payments over the 5-year transition period for physicians and nursing facilities because such a limit does not recognize significant programmatic changes and increases in the managed care population. Commenters recommended that we continue to allow increases over the 5-year transition period to give states the maximum amount of flexibility in phasing down pass-through payments. Some commenters also recommended that we permit new or increased pass-through payments for states that are currently in the process of moving physician or nursing facility FFS supplemental payments into managed care, or that we provide states that had received federal approval to transition to managed care before this rule, the opportunity to implement their managed care programs using the pass-through payment transition periods and amounts established in the May 6, 2016 final rule.

Response: As noted above, we believe the lack of an affirmative limit on pass-through payments at the total amount of prior pass-through payments identified under paragraph (d)(1)(i) will permit states to increase pass-through payments to physicians and nursing facilities, which is contrary to our policy goals for eliminating these types of payments. This final rule will encourage states to use the other, permissible payment types described in § 438.6(c) in directing payments to nursing facilities and physicians. We explained throughout this final rule our rationale for prohibiting increases of pass-through payments during the transition period beyond what was already in place when the pass-through payment limits and transition periods were finalized in the May 6, 2016 final rule. We reiterate that states can

implement allowed, accountable payment structures to reflect significant programmatic changes and increases in the managed care population. One advantage of using an allowed payment mechanism to address the changes is that such a structure would allow states and managed care plans to link new and increased funding to the corresponding increased utilization resulting from the programmatic changes or increased population. Additionally, the 5-year transition period provides states with significant flexibility and time to phase down existing pass-through payments for physicians and nursing facilities.

Consistent with our response for hospital FFS supplemental payments, we do not believe that we should allow new or increased pass-through payments for states that are currently in the process of moving physician or nursing facility FFS supplemental payments into managed care. As we have provided throughout this rule, pass-through payments are not consistent with our interpretation of the statutory requirement for actuarial soundness and our regulatory standards for actuarially sound rates because they do not tie provider payments with the provision of services. For states that are currently in the process of moving physician or nursing facility FFS supplemental payments into managed care, we believe that integrating the FFS supplemental payments into allowable payment structures at the time of the transition will ensure that the state can hold managed care plans accountable for the cost and quality of services delivered under the contract.

We did not receive any comments on our proposal to use the phrase “rating period” in § 438.6(d)(3) and (5). After considering the comments, we are finalizing § 438.6(d)(5) as proposed without revision.

III. Provisions of the Final Regulations

As a result of the public comments received under the proposed rule, this final rule incorporates the provisions of the proposed rule without revision.

IV. Collection of Information Requirements

This final rule will not impose any new or revised information collection, reporting, recordkeeping, or third-party disclosure requirements or burden. Our revision of § 438.6(d) will not impose any new or revised IT system requirements or burden because the existing regulation at § 438.7 requires the rate certification to document special contract provisions under § 438.6. Consequently, there is no need for review by the Office of Management

and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

V. Regulatory Impact Analysis

A. Statement of Need

As discussed in the May 6, 2016 final rule, the proposed rule, and this final rule, we have significant concerns that pass-through payments have negative consequences for the delivery of services in the Medicaid program. The existence of pass-through payments may affect the amount that a managed care plan is willing or able to pay for the delivery of services through its base rates or fee schedule. In addition, pass-through payments may make it more difficult to implement quality initiatives or to direct beneficiaries' utilization of services to higher quality providers because a portion of the capitation rate under the contract is independent of the services delivered and outside of the managed care plan's control. Put another way, when the fee schedule for services is set below the normal market, or negotiated rate, to account for pass-through payments, moving utilization to higher quality providers can be difficult because there may not be adequate funding available to incentivize the provider to accept the increased utilization. When pass-through payments guarantee a portion of a provider's payment and divorce the payment from service delivery, it is more challenging for managed care plans to negotiate provider contracts with incentives focused on outcomes and managing individuals' overall care.

We realize that some pass-through payments have served as a critical source of support for safety-net providers who provide care to Medicaid beneficiaries. Several commenters raised this issue in response to the June 1, 2015 proposed rule.⁴ Therefore, in response to some commenters' request for a delayed implementation of the limitation on directed payments and to address concerns that an abrupt end to these payments could create significant disruptions for some safety-net providers who serve Medicaid managed care enrollees, we included in the May 6, 2016 final rule a delay in the compliance date and a transition period for existing pass-through payments to hospitals, physicians, and nursing facilities. These transition periods begin with the compliance date, and were designed and finalized to enable affected providers, states, and managed care plans to transition away from

existing pass-through payments. Such payments could be transitioned into payments tied to covered services, value-based payment structures, or delivery system reform initiatives without undermining access for the beneficiaries; alternatively, states could step down such payments and devise other methods to support safety-net providers to come into compliance with § 438.6(c) and (d).

However, as noted previously, the transition period and delayed enforcement date caused some confusion regarding increased and new pass-through payments. The May 6, 2016 final rule inadvertently created a strong incentive for states to move swiftly to put pass-through payments into place in order to take advantage of the pass-through payment transition periods established in the May 6, 2016 final rule. Contrary to our discussion in the May 6, 2016 final rule regarding the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates, some states expressed interest in developing new and increased pass-through payments for their respective Medicaid managed care programs as a result of the May 6, 2016 final rule. In response to this interest, we published the July 29, 2016 CMCS Informational Bulletin (CIB) to quickly address questions regarding the May 6, 2016 final rule's intent regarding states' ability to increase or add new pass-through payments under Medicaid managed care plan contracts and capitation rates, and to describe our plan for monitoring the transition of pass-through payments to approaches for provider payment under Medicaid managed care programs that are based on the delivery of services, utilization, and the outcomes and quality of the delivered services.

We noted in the CIB that the transition from one payment structure to another requires robust provider and stakeholder engagement, agreement on approaches to care delivery and payment, establishing systems for measuring outcomes and quality, planning efforts to implement changes, and evaluating the potential impact of change on Medicaid financing mechanisms. Whether implementing value-based payment structures, implementing other delivery system reform initiatives, or eliminating pass-through payments, there will be transition issues for states coming into compliance; adequately working through transition issues, including ensuring adequate base rates, is central to both delivery system reform and to strengthening access, quality, and efficiency in the Medicaid program. We

⁴ Available at: <https://www.gpo.gov/fdsys/pkg/FR-2015-06-01/pdf/2015-12965.pdf>.

stressed that the purpose and intention of the transition periods is to acknowledge that pass-through payments existed prior to the May 6, 2016 final rule and to provide states, network providers, and managed care plans time and flexibility to integrate existing pass-through payment arrangements into permissible payment structures.

As we noted in the CIB and throughout this final rule, we believe that adding new or increased pass-through payments for hospitals, physicians, or nursing facilities, beyond what was included as of July 5, 2016, into Medicaid managed care contracts exacerbates a problematic practice that is inconsistent with our interpretation of statutory and regulatory requirements, complicates the required transition of these pass-through payments to permissible and accountable payment approaches that are based on the utilization and delivery of services to enrollees covered under the contract, or the quality and outcomes of such services, and reduces managed care plans' ability to effectively use value-based purchasing strategies and implement provider-based quality initiatives. In the CIB, we signaled the possible need, and our intent, to further address this policy in future rulemaking and link pass-through payments through the transition period to the amounts of pass-through payments in place at the time the Medicaid managed care rule was effective on July 5, 2016.

B. Overall Impact

We have examined the impacts of this final rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) Having an annual

effect on the economy of \$100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). We estimate that this final rule is “economically significant” as measured by the \$100 million threshold, and hence a major rule under the Congressional Review Act.

The May 6, 2016 final rule included a RIA (81 FR 27830). During that analysis, we did not project a significant fiscal impact for § 438.6(d). When we reviewed and analyzed the May 6, 2016 final rule, we concluded that states would have other mechanisms to build in the amounts currently provided through pass-through payments in approvable ways, such as approaches consistent with § 438.6(c). If a state was currently building in \$10 million in pass-through payments to hospitals under their current managed care contracts, we assumed that the state would incorporate the \$10 million into their managed care rates in permissible ways rather than spending less in Medicaid managed care. While it is possible that this would be more difficult for states with relatively larger amounts of pass-through payments, the long transition period provided under the May 6, 2016 final rule to phase out pass-through payments should help states to integrate existing pass-through payments into actuarially sound capitation rates through permissible Medicaid financing structures, including enhanced fee schedules or the other approaches consistent with § 438.6(c) that tie managed care payments to services and utilization covered under the contract.

A number of states have integrated some form of pass-through payments into their managed care contracts for hospitals, nursing facilities, and physicians. In general, the size and number of the pass-through payments

for hospitals has been more significant than for nursing facilities and physicians. We noted in the May 6, 2016 final rule (81 FR 27589) a number of reasons provided by states for using pass-through payments in their managed care contracts. As of the effective date of the May 6, 2016 final rule, we estimate that at least eight states have implemented approximately \$105 million in pass-through payments for physicians annually; we estimate that at least three states have implemented approximately \$50 million in pass-through payments for nursing facilities annually; and we estimate that at least 16 states have implemented approximately \$3.3 billion in pass-through payments for hospitals annually. These estimates are somewhat uncertain, as before the final rule, we did not have regulatory requirements for states to document and describe pass-through payments in their managed care contracts or rate certifications. The amount of pass-through payments often represents a significant portion of the overall capitation rate under a managed care contract. We have seen pass-through payments that have represented 25 percent, or more, of the overall managed care contract and 50 percent of individual rate cells. The rationale for these pass-through payments in the development of the capitation rates is often not transparent, and it is not clear what the relationship of these pass-through payments is to the provision of services or the requirement for actuarially sound rates.

Since the publication of the May 6, 2016 final rule, we received a formal proposal from one state regarding \$250 to \$275 million in pass-through payments to hospitals; we have been working with the state to identify permissible implementation options for their proposal, including under § 438.6(c), and tie such payments to the utilization and delivery of services (as well as the outcomes of delivered services). We heard informally that two additional states are working to develop pass-through payment mechanisms to increase total payments to hospitals by approximately \$10 billion cumulatively. We also heard informally from one state regarding a \$200 million proposal for pass-through payments to physicians. We also continue to receive inquiries from states, provider associations, and consultants who are developing formal proposals to add new pass-through payments, or increase existing pass-through payments, and incorporate such payments into Medicaid managed care rates. These state proposals have not been approved to date. While it is

difficult for us to conduct a detailed quantitative analysis given this considerable uncertainty and lack of data, we believe that without this final rulemaking, states will continue to ramp-up pass-through payments in ways that are not consistent with the pass-through payment transition periods established in the May 6, 2016 final rule.

Since we cannot produce a detailed quantitative analysis, we have developed a qualitative discussion for this RIA. We believe there are many benefits with this regulation, including consistency with our interpretation and implementation of the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates, improved transparency in rate development processes, permissible and accountable payment approaches that are based on the utilization and delivery of services to enrollees covered under the contract, or the quality and outcomes of such services, and improved support for delivery system reform that is focused on improved care and quality for Medicaid beneficiaries. We believe that the costs of this regulation to state and federal governments will not be significant; we currently review and work with states on managed care contracts and rates, and because pass-through payments exist today, any additional costs to state or federal governments should be negligible.

Relative to the current baseline, this final rule builds on the May 6, 2016 final rule and may further reduce the likelihood of increases in or the development of new pass-through payments, which could reduce state and federal government transfers to hospitals, physicians, and nursing facilities. However, states may instead increase or develop actuarially sound payments that link provider reimbursement with services covered under the contract or associated quality outcomes. Because we lack sufficient information to forecast the eventual overall impact of the May 6, 2016 final rule on state pass-through payments, we provide only a qualitative discussion of the impact of this final rule on avoided transfers. Given the potential for avoided transfers, we believe this final rule is economically significant as defined by Executive Order 12866.

We received the following comment on the proposed overall impact and regulatory impact analysis.

Comment: One commenter stated concern that we did not provide, in the proposed rule and to the public, a careful and transparent analysis of the anticipated quantitative consequences

of this economically significant regulatory action. This commenter recommended that we withdraw the proposed rule until such a quantitative analysis is completed.

Response: The commenter did not provide any substantive information with which to conduct such an analysis. As stated in the proposed rule, it is difficult for us to conduct a detailed quantitative analysis given the considerable uncertainty and lack of data discussed above; however we continue to believe that without this final rulemaking, states will continue to ramp-up pass-through payments in ways that are not consistent with the pass-through payment transition periods established in the May 6, 2016 final rule. We solicited and received no substantive suggestions on doing such an analysis. Since we cannot produce a detailed quantitative analysis, we have developed a qualitative discussion for this final rule.

After considering the comments, we are finalizing the regulatory impact analysis as proposed without revision.

C. Anticipated Effects

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Small entities are those entities, such as health care providers, having revenues between \$7.5 million and \$38.5 million in any 1 year. Individuals and states are not included in the definition of a small entity. We do not believe that this final rule will have a significant economic impact on a substantial number of small businesses.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a Metropolitan Statistical Area and has fewer than 100 beds. We do not anticipate that the provisions in this final rule will have a substantial economic impact on small rural hospitals. We are not preparing analysis for either the RFA or section 1102(b) of the Act because we have determined, and the Secretary certifies, that this final rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural

hospitals in comparison to total revenues of these entities.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2016, that is approximately \$146 million. This final rule does not mandate any costs (beyond this threshold) resulting from (A) imposing enforceable duties on state, local, or tribal governments, or on the private sector, or (B) increasing the stringency of conditions in, or decreasing the funding of, state, local, or tribal governments under entitlement programs.

Executive Order 13132 establishes certain requirements that an agency must meet when it issues a rule that imposes substantial direct requirements or costs on state and local governments, preempts state law, or otherwise has federalism implications. Since this final rule does not impose any costs on state or local governments, the requirements of Executive Order 13132 are not applicable. In accordance with the provisions of Executive Order 12866, this final rule was reviewed by the Office of Management and Budget.

We did not receive comments on the proposed anticipated effects for the revisions to § 438.6(d) and finalize our analysis in this rule.

D. Alternatives Considered

During the development of this final rule, we assessed all regulatory alternatives and discussed in the preamble of the proposed rule a few alternatives that we considered. First, in discussing our revisions to paragraphs (d)(1)(i) and (ii) in the proposed rule, we considered linking eligibility for the transition period to those states with pass-through payments for hospitals, physicians, or nursing facilities that were in approved (not just submitted for our review and approval) managed care contract(s) and rate certification(s) only for the rating period covering July 5, 2016. We noted in the proposed rule that we believed such an approach was not administratively feasible for states or us because it did not recognize the nuances of the timing and approval processes. We believe our approach under this final rule provides the appropriate parameters and conditions for pass-through payments in managed care contract(s) and rate certification(s) during the transition period.

Second, in discussing our revisions to paragraphs (d)(3) and (d)(5) in the proposed rule, we described that the

aggregate amounts of pass-through payments in each provider category would be used to set applicable limits for the provider type during the transition period, without regard to the specific provider(s) that received a pass-through payment. We considered proposing that the state should be limited by amount and recipient during

the transition period; however, this narrower policy would be more limiting than originally intended under the May 6, 2016 final rule when the pass-through payment transition periods were finalized. We requested comment on our alternative proposals.

We did not receive comments on the alternative proposals to revise § 438.6(d)

and, as noted above, are finalizing the proposed amendments to § 438.6(d).

E. Accounting Statement

As discussed in this RIA, the benefits, costs, and transfers of this final regulation are identified in table 1 as qualitative impacts only.

TABLE 1—ACCOUNTING STATEMENT

Category	Primary estimate	Low estimate	High estimate	Units			Notes
				Year dollars	Discount rate	Period covered	
Benefits							
Non-Quantified	Benefits include: Consistency with the statutory requirements in section 1903(m) of the Act and regulations for actuarially sound capitation rates; improved transparency in rate development processes; greater incentives for payment approaches that are based on the utilization and delivery of services to enrollees covered under the contract, or the quality and outcomes of such services; and improved support for delivery system reform that is focused on improved care and quality for Medicaid beneficiaries.						
Costs							
Non-Quantified	Costs to state or federal governments should be negligible.						
Transfers							
Non-Quantified	Relative to the current baseline, this final rule builds on the May 6, 2016 final rule and may further reduce the likelihood of increases in or the development of new pass-through payments, which could reduce state and federal government transfers to hospitals, physicians, and nursing facilities. Given the potential for avoided transfers, we believe this final rule is economically significant as defined by Executive Order 12866.						

List of Subjects in 42 CFR Part 438

Grant programs—health, Medicaid, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

PART 438—MANAGED CARE

■ 1. The authority citation for part 438 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

■ 2. Section 438.6 is amended by revising paragraphs (d)(1), (3), and (5) to read as follows:

§ 438.6 Special contract provisions related to payment.

* * * * *

(d) * * * (1) *General rule.* States may continue to require MCOs, PIHPs, and PAHPs to make pass-through payments (as defined in paragraph (a) of this section) to network providers that are hospitals, physicians, or nursing facilities under the contract, provided the requirements of this paragraph (d) are met. States may not require MCOs, PIHPs, and PAHPs to make pass-through payments other than those permitted under this paragraph (d).

(i) In order to use a transition period described in this paragraph (d), a State must demonstrate that it had pass-through payments for hospitals, physicians, or nursing facilities in:

(A) Managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016, and were submitted for CMS review and approval on or before July 5, 2016; or

(B) If the managed care contract(s) and rate certification(s) for the rating period that includes July 5, 2016 had not been submitted to CMS on or before July 5, 2016, the managed care contract(s) and rate certification(s) for a rating period before July 5, 2016 that had been most recently submitted for CMS review and approval as of July 5, 2016.

(ii) CMS will not approve a retroactive adjustment or amendment, notwithstanding the adjustments to the base amount permitted in paragraph (d)(2) of this section, to managed care contract(s) and rate certification(s) to add new pass-through payments or increase existing pass-through payments defined in paragraph (a) of this section.

* * * * *

(3) *Schedule for the reduction of the base amount of pass-through payments for hospitals under the MCO, PIHP, or PAHP contract and maximum amount of permitted pass-through payments for*

each year of the transition period. For States that meet the requirement in paragraph (d)(1)(i) of this section, pass-through payments for hospitals may continue to be required under the contract but must be phased out no longer than on the 10-year schedule, beginning with rating periods for contract(s) that start on or after July 1, 2017. For rating periods for contract(s) beginning on or after July 1, 2027, the State cannot require pass-through payments for hospitals under a MCO, PIHP, or PAHP contract. Until July 1, 2027, the total dollar amount of pass-through payments to hospitals may not exceed the lesser of:

(i) A percentage of the base amount, beginning with 100 percent for rating periods for contract(s) beginning on or after July 1, 2017, and decreasing by 10 percentage points each successive year; or

(ii) The total dollar amount of pass-through payments to hospitals identified in the managed care contract(s) and rate certification(s) used to meet the requirement of paragraph (d)(1)(i) of this section.

* * * * *

(5) *Pass-through payments to physicians or nursing facilities.* For States that meet the requirement in paragraph (d)(1)(i) of this section, rating

periods for contract(s) beginning on or after July 1, 2017 through rating periods for contract(s) beginning on or after July 1, 2021, may continue to require pass-through payments to physicians or nursing facilities under the MCO, PIHP, or PAHP contract of no more than the total dollar amount of pass-through payments to physicians or nursing facilities, respectively, identified in the managed care contract(s) and rate certification(s) used to meet the requirement of paragraph (d)(1)(i) of this section. For rating periods for contract(s) beginning on or after July 1, 2022, the State cannot require pass-through payments for physicians or nursing facilities under a MCO, PIHP, or PAHP contract.

Dated: January 3, 2017.

Andrew M. Slavitt,

Acting Administrator, Centers for Medicare & Medicaid Services.

Dated: January 10, 2017.

Sylvia M. Burwell,

Secretary, Department of Health and Human Services.

BILLING CODE 4120-01-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 665

[Docket No. 160811726-6999-02]

RIN 0648-XE809

Pacific Island Fisheries; 2016–17 Annual Catch Limit and Accountability Measures; Main Hawaiian Islands Deep 7 Bottomfish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final specifications.

SUMMARY: In this final rule, NMFS specifies an annual catch limit (ACL) of 318,000 lb of Deep 7 bottomfish in the main Hawaiian Islands (MHI) for the 2016–17 fishing year. As an accountability measure (AM), if the ACL is projected to be reached, NMFS would close the commercial and non-commercial fisheries for MHI Deep 7 bottomfish for the remainder of the fishing year. The ACL and AM support the long-term sustainability of Hawaii bottomfish.

DATES: The final specifications are effective from February 17, 2017, through August 31, 2017.

ADDRESSES: The environmental assessment and finding of no significant impact for this action, identified as NOAA–NMFS–2016–0112, is available at www.regulations.gov, or from Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Region (PIR), 1845 Wasp Blvd. Bldg. 176, Honolulu, HI 96818.

The Fishery Ecosystem Plan for the Hawaiian Archipelago is available from the Western Pacific Fishery Management Council (Council), 1164 Bishop St., Suite 1400, Honolulu, HI 96813, tel 808–522–8220, fax 808–522–8226, or www.wpcouncil.org.

FOR FURTHER INFORMATION CONTACT: Sarah Ellgen, NMFS PIR Sustainable Fisheries, 808–725–5173.

SUPPLEMENTARY INFORMATION: Through this action, NMFS is specifying an ACL of 318,000 lb of Deep 7 bottomfish in the MHI for the 2016–17 fishing year. The fishing year began September 1, 2016, and ends on August 31, 2017. The Council recommended this ACL, based on the best available scientific, commercial, and other information, taking into account the associated risk of overfishing. This ACL is 8,000 lb lower than the ACL that NMFS specified for the 2015–16 fishing year, and is the second annual reduction in a phased approach to lower the ACL incrementally over three years, as recommended by the Council.

The MHI Management Subarea is the portion of U.S. Exclusive Economic Zone around the Hawaiian Archipelago east of 161°20' W. The Deep 7 bottomfish are onaga (*Etelis coruscans*), ehu (*E. carbunculus*), gindai (*Pristipomoides zonatus*), kalekale (*P. sieboldii*), opakapaka (*P. filamentosus*), lehi (*Aphareus rutilans*), and hapuupuu (*Hyporthodus quernus*).

The MHI bottomfish fishing year started September 1, 2016, and is currently open. NMFS will monitor the fishery and, if we project that the fishery will reach the ACL before August 31, 2017, we would, as an AM authorized in 50 CFR 665.4(f), close the non-commercial and commercial fisheries for Deep 7 bottomfish in Federal waters through August 31, 2017. During a fishery closure for Deep 7 bottomfish, no person may fish for, possess, or sell any of these fish in the MHI Management Subarea. There is no prohibition on fishing for, possessing, or selling other (*non-Deep 7*) bottomfish during such a closure. All other management measures continue to apply in the MHI bottomfish fishery. If NMFS and the Council determine that the final 2016–17 Deep 7 bottomfish catch exceeds the ACL, NMFS would

reduce the Deep 7 bottomfish ACL for 2017–18 by the amount of the overage.

You may review additional background information on this action in the preamble to the proposed specifications (81 FR 75803; November 1, 2016); we do not repeat that information here.

Comments and Responses

The comment period for the proposed specifications ended on November 16, 2016. NMFS received comments from four individuals, and responds, as follows:

Comment 1: The 2016–2017 ACL serves as a precautionary measure for bottomfish stocks that supports healthy fisheries. The proposed ACL is greater than recent annual catches, so it would not significantly inconvenience fishermen.

Response: NMFS agrees. We assessed the potential beneficial and adverse impacts of the ACL and AM on the environment, including the fishery itself, and concluded that the action is necessary to prevent overfishing while supporting the long-term sustainability of Hawaii bottomfish.

Comment 2: We need to punish anyone who harms the ocean and any of our waters.

Response: While the comment is not specific to the proposed action, violations of Federal fishery regulations are subject to penalties pursuant to Section 308 of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Comment 3: Legislation is needed to reduce overfishing and to protect marine life in Hawaiian waters.

Response: Federal laws and regulations already protect Hawaii fish stocks from overfishing pressure. The Magnuson-Stevens Act includes requirements for ACLs and AMs and other provisions for preventing and ending overfishing and rebuilding fisheries. Unless exempted by law, all fisheries in Federal waters must have ACLs and AMs. Fishery scientists and managers use the best scientific information available, including catch, fishing effort, biological information, etc., to determine the maximum catch that would not harm the conservation needs of the fish stock, and ACLs must be set at or below the levels that account for uncertainty about the fishery information.

AMs are management controls to prevent ACLs from being exceeded, and to correct or mitigate overages when they occur. For the MHI bottomfish fishery, one AM would close the fishery before the scheduled end of the fishing year to prevent exceeding the ACL, and

another AM would reduce next year's ACL by the amount of any overage. These measures help to ensure sustainable harvests.

The reader may find more information on fishing regulations in Hawaii at http://www.fpir.noaa.gov/SFD/SFD_regs_index.html.

Comment 4: The MHI Deep 7 bottomfish stock assessment does not account for fish biomass within the State of Hawaii Bottomfish Restricted Fishing Areas (BRFA), marine protected areas (MPA), and the Kahoolawe Island Reserve.

Response: The 2011 MHI Deep 7 bottomfish stock assessment, as updated with three additional years of data, treats the MHI as a single fishing area and calculates the biomass required to produce the catch and catch per unit effort (CPUE) according to commercial fishery data. The assessment does not make a distinction between biomass inside and outside of protected areas, such as the BRFA, MPA, and Kahoolawe Island Reserve. Nevertheless, the 2011 MHI Deep 7 bottomfish stock assessment, as updated, represents the best scientific information available for this stock complex.

NMFS and the Council are working with the State and the fishing industry to obtain accurate information needed for stock assessments, including data on bottomfish distribution, relative abundance, stock structure, size, and age. Current efforts include working with bottomfish fishermen to conduct scientific surveys using standardized fishing gears and underwater video cameras.

Although stock assessments will likely continue to treat the MHI as a single fishing area, both the State and NMFS continue to try to quantify the effects of the BRFA, MPA, and Kahoolawe Island Reserve on unfished biomass for the MHI Deep 7 bottomfish stock. In Fall 2016, with the cooperation of the State of Hawaii and help from cooperative research fishing partners, NMFS sampled bottomfish inside these protected areas as part of a scientific

survey. NMFS will take into account information from this survey in future stock assessments, as appropriate.

Comment 5: Fishing prohibitions in BFRA and MPA result in more concentrated fishing in unrestricted areas, leading to decreased fish size and lower CPUE.

Response: Because the State catch reporting statistical area boundaries do not match the BRFA boundaries, it is not currently possible to determine if concentrated fishing that may be occurring in unrestricted areas could lead to decreased fish size and lower CPUE in those unrestricted areas. NMFS continues to evaluate the effect of the protected areas on the MHI bottomfish stock (see response to *Comment 4*).

Comment 6: The recent El Niño and unpredictable winds and seas have adversely affected the 2015–16 and 2016–17 MHI Deep 7 fishing seasons, resulting in uncaught fish. How would NMFS consider uncaught biomass in future ACLs?

Response: Councils recommend ACLs in consideration of all relevant information and scientific recommendations concerning stock status. The newly revised National Standard 1 guidelines (81 FR 71858, October 18, 2016) allow councils to develop an acceptable biological catch control rule that would allow for changes in the catch limit to account for the carry-over of some of the unused portion of the ACL from one year to the next, in certain circumstances. The 2016–17 ACL of 318,000 lb is the second annual reduction in a three-year phased approach to prevent overfishing, while supporting the long-term sustainability of Hawaii bottomfish. Therefore, in developing future ACL recommendations, the Council could evaluate a carry-over provision for MHI Deep 7 bottomfish, if the Council determines that such a provision is appropriate and desirable.

Comment 7: The MHI Deep 7 bottomfish fishery is experiencing ongoing problems with shark predation. How is NMFS addressing this issue?

Response: This comment is beyond the scope of the ACL and AM specifications, and NMFS is not currently studying shark predation in the bottomfish fishery. Interested persons may inquire about the availability of fisheries research project funding through, among other sources, the Saltonstall-Kennedy Grant Program (information at http://www.fisheries.noaa.gov/mb/financial_services/skhome.htm).

Changes From the Proposed Specifications

There are no changes in the final specifications from the proposed specifications.

Classification

The Regional Administrator, NMFS PIR, determined that this action is necessary for the conservation and management of MHI Deep 7 bottomfish, and that it is consistent with the Magnuson-Stevens Act and other applicable laws.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed specification stage that this action would not have a significant economic impact on a substantial number of small entities. NMFS published the factual basis for the certification in the proposed specifications, and does not repeat it here. NMFS did not receive comments regarding this certification. As a result, a final regulatory flexibility analysis is not required, and one was not prepared.

This action is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 9, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

Proposed Rules

Federal Register

Vol. 82, No. 11

Wednesday, January 18, 2017

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 205

[Document Number AMS–NOP–16–0052; NOP–16–03]

RIN 0581–AD52

National Organic Program (NOP); Sunset 2017 Amendments to the National List

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would address recommendations submitted to the Secretary of Agriculture (Secretary) by the National Organic Standards Board (NOSB) following their October 2015 meeting. These recommendations pertain to the 2017 Sunset Review of substances on the U.S. Department of Agriculture's (USDA) National List of Allowed and Prohibited Substances (National List). Consistent with the recommendations from the NOSB, this proposed rule would remove eleven substances from the National List for use in organic production and handling.

DATES: Comments must be received by March 20, 2017.

ADDRESSES: Interested persons may comment on the proposed rule using the following procedures:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Robert Pooler, Standards Division, National Organic Program, USDA–AMS–NOP, 1400 Independence Ave. SW., Room 2642–So., Ag Stop 0268, Washington, DC 20250–0268.

Instructions: All submissions received must include the docket number AMS–NOP–16–0052; NOP–16–03, and/or Regulatory Information Number (RIN) 0581–AD52 for this rulemaking. You should clearly indicate the topic and section number of this proposed rule to which your comment refers. You should clearly indicate whether you support

the action being proposed for the substances in this proposed rule. You should clearly indicate the reason(s) for your position. You should also supply information on alternative management practices, where applicable, that support alternatives to the proposed action. You should also offer any recommended language change(s) that would be appropriate to your position. Please include relevant information and data to support your position (e.g. scientific, environmental, manufacturing, industry, impact information, etc.). Only relevant material supporting your position should be submitted. All comments received and any relevant background documents will be posted without change to <http://www.regulations.gov>.

Document: For access to the document and to read background documents or comments received, go to <http://www.regulations.gov>. Comments submitted in response to this proposed rule will also be available for viewing in person at USDA–AMS, National Organic Program, Room 2642—South Building, 1400 Independence Ave. SW., Washington, DC, from 9 a.m. to 12 noon and from 1 p.m. to 4 p.m., Monday through Friday (except official Federal holidays). Persons wanting to visit the USDA South Building to view comments received in response to this proposed rule are requested to make an appointment in advance by calling (202) 720–3252.

FOR FURTHER INFORMATION CONTACT:

Robert Pooler, Standards Division, email: bob.pooler@ams.usda.gov, Telephone: (202) 720–3252; Fax: (202) 205–7808.

SUPPLEMENTARY INFORMATION:

I. Background

The National Organic Program (NOP) is authorized by the Organic Foods Production Act of 1990 (OFPA), as amended (7 U.S.C. 6501–6522). The USDA Agricultural Marketing Service (AMS) administers the NOP. Final regulations implementing the NOP, also referred to as the USDA organic regulations, were published December 21, 2000 (65 FR 80548), and became effective on October 21, 2002. Through these regulations, the AMS oversees national standards for the production, handling, and labeling of organically produced agricultural products. Since becoming effective, the USDA organic

regulations have been frequently amended, mostly for changes to the National List in 7 CFR 205.601–205.606.

This National List identifies the synthetic substances that may be used and the nonsynthetic substances that may not be used in organic production. The National List also identifies synthetic, nonsynthetic nonagricultural, and nonorganic agricultural substances that may be used in organic handling. The OFPA and the USDA organic regulations, as indicated in § 205.105, specifically prohibit the use of any synthetic substance in organic production and handling unless the synthetic substance is on the National List. Section 205.105 also requires that any nonorganic agricultural substance and any nonsynthetic nonagricultural substance used in organic handling appear on the National List.

As stipulated by the OFPA, recommendations to propose amendment of the National List are developed by the NOSB, operating in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2 *et seq.*), to assist in the evaluation of substances to be used or not used in organic production and handling, and to advise the Secretary on the USDA organic regulations. The OFPA also requires a sunset review of all substances by the NOSB included on the National List within five years of their addition to or renewal on the list. If a listed substance is not reviewed by the NOSB and renewed by the USDA within the five-year period, its allowance or prohibition on the National List is no longer in effect. Under the authority of the OFPA, the Secretary can amend the National List through rulemaking based upon proposed amendments recommended by the NOSB.

The NOSB's review of existing exemptions and prohibitions include the NOSB's evaluation of technical information, public comments, and supporting evidence that demonstrate whether the substance is: (a) Harmful to human health or the environment; (b) no longer necessary for organic production due to the availability of alternative wholly nonsynthetic substitute products or practices; or (c) inconsistent with organic farming and handling practices (7 U.S.C. 6517(c)).

In accordance with the sunset review process published in the **Federal Register** on September 16, 2013 (78 FR

61154), this proposed rule would amend the National List to reflect 2017 sunset review recommendations submitted to the Secretary by the NOSB on October 29, 2015, to amend the National List to remove eleven substances allowed as substances used in organic production or as ingredients in or on processed products labeled as “organic.” The exemptions of each substance appearing on the National List for use in organic production and handling are evaluated by the NOSB using the evaluation criteria specified in the OFPA (7 U.S.C. 6517–6518).

II. Overview of Proposed Amendments

Nonrenewals

At the completion of their 2017 sunset review of National List substances with five year review periods ending in 2017, the NOSB recommended the removal of eleven substances from the National List. During this sunset review, the NOSB determined that one substance exemption each in § 205.601(a), § 205.603(a), § 205.605(b) and eight substance exemptions in § 205.606 are no longer necessary for organic production or handling. AMS has reviewed and proposes to accept the eleven NOSB recommendations for removal. Based upon these NOSB recommendations, this action proposes to amend the National List to remove the exemptions for lignin sulfonate, furosemide, magnesium carbonate, Chia, dillweed oil, frozen galangal, inulin, frozen lemongrass, chipotle chile peppers, turkish bay leaves, and whey protein concentrate.

Lignin Sulfonate

The USDA organic regulations include an exemption on the National List for lignin sulfonate for use as a floating agent in postharvest handling at § 205.601(l)(1) as follows: Lignin sulfonate. In April 1995, lignin sulfonate was recommended by the NOSB for addition onto the National List as a plant or soil amendment for use as a chelating agent, dust suppressant, or floatation agent in organic crop production. AMS accepted this NOSB recommendation and included lignin sulfonate in the proposed rule and the final rule establishing the National Organic Program and the original National List that was published in the **Federal Register** on December 21, 2000 (65 FR 80548). Lignin sulfonate was included on the National List in § 205.601(j)(4) as a chelating agent, dust suppressant, or floatation agent, and in § 205.601(l)(1) as a floating agent in post-harvest handling. This proposed rule only addresses the listing of lignin

sulfonate in § 205.601(l)(1). As required by OFPA, the NOSB recommended the renewal of lignin sulfonate during the 2007 and 2012 sunset reviews which was renewed by the Secretary on October 16, 2007 (72 FR 58469) and June 6, 2012 (77 FR 33290).

Subsequently, the NOSB completed their 2017 sunset review of the exemption for lignin sulfonate at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review, with request for comments, were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the lignin sulfonate exemption discussed in this proposed rule would expire on September 12, 2016, if not reviewed by the NOSB and renewed by the Secretary. During their 2017 sunset review deliberation, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB’s recommendation on lignin sulfonate is available on the NOP Web site at <http://www.ams.usda.gov/nop>. During their sunset review of lignin sulfonate the NOSB considered two lignin sulfonate technical reports that were requested by and developed for the NOSB in 2011 and 2013. The latter technical report reviewed lignin sulfonate use in aquaculture production. Both technical reports are available for review in the petitioned substance database on the NOP Web site, <https://www.ams.usda.gov/rules-regulations/organic/national-list>.

Public comments received by the NOSB on lignin sulfonate in § 205.601(l)(1) indicated public support for removing lignin sulfonate as a floating agent in postharvest handling from the National List. Based upon these comments, the NOSB determined that the exemption for lignin sulfonate on the National List in § 205.601(l)(1) is no longer necessary or essential for organic postharvest handling. Subsequently, the NOSB recommended removal of lignin sulfonate from § 205.601(l)(1) from the National List at their October 2015 public meeting.

AMS accepts the NOSB’s recommendation on removing lignin sulfonate from the National List. This proposed rule would amend National

List § 205.601 by removing the substance exemption for lignin sulfonate listed in § 205.601(l)(1). This amendment is proposed to be effective on the current sunset date for lignin sulfonate, which is June 27, 2017.

Furosemide

The USDA organic regulations include an exemption on the National List for furosemide for use as medical treatment at § 205.603(a)(10) as follows: Furosemide (CAS #–54–31–9) in accordance with approved labeling; except that for use under 7 CFR part 205, the NOP requires a withdrawal period of at least two-times that required by the FDA. In December 2000, furosemide was petitioned for addition to § 205.603(a) for use as a medical treatment—a diuretic that reduces edema. In May 2003, the NOSB recommended adding furosemide to the National List in § 205.603(a). The NOSB included a restrictive annotation for twice the required FDA furosemide withdrawal time within their recommendation to add furosemide to the National List.

AMS accepted the NOSB’s recommendation and furosemide was added to the National List on December 12, 2007 (72 FR 70479). As required by OFPA, the NOSB recommended the renewal of furosemide during their 2012 sunset review. The Secretary accepted the NOSB’s recommendation and published a notice renewing the furosemide exemption on the National List on June 6, 2012 (77 FR 33290). Subsequently, the exemption for furosemide as included on the National List was considered during the NOSB’s 2017 sunset review. Two notices of the public meetings on the 2017 sunset review with request for comments were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the furosemide exemption discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB’s recommendation on

furosemide is available on the NOP Web site at <http://www.ams.usda.gov/nop>. During their sunset review of furosemide the NOSB considered a furosemide technical report that were requested by and developed for the NOSB in 2003. This technical report is available for review in the petitioned substance database on the NOP Web site, <https://www.ams.usda.gov/rules-regulations/organic/national-list>.

Public comments received by the NOSB on furosemide indicated alternatives to furosemide are available to organic livestock producers. Based upon these comments, the NOSB determined that the exemption for furosemide in § 205.603(a)(10) is no longer necessary or essential for organic livestock production. Subsequently, the NOSB recommended the removal of furosemide from § 205.603(a)(10) from the National List at their October 2015 public meeting.

AMS accepts the NOSB's recommendation on removing furosemide from the National List. This proposed rule would amend National List § 205.603 by removing the substance exemption for furosemide sulfonate listed in § 205.603(a)(10). This amendment is proposed to be effective on the current sunset date for furosemide, which is June 27, 2017.

Magnesium Carbonate

The USDA organic regulations include an exemption on the National List for magnesium carbonate as a synthetic ingredient for use in or on processed products at § 205.605(b) as follows: Magnesium carbonate—for use only in agricultural products labeled “made with organic (specified ingredients or food group(s)),” prohibited in agricultural products labeled “organic.” In September 1996, magnesium carbonate was petitioned for addition to the National List under § 205.605(b). The NOSB recommended that magnesium carbonate be added to the National List under § 205.605(b) with an annotation limiting its use to products labeled “made with organic (specified ingredients or food group(s))”. AMS accepted this recommendation and included magnesium carbonate in the proposed and the final rule establishing the National Organic Program and the original National List that was published in the **Federal Register** on December 21, 2001 (65 FR 80548). In this final rule, magnesium carbonate was included on the National List under § 205.605(b)(16).

As required by OFPA, the NOSB recommended the renewal of magnesium carbonate during the 2007

and 2012 sunset reviews, which were renewed by the Secretary on October 16, 2007 (72 FR 58469) and June 6, 2012 (77 FR 33290). The NOSB completed their 2017 sunset review of the exemption for magnesium carbonate at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review with request for comments were published in the **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to alert the public that the exemption for magnesium carbonate would expire on June 27, 2017 if not reviewed and recommended by the NOSB and renewed by the Secretary. During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on magnesium carbonate is available on the NOP Web site at <http://www.ams.usda.gov/nop>.

Public comments received by the NOSB regarding magnesium carbonate under § 205.605 (b) indicated that the material is not a necessity and recommended its removal from the National List. Based on the review of the material and the public comments received, the NOSB determined that magnesium carbonate is no longer necessary for organic production. As a result, the NOSB recommended the removal of magnesium carbonate from the National List at their October 2015 meeting.

AMS accepts the NOSB's recommendation to remove magnesium carbonate from the National List. This proposed rule would amend National List § 205.605 by removing the substance exemption for magnesium carbonate at § 205.605 (b). This amendment is proposed to be effective on the current sunset date for magnesium carbonate, which is June 27, 2017.

Chia

The USDA organic regulations include an exemption on the National List for Chia for use as an ingredient in or on processed products labeled as “organic” at § 205.606 (c) as follows: Chia (*Salvia hispanica* L.). In January 2007, Chia was petitioned for addition to § 205.606 as an ingredient due to the

lack of availability of certified organic Chia. In April 2007, the NOSB recommended that Chia be added to the National List under § 205.606. AMS accepted this recommendation and included Chia in the proposed rule and the final rule amending the National List that was published in the **Federal Register** on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of Chia during the 2012 sunset review, which was renewed by the Secretary on June 6, 2012 (77 FR 33290). The NOSB completed their 2017 sunset review of the exemption for Chia at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review with request for comments were published in the **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to alert the public that the exemption for Chia would expire on June 27, 2017 if not reviewed and recommended by the NOSB and renewed by the Secretary. During their 2017 sunset review deliberation, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <http://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on Chia is available on the NOP Web site at <http://www.ams.usda.gov/nop>.

Regarding Chia, the NOSB requested information from the public related to (1) commercial demand, (2) commercial availability, (3) alternatives, and (4) necessity and use. Several comments from a cross-section of the organic community were received in support of delisting Chia noting its wide commercial availability. No specific comments received supported relisting or addressed commercial unavailability of Chia. Based on the review of Chia and the public comments received, the NOSB determined that this material is now widely available from organic sources. Subsequently, the NOSB recommended the removal of Chia from § 205.606 of the National List at their October 2015 meeting. AMS accepts the NOSB's recommendation to remove Chia from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for Chia at

§ 205.606 (c). This amendment is proposed to be effective on the current sunset date for Chia, which is June 27, 2017.

Dillweed Oil

The USDA organic regulations include an exemption on the National List for dillweed oil for use as an ingredient in or on processed products labeled as “organic” at § 205.606 (e) as follows: Dillweed oil (CAS #458–37–7). In December 2006, dillweed oil was petitioned for addition to § 205.606. In April 2007, the NOSB recommended that dillweed oil be added to the National List under § 205.606. AMS accepted this recommendation and included dillweed oil in the proposed rule and the final rule amending the National List that was published in the **Federal Register** on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of dillweed oil during the 2012 sunset review, which was renewed by the Secretary on June 6, 2012 (77 FR 33290). The NOSB completed their 2017 sunset review of the exemption for dillweed oil at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review with request for comments were published in the **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to alert the public that the exemption for dillweed oil would expire on June 27, 2017 if not reviewed and recommended by the NOSB and renewed by the Secretary. During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <http://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB’s recommendation on dillweed oil is available on the NOP Web site at <http://www.ams.usda.gov/nop>.

In the review of dillweed oil, the NOSB requested information from the public related to (1) commercial demand, (2) commercial availability, (3) alternatives, and (4) necessity and use. No specific comments were received that supported relisting or addressed commercial unavailability of dillweed oil. Based on the NOSB’s review of dillweed oil and the public comments received, the NOSB determined that this substance is now available from organic

sources. Subsequently, the NOSB recommended the removal of dillweed oil from § 205.606 of the National List at their October 2015 meeting. AMS accepts the NOSB’s recommendation to remove dillweed oil from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for dillweed oil at § 205.606 (e). This amendment is proposed to be effective on the current sunset date for dillweed oil, which is June 27, 2017.

Galangal, Frozen

The USDA organic regulations include an exemption on the National List for galangal for use as an ingredient in or on processed products labeled as “organic” at § 205.606 (h) as follows: Galangal (frozen). In November 2006, galangal was petitioned for addition to § 205.606. In April 2007, the NOSB recommended that galangal be added to the National List under § 205.606. AMS accepted this recommendation and included galangal in the proposed rule and the final rule amending the National List that was published in the **Federal Register** on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of galangal during the 2012 sunset review, which was renewed by the Secretary on June 6, 2012 (77 FR 33290). The NOSB completed their 2017 sunset review of the exemption for galangal at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review with request for comments were published in the **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to alert the public that the exemption for galangal would expire on June 27, 2017 if not reviewed and recommended by the NOSB and renewed by the Secretary. During their 2017 sunset review deliberation, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <http://www.regulations.gov> by searching for the document ID numbers: AMS–NOP–15–0002 (April 2015 public meeting) and AMS–NOP–15–0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB’s recommendation on galangal is available on the NOP Web site at <http://www.ams.usda.gov/nop>.

In its review of galangal, the NOSB requested information from the public related to (1) commercial demand, (2) commercial availability, (3) alternatives,

and (4) necessity and use. No specific comments were received that supported relisting or addressed commercial unavailability of frozen galangal. Based on the NOSB’s review of galangal and the public comments received, the NOSB determined that this material is now available from organic sources. Subsequently, the NOSB recommended the removal of galangal from § 205.606 of the National List at their October 2015 meeting. AMS accepts the NOSB’s recommendation to remove galangal from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for galangal at § 205.606 (h). This amendment is proposed to be effective on the current sunset date for galangal, which is June 27, 2017.

Inulin—Oligofructose Enriched

The USDA organic regulations include an exemption on the National List for inulin—oligofructose enriched, allowed as an ingredient in or on processed products labeled as “organic” in § 205.606 (i) as follows: inulin—oligofructose enriched (CAS # 9005–80–5). In January 2007, inulin was petitioned for addition to § 205.606 for use as an ingredient in or on organic processed products. In April 2007, the NOSB recommended adding inulin—oligofructose enriched to the National List in § 205.606.

AMS accepted the NOSB’s recommendation and inulin—oligofructose enriched was added to the National List on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of inulin—oligofructose enriched during their 2012 sunset review. The Secretary accepted the NOSB’s recommendation and published a notice renewing the inulin—oligofructose enriched exemption on the National List on June 6, 2012 (77 FR 33290). Subsequently, the exemption for inulin—oligofructose enriched on the National List was considered during the NOSB’s 2017 sunset review. Two notices of the public meetings on the 2017 sunset review with request for comments were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the inulin—oligofructose enriched exemption discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review.

These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS-NOP-15-0002 (April 2015 public meeting) and AMS-NOP-15-0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on inulin—oligofructose enriched is available on the NOP Web site at <http://www.ams.usda.gov/nop>. During their sunset review of inulin—oligofructose enriched the NOSB considered an inulin—oligofructose enriched technical report that was requested by and developed for the NOSB in 2015. This technical report is available for review in the petitioned substance database on the NOP Web site, <https://www.ams.usda.gov/rules-regulations/organic/national-list>.

Public comments on inulin—oligofructose enriched received by the NOSB during their 2017 Sunset review indicated that organic inulin—oligofructose enriched sources are available to organic processors. Based upon these comments, the NOSB determined that the exemption for inulin—oligofructose enriched in § 205.606(l) is no longer necessary or essential for organic handling/processing. From this determination, the NOSB recommended the removal of inulin—oligofructose enriched from § 205.603(l) from the National List at their October 2015 public meeting. AMS accepts the NOSB's recommendation on removing inulin—oligofructose enriched from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for inulin—oligofructose enriched as listed in § 205.606(l). This amendment is proposed to be effective on the current sunset date for inulin—oligofructose enriched, which is June 27, 2017.

Lemon Grass, Frozen

The USDA organic regulations include an exemption on the National List for lemon grass, allowed as an ingredient in or on processed products labeled as “organic” in § 205.606(p) as follows: lemon grass, frozen. In November 2006, lemon grass was petitioned for addition onto § 205.606 for use as an ingredient in or on organic processed products. In March 2007, the NOSB recommended adding lemon grass to the National List in § 205.606.

AMS accepted the NOSB's recommendation and lemon grass was added to the National List on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of lemon grass during their

2012 sunset review. The Secretary accepted the NOSB's recommendation and published a notice renewing the lemon grass exemption on the National List on June 6, 2012 (77 FR 33290). Subsequently, the exemption for lemon grass was considered during the NOSB's 2017 sunset review. Two notices of the public meetings on the 2017 sunset review with request for comments were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the lemon grass exemption discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS-NOP-15-0002 (April 2015 public meeting) and AMS-NOP-15-0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on lemon grass is available on the NOP Web site at <http://www.ams.usda.gov/nop>. Since the NOSB has not requested the development of a technical review on lemon grass, either for the original lemon grass petition process or for sunset reviews, the NOSB did not review a technical report on lemon grass during their 2017 sunset review.

Public comments on lemon grass received by the NOSB during their 2017 Sunset review indicated that sources of organic lemon grass are available to organic processors. Based upon these comments, the NOSB determined that the exemption for lemon grass in § 205.606(p) is no longer necessary or essential for organic handling/processing. From this determination, the NOSB recommended the removal of lemon grass from § 205.606(p) from the National List at their October 2015 public meeting. AMS accepts the NOSB's recommendation on removing lemon grass from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for lemon grass as listed in § 205.606(p). This amendment is proposed to be effective on the current sunset date for lemon grass, which is June 27, 2017.

Peppers (Chipotle Chile)

The USDA organic regulations include an exemption on the National

List for chipotle chile peppers for use as an ingredient in or on processed products labeled as “organic” at § 205.606 (s) as follows: Peppers (Chipotle chile). Chipotle chile peppers were petitioned for addition to § 205.606 in November 2006 and January 2007. In April 2007, the NOSB recommended that chipotle chile peppers be added to the National List under § 205.606. AMS accepted this recommendation and included chipotle chile peppers in the proposed rule and the final rule amending the National List that was published in the **Federal Register** on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of chipotle chile peppers during the 2012 sunset review, which was renewed by the Secretary on June 6, 2012 (77 FR 33290). The NOSB completed their 2017 sunset review of the exemption for chipotle chile peppers at their October 2015 meeting. Two notices of the public meetings on the 2017 sunset review with request for comments were published in the **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to alert the public that the exemption for chipotle chile peppers would expire on June 27, 2017 if not reviewed and recommended by the NOSB and renewed by the Secretary. During their 2017 sunset review deliberation, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <http://www.regulations.gov> by searching for the document ID numbers: AMS-NOP-15-0002 (April 2015 public meeting) and AMS-NOP-15-0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on chipotle chile peppers is available on the NOP Web site at <http://www.ams.usda.gov/nop>.

Regarding chipotle chile, the NOSB requested information from the public related to (1) commercial demand, (2) commercial availability, (3) alternatives, and (4) necessity and use. Several comments from a cross-section of the organic community were received in support of delisting chipotle chiles noting commercial availability. No specific comments received supported relisting or addressed commercial unavailability of chipotle chiles. Based on the NOSB's review of chipotle chile peppers and the public comments received, the NOSB determined that this

material is now available from organic sources. Subsequently, the NOSB recommended the removal of chipotle chile peppers from § 205.606 of the National List at their October 2015 meeting. AMS accepts the NOSB's recommendation to remove chipotle chile peppers from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for chipotle chile peppers at § 205.606 (s). This amendment is proposed to be effective on the current sunset date for chipotle chile peppers, which is June 27, 2017.

Turkish Bay Leaves

The USDA organic regulations include an exemption on the National List for Turkish bay leaves, allowed as an ingredient in or on processed products labeled as "organic" in § 205.606(w) as follows: Turkish bay leaves. In November 2006, Turkish bay leaves was petitioned for addition to § 205.606 for use as an ingredient in or on organic processed products. In April 2007, the NOSB recommended adding Turkish bay leaves to the National List in § 205.606. AMS accepted the NOSB's recommendation and Turkish bay leaves was added to the National List on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of Turkish bay leaves during their 2012 sunset review. The Secretary accepted the NOSB's recommendation and published a notice renewing the Turkish bay leaves exemption on the National List on June 6, 2012 (77 FR 33290). Subsequently, the exemption for Turkish bay leaves on the National List was considered during the NOSB's 2017 sunset review. Two notices of the public meetings on the 2017 sunset review with request for comments were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the Turkish bay leaves exemption discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

During their 2017 sunset review, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS-NOP-15-0002 (April 2015 public meeting) and AMS-NOP-15-0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on

Turkish bay leaves is available on the NOP Web site at <http://www.ams.usda.gov/nop>. During their sunset review of Turkish bay leaves the NOSB did not review a technical report on Turkish bay leaves since the NOSB has not requested the development of a Turkish bay leaves technical report for the original petition review or any subsequent sunset reviews.

Public comments on Turkish bay leaves received by the NOSB during their 2017 Sunset review indicated that organic Turkish bay leaves sources are available to organic handlers/processors. The original petitioner of Turkish bay leaves also commented they now use organic Turkish bay leaves for their products. Based upon these comments, the NOSB determined that the exemption for Turkish bay leaves in § 205.606(w) is no longer necessary or essential for organic handling/processing. From this determination, the NOSB recommended the removal of Turkish bay leaves from § 205.606(w) from the National List at their October 2015 public meeting. AMS accepts the NOSB's recommendation on removing Turkish bay leaves from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for Turkish bay leaves listed in § 205.606(w). This amendment is proposed to be effective on the current sunset date for Turkish bay leaves, which is June 27, 2017.

Whey Protein Concentrate

The USDA organic regulations include an exemption on the National List for whey protein concentrate, allowed as an ingredient in or on processed products labeled as "organic" in § 205.606(y) as follows: whey protein concentrate. In February 2007, whey protein concentrate was petitioned for addition to § 205.606 for use as an ingredient in or on organic processed products. In April 2007, the NOSB recommended adding whey protein concentrate to the National List in § 205.606. AMS accepted the NOSB's recommendation and whey protein concentrate was added to the National List on June 27, 2007 (72 FR 35137). As required by OFPA, the NOSB recommended the renewal of whey protein concentrate during their 2012 sunset review. The Secretary accepted the NOSB's recommendation and published a notice renewing the whey protein concentrate exemption on the National List on June 6, 2012 (77 FR 33290). Subsequently, the exemption for whey protein concentrate on the National List was considered during the NOSB's 2017 sunset review. Two notices of the public meetings on the

2017 sunset review with request for comments were published in **Federal Register** on March 12, 2015 (80 FR 12975) and September 8, 2015 (80 FR 53759). The purpose of these notices was to notify the public that the whey protein concentrate exemption discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

During their 2017 sunset review deliberation, the NOSB considered written comments received prior to and during the public meetings on all substance exemptions included in the 2017 sunset review. These written comments can be viewed at <https://www.regulations.gov> by searching for the document ID numbers: AMS-NOP-15-0002 (April 2015 public meeting) and AMS-NOP-15-0037 (October 2015 public meeting). The NOSB also considered oral comments received during these public meetings. The NOSB's recommendation on whey protein concentrate is available on the NOP Web site at <http://www.ams.usda.gov/nop>. During their sunset review of whey protein concentrate the NOSB considered a whey protein concentrate technical report that were requested by and developed for the NOSB in 2015. This technical report is available for review in the petitioned substance database on the NOP Web site, <https://www.ams.usda.gov/rules-regulations/organic/national-list>.

Public comments on whey protein concentrate received by the NOSB during their 2017 Sunset review indicated that organic whey protein concentrate sources are available to organic processors. Based upon these comments, the NOSB determined that the exemption for whey protein concentrate in § 205.606(y) is no longer necessary or essential for organic handling/processing. From this determination, the NOSB recommended the removal of whey protein concentrate from § 205.606(y) from the National List at their October 2015 public meeting. AMS accepts the NOSB's recommendation on removing whey protein concentrate from the National List. This proposed rule would amend National List § 205.606 by removing the substance exemption for whey protein concentrate listed in § 205.606(y). This amendment is proposed to be effective on the current sunset date for whey protein concentrate, which is June 27, 2017.

III. Related Documents

Two notices of public meetings with request for comments were published in

Federal Register on March 12, 2015 (80 FR 12975) and on September 8, 2015 (80 FR 53759) in order to notify the public that the 2017 sunset review listings discussed in this proposed rule would expire on June 27, 2017, if not reviewed by the NOSB and renewed by the Secretary.

IV. Statutory and Regulatory Authority

OFPA, as amended (7 U.S.C. 6501–6522), authorizes the Secretary to make amendments to the National List based on proposed recommendations developed by the NOSB. Sections 6518(k)(2) and 6518(n) of OFPA authorize the NOSB to develop proposed amendments to the National List for submission to the Secretary and establish a petition process by which persons may petition the NOSB for the purpose of having substances evaluated for inclusion on or deletion from the National List. The National List petition process is implemented under § 205.607 of the USDA organic regulations. The current petition process was published on March 10, 2016 (81 FR 12680) and can be accessed through the NOP Web site at <http://www.ams.usda.gov/nop>.

A. Executive Order 12866

This action has been determined to be not significant for purposes of Executive Order 12866, and therefore, has not been reviewed by the Office of Management and Budget.

B. Executive Order 12988

Executive Order 12988 instructs each executive agency to adhere to certain requirements in the development of new and revised regulations in order to avoid unduly burdening the court system. This proposed rule is not intended to have a retroactive effect.

States and local jurisdictions are preempted under OFPA from creating programs of accreditation for private persons or State officials who want to become certifying agents of organic farms or handling operations. A governing State official would have to apply to USDA to be accredited as a certifying agent, as described in section 2115(b) of OFPA (7 U.S.C. 6514(b)). States are also preempted under section 2104 through 2108 of OFPA (7 U.S.C. 6503 through 6507) from creating certification programs to certify organic farms or handling operations unless the State programs have been submitted to, and approved by, the Secretary as meeting the requirements of OFPA.

Pursuant to section 2108(b)(2) of OFPA (7 U.S.C. 6507(b)(2)), a State organic certification program may contain additional requirements for the production and handling of organically

produced agricultural products that are produced in the State and for the certification of organic farm and handling operations located within the State under certain circumstances. Such additional requirements must: (a) Further the purposes of OFPA, (b) not be inconsistent with OFPA, (c) not be discriminatory toward agricultural commodities organically produced in other States, and (d) not be effective until approved by the Secretary.

Pursuant to section 2120(f) of OFPA (7 U.S.C. 6519(f)), this proposed rule would not alter the authority of the Secretary under the Federal Meat Inspection Act (21 U.S.C. 601–624), the Poultry Products Inspection Act (21 U.S.C. 451–471), or the Egg Products Inspection Act (21 U.S.C. 1031–1056), concerning meat, poultry, and egg products, nor any of the authorities of the Secretary of Health and Human Services under the Federal Food, Drug and Cosmetic Act (21 U.S.C. 301–399), nor the authority of the Administrator of EPA under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136–136(y)).

Section 2121 of OFPA (7 U.S.C. 6520) provides for the Secretary to establish an expedited administrative appeals procedure under which persons may appeal an action of the Secretary, the applicable governing State official, or a certifying agent under this title that adversely affects such person or is inconsistent with the organic certification program established under this title. OFPA also provides that the U.S. District Court for the district in which a person is located has jurisdiction to review the Secretary's decision.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612) requires agencies to consider the economic impact of each rule on small entities and evaluate alternatives that would accomplish the objectives of the rule without unduly burdening small entities or erecting barriers that would restrict their ability to compete in the market. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to the action. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities.

Pursuant to the requirements set forth in the RFA, AMS performed an economic impact analysis on small entities in the final rule published in the **Federal Register** on December 21, 2000 (65 FR 80548). AMS has also considered

the economic impact of this action on small entities. The impact on entities affected by this proposed rule would not be significant. The effect of this proposed rule would be to prohibit the use of eleven non-organic non-agricultural or non-organic agricultural substances that have limited public support and may no longer be used since alternatives to these substances may have been developed and implemented by organic producers or organic handlers (food processors). AMS concludes that the economic impact of removing lignin sulfonate, furosemide, magnesium carbonate, Chia, dillweed oil, frozen galangal, inulin, frozen lemongrass, chipotle chile peppers, Turkish bay leaves, and whey protein concentrate from the National List would be minimal to small agricultural firms since alternative products or ingredients may be commercially available. As such, these substances are proposed to be removed from the National List under this rule. Accordingly, AMS certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Small agricultural service firms, which include producers, handlers, and accredited certifying agents, have been defined by the Small Business Administration (SBA) (13 CFR 121.201) as those having annual receipts of less than \$7,000,000 and small agricultural producers are defined as those having annual receipts of less than \$750,000.

According to USDA, National Agricultural Statistics Service (NASS), certified organic acreage exceeded 3.6 million acres in 2014.¹ According to NOP's Accreditation and International Activities Division, the number of certified U.S. organic crop and livestock operations totaled over 21,764 in March 2016. The list of certified operations is available on the NOP Web site at <http://apps.ams.usda.gov/nop/>. AMS believes that most of these entities would be considered small entities under the criteria established by the SBA. U.S. sales of organic food and non-food have grown from \$1 billion in 1990 to \$43 billion in 2015.² In addition, the USDA has 80 accredited certifying agents who provide certification services to producers and handlers. A complete list of names and addresses of accredited certifying agents may be found on the AMS NOP Web site, at <http://>

¹ U.S. Department of Agriculture, National Agricultural Statistics Service. 2014 Organic Survey, https://www.agcensus.usda.gov/Publications/2012/Online_Resources/Organics/organics_1_001_001.pdf.

² Organic Trade Association. 2015. Organic Industry Survey. www.ota.com.

www.ams.usda.gov/nop. AMS believes that most of these accredited certifying agents would be considered small entities under the criteria established by the SBA.

D. Paperwork Reduction Act

No additional collection or recordkeeping requirements are imposed on the public by this proposed rule. Accordingly, OMB clearance is not required by section 350(h) of the Paperwork Reduction Act of 1995, 44 U.S.C. 3501, Chapter 35, or OMB's implementing regulations at 5 CFR part 1320.

E. Executive Order 13175

This proposed rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this regulation will not have substantial and direct effects on Tribal governments and will not have significant Tribal implications.

F. General Notice of Public Rulemaking

This proposed rule reflects recommendations submitted to the Secretary by the NOSB for substances on the National List of Allowed and Prohibited Substances that, under the Sunset review provisions of OFPA, would otherwise expire on June 27, 2017. A 60-day period for interested persons to comment on this rule is provided. Sixty days is deemed appropriate because the review of these listings was widely publicized through two NOSB meeting notices; the use or prohibition of these substances, as applicable, are critical to organic production and handling; and this rulemaking must be completed before the sunset date of June 27, 2017.

List of Subjects in 7 CFR Part 205

Administrative practice and procedure, Agriculture, Animals, Archives and records, Imports, Labeling, Organically produced products, Plants, Reporting and recordkeeping requirements, Seals and insignia, Soil conservation.

For the reasons set forth in the preamble, 7 CFR part 205 is proposed to be amended as follows:

PART 205—NATIONAL ORGANIC PROGRAM

■ 1. The authority citation for 7 CFR part 205 continues to read as follows:

Authority: 7 U.S.C. 6501–6522.

■ 2. Amend § 205.601 by revising paragraph (l) to read as follows:

§ 205.601 Synthetic substances allowed for use in organic crop production.

* * * * *

(l) As floating agents in postharvest handling. Sodium silicate—for tree fruit and fiber processing.

* * * * *

§ 205.603 [Amended]

■ 3. Amend § 205.603 by removing paragraph (a)(10) and redesignating paragraphs (a)(11) through (a)(23) as paragraphs (a)(10) through (a)(22).

§ 205.605 [Amended]

■ 4. Amend § 205.605 by removing the entry “Magnesium carbonate—for use only in agricultural products labeled “made with organic (specified ingredients or food group(s)),” prohibited in agricultural products labeled “organic” from paragraph (b).

§ 205.606 [Amended]

■ 5. Amend § 205.606 by removing paragraphs (c), (e), (h), (k), (o), (s), (w) and (y) and redesignating paragraphs (d), (f), (g), (i), (j), (l), (m), (n), (p), (q), (r), (t), (u) and (x) as paragraphs (c) through (q).

Dated: January 9, 2017.

Elanor Starmer,

Administrator, Agricultural Marketing Service.

[Document Number AMS–SC–16–0112; PR–B]

RIN 0581–AD55

Organic Research, Promotion, and Information Order; Referendum Procedures

AGENCY: Agricultural Marketing Service, Department of Agriculture.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on procedures for conducting a referendum to determine whether the issuance of a proposed Organic Research, Promotion, and Information Order (proposed Order) is favored by certified organic producers, certified organic handlers, and importers of certified organic products. The organic market includes a range of agricultural commodities such as fruits, vegetables, dairy, meat, poultry, breads, grains, snack foods, condiments, beverages, and

packaged and prepared foods, as well as non-food items such as fiber (linen and clothing), personal care products, pet food, and flowers. The procedures would also be used for any subsequent referendum under the proposed Order. The proposed Order is being published separately in this issue of the **Federal Register**. This document also announces the Agricultural Marketing Service's (AMS) intent to request approval by the Office of Management and Budget (OMB) of new information collection requirements to implement the program.

DATES: Comments must be received by March 20, 2017. Pursuant to the Paperwork Reduction Act (PRA), comments on the information collection burden that would result from this proposal must be received by March 20, 2017.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments may be submitted on the Internet at: <http://www.regulations.gov> or to the Promotion and Economics Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW., Room 0632–S, Stop 0244, Washington, DC 20250–0244; facsimile: (202) 205–2800. All comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection, including name and address, if provided, in the above office during regular business hours or it can be viewed at <http://www.regulations.gov>.

Pursuant to the PRA, comments regarding the accuracy of the burden estimate, ways to minimize the burden, including the use of automated collection techniques or other forms of information technology, or any other aspect of this collection of information, should be sent to the above address. In addition, comments concerning the information collection should also be sent to the Desk Office for Agriculture, Office of Information and Regulatory Affairs, OMB, New Executive Office Building, 725 17th Street NW., Room 725, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT:

Heather Pichelman, Division Director, Promotion and Economics Division, Specialty Crops Programs, AMS, USDA, 1400 Independence Avenue SW., Room 0632–S, Stop 0244, Washington, DC 20250–0244; facsimile: (202) 205–2800; or electronic mail: Heather.Pichelman@ams.usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued pursuant to the Commodity Promotion, Research, and Information Act of 1996 (7 U.S.C. 7411–7425).

Executive Order 12866 and Executive Order 13563

This rule has been determined to be not significant for purposes of Executive Order 12866, as supplemented by Executive Order 13563, and therefore has not been reviewed by the Office of Management and Budget (OMB).

Executive Order 12988

What is the purpose of this action?

This proposed rule invites comments on procedures for conducting a referendum to determine whether covered domestic certified organic producers, certified organic handlers and importers of organic products favor issuance of a proposed Order.¹ Accordingly, this rule would add subpart B to part 1255 that would establish procedures for conducting the referendum. The procedures would cover definitions, voting instructions, use of subagents, ballots, the referendum report, and confidentiality of information. The U.S. Department of Agriculture (USDA) would conduct the referendum. The program would be implemented if it is favored by a majority of domestic certified organic producers, certified organic handlers and importers of organic products voting in the referendum. The procedures would be applicable for the initial referendum and future referenda under the proposed Order.

This document also announces AMS's intent to request approval by the OMB of new information collection requirements to implement the program. The proposed Order is being published separately in this issue of the **Federal Register**.

What are the key statutes and regulations governing this action?

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect. Section 524 of the Commodity Promotion, Research, and Information Act of 1996 (7 U.S.C. 7411–7425) (Act) provides that it shall not affect or preempt any other Federal or state law authorizing promotion or research relating to an agricultural commodity.

The Act authorizes USDA to establish agricultural commodity research and promotion orders which may include a

combination of promotion, research, industry information, and consumer information activities funded by mandatory assessments. These programs are designed to maintain and expand markets and uses for agricultural commodities. To date, there are 10 commodity promotion programs (*i.e.*, research and promotion programs or R&P programs) operating under the authority of the Act. On February 7, 2014, section 10004 of the Agricultural Act of 2014 (2014 Farm Bill) (Pub. L. 113–79) amended section 501 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7401), which authorizes generic commodity promotion programs under the various commodity promotion laws, to allow for an organic commodity promotion order. Specifically, the definition of “agricultural commodity” under section 513(1)(E) of the Act was amended to include “products, as a class, that are produced on a certified organic farm (as defined in 7 U.S.C. 6502); and certified to be sold or labeled as “organic” or “100 percent organic” (as defined in part 205 of title 7, Code of Federal Regulations (or a successor regulation)). Should this proposed rule become final, pursuant to section 10004 of the 2014 Farm Bill, the regulatory language currently exempting organic commodities from assessment by generic commodity promotion programs created under the various commodity promotion laws (7 U.S.C. 7401(e)) shall no longer be in effect. Such commodities would then become “dual-covered commodities”, and persons producing, handling and importing them would need to elect to pay assessments to the commodity-specific program, or the organic commodity promotion program.

The 2014 Farm Bill amendments to the Act allowed the organic industry to submit a proposal for an organic R&P program. As the membership-based business association for the organic industry in North America, the Organic Trade Association (OTA) took on the role as a proponent group in the development of an organic R&P program proposal. OTA represents businesses across the organic supply chain and addresses all things organic, including food, fiber/textiles, personal care products, and new sectors as they develop. To develop the proposal, OTA established and collaborated with the 7-member GRO Organic Core Committee. The GRO Organic Core Committee is a subset of OTA's larger Organic Research and Promotion Program Steering Committee. It included OTA subcommittee chairs and other industry

leaders who built on the outreach and input from the larger committee to guide the development of a proposed Order.

Under section 519 of the Act, a person subject to an order may file a written petition with USDA stating that an order, any provision of an order, or any obligation imposed in connection with an order, is not established in accordance with the law, and request a modification of an order or an exemption from an order. Any petition filed challenging an order, any provision of an order, or any obligation imposed in connection with an order, shall be filed within two years after the effective date of an order, provision, or obligation subject to challenge in the petition. The petitioner will have the opportunity for a hearing on the petition. Thereafter, USDA will issue a ruling on the petition. The Act provides that the district court of the United States for any district in which the petitioner resides or conducts business shall have the jurisdiction to review a final ruling on the petition, if the petitioner files a complaint for that purpose not later than 20 days after the date of the entry of USDA's final ruling.

What are organic products?

To make an organic claim or use the USDA Organic Seal, the final product must follow the applicable production, handling and labeling regulations and go through the organic certification process specified at 7 CFR part 205. To become certified, producers and handlers must apply to a USDA-accredited certifying agent, develop and implement an organic system plan, and be inspected. Organic certification allows producers and handlers to sell their raw, processed, and multi-ingredient products as organic. Each production or handling operation that produces or handles crops, livestock, livestock products, or other agricultural products that are intended to be sold, labeled, or represented as “100 percent organic,” “organic,” or “made with organic (specified ingredients or food group(s))” must be certified according to the USDA organic regulations (7 CFR part 205).²

¹ For clarification, the phrase “organic products” used throughout the proposed Order and referendum procedures is synonymous with the terms: “certified products” or “certified organic products”. The words “certified organic” are used to modify the terms “certified organic handler” at section 1255.9 and “certified organic producer” at section 1255.10 for the purpose of reiterating the concept that certified products originate from certified entities.

² USDA organic regulations at 7 CFR 205.101 provides for some exclusions and exemptions from certification. For example, a production or handling operation that sells agricultural products as “organic” but whose gross agricultural income from organic sales totals \$5,000 or less annually is exempt from organic certification but must comply with the applicable organic production and handling requirements as specified at 7 CFR 205.101(a)(1).

Who would be assessed under this program?

Consistent with the definition of “covered person” at 7 U.S.C. 7401, which describes who may be subject to an organic commodity promotion order as “a producer, handler, marketer, or importer of an organic agricultural commodity”, the definition for “assessed entity” at section 1255.4 states that this order is applicable to any certified organic producer or certified organic handler that has gross organic sales in excess of \$250,000 for the previous marketing year, any importer with a transaction value greater than \$250,000 in organic products during the previous marketing year, and any voluntarily assessed entity. The proposed Order would provide for an initial assessment rate of one-tenth of one percent of net organic sales for domestic certified organic producers and certified organic handlers with gross organic sales greater than \$250,000 in the previous marketing year. Net organic sales would be equal to total gross sales in certified organic products minus (a) the cost of certified organic ingredients, feed, and inputs used in the production of certified products, and (b) the cost of any non-organic agricultural ingredients used in the production of certified products.³ Certified organic handlers may also deduct the cost of certified organic products purchased from producers. Importers with transaction value that exceeds \$250,000 in organic products during the prior

year would remit one-tenth of one percent of the declared transaction value of those certified organic products at the time of importation. This means that importers would remit assessments to the Board upon taking ownership of the imported product.

Under the permissive terms under section 516 of the Act, the term “assessed entity” also allows orders to provide exemptions for covered persons. More specifically, certified organic producers and certified organic handlers with gross organic sales less than or equal to \$250,000 of certified organic products for the previous marketing year would be exempt, and have the option to choose to pay assessments into the program as “voluntarily assessed” entities. Importers with \$250,000 or less in transaction value of imported organic products during the prior marketing year are exempt from remitting assessments to the board, and could also opt to be voluntarily assessed. Finally, certified organic producers, certified organic handlers, and importers of dual-covered commodities would be eligible to apply for an exemption.⁴ Such entities also have the option to choose to pay assessments into the program as “voluntarily assessed” entities, which would make them eligible to participate in the referendum. The purpose of the program would be to strengthen the position of certified organic products in the marketplace, support research to benefit the organic industry, and

improve access to information and data across the organic sector.

What products would be covered under this program?

Understanding that section 7412(1)(E)(ii) of the Act specified that the scope of an “agricultural commodity” as limited to products that are “certified to be sold or labeled as “organic” or “100 percent organic”, this proposal would assess only the value added of the certified organic ingredient content of “made with organic” products rather than the entire certified product. Consequently, the scope of covered products spans a range of agricultural commodities such as fruits, vegetables, dairy, meat, poultry, breads, grains, snack foods, condiments, beverages, and packaged and prepared foods, as well as non-food items such as fiber (linen and clothing), personal care products, pet food, and flowers. While the USDA organic regulations do not detail standards specific to non-food items, items that are agricultural products (e.g., pet food) and that meet the certification requirements of the USDA organic regulations can be certified and labeled “organic”, irrespective of the end use of the product.⁵ There are currently 38 Harmonized Tariff Schedule (HTS) codes representative of imported organic agricultural products. These codes and their product descriptions are listed in the table below.

HTS Code	HTS Description
0409000005	NATURAL, HONEY, CERTIFIED FOR ORGANIC.
0703200005	GARLIC, FRESH WHOLE BULBS, CERTIFIED ORGANIC.
0709604015	SWT BELL PEPPER, FRT OF CAPSICUM/PIMENTA, GRNHSE, CERT ORGANIC.
0709604065	SWT BELL PEPPER, OTH, FRUIT, CAPSICUM/PIMENTA, CERT ORGANIC, OTHER.
0802120005	SHELLED ALMONDS, CERTIFIED ORGANIC
0803900025	FRESH BANANAS, CERTIFIED ORGANIC
0804400020	AVOCADOS, HASS&HASS LIKE, CERTIFIED ORGANIC
0804504045	FRESH MANGOES ENTERED SEPT 1 TO MAY 31, CERTIFIED ORGANIC
0804506045	FRESH MANGOES ENTERED JUNE 1 TO AUG 31, CERTIFIED ORGANIC
0808100045	APPLES, FRESH, VALUED> \$0.22 PER KG, CERTIFIED ORGANIC
0808302015	PEARS, ORGANIC, ENTERED 4/1–6/30, FRESH
0808304015	PEARS, ORGANIC, ENTERED 7/1–3/31, FRESH
0808402015	QUINCES; FRESH, APR 1 THRU JUNE 30, CERTIFIED ORGANIC
0808404015	QUINCES; ORGANIC, ENTERED 7/1–3/31, FRESH
0810400026	BLUEBERRIES, FRESH, CULTIVATED, CERTIFIED ORGANIC
0901110015	ARABICA COFFEE NOT ROAST/DECAFFEINATED, CERTIFIED ORGANIC
0901110045	COFFEE, NOT ROASTED, NOT DECAFFEINATED, OTHER, CERTIFIED ORGANIC
0901120015	COFFEE, DECAFFEINATED, NOT ROASTED, CERTIFIED ORGANIC
0901210035	COFFEE, ROASTED; NOT DECAFFEINATED, <=2KG RET CONT, CERT ORGANIC
0901210055	COFFEE, ROASTED, N/DECAFFEINATED, NOT 2KG OR LESS, CERT ORGANIC

³ Examples of organic input costs that may be deducted from gross sales include fertilizer, lime, and soil conditioners; agricultural chemicals and other organic materials for pest control; seeds, plants, vines and trees; livestock purchased or leased; and feed purchased for livestock and poultry.

⁴ The 2014 Farm Bill amendments to 7 U.S.C. 7401 also included a requirement for an organic

research and promotion order to allow covered persons (which can include producers, handlers, and importers, depending upon the order) to elect whether to be assessed under the organic commodity promotion order or another applicable agricultural commodity promotion order. For example, an organic blueberry producer would have the option to pay into the blueberry program or the organic program.

⁵ In August 2005, the NOP issued a Policy Memorandum 11–2 to certifying agents, stating that agricultural products which meet the NOP certification standards can be certified and labeled “organic,” irrespective of the end use of the product. Policy Memo 11–2 is available on the AMS Web site in the NOP Handbook at: <http://www.ams.usda.gov/rules-regulations/organic/handbook>.

HTS Code	HTS Description

Initial Regulatory Flexibility Act Analysis

In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS is required to examine the impact of the proposed rule on small entities. Accordingly, AMS has considered the economic impact of this action on these entities.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be disproportionately burdened. The Small Business Administration (SBA) defines, in 13 CFR part 121, small agricultural producers as those having annual receipts of no more than \$750,000 and small agricultural support services firms (handlers and importers) as those having annual receipts of no more than \$7.5 million.

In 2014, there were a total of 19,466 certified organic operations in the U.S. and its territories.⁶ This total includes both certified organic producers and certified organic handlers. The number of operations that were certified solely as organic handlers, according to NOP, totaled 8,327 entities. The remaining 11,139 certified organic entities include operations that are certified only as producers and operations that are certified as both producers and handlers. Organic producers are also required to be certified as organic handlers in order to sell, process, or package agricultural products, except in such cases where a producer is simply selling, transporting or delivering crops or livestock to a handler (7 CFR 205.2).

Data from USDA's National Agricultural Statistics Service (NASS) 2014 Organic Survey show that about 91 percent of certified organic producers

had 2014 organic sales value of \$750,000 or less. Applying this proportion to the 11,139 certified organic producers referenced earlier results in 10,126 producing entities being considered small.

There is no one catch-all definition by the SBA of what constitutes a small handler of agricultural products. Therefore, to maintain consistency with other federal programs and marketing orders, AMS defines a small handler as one which has no more than \$7.5 million in annual receipts as defined by the SBA under subsector 115 of the North American Industry Classification System (NAICS), "Support Activities for Agriculture and Forestry".⁷ According to the 2012 County Business Patterns and 2012 Economic Census released June 22, 2015, about 95 percent of firms classified under subsector 115 of NAICS had less than \$7.5 million in annual receipts and would be considered small. Applying this proportion to the number of certified organic handlers results in an estimated 7,895 handler operations out of 8,327 being considered small under the SBA definition.

According to data from the U.S. Customs and Border Protection (CBP), there were 2,135 importers of organic products with codes in the HTS in 2014. Of these, about 98 percent had annual sales revenue of less than \$7.5 million in 2014. Adding the 2,135 number of organic importers to the 19,466 combined number of certified organic producers and handlers results in a total of 21,601 operations with sales of certified organic products in the U.S. Of this total, 20,121 entities, or 93 percent, would be considered to be small under the SBA definitions.

⁷ U.S. Small Business Administration, "Table of Small Business Size Standards Matched to North American Industry Classification System Codes", February 26, 2016.

The Organic Industry Survey, which was carried out by the Nutrition Business Journal (NBJ) on behalf of OTA, reported 2014 retail sales of all organic commodities at \$39.1 billion. Imports of the 38 organic products with HTS codes listed previously amounted to more than \$1.2 billion in 2014. In 2014, NASS, which collects data on farm-level production and sales, reported total certified organic sales of nearly \$5.5 billion, up 54 percent from three years previously.⁸

This proposed rule invites comments on procedures for conducting a referendum to determine whether issuance of a proposed Order is favored by domestic certified producers, certified handlers and importers of certified organic products. Organic agricultural ingredients are used in a range of products (e.g. food items (fruits, vegetables, dairy, meat, poultry, breads, grains, snack foods, condiments, beverages, and packaged and prepared foods), and non-food items (fiber (linen and clothing), supplements, personal care products, pet food, household products, and flowers)). The procedures would also be used for any subsequent referendum under the proposed Order. USDA would conduct the referendum.

The Act provides for alternatives within the terms of a variety of provisions. Paragraph (e) of section 518 of the Act provides three options for determining industry approval of a new research and promotion program: (1) By a majority of those persons voting; (2) by persons voting for approval who represent a majority of the volume of the agricultural commodity; or (3) by a

⁸ National Agricultural Statistics Service, 2014 Organic Survey, U.S. Department of Agriculture (September 2015), p. 1, available at <http://usda.mannlib.cornell.edu/usda/current/OrganicProduction/OrganicProduction-09-17-2015.pdf>.

⁶ NOP Organic Integrity database. Available at: <https://apps.ams.usda.gov/integrity/>.

majority of those persons voting for approval who also represent a majority of the volume of the agricultural commodity. In addition, section 518 of the Act provides for referenda to ascertain approval of an order to be conducted either prior to its going into effect or within three years after assessments first begin under an order. OTA recommended that the program be implemented if it is favored by a majority of assessed entities voting in the referendum. For example, if 10,000 certified organic producers, certified organic handlers, and importers voted in a referendum, 5,001 would have to vote in favor of the proposed Order for it to pass in the referendum. It is proposed that a single assessed entity may cast one vote in the referendum. A single entity is recognized by its individual tax identification number. This is a modification from the proponent's proposal, which recommended a single assessed entity would have one vote for each organic certificate held.

Regarding the economic impact of this rule on affected entities, eligible domestic certified producers, certified handlers and importers of certified organic products would have the opportunity to participate in the referendum. The proposed Order would exempt: (a) Producers and handlers with gross sales of \$250,000 or less of certified organic products for the previous marketing year, (b) importers with \$250,000 or less in transaction value of imported organic products during the prior marketing year, and (c) certified organic producers, certified organic handlers, and importers of dual-covered commodities who select to pay into the commodity-specific program instead of the organic program. Entities under the \$250,000 thresholds stated above would have the option to choose to pay assessments into the program as "voluntarily assessed" entities, which would make them eligible to participate in the referendum. Certified producers, certified handlers and importers of certified organic products exercising their exemptions would not be eligible to participate in the referendum.

AMS used 2014 data from multiple sources, such as the USDA Economic Research Service (ERS), USDA NASS, USDA Foreign Agricultural Service (FAS), USDA National Organic Program (NOP), U.S. Customs and Border Protection (CBP), and OTA industry surveys for consistency in estimating potential assessment income at producer, handler and importer levels. Based on an assumption that there is no participation by voluntarily assessed entities, of the 11,139 producers, 8,327

handlers, and 2,135 importers, it is estimated that about 2,691 producers, 5,015 handlers, and 326 importers would pay assessments under the proposed Order and thus be eligible to vote in the referendum. Assessment revenue that would be collected at the proposed exemption level of \$250,000 in gross annual revenue from organic sales would be \$25.3 million.⁹ Of this assessment revenue, about 14 percent would come from producers, 81 percent would come from handlers, and 5 percent would be from importers. In terms of the total value of exempt sales and the total number of exempt entities at the proposed exemption level, AMS estimates that about 5 percent of gross organic sales value would be exempt, and 63 percent of certified organic producers and handlers and organic importers, combined, would be exempt. At the producer level, 12 percent of certified organic sales value would be exempt, and 76 percent of entities would be exempt. For handlers, 3 percent of certified organic sales value and 40 percent of entities would be exempt. Of the total importers of organic products, 4 percent of organic sales value would be exempt, and 85 percent of entities would be exempt.

Voting in the referendum is optional. If domestic certified organic producers, certified organic handlers and importers choose to vote, the burden of voting would be offset by the benefits of having the opportunity to vote on whether or not they favor the proposed program.

Regarding alternatives, USDA considered requiring voters to vote in person at various USDA offices across the country. USDA also considered electronic voting, but the use of computers is not universal. Conducting the referendum from one central location by mail ballot would be more cost effective and reliable. USDA would provide easy access to information for potential voters through a toll free telephone line.

This action would impose an additional reporting burden on assessed entities. Those who would be assessed would have the opportunity to complete and submit a ballot to USDA indicating whether or not they favor implementation of the proposed Order. The specific burden for the ballot is detailed later in this document in the section titled Paperwork Reduction Act. As with all Federal promotion

⁹ No expense data exists for handlers, so input costs have not been deducted from total sales at the handler level. This means that handler assessable sales is likely lower than what is reported; however, all assumptions made in estimating potential assessment revenue have been made to generate a conservative figure.

programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. Finally, USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule.

AMS is committed to complying with the E-Government Act, to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Regarding outreach efforts, USDA would keep these individuals informed throughout the program implementation and referendum process to ensure that they are aware of and are able to participate in the program implementation process. USDA would also publicize information regarding the referendum process so that trade associations and related industry media can be kept informed.

USDA has performed this initial RFA analysis regarding the impact of this proposed rule on small businesses.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the referendum ballot, which represents the information collection and recordkeeping requirements that may be imposed by this rule, has been submitted to OMB for approval.

Title: Organic Research, Promotion, and Information Order.

OMB Number: 0581-NEW.

Expiration Date of Approval: 3 years from OMB date of approval.

Type of Request: New information collection for an organic research, promotion, and information program.

Abstract: The information collection requirements in the request are essential to carry out the intent of the Act. The information collection concerns a proposal received by USDA for a national research and promotion program for the organic industry. The program would be financed by an assessment on importers and domestic certified organic producers and certified organic handlers of organic products, and would be administered by a board of industry members selected by the Secretary. The program would exempt: (a) Certified organic producers and certified organic handlers with gross sales \$250,000 or less of certified organic products for the previous marketing year, (b) importers with \$250,000 or less in transaction value of imported organic products during the prior marketing year, and (c) certified

organic producers, certified organic handlers, and importers of dual-covered commodities, as applicable. Exports of certified organic products from the United States would also be exempt from assessments. A referendum would be held among eligible domestic certified organic producers, certified organic handlers and importers of certified organic products to determine whether they favor implementation of the program prior to it going into effect. The purpose of this program would be to: (1) Develop and finance an effective and coordinated program of research, promotion, industry information, and consumer education regarding organic commodities; and (2) maintain and expand existing markets for organic commodities.

The information collection requirements in this rule concern the referendum that would be held to determine whether the program is favored by the industry. Domestic certified organic producers and certified organic handlers with gross organic sales greater than \$250,000, importers with transaction value that exceeds \$250,000 in organic products during the prior year, and "voluntarily assessed" entities would be eligible to participate in the referendum. The ballot would be completed by eligible domestic certified organic producers, certified organic handlers, and importers who want to indicate whether or not they support implementation of the program. The following burden estimate assumes 0% voluntarily assessed participation.

Referendum Ballot

Estimate of Burden: Public recordkeeping burden for this collection of information is estimated to average 0.25 hours per application.

Respondents: Domestic certified organic producers, certified organic handlers, and importers.

Estimated Number of Respondents: 8,032 (7,706 domestic producers and handlers and 326 importers).

Estimated Number of Responses per Respondent: 1 every 7 years (0.14).

Estimated Total Annual Burden on Respondents: 281.12 hours.

The ballot would be added to the other information collections approved under OMB No. 0581-NEW.

An estimated 8,032 respondents would provide information to the Board (7,706 domestic producers and handlers and 326 importers). The estimated cost of providing the information to the Board by respondents would be \$9,754.99. This total has been estimated by the adding the cost of the hours required for producer and handling reporting (269.71 hours multiplied by

\$33.60 (the average mean hourly earnings of certified producers and handlers) and importer reporting (11.41 hours multiplied by \$30.85, the average mean hourly earnings of importers). Data for computation of the hourly rate for producers and handlers (Occupation code 11-9013: Farmers, Ranchers, and other Agricultural Managers) and importers (Occupation code 13-1020: Buyers and Purchasing Agents) was obtained from the U.S. Department of Labor, Bureau of Labor Statistics.

The proposed Order's provisions have been carefully reviewed, and every effort has been made to minimize any unnecessary recordkeeping costs or requirements, including efforts to utilize information already submitted under other programs administered by USDA and other state programs.

Request for Public Comment Under the Paperwork Reduction Act

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of functions of the proposed Order and USDA's oversight of the proposed Order, including whether the information would have practical utility; (b) the accuracy of USDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) the accuracy of USDA's estimate of the principal organic production areas in the United States; (d) the accuracy of USDA's estimate of the number of domestic certified organic producers, certified organic handlers, and importers of organic products that would be covered under the program (e) ways to enhance the quality, utility, and clarity of the information to be collected; and (f) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments concerning the information collection requirements contained in this action should reference OMB No. 0581-NEW. In addition, the docket number, date, and page number of this issue of the **Federal Register** also should be referenced. Comments should be sent to the same addresses referenced in the **ADDRESSES** section of this rule.

A 60-day comment period is provided to allow interested persons to comment on this proposed information collection. All written comments received will be summarized and included in the request

for OMB approval. All comments will also become a matter of public record.

List of Subjects in 7 CFR Part 1255

Administrative practice and procedure, Advertising, Consumer information, Marketing agreements, Organic, Promotion, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, it is proposed that Title 7, Chapter XI of the Code of Federal Regulations, as proposed to be amended elsewhere in this issue of the **Federal Register**, be further amended as follows:

PART 1255—ORGANIC RESEARCH AND PROMOTION ORDER

■ 1. The authority citation for part 1255 continues to read as follows:

Authority: 7 U.S.C. 7411–7425; 7 U.S.C. 7401.

■ 2. Add Subpart B to read as follows:

Subpart B—Referendum Procedures

Sec.	General.
1255.100	General.
1255.101	Definitions.
1255.102	Voting.
1255.103	Instructions.
1255.104	Subagents.
1255.105	Ballots.
1255.106	Referendum report.
1255.107	Confidential information.
1255.108	OMB Control number.

Subpart B—Referendum Procedures

§ 1255.100 General.

Referenda to determine whether eligible certified organic producers, certified organic handlers and importers of organic products favor the issuance, continuance, amendment, suspension, or termination of the Organic Research, Promotion, and Information Order shall be conducted in accordance with this subpart.

§ 1255.101 Definitions.

For the purposes of this subpart:

(a) *Administrator* means the Administrator of the Agricultural Marketing Service, with power to delegate, or any officer or employee of the U.S. Department of Agriculture to whom authority has been delegated or may hereafter be delegated to act in the Administrator's stead.

(b) *Assessed entity* means any certified organic producer or certified organic handler that has gross organic sales in excess of \$250,000 for the previous marketing year, any importer with a transaction value greater than \$250,000 in organic products during the previous marketing year, and any voluntarily assessed entity.

(c) *Certification or certified*. A determination made by a USDA-

accredited certifying agent that a production or handling operation is in compliance with the Organic Foods Production Act of 1990 (7 U.S.C. 6501–6522) and the regulations in 7 CFR part 205 or to an authorized international standard, and any amendments thereto, and which is documented by a certificate of organic operation.

(d) *Certified operation*. A crop or livestock production, wild-crop harvesting or handling operation, or portion of such operation that is certified by a USDA-accredited certifying agent as utilizing a system of organic production or handling as described by the Organic Foods Production Act of 1990 (7 U.S.C. 6501–6522) and the regulations in 7 CFR part 205.

(e) *Certified organic handler* means a person who handles certified organic products in accordance with the definition specified in 7 CFR 205.100, the requirements specified in 7 CFR 205.270 through 7 CFR 205.272, and all other applicable requirements of part 205 and receives, sells, consigns, delivers, or transports certified organic products into the current of commerce in the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

(f) *Certified organic producer* means a person who produces certified organic products in accordance with the definition specified in 7 CFR 205.100, the requirements specified in 7 CFR 205.202 through 7 CFR 205.207 or 7 CFR 205.236 through 7 CFR 205.240, and all other applicable requirements of part 205.

(g) *Customs or CBP* means the U.S. Customs and Border Protection, an agency of the U.S. Department of Homeland Security.

(h) *Department* means the U.S. Department of Agriculture or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead.

(i) *Dual-covered commodity* means an agricultural commodity that is produced on a certified organic farm and is covered under this part and any other agricultural commodity promotion order issued under a commodity promotion law.

(j) *Gross organic sales* means the total amount the person received for all organic products during the fiscal year without subtracting any costs or expenses.

(k) *Importer* means any person who imports certified organic products from outside the United States for sale in the United States as a principal or as an

agent, broker, or consignee of any person who produces organic products outside the United States for sale in the United States, and who is listed in the import records as the importer of record for such organic products. Organic importers can be identified through organic certificates, import certificates, HTS codes, or any other demonstration that they meet the definition above.

(l) *Ingredient*. Any substance used in the preparation of an agricultural product that is still present in the final commercial product as consumed.

(m) *National Organic Program* means the program authorized by the Organic Foods Production Act of 1990 (OFPA) (7 U.S.C. 6501–6522) for the purpose of implementing its provisions.

(n) *Net organic sales* means total gross sales in organic products minus:

(1) The cost of certified organic ingredients, feed, and agricultural inputs used in the production of certified products; and

(2) The cost of any non-organic agricultural ingredients used in the production of certified products.

(o) *Order* means the Organic Research, Promotion, and Information Order.

(p) *Organic* means a labeling term that refers to an agricultural product produced in accordance with the Organic Foods Production Act of 1990 (OFPA) (7 U.S.C. 6501–6522) and the regulations in 7 CFR part 205.

(q) *Organic products* means products produced and certified under the authority of the Organic Foods Production Act of 1990 (7 U.S.C. 6501–6522) and the regulations in 7 CFR part 205 or to an authorized international standard, and any amendments thereto.

(r) *Person* means any individual, group of individuals, partnership, corporation, association, cooperative, or any other legal entity. For the purpose of this definition, the term “partnership” includes, but is not limited to:

(1) A husband and a wife who have title to, or leasehold interest in organic production, organic handling or organic import entity as tenants in common, joint tenants, tenants by the entirety, or, under community property laws, as community property; and

(2) So called “joint ventures” wherein one or more parties to an agreement, informal or otherwise, contributed land, facilities, capital, labor, management, equipment, or other services, or any variation of such contributions by two or more parties, so that it results in the production, handling or importation of organic products and the authority to transfer title to the organic products.

(s) *Referendum agent or agent* means the individual or individuals designated

by the Secretary to conduct the referendum.

(t) *United States* means collectively the 50 states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

(u) *Voluntarily assessed entity* means any covered person with gross organic sales or transaction value of \$250,000 or less for the previous marketing year and thus not subject to assessment under this part, but elects to participate in the Order by remitting an assessment pursuant to § 1255.52

§ 1255.102 Voting.

(a) Each assessed entity shall be entitled to cast one ballot in the referendum. Organic importers shall be entitled to request one ballot per business entity that meets the definition of importer.

(b) Proxy voting is not authorized, but an officer or employee of an assessed entity, or an administrator, executor, or trustee of an assessed entity may cast a ballot on behalf of such entity. Any individual so voting in a referendum shall certify that such individual is an officer or employee of the assessed entity, or an administrator, executive, or trustee of an assessed entity and that such individual has the authority to take such action. Upon request of the referendum agent, the individual shall submit adequate evidence of such authority.

(c) Each assessed entity may cast one ballot in the referendum.

(d) All ballots are to be cast by mail, in person at a local Farm Services Agency office, or by other means, as instructed by the Department.

(e) All assessed entities in good standing shall be eligible to vote in a subsequent referendum. To be in good standing, an entity must carry a valid (not revoked) organic certificate and:

(1) A dual-covered entity must demonstrate that it has paid into the organic research and promotion program for a majority of the years since the most recent referendum; or

(2) A voluntarily-assessed entity must demonstrate that it has paid into the organic research and promotion program for a majority of the years since the most recent referendum; or

(3) An entity must demonstrate that it attained its organic certification since the most recent referendum; or

(4) An assessed entity that does not meet any of the above descriptions must demonstrate that it has paid into the organic research and promotion program every year since the most recent referendum.

§ 1255.103 Instructions.

The referendum agent shall conduct the referendum, in the manner provided in this subpart, under the supervision of the Administrator. The Administrator may prescribe additional instructions, consistent with the provisions of this subpart, to govern the procedure to be followed by the referendum agent. Such agent shall:

(a) Determine the period during which ballots may be cast;

(b) Provide ballots and related material to be used in the referendum. The ballot shall provide for recording essential information, including that needed for ascertaining whether the person voting, or on whose behalf the vote is cast, is an assessed entity;

(c) Give reasonable public notice of the referendum:

(1) By using available media or public information sources, without incurring advertising expense, to publicize the dates, places, method of voting, eligibility requirements, and other pertinent information. Such sources of publicity may include, but are not limited to, print and radio; and

(2) By such other means as the agent may deem advisable.

(d) The Secretary must provide public notice of instructions on voting and a summary of the terms and conditions of the Order. All assessed entities may request and receive by mail a ballot. No person who claims to be an assessed entity shall be refused a ballot;

(e) At the end of the voting period, collect, open, number, and review the ballots and tabulate the results in the presence of an agent of a third party authorized to monitor the referendum process;

(f) Prepare a report on the referendum; and

(g) Announce the results to the public.

§ 1255.104 Subagents.

The referendum agent may appoint any individual or individuals necessary or desirable to assist the agent in performing such agent's functions of this subpart. Each individual so appointed may be authorized by the agent to perform any or all of the functions which, in the absence of such appointment, shall be performed by the agent.

§ 1255.105 Ballots.

The referendum agent and subagents shall accept all ballots cast. However, if an agent or subagent deems that a ballot should be challenged for any reason, the agent or subagent shall endorse above their signature, on the ballot, a statement to the effect that such ballot was challenged, by whom challenged,

the reasons therefore, the results of any investigations made with respect thereto, and the disposition thereof. Ballots deemed invalid under this subpart shall not be counted.

§ 1255.106 Referendum report.

Except as otherwise directed, the referendum agent shall prepare and submit to the Administrator a report on the results of the referendum, the manner in which it was conducted, the extent and kind of public notice given, and other information pertinent to the analysis of the referendum and its results.

§ 1255.107 Confidential information.

The ballots and other information or reports that reveal, or tend to reveal, the vote of any person covered under the Order and the voter list shall be strictly confidential and shall not be disclosed.

§ 1255.108 OMB control number.

The control number assigned to the information collection requirement in this subpart by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35 is OMB control number 0581-NEW.

* * * * *

Dated: January 9, 2017.

Elanor Starmer,

Administrator, Agricultural Marketing Service.

BILLING CODE 3410-02-P

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC-2016-0255]

Regulatory Issue Summary Regarding Certificate of Compliance Corrections and Revisions

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory issue summary; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on draft regulatory issue summary (RIS) 2016-xx, "Administration of 10 CFR part 72 Certificate of Compliance Corrections and Revisions." The NRC is issuing this RIS to inform addressees of the processes to revise an initial certificate of compliance (CoC) and subsequent amendments (hereafter referred to as CoCs, whether initial CoCs or subsequent amendments) to make

administrative corrections and technical changes using the existing regulatory framework.

DATES: Submit comments by March 20, 2017. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID: NRC-2016-0255. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN-12-H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: John Goshen, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6933, email: John.Goshen@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2016-0255 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2016-0255.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The RIS 2016-0255, "Administration of 10 CFR

part 72 Certificate of Compliance Corrections and Revisions” is available in ADAMS under Accession No. ML14107A510.

- **NRC’s PDR:** You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0255 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background.

The NRC is issuing this RIS to inform addressees of the processes to revise an initial CoC and subsequent amendments (hereafter referred to as CoCs, whether initial CoCs or subsequent amendments) to make administrative corrections and technical changes using the existing regulatory framework in 10 CFR part 72.

The NRC issues RISs to communicate with stakeholders on a broad range of matters.

III. Proposed Action

The NRC is requesting public comments on the draft RIS. All comments that are to receive consideration in the final RIS must still be submitted electronically or in writing as indicated in the **ADDRESSES** section of this document. The NRC staff will make a final determination regarding issuance of the RIS after it considers any public comments received in response to this request.

Dated at Rockville, Maryland, this 20th day of December 2016.

For the Nuclear Regulatory Commission.

John McKirgan,

Chief, Spent Fuel Licensing Branch, Division of Spent Fuel Management, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590–01–P

DEPARTMENT OF ENERGY

10 CFR Part 431

[Docket Number EERE–2015–BT–STD–0008]

RIN 1904–AD52

Energy Conservation Program: Energy Conservation Standards for Dedicated-Purpose Pool Pumps

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of proposed rulemaking (NOPR).

SUMMARY: The Energy Policy and Conservation Act of 1975 (EPCA), as amended, sets forth a variety of provisions designed to improve energy efficiency. Part C of Title III establishes the “Energy Conservation Program for Certain Industrial Equipment.” The covered equipment includes pumps. In this document, DOE proposes amended energy conservation standards for dedicated-purpose pool pumps identical to those set forth in a direct final rule published elsewhere in the **Federal Register**. If DOE receives an adverse comment and determines that such comment may provide a reasonable basis for withdrawing the direct final rule, DOE will publish a notice withdrawing the direct final rule and will proceed with this proposed rule.

DATES: DOE will accept comments, data, and information regarding the proposed standards no later than May 8, 2017.

Comments regarding the likely competitive impact of the proposed standard should be sent to the Department of Justice contact listed in the **ADDRESSES** section before February 17, 2017.

ADDRESSES: If DOE withdraws the direct final rule published elsewhere in the **Federal Register**, DOE will hold a public meeting to allow for additional comment on this proposed rule. DOE will publish notice of any public meeting in the **Federal Register**.

Instructions: Any comments submitted must identify the NOPR on Energy Conservation Standards for Dedicated-Purpose Pool Pumps, and provide docket number EERE–2015–BT–STD–0008 and/or regulatory

information number (RIN) 1904–AD52. Comments may be submitted using any of the following methods:

1) **Federal eRulemaking Portal:** www.regulations.gov. Follow the instructions for submitting comments.

2) **Email:** PoolPumps2015STD0008@ee.doe.gov. Include the docket number and/or RIN in the subject line of the message. Submit electronic comments in WordPerfect, Microsoft Word, PDF, or ASCII file format, and avoid the use of special characters or any form of encryption.

3) **Postal Mail:** Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, Mailstop EE–5B, 1000 Independence Avenue SW., Washington, DC, 20585–0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.

4) **Hand Delivery/Courier:** Appliance and Equipment Standards Program, U.S. Department of Energy, Building Technologies Office, 950 L’Enfant Plaza, SW., 6th Floor, Washington, DC, 20024. Telephone: (202) 586–6636. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

No telefacsimilies (faxes) will be accepted. For detailed instructions on submitting comments and additional information on the rulemaking process, see section III of this document (“Public Participation”).

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to Office of Energy Efficiency and Renewable Energy through the methods listed above and by email to Chad_S_Whiteman@omb.eop.gov.

EPCA requires the Attorney General to provide DOE a written determination of whether the proposed standard is likely to lessen competition. The U.S. Department of Justice Antitrust Division invites input from market participants and other interested persons with views on the likely competitive impact of the proposed standard. Interested persons may contact the Division at energy.standards@usdoj.gov before February 17, 2017. Please indicate in the “Subject” line of your email the title and Docket Number of this rulemaking notice.

Docket: The docket, which includes **Federal Register** notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at www.regulations.gov. All documents in the docket are listed in

the www.regulations.gov index. However, some documents listed in the index may not be publicly available, such as those containing information that is exempt from public disclosure.

The docket Web page can be found at <https://www.regulations.gov/docket?D=EERE-2015-BT-STD-0008>. The docket Web page contains simple instructions on how to access all documents, including public comments, in the docket. See section III, “Public Participation,” for further information on how to submit comments through www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Mr. John Cymbalsky, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW., Washington, DC, 20585-0121. Telephone: (202) 586-9507. Email: ApplianceStandardsQuestions@ee.doe.gov.

Ms. Johanna Jochum, U.S. Department of Energy, Office of the General Counsel, GC-33, 1000 Independence Avenue SW., Washington, DC, 20585-0121. Telephone: (202) 287-6307. Email: Johanna.Jochum@hq.doe.gov.

For further information on how to submit a comment, review other public comments and the docket, or participate in the public meeting, contact the Appliance and Equipment Standards Program staff at (202) 586-6636 or by email: ApplianceStandardsQuestions@ee.doe.gov.

I. Introduction

A. Authority

Title III, Part C¹ of the Energy Policy and Conservation Act of 1975 (EPCA), (42 U.S.C. 6311–6317, as codified) established the Energy Conservation Program for Certain Industrial Equipment, a program covering certain

industrial equipment.² “Pumps” are listed as a type of covered industrial equipment. (42 U.S.C. 6311(1)(A))

While pumps are listed as a type of covered equipment, EPCA does not define the term “pump.” To address this, in January 2016, DOE published a test procedure final rule (January 2016 general pumps test procedure final rule) that established a definition for the term “pump.” 81 FR 4086, 4147 (January 25, 2016). In the December, 2016 test procedure final rule (“test procedure final rule”),³ DOE noted the applicability of the definition of “pump” and associated terms to dedicated-purpose pool pumps.

Pursuant to EPCA, DOE’s energy conservation program for covered equipment consists essentially of four parts: (1) Testing, (2) labeling, (3) the establishment of Federal energy conservation standards, and (4) certification and enforcement procedures. Subject to certain criteria and conditions, DOE is required to develop test procedures to measure the energy efficiency, energy use, or estimated annual operating cost of covered equipment. (42 U.S.C. 6295(o)(3)(A) and 6316(a)) Manufacturers of covered equipment must use the prescribed DOE test procedure as the basis for certifying to DOE that their equipment complies with the applicable energy conservation standards adopted under EPCA, and when making representations to the public regarding their energy use or efficiency. (42 U.S.C. 6314(d)) Similarly, DOE must use these test procedures to determine whether the equipment complies with standards adopted pursuant to EPCA. *Id.* The DOE test procedures for dedicated-purpose pool pumps appear at title 10 of the Code of Federal Regulations (CFR) part 431, subpart Y, appendix B.

DOE must follow specific statutory criteria for prescribing new or amended standards for covered equipment, including dedicated-purpose pool pumps. Any new or amended standard for covered equipment must be designed to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified. (42 U.S.C. 6313(a)(6)(C), 6295(o), and 6316(a)) Furthermore, DOE may not adopt any standard that would not result in the significant conservation of energy. (42 U.S.C. 6295(o)(3)) and 6316(a))

Moreover, DOE may not prescribe a standard (1) for certain equipment, including dedicated-purpose pool pumps, if no test procedure has been established for the product, or (2) if DOE determines by rule that the standard is not technologically feasible or economically justified. (42 U.S.C. 6295(o) and 6316(a)) In deciding whether a proposed standard is economically justified, DOE must determine whether the benefits of the standard exceed its burdens. DOE must make this determination after receiving comments on the proposed standard, and by considering, to the greatest extent practicable, the following seven statutory factors:

1. The economic impact of the standard on manufacturers and consumers of the equipment subject to the standard;
2. The savings in operating costs throughout the estimated average life of the covered equipment in the type (or class) compared to any increase in the price, initial charges, or maintenance expenses for the covered equipment that are likely to result from the standard;
3. The total projected amount of energy (or as applicable, water) savings likely to result directly from the standard;
4. Any lessening of the utility or the performance of the covered equipment likely to result from the standard;
5. The impact of any lessening of competition, as determined in writing by the Attorney General, that is likely to result from the standard;
6. The need for national energy and water conservation; and
7. Other factors the Secretary of Energy (Secretary) considers relevant. (42 U.S.C. 6295(o)(2)(B)(i)(I)–(VII) and 6316(a))

Further, EPCA establishes a rebuttable presumption that a standard is economically justified if the Secretary finds that the additional cost to the consumer of purchasing a product complying with an energy conservation standard level will be less than three times the value of the energy savings during the first year that the consumer will receive as a result of the standard, as calculated under the applicable test procedure. (42 U.S.C. 6295(o)(2)(B)(iii)) and 6316(a))

EPCA also contains what is known as an “anti-backsliding” provision, which prevents the Secretary from prescribing any amended standard that either increases the maximum allowable energy use or decreases the minimum required energy efficiency of a covered product. (42 U.S.C. 6295(o)(1)) and 6316(a)) Also, the Secretary may not prescribe an amended or new standard

¹ For editorial reasons, upon codification in the U.S. Code, Part C was re-designated Part A–1.

² All references to EPCA refer to the statute as amended through the Energy Efficiency Improvement Act of 2015, Public Law 114–11 (April 30, 2015).

³ See https://www1.eere.energy.gov/buildings/appliance_standards/standards.aspx?productid=41.

if interested persons have established by a preponderance of the evidence that the standard is likely to result in the unavailability in the United States in any covered product type (or class) of performance characteristics (including reliability), features, sizes, capacities, and volumes that are substantially the same as those generally available in the United States. (42 U.S.C. 6295(o)(4) and 6316(a))

Additionally, EPCA specifies requirements when promulgating an energy conservation standard for a covered product that has two or more subcategories. DOE must specify a different standard level for a type or class of products that has the same function or intended use if DOE determines that equipment within such group (a) consumes a different kind of energy from that consumed by other covered equipment within such type (or class); or (b) has a capacity or other performance-related feature that other equipment within such type (or class) do not have and such feature justifies a higher or lower standard. (42 U.S.C. 6295(q)(1) and 6316(a)) In determining whether a performance-related feature justifies a different standard for a group of equipment, DOE must consider such factors as the utility to the consumer of such a feature and other factors DOE deems appropriate. *Id.* Any rule prescribing such a standard must include an explanation of the basis on which such higher or lower level was established. (42 U.S.C. 6295(q)(2) and 6316(a))

Federal energy conservation requirements generally supersede State laws or regulations concerning energy conservation testing, labeling, and standards. (42 U.S.C. 6297(a)–(c) and 6316(a)) DOE may, however, grant waivers of Federal preemption for particular State laws or regulations, in accordance with the procedures and other provisions set forth under 42 U.S.C. 6297(d).

With particular regard to direct final rules, the Energy Independence and Security Act of 2007 (EISA 2007), Pub. Law 110–140 (December 19, 2007), amended EPCA, in relevant part, to grant DOE authority to issue a type of final rule (*i.e.*, a “direct final rule”) establishing an energy conservation standard for a product or equipment (including dedicated-purpose pool pumps) on receipt of a statement submitted jointly by interested persons that are fairly representative of relevant points of view (including representatives of manufacturers of covered equipment, States, and efficiency advocates), as determined by the Secretary. (42 U.S.C. 6295(p)(4)(A))

and 6316(a)) That statement must contain recommendations with respect to an energy or water conservation standard that are in accordance with the provisions of 42 U.S.C. 6295(o). (42 U.S.C. 6295(p)(4)(A)(i)) A notice of proposed rulemaking (NOPR) that proposes an identical energy efficiency standard must be published simultaneously with the direct final rule and a public comment period of at least 110 days provided. (42 U.S.C. 6295(p)(4)(A)–(B)) Not later than 120 days after issuance of the direct final rule, if DOE receives one or more adverse comments or an alternative joint recommendation relating to the direct final rule, the Secretary must determine whether the comments or alternative joint recommendation may provide a reasonable basis for withdrawal under 42 U.S.C. 6295(o) or other applicable law. (42 U.S.C. 6295(p)(4)(C)(i)) If the Secretary makes such a determination, DOE must withdraw the direct final rule and proceed with the simultaneously published NOPR, and publish in the **Federal Register** the reason why the direct final rule was withdrawn. (42 U.S.C. 6295(p)(4)(C)(ii))

B. Background

DOE began the separate rulemaking for dedicated-purpose pool pumps on May 8, 2015, when it issued a Request for Information (RFI) (May 2015 DPPP RFI). 80 FR 26475. Consistent with feedback from these interested parties, DOE began a process through the ASRAC to charter a working group to recommend energy conservation standards and a test procedure for dedicated-purpose pool pumps rather than continuing down the traditional notice and comment route that DOE had already begun. (Docket No. EERE–2015–BT–STD–0008) On August 25, 2015, DOE published a notice of intent to establish a working group for dedicated-purpose pool pumps (the DPPP Working Group). 80 FR 51483. DOE selected the members of the DPPP Working Group to ensure a broad and balanced array of interested parties and expertise, including representatives from efficiency advocacy organizations and manufacturers, as well as one representative from a state government organization. Additionally, one member from ASRAC and one DOE representative were part of the group.

The DPPP Working Group completed its initial charter on December 8, 2015, with a consensus vote to approve a term sheet containing recommendations to DOE on scope, metric, and the basis of test procedure (“December 2015 DPPP Working Group recommendations”). ASRAC subsequently voted

unanimously to approve the December 2015 DPPP Working Group recommendations during its January 20, 2016 meeting. (Docket No. EERE–2015–BT–STD–0008, No. 0052) At the January 20, 2016 ASRAC meeting, the DPPP Working Group also requested more time to discuss potential energy conservation standards for dedicated-purpose pool pumps. In response, ASRAC recommended that the DPPP Working Group continue its work in a second phase of negotiations to recommend potential energy conservation standards for dedicated-purpose pool pumps. (Docket No. EERE–2013–BT–NOC–0005, No. 71 at pp. 20–52)

The second phase of meetings commenced on March 21, 2016 and concluded on June 23, 2016, with approval of a second term sheet (June 2016 DPPP Working Group recommendations). This term sheet contained DPPP Working Group recommendations on performance-based energy conservation standard levels, scope of such standards, certain prescriptive requirements, certain labeling requirements, certain definitions, and certain amendments to its previous test procedure recommendations. (Docket No. EERE–2015–BT–STD–0008, No. 82) ASRAC subsequently voted unanimously to approve the June 2016 DPPP Working Group recommendations during the July 29, 2016 meeting.

After carefully considering the consensus recommendations submitted by the DPPP Working Group and adopted by ASRAC, DOE has determined that these recommendations comprised a statement submitted by interested persons who are fairly representative of relevant points of view on this matter. In reaching this determination, DOE took into consideration the fact that the Working Group, in conjunction with ASRAC members who approved the recommendations, consisted of representatives of manufacturers of covered products, States, and efficiency advocates—all of which are groups specifically identified by Congress as relevant parties to any consensus recommendation. (42 U.S.C. 6295(p)(4)(A))

DOE has considered the recommended energy conservation standards and believes that they meet the EPCA requirements for issuance of a direct final rule. As a result, DOE published a direct final rule establishing energy conservation standards for pool pumps elsewhere in **Federal Register**. If DOE receives adverse comments that may provide a reasonable basis for

withdrawal and withdraws the direct final rule, DOE will consider those comments and any other comments received in determining how to proceed with this proposed rule.

For further background information on these proposed standards and the supporting analyses, please see the direct final rule published elsewhere in **Federal Register**. That document includes additional discussion of the EPCA requirements for promulgation of energy conservation standards; the history of the standards rulemaking for pool pumps; and information on the test

procedures used to measure the energy efficiency of pool pumps. The document also contains an in-depth discussion of the analyses conducted in support of this rulemaking, the methodologies DOE used in conducting those analyses, and the analytical results.

II. Proposed Standards

1. Benefits and Burdens of Standards Considered for Dedicated-Purpose Pool Pumps

Table II.1 and Table II.2 summarize the quantitative impacts estimated for

each trial standard level (TSL) for pool pumps. The national impacts are measured over the lifetime of dedicated-purpose pool pumps purchased in the 30-year period that begins in the anticipated year of compliance with new standards (2021–2050). The energy savings, emissions reductions, and value of emissions reductions refer to full-fuel-cycle results. The efficiency levels contained in each TSL are described in section V.A of the direct final rule.

TABLE II.1—SUMMARY OF ANALYTICAL RESULTS FOR POOL PUMPS TSLs: NATIONAL IMPACTS

Category	TSL 1	TSL 2	TSL 3	TSL 4	TSL 5

* Parentheses indicate negative (–) values.

DOE first considered TSL 5, which represents the max-tech efficiency levels. TSL 5 would save an estimated 4.6 quads of energy, an amount DOE considers significant. Under TSL 5, the NPV of consumer benefit would be \$12 billion using a discount rate of 7 percent, and \$25 billion using a discount rate of 3 percent.

The cumulative emissions reductions at TSL 5 are 246 Mt of CO₂; 178 thousand tons of SO₂; 313 thousand tons of NO_x; 0.60 tons of Hg; 1,179 thousand tons of CH₄; and 3.6 thousand tons of N₂O. The estimated monetary value of the GHG emissions reduction at TSL 5 ranges from \$1.8 billion to \$25 billion for CO₂, from \$393 million to \$3,202 million for CH₄, and from \$10 million to \$110 million for N₂O. The estimated monetary value of the NO_x emissions reduction at TSL 5 is \$250 million using a 7-percent discount rate and \$575 million using a 3-percent discount rate.

At TSL 5, the average LCC impact is a savings that ranges from \$10 for extra-small non-self-priming pumps, to \$2,085 for standard-size self-priming pump, except for pressure cleaner booster pumps, which have a savings of negative \$313. The simple payback period ranges from 0.6 years for standard-size self-priming pumps to 5.1 years for pressure cleaner booster pumps. The fraction of consumers experiencing a net LCC cost ranges from eight percent for standard-size self-priming pumps to 68 percent for pressure cleaner booster pumps.

At TSL 5, the projected change in INPV ranges from a decrease of \$176.0 million to a decrease of \$102.3 million, which correspond to decreases of 82.7 percent and 48.1 percent, respectively. DOE estimates that industry must invest \$199.5 million to comply with standards set at TSL 5. Manufacturers would need to redesign a significant portion of the equipment they offer, including hydraulic redesigns to convert the vast majority of their standard-size self-priming pool filter pumps.

The Secretary tentatively concludes that at TSL 5 for dedicated-purpose pool

pumps, the benefits of energy savings, positive NPV of consumer benefits, emission reductions, and the estimated monetary value of the emissions reductions would be outweighed by the economic burden on some consumers, and the significant impacts on manufacturers, including the large conversion costs and profit margin impacts that could result in a large reduction in INPV. Consequently, the Secretary has tentatively concluded that TSL 5 is not economically justified.

DOE then considered TSL 4, which represents efficiency levels based on variable speed technology for most equipment classes. TSL 4 would save an estimated 4.1 quads of energy, an amount DOE considers significant. Under TSL 4, the NPV of consumer benefit would be \$10 billion using a discount rate of 7 percent, and \$21 billion using a discount rate of 3 percent.

The cumulative emissions reductions at TSL 4 are 216 Mt of CO₂, 156 thousand tons of SO₂, 275 thousand tons of NO_x, 0.53 tons of Hg, 1,035 thousand tons of CH₄, and 3.2 thousand tons of N₂O. The estimated monetary value of the GHG emissions reduction at TSL 4 ranges from \$1.6 billion to \$22 billion for CO₂, from \$346 million to \$2,812 million for CH₄, and from \$8.8 million to \$97 million for N₂O. The estimated monetary value of the NO_x emissions reduction at TSL 4 is \$222 million using a 7-percent discount rate and \$508 million using a 3-percent discount rate.

At TSL 4, the average LCC impact is a savings that ranges from \$10 for extra-small non-self-priming pumps, to \$2,140 for standard-size self-priming pumps, except for pressure cleaner booster pumps, which have a savings of negative \$372, and waterfall pumps, which have a savings of negative \$20. The simple payback period ranges from 0.7 years for standard-size self-priming pumps to 6.0 years for pressure cleaner booster pumps. The fraction of consumers experiencing a net LCC cost ranges from 10 percent for standard-size

self-priming pumps to 70 percent for waterfall pumps.

At TSL 4, the projected change in INPV ranges from a decrease of \$86.6 million to a decrease of \$16.9 million, which correspond to decreases of 40.7 percent and 7.9 percent, respectively. DOE estimates that industry must invest \$68.4 million to comply with standards set at TSL 4.

The Secretary tentatively concludes that at TSL 4 for dedicated-purpose pool pumps, the benefits of energy savings, positive NPV of consumer benefits, emission reductions, and the estimated monetary value of the emissions reductions, would be outweighed by the economic burden on some consumers, and the significant impacts on manufacturers, including the large conversion costs and profit margin impacts that could result in a large reduction in INPV. Consequently, the Secretary has tentatively concluded that TSL 4 is not economically justified.

DOE then considered TSL 3, the recommended TSL, which would save an estimated 3.8 quads of energy, an amount DOE considers significant. Under TSL 3, the NPV of consumer benefit would be \$11 billion using a discount rate of 7 percent, and \$24 billion using a discount rate of 3 percent.

The cumulative emissions reductions at TSL 3 are 202 Mt of CO₂, 147 thousand tons of SO₂; 257 thousand tons of NO_x, 0.50 tons of Hg, 968 thousand tons of CH₄; and 3.0 thousand tons of N₂O. The estimated monetary value of the GHG emissions reduction at TSL 3 ranges from \$1.5 billion to \$21 billion for CO₂, from \$324 million to \$2,632 million for CH₄, and from \$8.3 million to \$91 million for N₂O. The estimated monetary value of the NO_x emissions reduction at TSL 3 is \$210 million using a 7-percent discount rate and \$477 million using a 3-percent discount rate.

At TSL 3, the average LCC impact is a savings that ranges from \$36 for extra-small non-self-priming pool filter pumps to \$2,140 for standard-size self-priming pumps. The simple payback

period ranges from 0.2 years for standard-size non-self-priming pool filter pumps to 0.8 years for extra-small non-self-priming pool filter pumps. The fraction of consumers experiencing a net LCC cost ranges from zero percent for standard-size non-self-priming pumps and pressure cleaner booster pumps to 10 percent for standard-size self-priming pumps.

At TSL 3, the projected change in INPV ranges from a decrease of \$46.3 million to an increase of \$7.0 million, which represents a decrease of 21.8 percent to an increase of 3.3 percent, respectively. DOE estimates that

industry must invest \$35.6 million to comply with standards set at TSL 3.

After considering the analysis and weighing the benefits and burdens, the Secretary has tentatively concluded that, at TSL 3 for dedicated-purpose pool pumps, the benefits of energy savings, positive NPV of consumer benefits, emission reductions, the estimated monetary value of the emissions reductions, and positive average LCC savings, would outweigh the potential negative impacts on manufacturers. Accordingly, the Secretary has tentatively concluded that TSL 3 would offer the maximum

improvement in efficiency that is technologically feasible and economically justified, and would result in the significant conservation of energy.

Therefore, based on the above considerations, DOE proposes the energy conservation standards for pool pumps at TSL 3. The proposed performance-based energy conservation standards for pool pumps, which are expressed as kgal/kWh, are shown in Table II.3. The proposed prescriptive energy conservation standards for pool pumps are shown in Table II.4.

TABLE II.3—PROPOSED PERFORMANCE-BASED ENERGY CONSERVATION STANDARDS FOR DEDICATED-PURPOSE POOL PUMPS

Equipment class			Minimum allowable WEF score [kgal/kwh]
Dedicated-purpose pool pump variety	hhp Applicability*	Motor phase	
Self-priming pool filter pumps	0.711 hp ≤ hhp < 2.5 hp	Single	$-2.30 * \ln(\text{hhp}) + 6.59$. 5.55, for hhp ≤ 0.13 hp $-1.30 * \ln(\text{hhp}) + 2.90$, for hhp > 0.13 hp. 4.60, for hhp ≤ 0.13 hp $-0.85 * \ln(\text{hhp}) + 2.87$, for hhp > 0.13 hp. 0.42.
Self-priming pool filter pumps	hhp < 0.711 hp	Single	
Non-self-priming pool filter pumps**	hhp < 2.5 hp	Any	
Pressure cleaner booster pumps	Any	Any	

* All instances of hhp refer to rated hydraulic horsepower as determined in accordance with the DOE test procedure at 10 CFR 431.464 and applicable sampling plans.

** Because DOE selected the same efficiency level for both extra-small and standard-size non-self-priming pool filter pumps, the two equipment classes were ultimately merged into one.

TABLE II.4—PROPOSED PRESCRIPTIVE ENERGY CONSERVATION STANDARDS FOR DEDICATED-PURPOSE POOL PUMPS

Equipment class			Prescriptive standard
Dedicated-purpose pool pump variety	hhp Applicability	Motor phase	
Integral sand filter pool pump	Any	Any	Must be distributed in commerce with a pool pump timer that is either integral to the pump or a separate component that is shipped with the pump.
Integral cartridge filter pool pump	Any	Any	Must be distributed in commerce with a pool pump timer that is either integral to the pump or a separate component that is shipped with the pump.

2. Summary of Annualized Benefits and Costs of the Proposed Standards

The benefits and costs of the proposed standards can also be expressed in terms of annualized values. The annualized net benefit is (1) the annualized national economic value (expressed in 2015\$) of the benefits from operating equipment that meet the adopted standards (consisting primarily of operating cost savings from using less energy, minus increases in product purchase costs, and (2) the annualized monetary value of the benefits of GHG and NO_x emission reductions.

Table II.5 shows the annualized values for dedicated-purpose pool pumps under TSL 3, expressed in 2015\$. The results under the primary estimate are as follows.

Using a 7-percent discount rate for benefits and costs other than GHG reduction (for which DOE used average social costs with a 3-percent discount rate),⁴ the estimated cost of the standards in this rule is \$138 million per year in increased equipment costs, while the estimated annual benefits are \$1.3 billion in reduced equipment operating costs, \$449 million in GHG

reductions, and \$22 million in reduced NO_x emissions. In this case, the net benefit amounts to \$1.7 billion per year.

Using a 3-percent discount rate for all benefits and costs, the estimated cost of the adopted standards for dedicated-purpose pool pumps is \$149 million per year in increased equipment costs, while the estimated annual benefits are \$1.5 billion in reduced operating costs, \$449 million in CO₂ reductions, and \$27 million in reduced NO_x emissions. In this case, the net benefit amounts to \$1.8 billion per year.

⁴ DOE used average social costs with a 3-percent discount rate these values are considered as the "central" estimates by the interagency group.

TABLE II.5—ANNUALIZED BENEFITS AND COSTS OF PROPOSED STANDARDS (TSL 3) FOR DEDICATED-PURPOSE POOL PUMPS

	Discount rate %	Million 2015\$/year		
		Primary estimate	Low-net-bene- fits estimate	High-net-bene- fits estimate
Benefits				
Consumer Operating Cost Savings	7	1,340	1,221	1,467
	3	1,516	1,367	1,678
GHG Reduction (using avg. social costs at 5% discount rate)**	5	147	129	164
GHG Reduction (using avg. social costs at 3% discount rate)**	3	449	392	504
GHG Reduction (using avg. social costs at 2.5% discount rate)**	2.5	642	560	721
GHG Reduction (using 95th percentile social costs at 3% discount rate)**.	3	1,346	1,175	1,510
NO _x Reduction †	7%	22	20	55
	3%	27	24	70
Total Benefits ‡	7% plus GHG range ..	1,509 to 2,708	1,369 to 2,416	1,686 to 3,032
	7%	1,811	1,633	2,026
	3% plus GHG range ..	1,690 to 2,890	1,520 to 2,566	1,912 to 3,258
	3%	1,993	1,783	2,252
Costs				
Consumer Incremental Equipment Costs	7%	138	124	151
	3%	149	133	164
Manufacturer Conversion Costs ††	7%	3	3	3
	3%	2	2	2
Net Benefits				
Total ‡	7% plus GHG range ..	1,371 to 2,570	1,245 to 2,292	1,535 to 2,881
	7%	1,673	1,509	1,875
	3% plus GHG range ..	1,542 to 2,741	1,387 to 2,433	1,748 to 3,094
	3%	1,844	1,651	2,088

* This table presents the annualized costs and benefits associated with pool pumps shipped in 2021–2050. These results include benefits to consumers which accrue after 2050 from the pool pumps purchased from 2021–2050. The incremental equipment costs include incremental equipment cost as well as installation costs. The costs account for the incremental variable and fixed costs incurred by manufacturers due to the proposed standards, some of which may be incurred in preparation for the rule. The Primary, Low Net Benefits, and High Net Benefits Estimates utilize projections of energy prices and real GDP from the *AEO2016 No-CPP* case, a Low Economic Growth case, and a High Economic Growth case, respectively. In addition, incremental equipment costs reflect the default price trend in the Primary Estimate, a high price trend in the Low Benefits Estimate, and a low price trend in the High Benefits Estimate. The methods used to derive projected price trends are explained in section IV.F.1 of the DFR. Note that the Benefits and Costs may not sum to the Net Benefits due to rounding.

** The interagency group selected four sets of SC-CO₂, SC-CH₄, and SC-N₂O values for use in regulatory analyses. Three sets of values are based on the average social costs from the integrated assessment models, at discount rates of 5 percent, 3 percent, and 2.5 percent. The fourth set, which represents the 95th percentile of the social cost distributions calculated using a 3-percent discount rate, is included to represent higher-than-expected impacts from climate change further out in the tails of the social cost distributions. The social cost values are emission year specific. The GHG reduction benefits are global benefits due to actions that occur nationally. See section IV.L of the DFR for more details.

† DOE estimated the monetized value of NO_x emissions reductions associated with electricity savings using benefit per ton estimates from the *Regulatory Impact Analysis for the Clean Power Plan Final Rule*, published in August 2015 by EPA's Office of Air Quality Planning and Standards. (Available at www.epa.gov/cleanpowerplan/clean-power-plan-final-rule-regulatory-impact-analysis.) See section IV.L.3 for further discussion. For the Primary Estimate and Low Net Benefits Estimate, DOE used national benefit-per-ton estimates for NO_x emitted from the Electric Generating Unit sector based on an estimate of premature mortality derived from the ACS study (Krewski *et al.* 2009). For the High Net Benefits Estimate, the benefit-per-ton estimates were based on the Six Cities study (Lepuele *et al.* 2011); these are nearly two-and-a-half times larger than those from the ACS study.

‡ Total Benefits for both the 3-percent and 7-percent cases are presented using the average social costs with 3-percent discount rate. In the rows labeled “7% plus GHG range” and “3% plus GHG range,” the operating cost and NO_x benefits are calculated using the labeled discount rate, and those values are added to the full range of social cost values.

†† Manufacturers are estimated to incur \$35.6 million in conversion costs between 2017 and 2020.

III. Other Prescriptive Requirements

As part of the DPPP Working Group's extended charter, the DPPP Working Group considered requirements for pumps distributed in commerce with freeze protections controls. (Docket No. EERE–2013–BT–NOC–0005, No. 71 at pp. 20–52) Freeze protection controls, as defined in the test procedure final rule, are controls that, at certain ambient temperature, turn on the dedicated-purpose pool pump to circulate water

for a period of time to prevent the pool and water in plumbing from freezing. As the control schemes for freeze protection vary widely between manufacturers, the resultant energy consumption associated with such control can also vary depending on control settings and climate. To ensure freeze protection controls on dedicated-purpose pool pumps only operate when necessary and do not result in unnecessary energy use, the DPPP

Working Group recommended establishing prescriptive requirements for dedicated-purpose pool pumps that are distributed in commerce with freeze protection controls. Specifically, the DPPP Working Group made the following recommendation, which it purports to maintain end-user utility while also reducing energy consumption:

All dedicated-purpose pool pumps distributed in commerce with freeze

protection controls must be shipped either with freeze protection disabled, or with the following default, user-adjustable settings: (1) The *default* dry-bulb air temperature setting is no greater than 40 °F; and (2) the *default* run time setting shall be no greater than 1 hour (before the temperature is rechecked); and (3) the *default* motor speed shall not be more than half of the maximum available speed. *Id.* (Docket No. EERE–2015–BT–STD–0008, No. 82, Recommendation #6A at p. 4). DOE agrees with the DPPP Working Group’s reasoning, and given the considerations discussed in section III.A of the Direct Final Rule, DOE proposes to adopt the recommended prescriptive standard for dedicated-purpose pool pumps distributed in commerce with freeze protection controls.

IV. Procedural Issues and Regulatory Review

The regulatory reviews conducted for this proposed rule are identical to those conducted for the direct final rule published elsewhere in **Federal Register**. Please see the direct final rule for further details.

V. Public Participation

A. Submission of Comments

DOE will accept comments, data, and information regarding this proposed rule before or after the public meeting, but no later than the date provided in the **DATES** section at the beginning of this proposed rule. Interested parties may submit comments, data, and other information using any of the methods described in the **ADDRESSES** section at the beginning of this proposed rule.

Submitting comments via www.regulations.gov. The www.regulations.gov Web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment itself or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be

included in your comment, nor in any document attached to your comment. Otherwise, persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to www.regulations.gov information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (CBI)). Comments submitted through www.regulations.gov cannot be claimed as CBI. Comments received through the Web site will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through www.regulations.gov before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that www.regulations.gov provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery/courier, or mail. Comments and documents submitted via email, hand delivery/courier, or mail also will be posted to www.regulations.gov. If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information in a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery/courier, please provide all items on a CD, if feasible, in which case it is not necessary to submit printed copies. No telefacsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, that are written in English, and that are free of any defects or viruses. Documents should not contain special characters or any form of encryption

and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters’ names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery/courier two well-marked copies: one copy of the document marked “confidential” including all the information believed to be confidential, and one copy of the document marked “non-confidential” with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include (1) a description of the items, (2) whether and why such items are customarily treated as confidential within the industry, (3) whether the information is generally known by or available from other sources, (4) whether the information has previously been made available to others without obligation concerning its confidentiality, (5) an explanation of the competitive injury to the submitting person that would result from public disclosure, (6) when such information might lose its confidential character due to the passage of time, and (7) why disclosure of the information would be contrary to the public interest.

It is DOE’s policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

B. Public Meeting

As stated previously, if DOE withdraws the direct final rule published elsewhere in the **Federal Register** pursuant to 42 U.S.C. 6295(p)(4)(C), DOE will hold a public meeting to allow for additional comment on this proposed rule. DOE will publish notice of any meeting in the **Federal Register**.

VI. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this notice of proposed rulemaking.

List of Subjects in 10 CFR Part 431

Administrative practice and procedure, Confidential business information, Energy conservation, Imports, Intergovernmental relations, Small businesses.

Issued in Washington, DC, on December 23, 2016.

David J. Friedman,

Acting Assistant Secretary Energy Efficiency and Renewable Energy.

For the reasons set forth in the preamble, DOE proposes to amend part 431 of chapter II, subchapter D, of title 10 of the Code of Federal Regulations, as set forth below:

PART 431—ENERGY EFFICIENCY PROGRAM FOR CERTAIN COMMERCIAL AND INDUSTRIAL EQUIPMENT

■ 1. The authority citation for part 431 continues to read as follows:

Authority: 42 U.S.C. 6291–6317; 28 U.S.C. 2461 note.

■ 2. Section 431.462 is amended by adding the definition for “pool pump timer” in alphabetical order to read as follows:

§ 431.462 Definitions.

* * * * *

Pool pump timer means a pool pump control that automatically turns off a dedicated-purpose pool pump after a run-time of no longer than 10 hours.

* * * * *

■ 3. Section 431.465 is amended by adding paragraphs (e), (f), (g) and (h) to read as follows:

§ 431.465 Pumps energy conservation standards and their compliance dates.

* * * * *

(e) For the purposes of paragraph (f) of this section, “WEF” means the weighted energy factor and “hhp” means the rated hydraulic horsepower, as determined in accordance with the test procedure in § 431.464(b) and applicable sampling plans in § 429.59 of this chapter.

(f) Each dedicated-purpose pool pump that is not a submersible pump and is manufactured starting on July 19, 2021 must have a WEF rating that is not less than the value calculated from the following table:

Equipment class		Minimum allowable WEF score [kgal/kWh]	Minimum allowable WEF score [kgal/kWh]
Dedicated-Purpose Pool Pump Variety	hhp Applicability	Motor phase	
Self-priming pool filter pumps	0.711 hp ≤ hhp < 2.5 hp	Single	WEF = $-2.30 * \ln(\text{hhp}) + 6.59$. WEF = 5.55, for hhp ≤ 1.30. hp – 1.30 * $\ln(\text{hhp}) + 2.90$, for hhp > 0.13 hp. WEF = 4.60, for hhp ≤ 0.13 hp – 0.85 * $\ln(\text{hhp}) + 2.87$, for hhp > 0.13 hp. WEF = 0.42
Self-priming pool filter pumps	hhp < 0.711 hp	Single	
Non-self-priming pool filter pumps	hhp < 2.5 hp	Any	
Pressure cleaner booster pumps	Any	Any	

(g) Each integral cartridge filter pool pump and integral sand filter pool pump that is manufactured starting on July 19, 2021 must be distributed in commerce with a pool pump timer that is either integral to the pump or a separate component that is shipped with the pump.

(h) For all dedicated-purpose pool pumps distributed in commerce with freeze protection controls, the pump must be shipped with freeze protection disabled or with the following default, user-adjustable settings:

(1) The default dry-bulb air temperature setting is no greater than 40 °F;

(2) The default run time setting shall be no greater than 1 hour (before the temperature is rechecked); and

(3) The default motor speed shall not be more than ½ of the maximum available speed.

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–0755; Directorate Identifier 2010–NE–12–AD]

RIN 2120–AA64

Airworthiness Directives; Rolls-Royce plc Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede airworthiness directive (AD) 2012–04–01 that applies to all Rolls-Royce plc (RR) RB211–Trent 800 model turbofan engines. AD 2012–04–01 requires removal from service of certain critical engine rotating parts based on reduced life limits. Since we issued AD 2012–04–01, RR has further revised the life limits of certain critical engine rotating parts. This proposed AD would make additional revisions to the life limits of certain critical engine rotating parts. We

are proposing this AD to correct the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by March 6, 2017.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

• *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

• *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2010–0755; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket

contains this proposed AD, the mandatory continuing airworthiness information, regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Robert Green, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781-238-7754; fax: 781-238-7199; email: robert.green@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2010-0755; Directorate Identifier 2010-NE-12-AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the

closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On February 10, 2012, we issued AD 2012-04-01, Amendment 39-16956 (77 FR 10355, February 22, 2012), “AD 2012-04-01,” for all RR RB211-Trent 800 model turbofan engines. AD 2012-04-01 requires removal from service of certain critical engine rotating parts based on reduced life limits. AD 2012-04-01 resulted from RR reducing the life limits of certain critical engine rotating parts. We issued AD 2012-04-01 to prevent the failure of critical engine rotating parts, which could result in damage to the engine and damage to the airplane.

Actions Since AD 2012-04-01 Was Issued

Since we issued AD 2012-04-01, RR has reduced the life limit of two affected

critical engine rotating parts and extended the life of an additional critical engine rotating part. Also since we issued AD 2012-04-01, the European Aviation Safety Agency (EASA) has issued AD 2016-0223, dated November 8, 2016, which imposes new life limits on certain critical engine rotating parts.

FAA’s Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This proposed AD would require replacement of certain critical engine rotating parts at a newer, lower life limit. This proposed AD would also extend the life limit for an additional critical engine rotating part.

Costs of Compliance

We estimate that this proposed AD affects 16 engines installed on airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement of critical engine rotating parts	0 work-hours × \$85 per hour = \$0.	\$45,000 (pro-rated cost of parts).	\$45,000	\$720,000

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing airworthiness directive (AD) 2012-04-01, Amendment 39-16956 (77 FR 10355, February 22, 2012), and adding the following new AD:

Rolls-Royce plc: Docket No. FAA-2010-0755; Directorate Identifier 2010-NE-12-AD.

(a) Comments Due Date

We must receive comments by March 6, 2017.

(b) Affected ADs

This AD supersedes AD 2012–04–01, Amendment 39–16956 (77 FR 10355, February 22, 2012).

(c) Applicability

This AD applies to all Rolls-Royce plc (RR) RR RB211–Trent 875–17, 877–17, 884–17,

884B–17, 892–17, 892B–17, and 895–17 turbofan engines.

(d) Subject

Joint Aircraft System Component (JASC) Code 7200, Engine (Turbine/Turboprop).

(e) Unsafe Condition

This AD was prompted by RR revising the life limits of certain critical engine rotating parts. We are issuing this AD to prevent the failure of critical engine rotating parts,

damage to the engine, and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) After the effective date of this AD, remove from service the parts listed in Table 1 to paragraph (f) of this AD before exceeding the new life limit indicated:

TABLE 1 TO PARAGRAPH (f)—REDUCED PART LIVES

Part nomenclature	Part No.	Life in standard duty cycles	Life in cycles using the HEAVY profile
Intermediate Pressure (IP) Compressor Rotor Shaft	FK24100	12,500	11,500
IP Compressor Rotor Shaft	FK24496	8,860	8,180
High-Pressure Compressor (HPC) Stage 1 to 4 Rotor Discs Shaft	FK24009	4,560	4,460
HPC Stage 1 to 4 Rotor Discs Shaft	FK26167	5,580	5,280
HPC Stage 1 to 4 Rotor Discs Shaft	FK32580	5,580	5,280
HPC Stage 1 to 4 Rotor Discs Shaft	FW11590	8,550	6,850
HPC Stage 1 to 4 Rotor Discs Shaft	FW61622	8,550	6,850
HPC Stage 5 and 6 Discs and Cone	FK25230	5,000	5,000
HPC Stage 5 and 6 Discs and Cone	FK27899	5,000	5,000
IP Turbine Rotor Disc	FK21117	11,610	10,400
IP Turbine Rotor Disc	FK33083	0	0

(2) Reserved.

(g) Installation Prohibition

After the effective date of this AD, do not install any IP turbine discs, P/N FK33083, into any engine.

(h) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: ANE-AD-AMOC@faa.gov.

(i) Related Information

(1) For more information about this AD, contact Robert Green, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7754; fax: 781–238–7199; email: robert.green@faa.gov.

(2) Refer to MCAI European Aviation Safety Agency, AD 2016–0223, dated November 8, 2016, for more information. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA–2010–0755.

Issued in Burlington, Massachusetts, on January 11, 2017.

Colleen M. D'Alessandro,

Manager, Engine & Propeller Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA–2017–0019; Directorate Identifier 2016–CE–038–AD]

RIN 2120–AA64

Airworthiness Directives; GROB Aircraft AG Gliders

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for GROB Aircraft AG Models GROB G 109 and GROB G 109B gliders. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as broken pivots of the tail wheel mounting bracket resulting from corrosion and damage due to wear. We are issuing this proposed AD to require actions to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by March 6, 2017.

ADDRESSES: You may send comments by any of the following methods:

• *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

• *Fax:* (202) 493–2251.

• *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

• *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact GROB Aircraft AG, Product Support, Lettenbachstrasse 9, D–86874 Tussenhausen-Mattsies, Germany, telephone: + 49 (0) 8268–998–105; fax: + 49 (0) 8268–998–200; email: productsupport@grob-aircraft.com; Internet: grob-aircraft.com. You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2017–0019; or in person at the Docket Management Facility between 9 a.m.

and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4165; fax: (816) 329-4090; email: jim.rutherford@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2017-0019; Directorate Identifier 2016-CE-038-AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued EASA AD No.: 2016-0228, dated November 14, 2016 (referred to after this as “the MCAI”), to correct an unsafe condition for the specified products. The MCAI states:

Occurrences were reported of broken pivots of the tail wheel mounting bracket. Subsequent investigation attributed these events to corrosion and damage due to wear.

This condition, if not detected and corrected, could lead to loss of rudder control, resulting in reduced control of the powered sailplane.

To address this potentially unsafe condition, Grob Aircraft AG issued Mandatory Service Bulletin (MSB) 817-70 (hereafter referred to as “the MSB” in this AD) to provide inspection and repair instructions.

For the reasons described above, this AD requires repetitive inspections of the tail wheel mounting bracket and, depending on findings, accomplishment of applicable corrective action(s).

You may examine the MCAI on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2017-0019.

Related Service Information Under 1 CFR Part 51

GROB Aircraft AG has issued Service Bulletin No. MSB817-70, dated September 28, 2016, and GROB Aircraft AG Repair Instruction RI 817-015, dated September 16, 2016. In combination, this service information describes procedures for inspection of the tail mounting bracket and instructions for any necessary repair. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA’s Determination and Requirements of the Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD will affect 57 products of U.S. registry. We also estimate that it would take about 3 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$50 per product.

Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be \$17,385, or \$305 per product.

In addition, we estimate that any necessary follow-on actions would take about 5 work-hours and require parts costing \$100, for a cost of \$525 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a “significant regulatory action” under Executive Order 12866,

(2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

GROB Aircraft AG: Docket No. FAA-2017-0019; Directorate Identifier 2016-CE-038-AD.

(a) Comments Due Date

We must receive comments by March 6, 2017.

(b) Affected ADs

None.

(c) Applicability

This AD applies to GROB Aircraft AG Models GROB G 109 and GROB G 109B gliders, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 32: Landing Gear.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as broken pivots of the tail wheel mounting bracket resulting from corrosion and damage due to wear. We are issuing this proposed AD to detect and correct if necessary any corrosion or damage to the tail wheel mounting bracket, which could cause loss of rudder control and result in reduced control.

(f) Actions and Compliance

Unless already done, do the following actions:

(1) Within the next 3 months after the effective date of this AD or 100 hours time-in-service (TIS) after the effective date of this AD, whichever occurs first, and repetitively thereafter at intervals not to exceed every 100 hours TIS or 12 months, whichever occurs first, inspect the tail wheel mounting bracket following the Accomplishment Instructions in section 1.8 of GROB Aircraft AG Service Bulletin (SB) No. MSB817-70, dated September 28, 2016.

(2) If any damage is found during any inspection required in paragraph (f)(1) of this AD, before further flight, repair following GROB Aircraft AG Repair Instruction RI 817-015, dated September 16, 2016.

Note 1 to paragraph (f)(2) of this AD: The bolt in Figure 1, Pos. 10 of GROB Aircraft AG Repair Instruction RI 817-015, dated September 16, 2016, is welded into place onto the steel base plate. Therefore, in order to facilitate the removal of the bolt, the welding seams may be carefully ground off using caution to not damage the steel base plate, instead of completely cutting off the bolt head.

(3) Repairs made as required by paragraph (f)(2) of this AD do not qualify as terminating action for the repetitive inspections required in paragraph (f)(1) of this AD.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust,

Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4165; fax: (816) 329-4090; email: jim.rutherford@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2016-0228, dated November 14, 2016, for related information. You may examine the MCAI on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2017-0019. For service information related to this AD, contact GROB Aircraft AG, Product Support, Lettenbachstrasse 9, D-86874 Tussenhausen-Mattsies, Germany, telephone: + 49 (0) 8268-998-105; fax: + 49 (0) 8268-998-200; email: productsupport@grob-aircraft.com; Internet: grob-aircraft.com. You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148.

Issued in Kansas City, Missouri, on January 6, 2017.

Melvin Johnson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 982 and 983

[Docket No. FR-5976-N-03]

Housing Opportunity Through Modernization Act of 2016: Implementation of Various Section 8 Voucher Provisions

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Implementation and request for comment.

SUMMARY: On July 29, 2016, President Obama signed into law the Housing Opportunity Through Modernization Act of 2016 (HOTMA). Several of the statutory amendments made by HOTMA affect the Project-Based Voucher (PBV) program or the Housing Choice Voucher (HCV) program. HOTMA also gave HUD the authority to implement many of

those changes by notice, and those statutory changes are not effective until HUD issues that notice. This document serves as the implementation notice for several of the provisions of HOTMA that impact the HCV and PBV programs, and seeks additional public input on both the implementing requirements in this document and future changes to these programs.

DATES: *Effective date:* April 18, 2017.

Comment due date: March 20, 2017.

ADDRESSES: Interested persons are invited to submit comments regarding this document. All communications must refer to the above docket number and title. There are two methods for submitting public comments.

1. *Submission of Comments by Mail.* Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10276, Washington, DC 20410-0500.

2. *Electronic Submission of Comments.* Interested persons may submit comments electronically through the Federal eRulemaking Portal at www.regulations.gov. HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make comments immediately available to the public. Comments submitted electronically through the www.regulations.gov Web site can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

No Facsimile Comments. Facsimile (fax) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m., weekdays, at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202-708-3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at 800-877-8339 (this is a toll-free number). Copies of all comments submitted are available for inspection and downloading at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:
Please direct all questions about this notice to HOTMAquestionsPIH@hud.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On July 29, 2016, President Obama signed HOTMA into law (Public Law 114–201, 130 Stat. 782). HOTMA made numerous changes to statutes that govern HUD programs, including section 8 of the United States Housing Act of 1937 (1937 Act) (42 U.S.C. 1437f). HUD issued a notice on October 24, 2016, at 81 FR 73030, announcing to the public which of the statutory changes made by HOTMA could be implemented immediately, and which required further guidance from HUD before owners, public housing agencies (PHAs), or other grantees may use the new statutory provisions.

This document implements new statutory provisions regarding certain inspection requirements for both HCV tenant-based and PBV assistance (found in § 101(a)(1) of HOTMA), the definition of PHA-owned housing (§ 105 of HOTMA), and changes to the PBV program at large (§ 106 of HOTMA) by providing the additional information needed for PHAs and owners to use those provisions. The document also implements and provides guidance on the statutory change to the HCV housing assistance payment (HAP) calculation for families who own manufactured housing and are renting the manufactured home space (§ 112 of HOTMA).

While this document makes the provisions below effective, HUD seeks further public comment on the implementation of these provisions. Below each section describing the implementation of a statutory provision, HUD has included specific questions for public comment. All comments must be submitted using the two methods detailed above.

II. Implementation Information

A. Inspections of Dwelling Units (HOTMA § 101(a)(1))

Section 101(a)(1) of HOTMA adds a modified subparagraph (A) to section 8(o)(8) of the 1937 Act (42 U.S.C. 1437f(o)(8)). The amended subparagraph continues the requirement of inspections of dwelling units assisted under section 8(o) of the 1937 Act to determine that the units meet housing quality standards (HQS) prior to the PHA making a housing assistance payment. However, new language provides an exception to this requirement, allowing the PHA to

approve the assisted tenancy and commence housing assistance payments if the unit fails the inspection but only has non-life-threatening HQS deficiencies. If a PHA makes payments under that exception, the PHA must withhold any assistance payments if the non-life-threatening deficiencies are not remedied within no more than 30 days of the PHA notifying the owner of the unit, in writing, of the unit's failure to comply with HQS.

In addition, new language authorizes occupancy of a unit prior to the inspection being completed if the unit had, in the previous 24 months, passed an alternative inspection method under section 8(o)(8)(E). The PHA must inspect the unit within 15 days of receiving the Request for Tenancy Approval. Once the unit passes the HQS, the PHA may make assistance payments retroactively, dating back to the beginning of the assisted lease term, which is the effective date of the HAP contract. Per 24 CFR 982.309(b), the term of the HAP contract begins on the first day of the lease term and ends on the last day of the lease term.

This document does not implement other provisions in section 101(a) of HOTMA.

1. Occupancy Prior to Meeting HQS (§ 8(o)(8)(A)(ii) of 1937 Act)

As a result of the HOTMA amendments to Section 8(o)(8)(A)(ii) of the 1937 Act, PHAs may choose to approve an assisted tenancy, execute the HAP contract, and begin making housing assistance payments on a unit that fails the initial HQS inspection, provided the unit's failure to meet HQS is the result only of non-life-threatening conditions, as such conditions are defined by HUD. In exercising this administrative flexibility under § 8(o)(8)(A)(ii), PHAs must comply with the definitions and requirements in this section, in addition to those provided in HUD regulations and requirements. If the PHA exercises this authority, this document overrides the requirement at 982.305(a)(2) and (b)(i) that the PHA has determined that the unit *meets* HQS before approval of the tenancy and beginning of the initial lease term. (The PHA must still conduct the HQS inspection prior to approval of the tenancy and the beginning of the initial lease term in accordance with those regulations.)

A. HUD Definition of Non-Life-Threatening and Life-Threatening Conditions

For the purposes of implementing § 8(o)(8)(A)(ii), HUD is defining a non-life-threatening condition as any

condition that would fail to meet the housing quality standards under 24 CFR 982.401 and is not a life-threatening condition. Further, for the purposes of this implementation notice, HUD is defining life-threatening conditions as follows:

(1) Gas (natural or liquid petroleum) leak or fumes. A life-threatening condition under this standard is one of the following: (a) A fuel storage vessel, fluid line, valve, or connection that supplies fuel to a HVAC unit is leaking; or (b) a strong gas odor detected with potential for explosion or fire, or that results in health risk if inhaled.

(2) Electrical hazards that could result in shock or fire. A life-threatening condition under this standard is one of the following: (a) A light fixture is readily accessible, is not securely mounted to the ceiling or wall, and electrical connections or wires are exposed; (b) a light fixture is hanging by its wires; (c) a light fixture has a missing or broken bulb, and the open socket is readily accessible to the tenant during the day to day use of the unit; (d) a receptacle (outlet) or switch is missing or broken and electrical connections or wires are exposed; (e) a receptacle (outlet) or switch has a missing or damaged cover plate and electrical connections or wires are exposed; (f) an open circuit breaker position is not appropriately blanked off in a panel board, main panel board, or other electrical box that contains circuit breakers or fuses; (g) a cover is missing from any electrical device box, panel box, switch gear box, control panel, etc., and there are exposed electrical connections; (h) any nicks, abrasions, or fraying of the insulation that expose conducting wire; (i) exposed bare wires or electrical connections; (j) any condition that results in openings in electrical panels or electrical control device enclosures; (k) water leaking or ponding near any electrical device; or (l) any condition that poses a serious risk of electrocution or fire and poses an immediate life-threatening condition.

(3) Inoperable or missing smoke detector. A life-threatening condition under this standard is one of the following: (a) the smoke detector is missing; or (b) the smoke detector does not function as it should.

(4) Interior air quality. A life-threatening condition under this standard is one of the following: (a) the carbon monoxide detector is missing; or (b) the carbon monoxide detector does not function as it should.

(5) Gas/oil fired water heater or heating, ventilation, or cooling system with missing, damaged, improper, or misaligned chimney or venting. A life-

threatening condition under this standard is one of the following: (a) The chimney or venting system on a fuel fired water heater is misaligned, negatively pitched, or damaged, which may cause improper or dangerous venting of gases; (b) a gas dryer vent is missing, damaged, or is visually determined to be inoperable, or the dryer exhaust is not vented to the outside; (c) a fuel fired space heater is not properly vented or lacks available combustion air; (d) a non-vented space heater is present; (e) safety devices on a fuel fired space heater are missing or damaged; or (f) the chimney or venting system on a fuel fired heating, ventilation, or cooling system is misaligned, negatively pitched, or damaged which may cause improper or dangerous venting of gases.

(6) Lack of alternative means of exit in case of fire or blocked egress. A life-threatening condition under this standard is one of the following: (a) Any of the components that affect the function of the fire escape are missing or damaged; (b) stored items or other barriers restrict or prevent the use of the fire escape in the event of an emergency; or (c) the building's emergency exit is blocked or impeded, thus limiting the ability of occupants to exit in a fire or other emergency.

(7) Other interior hazards. A life-threatening condition under this standard is a fire extinguisher (where required) that is missing, damaged, discharged, overcharged, or expired.

(8) Deteriorated paint, as defined by 24 CFR 35.110, in a unit built before 1978 that is to be occupied by a family with a child under 6 years of age. This is a life-threatening condition only for the purpose of a condition that would prevent a family from moving into the unit. All lead hazard reduction requirements in 24 CFR part 35, including the timeline for lead hazard reduction procedures, still apply.

(9) Any other condition subsequently identified by HUD as life threatening in a notice published in the **Federal Register**. HUD will notify PHAs if such changes are made.

(10) Any other condition identified by the administering PHA as life-threatening in the PHA's administrative plan prior to this notice taking effect.

B. Administrative Plans

Before implementing § 8(o)(8)(A)(ii), PHAs must amend their HCV administrative plans to include HUD's definition of non-life-threatening conditions as any conditions that would fail to meet the housing quality standards under 24 CFR 982.401 and do not meet the definition of life-

threatening provided in this notice. The PHA's HCV administrative plan must list the specific life-threatening conditions that will be identified through the PHA's inspections, including the life-threatening conditions listed in Section 1.A. above and any other conditions that the PHA identified in its HCV administrative plan as life-threatening prior to this notice taking effect.

The PHA must also specify in its administrative plan how it will apply the flexibility provided by § 8(o)(8)(A)(ii) to its HCV and/or PBV program. The PHA may opt to apply the policy to all the PHA's initial inspections or to a portion of the PHA's initial inspections. The PHA's administrative plan must specify the circumstances under which the PHA will enter into a HAP contract for a unit that fails the initial HQS inspection as a result only of non-life-threatening conditions and the circumstances under which a PHA will require the unit to meet all HQS standards before entering into the HAP contract.

The changes to the PHA's HCV administrative plan to define non-life-threatening conditions and to specify how the policy will be applied across its portfolio of units may constitute significant amendments to the PHA's PHA plan, in which case a PHA must follow its PHA plan amendment and public notice requirements before implementing § 8(o)(8)(A)(ii).

C. Application of Life-Threatening Definition to aAl Inspections

A PHA that chooses to implement § 8(o)(8)(A)(ii) must apply the list of life-threatening conditions identified in its HCV administrative plan to all HQS inspections that the PHA conducts, not just the initial inspections. In other words, PHAs that adopt § 8(o)(8)(A)(ii) must amend their HCV administrative plans to include HUD's definition of life-threatening conditions, as well as any additional life-threatening conditions included in the PHA's HCV administrative plan that were already defined in the PHA's HCV administrative plan prior to this notice taking effect, and must use those definitions in its ongoing HQS inspections and HQS enforcement activities as well as its initial inspections. The PHA must use the new definition of life-threatening deficiencies across all of its HQS inspections even if the PHA chooses to apply § 8(o)(8)(A)(ii) only to a portion of its initial inspections. The only exception to this uniformity requirement is the presence of deteriorated paint in units built before

1978 to be occupied by a family with a child under the age of 6. The presence of such hazards during the initial HQS inspection means a PHA may not approve the tenancy, execute the HAP contract and make assistance payments until lead hazard reduction is complete. However, in the case where the deficiency is identified for a unit under HAP contract during a regular or interim HQS inspection, lead hazard reduction need not be completed within 24 hours. Instead, PHAs and owners must follow the requirements in 24 CFR part 35.

D. Documenting the Absence of Life-Threatening Conditions

A PHA that chooses to implement § 8(o)(8)(A)(ii) must ensure that the unit does not have any life-threatening deficiencies before the PHA approves the assisted tenancy and executes the HAP contract. The PHA must document that the unit passes all inspection items that relate to any life-threatening deficiencies identified in the PHA's HCV administrative plan (including those on HUD's list of life-threatening deficiencies). HUD will provide guidance for PHAs on how to incorporate HUD's definition of life-threatening conditions into its regular HQS procedures for purposes of implementing § 8(o)(8)(A)(ii).

E. Notification of Owners and Tenants

PHAs that adopt § 8(o)(8)(A)(ii) must notify owners and families, as applicable, of the new procedures and timelines for assistance payments. If the initial inspection on the unit identifies one or more non-life-threatening deficiencies, the PHA must provide the family a list of the deficiencies and offer the family the opportunity to decline to enter into the assisted lease without losing the voucher. The PHA must also notify the family that if the owner fails to correct the non-life-threatening deficiencies within the PHA-specified time period, the PHA will terminate the HAP contract, which in turn terminates the assisted lease, and the family will have to move to another unit in order to receive voucher assistance.

F. Housing Assistance Payments

PHAs that adopt § 8(o)(8)(A)(ii) may, with the agreement of the family, approve the assisted tenancy, execute the HAP contract, and make housing assistance payments for a unit that fails the initial HQS inspection only as a result of non-life-threatening conditions as defined above. If the non-life-threatening conditions are not corrected within 30 days of the PHA notifying the owner of the unit, in writing, of the unit's failure to comply with HQS, the

PHA must withhold any further assistance payments until those conditions are addressed and the unit is in compliance with the housing quality standards. After the 30-day correction period has passed and the PHA begins withholding payments, the PHA may establish a policy regarding the maximum amount of time it will withhold payments before abating payments or terminating the HAP contract for owner non-compliance with HQS. Once the unit is in compliance, the PHA may use any payments withheld to make payments for the period during which payments were withheld.

The PHA will follow its administrative policy on when to issue a new voucher to the family and when to terminate the HAP contract for owner non-compliance with HQS. HUD expects PHAs to require prompt correction of HQS deficiencies to minimize the amount of time a family could be living in a unit that is not HQS compliant. There may be some cases where repairs cannot be made immediately. However, under no circumstances may the HAP contract continue beyond 180 days of the effective date of the HAP contract if unit is not in compliance with HQS.

If the PHA adopts this administrative policy, 24 CFR 982.305(a) and (b) remain in effect, with the exception that the PHA is required to inspect the unit and determine that there are no life-threatening deficiencies (rather than determining the unit satisfies the HQS) before the approval of the assisted tenancy and the beginning of the assisted lease term.

G. Notification of HUD

PHAs that plan to adopt § 8(o)(8)(A)(ii) must notify HUD of their intention to do so. The notification must be provided at least 30 days before the new policy is implemented and must be sent by email to HOTMA_HQS@hud.gov. This notification allows HUD to track the usage of this provision as authorized by this notice for the purpose of making adjustments to the PHA's scoring under HUD's Section Eight Management Assessment Program (SEMAP) as needed.

H. Section Eight Management Assessment Program (SEMAP)

SEMAP Indicator 11, Pre-Contract HQS Inspection, scores the PHA based on the percentage of units that pass the HQS inspection before the beginning of the assisted lease and HAP contract. This indicator is inconsistent with § 8(o)(8)(A)(ii), assuming a PHA utilizes the new statutory flexibility. Therefore,

HUD will issue specific guidance on how SEMAP Indicator 11 will be modified to ensure that PHAs that adopt § 8(o)(8)(A)(ii) will be scored based on the new statutory standard. Until further guidance is provided, PHAs should continue to report as usual in PIC (that is, the date the PHA enters into PIC for when the unit passes HQS inspection is the date that the unit is found to have no HQS deficiencies, including no non-life-threatening deficiencies).

Questions for Comment

1. Is HUD's definition of non-life-threatening conditions as any condition that does not meet HUD's definition of life-threatening appropriate? If not, is there an alternate definition HUD should use?

2. HUD's list of life-threatening conditions is based on the definition currently being used by the UPCS-V demonstration. Are there other sources that HUD should consider for this list?

3. Is establishing 180 days as the maximum time the PHA may withhold or abate payments before terminating the HAP contract for the owner's failure to make the repairs the appropriate time frame? Should this time period be shorter or longer?

4. How should HUD modify SEMAP Indicator 11 for PHAs that elect to implement § 8(o)(8)(A)(ii)?

5. Are there any other discretionary factors that PHAs should consider in implementing § 8(o)(8)(A)(ii)?

2. Alternative Inspections (§ 8(o)(8)(A)(iii) of 1937 Act)

The new § 8(o)(8)(A)(iii) of the 1937 Act authorizes occupancy of a unit prior to the PHA's inspection being completed if the property has, in the previous 24 months, passed an alternative inspection method that qualifies as an alternative inspection method pursuant to § 8(o)(8)(E). In this case, a PHA may also make assistance payments retroactively, dating back to the effective date of the HAP contract and assisted lease term, once the unit has been inspected and found to meet HQS standards. In exercising this administrative flexibility under § 8(o)(8)(A)(iii), PHAs must comply with the definitions and requirements in this section, in addition to those provided in HUD regulations and requirements. If a PHA exercises this authority, this document overrides the regulatory requirement at 24 CFR 982.305(a)(2) and (b)(1)(i) that the PHA inspect the unit and determine it meets HQS prior to approving the tenancy and the beginning of the assisted lease term. The requirements of this document also

overrides §§ 982.305(b)(2) and 982.305(c)(1) and (3).

A. Eligible Alternative Inspection Methods

In order to qualify as an alternative inspection method for § 8(o)(8)(A)(iii), the inspection method must meet the same requirements for the use of alternative inspections under 24 CFR 982.406. Specifically:

(1) The PHA must be able to obtain the results of the alternative inspection.

(2) If the alternative inspection employs sampling, the PHA may rely on such alternative method only if the HCV or PBV unit was included in the population of units forming the basis of the sample. For example, if a 100-unit property includes 20 units that are occupied by HCV-assisted families or are under a PBV contract, then those 20 units must be included in the universe of units from which the sample was pulled. This does not mean that the 20 units had to be included in the actual sample of units that were inspected under the alternative inspection, but that these units were included in the universe of potential units from which the sample was drawn.

(3) A PHA may rely upon inspections of housing assisted under the HOME Investment Partnerships (HOME) program or housing financed using Low-Income Housing Tax Credits (LIHTCs), or inspections performed by HUD, without prior HUD approval. However, before employing this alternative method the PHA must amend its HCV administrative plan and notify HUD as described below.

(4) If the PHA wishes to rely on an alternative inspection method other than that used for HOME, LIHTC, or inspections performed by HUD, the PHA must, prior to amending its HCV administrative plan, submit to HUD's Real Estate Assessment Center (REAC) a copy of the inspection method it wishes to use, along with its analysis of the inspection method that shows that the method "provides the same or greater protection to occupants of dwelling units" as would HQS. A PHA may not rely upon such alternative inspection method unless and until REAC has reviewed and approved use of the method and the PHA has amended its HCV administrative plan and notified HUD as described below. A PHA that uses such alternative inspection method must monitor changes to the standards and requirements applicable to such method. If any change is made to the alternative inspection method, the PHA must submit to REAC a copy of the revised standards and requirements, along with a revised comparison to

HQS. If the PHA or REAC determines that the revision would cause the alternative inspection to no longer meet or exceed HQS, then the PHA may no longer rely upon the alternative inspection method for § 8(o)(8)(A)(iii).

B. Administrative Plans

The PHA must identify the alternative inspection method(s) being used in its HCV administrative plan, making clear the specific properties or types of properties for which the inspection method(s) will be employed. This change may be a significant amendment to the PHA Plan, in which case a PHA must follow its PHA Plan amendment and public notice requirements before using the alternative inspection method.

C. Authorization of Occupancy

Section 8(o)(8)(A)(iii) states that the PHA may “authorize occupancy” before the PHA completes its inspection if the property passed the alternative inspection. The PHA authorizes occupancy in response to a Request for Tenancy Approval (RFTA) received from the family. Upon receiving the RFTA, a PHA that elects to use this provision determines whether the property in which the unit is located received an inspection within the previous 24 months that qualifies as an alternative inspection and the unit meets any additional requirements established in the PHA administrative plan. If the property has passed the alternative inspection within the past 24 months, the PHA may approve the assisted tenancy before the PHA conducts the initial HQS inspection. If the PHA chooses to approve the assisted tenancy prior to conducting the HQS inspection, the PHA enters into the HAP contract with the owner and the owner and family enter into the lease agreement and HUD prescribed tenancy addendum before the PHA’s HQS inspection takes place. The PHA must conduct the HQS inspection within 15 days of receiving the RFTA (as described below) and after it has executed the HAP contract.

In the case where the PHA exercises its authority under § 8(o)(8)(A)(iii), the PHA must execute the HAP contract with the owner before the PHA’s inspection takes place. The PHA must execute the HAP contract with the owner on or before the beginning of the lease term, not within 60 days of the beginning of the lease term as provided in 24 CFR 982.305(c). Since the family will have moved into the unit before the PHA does the initial inspection, the PHA must have a contractual relationship with the owner at the time of the inspection so that the PHA can

take enforcement action if the unit does not pass HQS and the owner does not make the necessary repairs within the required timeframes.

D. Timing of the PHA Inspection

Section 8(o)(8)(A)(iii) allows the PHA to authorize occupancy before the PHA’s inspection is completed. It does not eliminate the requirement under § 8(o)(8)(A)(i) for the PHA (or designated entity) to conduct the initial inspection. Under the current program regulations at 24 CFR 982.305(b)(2), a PHA with up to 1,250 budgeted units in its tenant-based program must complete the initial inspection within 15 days of receiving the RFTA, and a PHA with more than 1,250 budgeted units in its tenant-based program must complete the initial inspection within a reasonable time after the PHA receives the RFTA. All PHAs that implement Section 8(o)(8)(A)(iii) must complete the initial inspection within 15 days of receiving the RFTA for units located in properties that have met the requirements of an eligible alternative inspection in the past 24 months. The 15-day standard applies to all units for which the PHA employs § 8(o)(8)(A)(iii), regardless of the size of the PHA’s tenant-based program.

E. Housing Assistance Payments

The PHA must conduct the initial HQS inspection within 15 days of receiving the RFTA. If the unit passes the PHA’s inspection, the PHA may make HAPs retroactively to the effective date of the HAP contract and the start of the assisted lease term. If the unit does not pass the PHA’s inspection, and if the PHA has not adopted § 8(o)(8)(A)(ii) regarding the correction of non-life-threatening deficiencies, the PHA may not make housing assistance payments until the HQS deficiencies have been corrected. The PHA must notify the owner in writing of the defects and take enforcement action against the owner if any life-threatening defect (as identified in the PHA’s HCV administrative plan) is not corrected within 24 hours or any other defect is not corrected within 30 calendar days or any PHA-approved extension. If the PHA has adopted § 8(o)(8)(A)(ii) and the unit has only non-life-threatening deficiencies, the PHA may make housing assistance payments according to the procedures specified in Section A.1. above.

In deciding whether to implement Section 8(o)(8)(A)(ii), HUD recommends that PHAs carefully consider the complications that could arise if a PHA enters into a HAP contract with an owner on the basis of an alternative

inspection but then identifies HQS deficiencies in its initial inspection. The family may be living with these deficiencies during the correction period and may ultimately have to move if the owner is not willing to make the corrections. The PHA will follow its administrative policy on when to issue a new voucher to the family and when to terminate the HAP contract for owner non-compliance with HQS. HUD expects PHAs to require prompt correction of HQS deficiencies to minimize the amount of time a family could be living in a unit that is not HQS compliant. There may be some cases where repairs cannot be made immediately. However, under no circumstances will the HAP contract continue beyond 180 days of the effective date of the HAP contract if unit is not in compliance with HQS.

F. Notification of Owners and Tenants

PHAs that adopt § 8(o)(8)(A)(iii) must notify owners and families, as applicable, of the new procedures and timelines for assistance payments. When authorizing a family to move into a unit prior to the PHA’s inspection, the PHA must advise the family of the PHA’s list of life-threatening deficiencies so that the family can look for such items in the unit and notify the PHA immediately if such deficiencies are found or decline to enter into the lease with the owner.

G. Notification of HUD

PHAs that plan to adopt § 8(o)(8)(A)(iii) must notify HUD of their intention to do so. The notification must be provided at least 30 days before the new policy is implemented and must be sent by email to HOTMA_HQS@hud.gov. This allows HUD to track the usage of this provision as authorized by this notice for the purpose of making adjustments to the PHA’s scoring under HUD’s Section Eight Management Assessment Program (SEMAP) as needed.

H. Section Eight Management Assessment Program (SEMAP)

SEMAP Indicator 11, Pre-Contract HQS Inspection, scores the PHA based on the percentage of units that pass the HQS inspection before the beginning of the assisted lease and HAP contract. This indicator is inconsistent with § 8(o)(8)(A)(iii), assuming a PHA utilizes the new statutory flexibility. Therefore, HUD will issue specific guidance on how SEMAP Indicator 11 will be modified to ensure that PHAs that adopt § 8(o)(8)(A)(iii) will be scored based on the new statutory standard.

Question for Comment

How should HUD modify SEMAP Indicator 11 for PHAs that elect to implement § 8(o)(8)(A)(iii)?

B. Units Owned by a PHA (HOTMA § 105)

HOTMA amends section 8(o) of the 1937 Act to provide a statutory definition of units owned by a PHA, overriding HUD's current definition at 24 CFR 983.3 for the PBV program and as a PHA-owned unit is described at 24 CFR 982.352. A unit is now "owned by a public housing agency" only if the unit is in a project that is one of the following categories:

- (1) Owned by a PHA.
- (2) Owned by an entity wholly controlled by the PHA.
- (3) Owned by a limited liability company or limited partnership in which the PHA (or an entity wholly controlled by the PHA) holds a controlling interest in the managing member or general partner. A "controlling interest" is—
 - (A) holding 50 percent or more of the stock of any corporation;
 - (B) having the power to appoint 50 percent or more of the members of the board of directors of a non-stock corporation (such as a non-profit corporation);
 - (C) where 50 percent or more of the members of the board of directors of any corporation also serve as directors, officers or employees of the PHA;
 - (D) holding 50 percent or more of all managing member interests in an LLC;
 - (E) holding 50 percent or more of all general partner interests in a partnership; or
 - (F) equivalent levels of control in other organizational structures.

Units in which PHAs have a different ownership interest are no longer considered to be owned by the PHA.

In order to be considered a "PHA-owned" unit as described above, the PHA must have ownership interest in the building itself, not simply the land beneath the building.

For units that were previously considered to be PHA-owned but are no longer PHA-owned due to this definitional change, the PHA must obtain an opinion from its legal counsel that the project in question falls outside the statutory definition. The PHA must keep the opinion in the PHA's files. Until such time that the opinion letter is obtained, the PBV project remains PHA-owned for purposes of program requirements and HUD monitoring. If an ownership structure changes in the future that removes a project from the definition of PHA-owned, the PHA must

obtain and keep the same sort of opinion letter. If an ownership structure changes in a manner that would cause a PBV project to be classified as PHA-owned (e.g., PHA ownership interest is increased to an amount greater than 50 percent), the PHA must identify, in writing, within 30 days of the change in ownership, the proposed independent entity that will perform all of the applicable independent entity responsibilities for the project in compliance with 24 CFR 983.59 and PIH Notice 2015–05 (or subsequent guidance) for PBV and 24 CFR 982.352(b) for HCV tenant-based assistance.

For PBV projects where the PHA has an interest in the project, but such interest does not cause the project to be classified as PHA-owned housing as described above, HUD may review the PHA's rent determination for such projects, including the PHA's methodology of determining rent comparability. HUD intends to issue additional guidance concerning HUD review and monitoring of rent determinations and rent adjustments for PBV projects, including cases in which the PHA has an interest in the PBV project.

Questions for Comment

1. Should the definition of "controlling interest" be different?
2. Are there programmatic issues with changing a unit's designation from PHA-owned to not PHA-owned that need to be addressed by HUD?
3. What, if any, additional oversight and monitoring should HUD undertake for units in which the PHA has ownership interest in order to ensure that all program requirements (including rent reasonableness and housing quality standards) are being met, especially in cases where the PHA responsible for enforcing those standards has a financial interest in the project?

C. Project-Based Vouchers (HOTMA § 106)

This section makes several statutory changes to the Project-Based Voucher (PBV) Program in section 8(o)(13) of the 1937 Act. The amendments include:

- (1) changing the terminology in the statute from "structure" to "project" where the statute refers to structure instead of project;
- (2) changing the PHA HCV program limitation on PBV vouchers from a 20 percent funding limitation to a 20 percent unit limitation calculation and allowing for additional project-basing of vouchers by raising the limit an additional 10 percent for homeless

families, families with veterans, supportive housing for persons with disabilities or elderly persons, or in areas where vouchers are difficult to use. The statute also excludes certain projects that were previously subject to federally required rent restrictions or were receiving another type of long-term HUD housing subsidy from the program PBV limitation entirely;

(3) changing the income-mixing cap on the number of PBV units in a project to be the greater of 25 units in a project or 25 percent of the units in a project (the project unit cap), and making changes to the categories of PBV units that are excepted from this project unit cap;

(4) allowing the PHA to provide for an initial PBV contract of up to 20 years and to further extend that term for an additional 20 years;

(5) allowing the PHA to establish a selection preference for families who *qualify* for voluntary services, including disability-specific services, offered in conjunction with assisted units, provided that the preference is consistent with the PHA plan;

(6) allowing the PHA to attach assistance to structures in which the PHA has an ownership interest or control without following a competitive process; and

(7) allowing PHAs to project-base HUD-VASH and FUP vouchers in accordance with statutory and regulatory requirements of the PBV program without additional requirements for approval by HUD.

This notice does not implement all the provisions of section 106 of HOTMA, but only those where HUD believes it is reasonable to do so and does not provide undue burden on PHAs to implement. HUD may provide additional guidance to this notice to ensure effective implementation and elaborate on issues that may need clarification.

Provisions under section 106 of HOTMA that are *not* implemented by this document and that the PHA and owner may not yet implement are as follows:

(1) Entering into a PBV HAP Contract for any unit that does not qualify as existing housing and is under construction or recently has been constructed regardless of whether the PHA and owner executed an Agreement to Enter a Housing Assistance Payments Contract (AHAP) (see section 106(a)(4) of HOTMA);

(2) Providing rent adjustments using an operating cost factor (see section 106(a)(6) of HOTMA);

(3) Establishing and utilizing procedures for owner-maintained site-

based waiting lists (see section 106(a)(7) of HOTMA); and

(4) Concerning the environmental review requirements for existing housing (see section 106(a)(8) of HOTMA).

1. Changing “structure” to “project” (§ 106(a)(1) of HOTMA)

This provision amends section 8(o)(13) by replacing the term “structure” with the term “project” throughout the paragraph. No guidance is needed to make this change. In accordance with the law, this document serves as official notice that this statutory change is effective as of *April 18, 2017*. HUD will issue any needed conforming regulatory changes in the future.

2. Changing the Maximum Amount of PBVs Permitted in the PHA HCV Program (§ 8(o)(13)(B) of 1937 Act).

This section of the document overrides 24 CFR 983.6 of the PBV program regulations.

A. Maximum Amount of PBVs in the PHA’s HCV Program

Under the new § 8(o)(13)(B) of the 1937 Act, PHAs may now project-base up to 20 percent of the PHA’s authorized units, instead of 20 percent of the PHA’s voucher budget authority. However, the PHA is still responsible for determining the amount of budget authority it has is available and ensuring that the amount of assistance that will be attached to the units is available under the ACC, regardless of whether the PHA has vouchers available for project-basing.

Prior to issuing a request for proposals (RFP) (24 CFR 983.51(b)(1)), selecting a project based on a previous competition (24 CFR 983.51(b)(2)), or selecting a project without following a competition process where the PHA has ownership interest and is engaged in improving, developing or replacing a public housing property or site (see section C.7 of this document), the PHA must submit to the local field office all the following information (in lieu of following the requirements of 24 CFR 983.6(d)):

(1) The total number of units authorized under the Consolidated Annual Contributions Contract (ACC) for the PHA (excluding those PBV units entirely excluded from the cap described in sections C.2.C and C.2.D below). This number of authorized units includes special-purpose vouchers such as HUD–VASH (except as provided in section D below) and Family Unification Program vouchers. The PHA must also identify the number of PBV units that are excluded from total, if applicable.

(2) The total number of units currently committed to PBV (excluding those PBV units entirely excluded from the cap described in sections C.2.C and C.2.D below.). The number of units “committed to PBV” is comprised of the total number of units that are either (a) currently under PBV HAP contract, (b) under an Agreement to Enter into HAP contract (AHAP), or (c) covered by a notice of proposal selection (24 CFR 983.51(d)). The PHA must also identify the number of PBV units that are excluded from the total, if applicable. This number must match the number of PBV units excluded from the baseline units (discussed above).

(3) The number of units to which the PHA is proposing to attach project-based assistance through the new RFP or selection.

The PHA is no longer required to submit information on funding or available budget authority when submitting information to HUD on its intent to project-base vouchers. However, PHAs are still required to provide this PBV unit information to HUD no later than 14 calendar days prior to the date that the PHA intends to issue the Request for Proposals (or makes the selection based on a previous competition or noncompetitively as applicable). The PHA continues to submit the required information electronically to the HUD field office by sending an email to pbvsubmission@hud.gov. The PHA must also copy their local HUD Office of Public Housing Director on its email submission.

B. Additional Project-Based Units

HOTMA further allows PHAs to project-base an additional 10 percent of its units above the 20 percent program limit, provided those additional units fall into one of the following categories:

(1) The units are specifically made available to house individuals and families that meet the definition of homeless under section 103 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11302), and contained in the Continuum of Care Interim Rule at 24 CFR 578.3. See <https://www.federalregister.gov/d/2012-17546> and <https://www.federalregister.gov/d/2016-13684>.

(2) The units are specifically made available to house families that are comprised of or include a veteran. A veteran is an individual who has served in the United States armed forces. The PHA may further define “veteran” for purposes of determining if the units are eligible for this exception. For example, the PHA could require that the veteran must be eligible to receive supportive services from the Department of

Veterans Affairs or require that the veteran was not dishonorably discharged.

(3) The units provide supportive housing to persons with disabilities or to elderly persons. The definitions of a person with disabilities and an elderly person are found at 24 CFR 5.403. Supportive housing means that the project makes supportive services available for all of the assisted families in the project and provides a range of services tailored to the needs of the residents occupying such housing. Such services may include (but are not limited to):

(A) meal service adequate to meet nutritional need,

(B) housekeeping aid,

(C) personal assistance,

(D) transportation services;

(E) health-related services;

(F) educational and employment services; or

(G) other services designed to help the recipient live in the community as independently as possible.

The PHA must include in the PHA administrative plan the types of services offered to families for a project to qualify for the exception and to the extent to which such services will be provided. Such supportive services need not be provided by the owner or on-site, but must be reasonably available to the families receiving PBV assistance in the project. A PHA may not require participation as a condition of living in an excepted unit, although such services may be offered.

Note that in accordance with 24 CFR 983.354, with the exception of an assisted living facility, the owner of a PBV project may not require the assisted family to pay charges for meals or supportive services, and non-payment of such charges by the family is not grounds for termination of tenancy. In the case of an assisted living facility (as defined in § 983.3) receiving PBV assistance, owners may charge families for meals or supportive services. These charges may not be included in the rent to owner or the calculation of reasonable rent.

(4) The units are located in a census tract with a poverty rate of 20 percent or less, as determined in the most recent American Community Survey 5-Year Estimates.

These categories are those under which a PHA is permitted to project-base an additional 10 percent of its units above the normally applicable 20 percent PBV program limitation. These categories are separate and distinct from exceptions to the income-mixing requirements that limit the number and percentage of units within a particular

project to which PBV assistance may be attached (no more than the greater of 25 units or 25 percent of the units), which is discussed later in this document.

If a PHA wishes to add PBV units under this exception authority, the PHA must submit the same information in section C.2.A above to the Field Office, and identify the exception category (or categories) for which the PHA will project-base additional units (up to an additional 10 percent above the normally applicable PBV program limitation) and the specific number of units that qualify under the exception category.

PBV units may only be covered by this 10 percent exception authority if the PBV HAP contract was first executed on or after the effective date of this notice.

C. Units Not Subject to PBV Program Unit Limitation

New language in section 8(o)(13)(B) provides that units that were previously subject to certain federal rent restrictions or receiving another type of long-term housing subsidy provided by HUD do not count toward the percentage limitation when PBV assistance is attached to them.

(1) *Exception requirements.* For purposes of this document, the unit must meet the following conditions in order to qualify for this exception:

(a) The unit must be covered under a PBV HAP contract that first became effective on or after the effective date of this notice; and

(b) In the 5 years prior to the date the PHA either (i) issued the RFP under which the project was selected or (ii) selected the project based on a prior competition or without competition, the unit met at least one of the two following conditions:

(i) The unit received one of the following forms of HUD assistance:

(I) Public Housing Capital or Operating Funds (section 9 of the 1937 Act).

(II) Project-Based Rental Assistance (section 8 of the 1937 Act). Project-based rental assistance under section 8 includes the section 8 moderate rehabilitation program, including the single-room occupancy (SRO) program.

(III) Housing For the Elderly (section 202 of the Housing Act of 1959).

(IV) Housing for Persons With Disabilities (section 811 of the Cranston-Gonzalez National Affordable Housing Act).

(V) The Rent Supplement (Rent Supp) program (section 101 of the Housing and Urban Development Act of 1965).

(VI) Rental Assistance Program (RAP) (section 236(f)(2) of the National Housing Act).

(ii) The unit was subject to a rent restriction as a result of one of the following HUD loan or insurance programs:

(I) Section 236.

(II) Section 221(d)(3) or (d)(4) BMIR.

(III) Housing For the Elderly (section 202 of the Housing Act of 1959).

(IV) Housing for Persons With Disabilities (section 811 of the Cranston-Gonzalez National Affordable Housing Act).

Units that were previously receiving PBV assistance or HCV tenant-based assistance are not covered by this exception. (The statute provides that the units must have been receiving "other" project-based assistance provided by the Secretary in order to cover by the exception authority.)

Both existing units and units rehabilitated under the PBV program are eligible for this exception if the units meet the conditions outlined above. In addition, newly constructed units developed under the PBV program may also be excluded from the PHA program limitation, provided the newly constructed unit qualifies as a replacement unit as described below.

(2) *PBV New Construction Units that Qualify for the Exception as Replacement Housing.* For purposes of this notice, a PBV new construction unit must meet all of the following requirements in order to be a replacement unit and qualify for this exception to the program limitation:

(a) The unit which the PBV new construction unit is replacing (*i.e.*, the original unit) must have received one of the forms of HUD assistance or was subject to a rent restriction as a result of one of the HUD loan or insurance programs listed above no more than 5 years from the date the PHA either (i) issued the RFP under which the PBV new construction project was selected or (ii) selected the PBV new construction project based on a prior competition or without competition. If the PBV new construction project was selected based on a prior competition or without competition, the date of selection used to determine if the 5-year threshold has been met is the date of the PHA written notice of owner selection under 24 CFR 983.51(d)).

(b) The newly constructed unit is located on the same site as the unit it is replacing. An expansion of or modification to the prior project's site boundaries as a result of the design of new construction project is acceptable as long as a majority of the replacement units are built back on the site of the

original public housing development and any units that are not built on the existing site share a common border with, are across a public right of way from, or touch that site.

(c) One of the primary purposes of the planned development of the PBV new construction project is or was to replace the affordable rental units that previously existed at the site, as evidenced by at least *one* of the following:

(i) Former residents of the original project are provided with a selection preference that provides the family with the right of first occupancy at the PBV new construction project when it is ready for occupancy.

(ii) Prior to the demolition of the original project, the PBV new construction project was specifically identified as replacement housing for that original project as part of a documented plan for the redevelopment of the site.

HUD is specifically seeking comment on what changes HUD should consider making to the initial conditions set forth under this notice in order for a PBV new construction unit to qualify as replacement housing and the exception to the PBV program limitation. Please see the questions for comment section, below.

(3) *Unit size configuration and number of units for new construction and rehabilitation projects.* The unit size configuration of the PBV new construction project may differ from the unit size configuration of the original project that the PBV units are replacing. In addition, the total number of PBV assisted units may differ from the number of units in the original project. However, under no circumstances may the program limitation exception be applied to PBV new construction units that exceed the total number of covered units in the original project that the PBV units are replacing. For example, assume the PBV new construction project will consist of a total of 50 PBV units and is replacing a former section 236 project consisting of 40 units. The maximum number of PBV units that would meet the exception from the program limitation in this example would be 40 units, and the remaining 10 PBV units in the project would count against the program limitation.

These same policies apply in the case where the owner is rehabilitating the project under the PBV program and is changing the unit configuration and/or total number of units in the project as a result of the rehabilitation.

(4) *Applicability of PBV project selection requirements.* For owner proposals involving all of these PBV

properties (existing, rehabilitation, and new construction), the standard criteria for selection of projects and the units to which project-based assistance can be attached, including consistency with the PHA Plan, the goals of deconcentrating poverty and expanding housing and economic opportunities, site selection, and all civil rights requirements, are still in effect. Likewise, the requirements of HUD Notice PIH 2013–27 that concern the voluntary relinquishment by families of enhanced voucher assistance for PBV assistance remains in effect. The only difference is that the PBV units in these projects will not be included in determining if a PHA has exceeded its PBV program cap. These units are excluded from both the total number of units authorized under the PHA's ACC and the number of units committed to PBV in the program.

As noted above, the PHA is required to provide the number of PBV units to which it will be attaching PBV assistance under this exception authority to HUD no later than 14 calendar days prior to the date that the PHA intends to issue the RFP or make the selection. The PHA must indicate the specific exception that covers the units (*i.e.*, identify the property and the covered program or programs under which the property was formerly assisted). The PHA submits the required information electronically to the HUD field office by sending an email to pbvsubmission@hud.gov. The PHA must also copy their local HUD Office of Public Housing Director on its email submission.

D. Other Units Not Subject to the PBV Program Unit Calculation

In addition to the units listed under section C.2.C above, other units are not subject to the program limitation calculation and would be excluded in the total number of authorized units and the total number of PBV units currently committed to PBV that the PHA submits to the field office (in lieu of following the requirements of 24 CFR 983.6(b)).

(1) *RAD exception.* HUD waived the 20 percent limitation at section 8(o)(13)(B) of the 1937 Act as well as 24 CFR 983.6 for PBV units under the RAD demonstration. This waiver remains in effect, and, consequently, a PHA that continues to be exempted from submitting information on its PBV cap calculation to HUD when it is project-basing vouchers under RAD. Furthermore, RAD PBV units are excluded from both the total number of units under the ACC and the units committed to PBV when determining if the PHA has vouchers available to

project-base under the program limit requirements.

(2) *HUD–VASH PBV Set-aside vouchers.* HUD has awarded vouchers specifically designated for project-based assistance out of the HUD–VASH appropriated funding made available from the FY 2016, FY 2015, FY 2014, FY 2013, FY 2011, and FY 2010 Appropriations Acts. Since these voucher allocations were specifically allocated for project-based assistance, HUD has determined that the PBV units supported by those vouchers should not count against the PHA's PBV program unit limitation as long as those vouchers remain under PBV HAP contract at the designated project. The Appropriations Acts funding these vouchers authorize the HUD Secretary, in consultation with the VA Secretary, to waive or specify alternative requirements for any provision of any statute or regulation that the HUD Secretary administers in connection with the use of those HUD–VASH funds (except for requirements related to fair housing, labor standards, and the environment), upon a finding by the Secretary that any such waivers or alternative requirements are necessary for the effective delivery and administration of such voucher assistance. Accordingly, section 8(o)(13)(B) is waived for those HUD–VASH PBV vouchers.

This exception only applies to HUD–VASH PBV vouchers that were awarded to the PHA through the HUD–VASH PBV set-aside funding process. All other HUD–VASH vouchers, including those HUD–VASH vouchers that the PHA opts to project-base, are still subject to the PHA PBV program limitation, and would be included in the units authorized and units committed to PBV that the PHA submits to HUD under this document, which replaces the voucher funding information that was previously provided under 24 CFR 983.6(b).

(3) *Additional categories established by HUD by regulation.* Section 8(o)(B)(ii), as amended by HOTMA, further provides that the Secretary may, by regulation, establish additional categories for the exception to the PBV program unit limitation. HUD has not yet exercised this authority but may do so in the future.

For future PBV projects other than RAD, the PHA is required to provide the number of PBV units to which it will be attaching PBV assistance under this exception authority to HUD no later than 14 calendar days prior to the date that the PHA intends to issue the RFP or make the selection. The PHA must indicate the specific exception that covers the units. The PHA submits the required information electronically to

the HUD field office by sending an email to pbvsubmission@hud.gov. The PHA must also copy their local HUD Office of Public Housing Director on its email submission.

Questions for Comment

1. Should HUD allow PHAs that are administering PBV units that would qualify under the additional 10 percent exception categories but were placed under HAP contract prior to the effective date of this notice count those units as excepted? This would potentially allow a PHA that was at the 20 percent limit to add new PBV units that do not fall under any of the exception categories, because counting the PBV units that were already under HAP under the new 10 percent exception authority would free up space under the regular 20 percent cap.

2. The new (o)(13)(B) further provides that the additional 10 percent exception may be applied to units that are difficult to use, as determined by the Secretary, and with respect to census tracts with a poverty rate of 20 percent or less. This document, for now, only applies the statutory exception provision to those units located in census tracts with poverty rates of 20 percent or less. What criteria should HUD use to define or determine the areas where vouchers are “difficult to use” for this exception category?

3. The statute allows the Secretary to issue regulations to create additional exception categories from the normally applicable PBV program limit, which could apply to the additional 10 percent authority or that could be exempted from the program limit entirely. What additional exception categories that should be included in the 10 percent authority? What other types of units should be exempted from the PBV program limit entirely?

4. This document sets out certain conditions that a PBV new construction unit must meet in order to be considered replacement housing and eligible for the exception to the PHA PBV program limitation. Are those conditions appropriate or should they be changed or expanded?

5. In light of the impact that additional exceptions and exemptions from the program limit will have on the number of vouchers available for tenant-based assistance under the HCV program, should HUD establish additional categories at all? What limits or requirements on project-basing, if any, should be placed on the use of this exception authority to ensure that the PHA has sufficient tenant-based assistance available for families to exercise their statutory right to move

from the PBV project with tenant-based assistance after one year of occupancy at the PBV project?

3. Changes to Income-Mixing Requirements for a Project (Project Cap) (§ 8(o)(13)(D) of 1937 Act)

This section overrides the PBV program regulations at 24 CFR 983.56(a) and 983.56(b)(1) and (2). This section also overrides §§ 983.262(c) and (d).

A. PBV Income-Mixing Project Cap, Generally

HOTMA amended the income-mixing requirement for an individual project found in section 8(o)(13)(D) of the 1937 Act. The limitation on the number of PBVs in a project is now the greater of 25 units or 25 percent of the units in a project. However, owners under current HAP contracts are still obligated by the terms of those HAP contracts with respect to the requirements that apply to the number of excepted units in a multifamily project. The owner must continue to designate the same number of contract units and assist the same number of excepted families as provided under the HAP contract during the remaining term of the HAP contract, unless the owner and the PHA mutually agree to change those requirements. For example, if an owner has a PBV HAP contract for a 20 unit project, and the HAP contract provides that 15 of those units were exempted from the 25 percent income mixing requirement because the units are designated for elderly families, the owner must continue to designate those units for occupancy by elderly families, notwithstanding the fact that the statutory limit on PBV has been increased to 25 units, unless the owner and the PHA mutually agree to change the terms of the assistance contract.

Except as provided below, the PBV HAP contract may not include units in excess of the greater of 25 units or 25 percent of the units in the project.

B. Exceptions to Project Cap

Units that are in one of the following categories are excluded from the 25 percent or 25-unit project cap on PBV assistance:

(1) Units exclusively serving elderly families (as such term is defined in 24 CFR 5.403).

(2) Units housing households eligible for supportive services available to all families receiving PBV assistance in the project. The project must make supportive services available to all assisted families in the project (but the family does not have to actually accept and receive the supportive service for the exception to apply to the unit).

Families eligible for supportive services under this exception to the project cap would include families with a household member with a disability, among other populations. Such supportive services need not be provided by the owner or on-site, but must be reasonably available to the families receiving PBV assistance in the project and designed to help the families in the project achieve self-sufficiency or live in the community as independently as possible. PHAs must include in the PHA administrative plan the type of services offered to families for a project to qualify under the exception and the extent to which such services will be provided.

A PHA may not require participation in the supportive services as a condition of living in an excepted unit, although such services may be offered. In cases where the unit is excepted because of FSS supportive services or any other supportive services as defined in the PHA administrative plan, if a family at the time of initial tenancy was eligible for FSS supportive services and successfully completes its FSS contract of participation or the supportive services objective, the unit continues to count as an excepted unit for as long as the family resides in the unit even though the family is no longer eligible for the service.

However, if the FSS family fails to successfully complete the FSS contract of participation or supportive services objective and consequently *is no longer eligible* for the supportive services, the family must vacate the unit within a reasonable period of time established by the PHA, and the PHA shall cease paying housing assistance payments on behalf of the ineligible family. If the family fails to vacate the unit within the established time, the unit must be removed from the HAP contract (unless it is possible to substitute a different unit for the formerly excepted unit in the project in accordance with 983.207(a)).

(3) Projects that are in a census tract with a poverty rate of 20 percent or less, as determined in the most recent American Community Survey 5-Year Estimates.

The PHA may only refer qualifying families for occupancy of excepted units under (1) and (2) above.

C. Grandfathering of Certain Properties

The HOTMA amendments entirely eliminate the statutory exemption from a project cap for projects that serve disabled families and modify the supportive services exception. Previously, the statutory exception required that the family must be

actually receiving the supportive services for the individual unit to be exempted from the income-mixing requirement. The new requirement provides that the project must make supportive services available to all assisted families in the project (but that the family does not have to actually accept and receive the supportive services for the exception to apply to the unit). However, projects that are using the former statutory exemptions will continue to operate under the pre-HOTMA requirements and will continue to renew their HAP contracts under the old requirements, unless the PHA and the owner agree by mutual consent to change the conditions to the HOTMA requirement. The PBV HAP contract may not be changed to the HOTMA requirement if the change would jeopardize an assisted family's eligibility for continued assistance at the project (e.g., excepted units at the project included units designated for the disabled, and changing to the HOTMA standard would result in those units no longer being eligible as an excepted unit unless the owner will make supportive services available to all assisted families in the unit.)

D. Projects Not Subject to a Project Cap

New language in section 8(o)(13)(D) exempts certain types of units receiving project-based voucher assistance from having a project cap entirely. These are PBV units that were previously subject to certain federal rent restrictions or receiving another type of long-term housing subsidy provided by HUD. This exception to the project cap may only be applied to projects that were not already under HAP contract on the effective date of this document. The exception may not be applied retroactively to projects under HAP contract on the effective date of this notice or subsequently applied at the extension of those HAP contracts.

(1) *Exception requirements.* For purposes of this document, the unit must meet the following conditions in order to qualify for this exception:

(a) The unit must be covered under a PBV HAP contract that first became effective on or after the effective date of this notice, and

(b) In the 5 years prior to the date the PHA either (i) issued the RFP under which the project was selected or (ii) selected the project without competition, the unit met at least one of the two following conditions:

(i) The unit received one of the following forms of HUD assistance:

(I) Public Housing Capital or Operating Funds (section 9 of the 1937 Act).

(II) Project-Based Rental Assistance (section 8 of the 1937 Act). Project-based rental assistance under section 8 includes the moderate rehabilitation program, including the SRO program.

(III) Housing For the Elderly (section 202 of the Housing Act of 1959).

(IV) Housing for Persons With Disabilities (section 811 of the Cranston-Gonzalez National Affordable Housing Act).

(V) The Rent Supplement program (section 101 of the Housing and Urban Development Act of 1965).

(VI) Rental Assistance Program (section 236(f)(2) of the National Housing Act); or

(ii) The unit was subject to a rent restriction as a result of one of the following HUD loan or insurance programs:

(I) Section 236.

(II) Section 221(d)(3) or (d)(4) BMIR.

(III) Housing For the Elderly (section 202 of the Housing Act of 1959).

(IV) Housing for Persons With Disabilities (section 811 of the Cranston-Gonzalez National Affordable Housing Act).

Units that were previously receiving PBV assistance are not covered by this exception. The statute provides that the units must have been receiving “other” project-based assistance provided by the Secretary in order to be covered by the exception authority.

For proposals involving these properties, the standard criteria for selection of projects and the units to which PBV assistance can be applied are still in effect. The only difference is that any PBV assistance provided to these properties may be used to project base up to 100 percent of the units in the project.

Both existing units or units rehabilitated under the PBV program are eligible for this project cap exception if the units meet the conditions outlined above. In addition, newly constructed units developed under the PBV program may also be excluded from the PHA program limitation, provided the newly constructed unit qualifies as a replacement unit as described below.

(2) *PBV New Construction Units that Qualify for the Exception as Replacement Housing.* For purposes of this document, the PBV new construction unit must meet the following requirements in order to be a replacement unit and qualify for the project cap exception (these are the same conditions that apply for units to qualify as replacement units for purposes of the exception to the PBV Program unit limit under section C.2.C of this document above):

(a) The unit which the PBV new construction unit is replacing (*i.e.*, the original unit) must have received one of the forms of HUD assistance or was subject to a rent restriction as a result of one of the HUD loan or insurance programs listed above within 5 years from the date the PHA either (i) issued the RFP under which the PBV new construction project was selected or (ii) selected the PBV new construction project under a prior competition or without competition. If the PBV new construction project was selected based on a prior competition or without competition, the date of selection is the date of the PHA notice of owner selection (24 CFR 983.51(d)).

(b) The newly constructed unit is located on the same site as the unit it is replacing. (An expansion of or modification to the prior project’s site boundaries as a result of the design of new construction project is acceptable as long as new project is generally located at the same site as the original project for purposes of this requirement.)

(c) One of the primary purposes of the planned development of the PBV new construction project is or was to replace the affordable rental units that previously existed at the site, as evidenced by at least *one* of the following:

(i) Former residents of the original project are provided with a selection preference that provides the family with the right of first occupancy at the PBV new construction project when it is ready for occupancy.

(ii) Prior to the demolition of the original project, the PBV new construction project was specifically identified as replacement housing for that original project as part of a documented plan for the redevelopment of the site.

(3) *Unit size configuration and number of units.* The unit size configuration of the PBV new construction project may differ from the unit size configuration of the original project that the PBV units are replacing. In addition, the total number of PBV assisted units may differ from the number of units in the original project. However, under no circumstances may the project cap exception be applied to PBV new construction units that exceed the total number of covered units in the original project that the PBV units are replacing. For example, assume the PBV new construction project will consist of a total of 50 PBV units and is replacing a former section 236 project consisting of 40 units. The maximum number of PBV units that would meet the exception from the project cap in this

example would be 40 units, and the remaining 10 PBV units would be subject to the project cap and would need to qualify for an exception on the basis of another exception category.

These same policies apply in the case where the owner is rehabilitating the project under the PBV program and is changing the unit configuration and/or total number of units in the project as a result of the rehabilitation.

Questions for Comment

1. What other standards should HUD require for supportive services under B.2, above?

2. The Secretary has authority to define areas where tenant-based vouchers are “difficult to use.” This document, for now, only applies the statutory provision of census tracts with poverty rates of 20 percent or less. What are some other criteria that HUD should include? For example, other possible criteria include rental vacancy rates, voucher success rates, high cost areas as captured by the difference between the zip code level small area FMR and the metropolitan-wide FMR, or alternative measures of low-poverty areas.

3. Are there additional properties formerly subject to federal rent restrictions or receiving rental assistance from HUD that should be exempted from a project cap?

4. The statute allows HUD to impose additional monitoring and requirements on projects that project-base assistance for more than 40 percent of the units. How can PHAs ensure that this increase in PBV units will not hamper mobility efforts and moves to opportunity areas?

4. PBV Contract Terms (§ 8(o)(13)(F) and (G) of 1937 Act and §§ 106(a)(4) and (5) of HOTMA)

A. Initial Term of HAP Contract and Extension of Term

The initial HAP Contract term may now be of a period of up to 20 years (instead of the prior 15-year limitation). The length of the term of the initial HAP contract for any HAP contract unit may not be less than one year nor more than 20 years (instead of the prior 15-year limitation on the initial term of the HAP contract). In addition, the PHA may agree to enter into an extension (at the time of the initial HAP contract execution or any time before the expiration of the contract, for an additional term of up to 20 years (as opposed to the prior 15-year limitation on the term of the contract extension). A HAP contract extension may not exceed 20 years. The PHA may provide for multiple extensions; however, in no circumstances may such extensions exceed 20 years, cumulatively.

PHAs and owners with HAP contracts that are still in the initial term may extend the initial term up to a maximum initial term of 20 years by mutual consent, and then may subsequently agree to extend the contract for up to 20 years. The maximum term of the HAP contract in that instance (initial term and subsequent extension) would be 40 years. PHAs and owners with HAP contracts that are no longer in the initial term may mutually agree to extend the HAP contract for a total extension term of 20 years. The maximum term of the HAP contract in that case would be 20 years plus the number of years that constituted the initial term of the HAP contract.

If the project in question is a PHA-owned project, any change in the initial term and any subsequent extension is also subject to the approval of the independent entity.

This section overrides 24 CFR 983.205(a) and (b) only with respect to the length of the initial term and the extension of the term of the HAP contract. Otherwise, all of the other requirements of those regulations remain in effect, including the requirements related to PHA-owned units.

B. Priority of Assistance Contracts

The new section 8(o)(13)(F)(i)(I) requires PHAs, in times of insufficient funding, to first take all cost-savings measures prior to failing to make payments under existing PBV HAP contracts (*i.e.*, terminating the HAP contract). If the PHA has taken all cost-savings measures and still has insufficient funding to make HAPs, it is left up to the discretion of the PHA to choose to terminate HCV or PBV assistance first. The list of cost-savings measures that must be taken prior to terminating assistance contracts are found in PIH Notice 2011–28.¹

C. Biennial Inspection Requirements

The new language in section 8(o)(13)(F)(i)(II) of the 1937 Act is a change that clarifies the frequency of inspection requirement for PBV projects to those found in paragraph (8), which allows for biennial as opposed to annual inspections. The language in paragraph (13)(F)(i)(II) merely clarifies that for PBV assistance, biennial inspections may be conducted using a sample of units. The PBV regulations at 24 CFR 983.103 were revised under the final rule entitled, “Streamlining Administrative Regulations for Public Housing, Housing Choice Voucher, Multifamily Housing, and Community Planning and Development Programs,” published in the **Federal Register** on March 8, 2016,

at 81 FR 12353. This rule amended regulations to reflect the biennial inspection requirement for PBV and that a random sampling of at least 20 percent of the PBV units in each building may be used to fulfill that biennial inspection requirement.

D. Additional Units Without Competition

The new language in section 8(o)(13)(F)(ii) allows PHAs and owners to amend the HAP contract to add additional PBV contract units in projects that already have a HAP contract without having to fulfill the selection requirements (see 24 CFR 983.51(b)) for those added PBV units, regardless of when the HAP contract was signed. The additional PBV units, however, are still subject to the PBV program cap and the individual project caps, found in sections 8(o)(13)(B) and (D) of the 1937 Act, respectively. Furthermore, prior to attaching additional units without competition, the PHA must submit to the local field office the information described in section C.2.A above, which pertains to demonstrating the PHA is able to project-base additional units without exceeding the PHA program limitation on PBV units. PHAs must also detail their intent to add PBV units in this manner in their administrative plan, along with their rationale for adding PBVs to this specific project. This provision overrides the restriction in 24 CFR 983.207(b) that additional units may only be added to the HAP contract during the three-year period immediately following execution of the HAP contract. All of the other requirements under § 983.207(b) continue to apply.

E. Additional Contract Conditions

The new 8(o)(13)(F)(IV) allows the PBV HAP contract to have additional conditions, including conditions related to continuation, termination, or expiration. HUD is not adding any additional conditions to the PBV HAP contract at this time.

The section further requires that HAP contracts specify that, upon termination or expiration of a contract that is not extended, a family living at the property is entitled to receive a tenant-based voucher (the voucher that was previously providing project-based assistance for the family in the PBV project). The PHA must provide the family with a voucher and that family must also be given the option by the PHA and owner to remain in their unit with HCV tenant-based assistance if the unit complies with inspection requirements and rent reasonableness

requirements. The family must pay the total tenant payment (determined under 24 CFR part 5 subpart F) and any additional amount if the unit rent exceeds the applicable payment standard. The family has the right to remain in the project as long as the units are used for rental housing and are otherwise eligible for HCV assistance (for example, the rent is reasonable, unit meets HQS, etc.). The owner may not terminate the tenancy of a family that exercises its right to remain except for a serious or repeated lease violation or other good cause.

Families that receive a tenant-based voucher at the expiration or termination of the PBV HAP contract are not new admissions to the PHA HCV tenant-based program, and are not subject to income eligibility requirements or any other admission requirements. If the family chooses to remain in their unit with tenant-based assistance, the family may do so regardless of whether the family share would initially exceed 40 percent of the family's adjusted monthly income.

The statutory owner notice requirements related to the contract termination or expiration at 24 CFR 983.206 continue to apply to the PBV program. If the owner fails to provide timely notice of termination, the owner must permit the tenants in assisted units to remain in their units for the required notice period with no increase in the tenant portion of the rent, and with no eviction as a result of an owner's inability to collect an increased tenant portion of the rent. For families that wish to remain at the property, the HCV tenant-based assistance would not commence until the owner's required notice period ends.

Question for Comment

Are there additional parameters HUD should consider placing on PHAs and owners when amending HAP contract terms related to continuation, termination or expiration?

5. Preference for Families Who Qualify for Voluntary Services (§ 8(o)(13)(J) of 1937 Act)

Section 106(a)(7)(A) and (C) of HOTMA makes changes to section 8(o)(13)(J) of the 1937 Act to allow a PHA to allow owners with PBV contracts to create and maintain site-based waiting lists. HUD is not implementing these provisions at this time, but instead will pursue rulemaking.

However, section 106(a)(7)(B) of HOTMA provides that a PHA may establish a selection preference for families who qualify for voluntary

services, including disability-specific services, offered in conjunction with assisted units, provided that the preference is consistent with the PHA plan. This is a change from the current regulatory requirement at 24 CFR 983.251(d), that provides in selecting families, PHAs may give preference to disabled families who need the services offered at a particular project in accordance with the limits under the regulatory paragraph, regardless of whether the family qualifies for the supportive service and will actually be able to receive the supportive services. Note, however, that the prohibition on granting preferences to persons with a specific disability at 24 CFR 982.207(b)(3) continues to apply. This document provides PHAs with additional guidance and information on how to establish such preferences.

A. Selection Preference for Families Who Qualify for Voluntary Services

(1) Consistency With Nondiscrimination and Civil Rights Statutes and Requirements

Both the owner and the PHA are responsible for ensuring that the proposed preference is consistent with all applicable Federal nondiscrimination and civil rights statutes and requirements. This includes, but is not limited to, the Fair Housing Act, Title VI of the Civil Rights Act, Section 504 of the Rehabilitation Act, the Americans with Disabilities Act, and HUD's Equal Access Rule. See 24 CFR 5.105(a). It is also the responsibility of the PHA to ensure that an owner is carrying out the PHA's program in a manner consistent with Section 504. There are unique requirements regarding the selection preference when considered in the context of providing services for individuals with disabilities. In particular, the statutory language permitting a preference for individuals who qualify for voluntary services, including disability-specific services, must be read consistent with Federal laws that provide protections against discrimination based on disability and segregation of individuals with disabilities as well as the affirmative requirement that programs, services, and activities be provided in the most integrated setting appropriate to the needs of individuals with disabilities. Among these requirements, PHAs and owners, and in certain circumstances services providers, may not impose eligibility criteria that discriminate on the basis of disability, and must comply with the integration mandate.

The HOTMA amendments permit a PHA to establish a preference based on who qualifies for voluntary services, including disability-related services, offered in conjunction with the assisted units. Consistent with Federal nondiscrimination laws, qualifications or eligibility criteria, including for voluntary services, cannot be applied in a discriminatory manner. In particular, PHAs, owners, and service providers cannot impose additional admissions criteria that discriminate or are applied in a discriminatory manner. Any individual who is qualified for the services must be able to receive the preference, including qualified individuals with disabilities, regardless of disability type.

Voluntary services can consist of a variety of activities, including for example, meal service adequate to meet nutritional needs, housekeeping assistance, personal assistance, transportation services, case management, child care, education services, employment assistance and job training, counseling services, life skills training, and other services designed to help the recipient live in the community as independently as possible. Voluntary services can also include disability-specific services, such as mental health services, assistance with activities of daily living, personal assistance services, outpatient health services, and the provision of medication, which are provided to support a person with a disability. Such services may also include, for example, services provided by State Medicaid programs to promote community based settings for individuals with disabilities.

The revised statute permits such a preference to be established if it is consistent with the PHA plan. As part of the PHA plan review process, the Office of Fair Housing and Equal Opportunity, in consultation with the Office of General Counsel, will review each proposed preference for consistency with fair housing and civil rights requirements. As part of this process, HUD may request the PHA or owner provide any additional documentation necessary to determine consistency with the PHA plan and all applicable federal fair housing and civil rights requirements. In developing any proposed targeted preferences, PHAs must comply with the requirements outlined in PIH Notice 2012–31 and HUD's *Statement on the Role of Housing in Accomplishing the Goals of Olmstead*.

(2) Preferences for Disability-Specific Services

A PHA or owner may offer a preference for individuals who qualify for voluntary services offered in connection with the units. Such services may or may not include disability-specific services. For example, a preference may be only for persons who qualify for employment assistance, or for transportation services, or a preference may be for persons who qualify for either housekeeping assistance, case management, or outpatient health services. If a PHA or owner decides, however, that the only preference that will be offered is based on qualification for a disability-specific service, it is especially important for the entity to consider how to implement this preference consistent with Section 504 and the ADA, and their implementing regulations.

Further, the statutory language allowing an agency or owner to give preference to families who qualify for voluntary services, including disability-specific services, must be implemented consistent with the integration mandate under Section 504 and Title II of the ADA. 24 CFR 8.4(d); 28 CFR 35.130(d). The integration mandate, as mentioned earlier in the notice, requires that covered entities ensure persons with disabilities can interact with persons without disabilities to the fullest extent possible. HUD has provided guidance on what the Department considers integrated settings in the housing context:

“Integrated settings also enable individuals with disabilities to live independently with individuals without disabilities and without restrictive rules that limit their activities or impede their ability to interact with individuals without disabilities. Examples of integrated settings include scattered-site apartments providing permanent supportive housing, tenant-based rental assistance that enables individuals with disabilities to lease housing in integrated developments, and apartments for individuals with various disabilities scattered throughout public and multifamily housing developments.”²

By contrast, HUD has stated that segregated settings are “occupied exclusively or primarily by individuals with disabilities.”³

² Statement of the Department of Housing and Urban Development on the Role of Housing in Accomplishing the Goals of Olmstead, <http://portal.hud.gov/hudportal/documents/huddoc?id=OlmsteadGuidnc060413.pdf>.

³ The U.S. Department of Justice provides additional relevant guidance on the application of the integration mandate under Title II and Section 504 in its Statement of the Department of Justice on Enforcement of the Integration Mandate of Title II of the Americans with Disabilities Act and Olmstead v. L.C., <https://www.ada.gov/olmstead/>

In addition, requirements under the Fair Housing Act, including the regulatory obligation under 24 CFR 100.70(c)(4) regarding dispersion of units occupied by individuals with disabilities and not assigning individuals with disabilities to a particular section or floor of a building, continue to apply.

As more states implement requirements under Title II of the ADA and *Olmstead*, which are focused on transitioning individuals from institutional and other segregated settings into integrated community-based settings, as well as assisting individuals at risk of institutionalization from entering such settings, there is an increased need for affordable, integrated, and accessible housing opportunities. To assist with these concerns, PHAs or owners may want to coordinate with other relevant agencies implementing *Olmstead* planning and transition planning related to the Centers for Medicare and Medicaid Services (CMS)' Home and Community-Based Setting (HCBS) regulation in their State. HUD encourages the PHA or owner to consult with the relevant agencies who make determinations as to whether the housing qualifies as a HCBS under the CMS regulations to allow for State Medicaid funding to be accessed at the site. The CMS regulations specify the qualities that HCBS must have in order to receive funding, including that the setting is integrated.

B. Informed Client Choice and Self-Determination

HUD emphasizes the importance of client choice, independence, and self-determination in implementing this provision. Consistent with the statutory language, as well as federal fair housing and civil rights requirements, participation in services is voluntary. Accordingly, the existing regulatory language at 24 CFR 982.251(d)(2) stating that residents with disabilities shall not be required to accept the particular services at the project continues to apply. Program beneficiaries who receive housing because of the preference still have the ability to receive voluntary services from a service provider of their choosing, or choose not to participate in services at all. Similarly, an individual who chooses to no longer participate in a service or who no longer qualifies for services he or she did qualify for at the time of initial occupancy cannot subsequently be denied a continued housing opportunity

because of this changed circumstance. A PHA or owner also cannot determine that a participant's needs exceed the level of care offered by qualifying services or require that individuals be transitioned to different projects based on service needs.

C. Additional Requirements

- PHAs and project owners must also ensure that their programs are operated in a manner to affirmatively further fair housing under the Fair Housing Act, 42 U.S.C. 3608, and related authorities, such as the Affirmatively Furthering Fair Housing Rule, 24 CFR 5.150 *et seq.*

- Housing providers cannot use a preference to impose additional criteria that intentionally discriminates against members of any protected class or may result in a discriminatory effect. For recent HUD guidance on discriminatory effects under the Fair Housing Act, see Office of General Counsel Guidance on Application of Fair Housing Act Standards to the Use of Criminal Records by Providers of Housing and Real Estate-Related Transactions, https://portal.hud.gov/hudportal/documents/huddoc?id=HUD_OGCGuidAppFHASandCR.pdf; Office of General Counsel Guidance on Fair Housing Act Protections for Persons with Limited English Proficiency, <http://portal.hud.gov/hudportal/documents/huddoc?id=lepmemo091516.pdf>.

- PHAs and owners must also ensure their implementation of preferences and other operations comply with other Federal nondiscrimination requirements. This includes, among other requirements, providing reasonable accommodations for persons with disabilities, auxiliary aids and services necessary to ensure effective communication with individuals with disabilities, which includes ensuring that information is provided in appropriate accessible formats as needed, *e.g.*, Braille, audio, large type, accessible web-based applications, assistive listening devices, and sign language interpreters, and taking reasonable steps to maximize the utilization of accessible units (units accessible to persons with mobility impairments and units accessible to persons with hearing or vision impairments) by eligible individuals who need the accessibility features of the particular unit. For additional guidance on permissible PHA preferences, please see the *Statement of the Department of Housing and Urban Development on the Role of Housing in Accomplishing the Goals of Olmstead*, <http://portal.hud.gov/hudportal/documents/huddoc?id=OlmsteadGuidnc060413.pdf>, and PIH Notice 2012-31,

<http://portal.hud.gov/hudportal/documents/huddoc?id=pih2012-31.pdf>. In addition, HUD anticipates issuing additional guidance on the application of HOTMA, including fair housing guidance.

6. Attaching PBVs to Structures Owned by PHAs (§ 8(o)(13)(N) of 1937 Act)

The new section 8(o)(13)(N) allows PHAs to attach PBVs to projects in which the PHA has an ownership interest or has control of, without following a competitive process, in cases where the PHA is engaged in an initiative to improve, develop, or replace a public housing property or site. The PHA's ownership interest does not have to meet the definition of the term "owned by a PHA" established by section 105 of HOTMA. For purposes of this section, an ownership interest means that the PHA or its officers, employees, or agents are in an entity that holds any such direct or indirect interest in the building, including, but not limited to an interest as: titleholder; lessee; a stockholder; a member, or general or limited partner; or a member of a limited liability corporation. These PBV projects are still subject to all other applicable PBV requirements.

In order to be subject to this non-competitive exception, the PHA must be planning rehabilitation or construction on the project with a minimum of \$25,000 per unit in hard costs. The PHA must detail in its PHA administrative plan what work it plans to do on the property or site and how many units of PBV it is planning on adding to the site.

This section overrides the regulatory requirements for selection of PBV proposals at 24 CFR 983.51(b).

Questions for Comment

1. Is the \$25,000 per unit threshold appropriate for this exception from the competitive process? HUD chose the \$25,000 threshold based on the findings of the 2010 Capital Needs study on the average existing capital need per public housing unit, but is seeking public comment on other possible dollar thresholds or methodologies for determining whether a PHA's rehabilitation or construction projects qualifies as an initiative to improve, develop, or replace a public housing property or site.

2. The law provides that this section is applicable to a PHA that has an ownership interest in or has control of the project. Are there examples or cases where a PHA may have control of a project but would not have any ownership interest in the project that HUD should address in future implementing guidance or when

q&a_olmstead.htm and its *Olmstead* compliance and enforcement efforts, <https://www.ada.gov/olmstead/index.htm>.

conforming the regulation to these provisions?

7. Project-Basing Special-Purpose Vouchers (§ 8(o)(13)(O) of 1937 Act)

HOTMA added a new section 8(o)(13)(O) to the 1937 Act, allowing PHAs to project-base Family Unification Program (FUP) and HUD-VASH vouchers without requiring additional HUD approval. This document serves as official notice that this statutory change is effective as of *April 18, 2017*. This document also provides additional information on how PHAs may project-base HUD-VASH or FUP vouchers.

All normally applicable PBV requirements under 24 CFR part 983 or implemented through this document apply to project-based FUP and HUD-VASH vouchers, and PHAs must continue to meet all of their obligations to assist the required number of HUD-VASH and FUP families for their HCV programs.

A. HUD-VASH Vouchers

The most current requirements for the HUD-VASH program may be found in PIH Notice 2015–10. In that notice, HUD requires that PHAs wishing to project-base HUD-VASH vouchers must meet certain requirements in order to do so. Those PBV requirements are now superseded by the statutory amendments made by HOTMA.

However, statutory authorization for the HUD-VASH program, including section 8(o)(19) of the 1937 Act and the FY 2016 appropriations Act,⁴ requires that PHAs conduct their HUD-VASH programs in conjunction with a Veterans Administration Medical Center (VAMC), which must make supportive services available to individuals receiving HUD-VASH assistance. Therefore, in order to meet the requirement that the PHA provide rental assistance in conjunction with a VAMC's ability to provide supportive services, PHAs wishing to project-base HUD-VASH vouchers must consult with their partner VAMC to ensure that the VAMC will be able to continue to provide supportive services should the PHA project-base its HUD-VASH vouchers. Furthermore, PHAs that received HUD-VASH PBV set-aside funds must continue to comply with all of the terms and conditions that apply to those vouchers.

B. Family Unification Program (FUP) Vouchers

HOTMA also allows PHAs to project-base vouchers awarded to the PHA for

the FUP program without further approval from HUD. However, HUD encourages PHAs wishing to do so to consider whether project-basing such vouchers yields significant benefits, whether doing so would limit the ability of youth to use such vouchers, and whether project-basing FUP vouchers would allow the PHA to serve the populations eligible for FUP vouchers in such a way as to keep the units filled. A PHA project-basing FUP vouchers may limit the project-based vouchers to one category of FUP eligible families, such as making the project-based vouchers exclusively available for FUP-youth.

Questions for Comment

1. Is there an advantage to grouping FUP families (either FUP families, FUP youth, or all FUP families) in one project (as opposed to interspersed with other PBV units in a PHA's portfolio)?
2. How would the PHA administer waitlists and preferences to manage FUP availability across multiple waitlists?
3. How do PHAs ensure mobility access with a time-limited voucher (*i.e.*, FUP voucher that is assisting a FUP-eligible youth)?
4. How do PHAs ensure full occupancy of PBV units with time-limited vouchers and limited numbers?

D. Using Vouchers in Manufactured Housing (HOTMA § 112)

Section 112 of HOTMA amends section 8(o)(12) of the 1937 Act with respect to the use of voucher assistance provided to families that are owners of manufactured housing. Prior to the HOTMA amendment, voucher assistance payments on behalf of owners of manufactured housing under section 8(o)(12) could only be made to assist the manufactured home owner with the rent for the space on which the manufactured home is located (the manufactured home space). Section 112 expanded the definition of "rent" for manufactured home owners receiving voucher assistance to also include other housing expenses, specifically the monthly payments made by the family to amortize the cost of purchasing the manufactured home (including any required insurance and property taxes) and tenant-paid utilities.

The use of housing assistance payments to assist a manufactured home owner with the rent of the manufactured home space and other eligible expenses continues to be a special housing type under 24 CFR part 982 subpart M. In general, the PHA is not required to permit families to use any of the special housing types and may limit the number

of families using special housing types. However, the PHA must permit use of any special housing type if needed as a reasonable accommodation so that the program is readily accessible to and usable by persons with disabilities in accordance with 24 CFR part 8.

For manufactured home owners that are currently receiving HCV assistance to rent the manufactured home space in accordance with 24 CFR 982.622 through 982.624, the PHA must implement the HOTMA changes to the calculation of "rent" and the amount of subsidy effective on the first regular reexamination following the effective date of this document, or no later than one year after the effective date of this document (if the first regular examination falls after that date). The new subsidy calculation shall apply from that point on during the term of the HAP contract.

24 CFR 982.622 and 982.624 continue to apply for HCV assistance provided on behalf of a manufactured home owner that is renting the manufactured home space. Section 982.623, which covers how the housing assistance payment is calculated, is no longer applicable. Instead, if a PHA chooses to provide voucher assistance to a manufactured home owner who is renting the manufactured home space, the monthly housing assistance payment is calculated as the lower of:

- (a) The PHA payment standard minus the total tenant payment; or
- (b) The rent of the manufactured home space (including other eligible housing expenses) minus the total tenant payment.

The PHA payment standard is determined in accordance with 24 CFR 982.505 and is the payment standard used for the PHA's HCV program. The payment standard for the family is the lower of the payment standard amount for the family unit size or the payment standard amount for the size (number of bedrooms) of the manufactured home. The separate fair market rent (FMR) for a manufactured home space is no longer applicable to establishing the payment standard for a manufactured homeowner who is renting the manufactured home space since the payment is assisting the homeowner with other housing expenses. The PHA payment standard will be based on the applicable HUD published FMR for the area in which the manufactured home space is located.

The rent of the manufactured home space (including other eligible housing expenses) is the total of:

- (a) The rent charged for the manufactured home space;

⁴ Division L, Title II of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113, approved December 18, 2015).

(b) owner maintenance and management charges for the space;

(c) the monthly payments made by the family to amortize the cost of purchasing the manufactured home, including any required insurance and property taxes; and

(d) the applicable allowances for tenant paid utilities.

The monthly payment made by the family to amortize the cost of purchasing the manufactured home is the debt service established at the time of application to a lender for financing the purchase of the manufactured home if monthly payments are still being made. Any increase in debt service due to refinancing after purchase of the home may not be included in the amortization cost. Debt service for set-up charges incurred by a family may be included in the monthly amortization payments made by the family. In addition, set-up charges incurred before the family became an assisted family may be included in the amortization cost if monthly payments are still being made to amortize the charges.

The total amount for the rent of the manufactured home space and the other eligible expenses is reported in PIC on the HUD-50058 on line 12k, even though it includes amounts in addition to the total monthly rent payable to the owner under the lease for the contract unit.

The utility allowances are the applicable utility allowances from the PHA utility allowance schedule under 24 CFR 982.517 and 982.624.

If the amount of the monthly assistance payment for a family exceeds the monthly rent for the manufactured home space (including the owner's monthly management and maintenance charges), the PHA may pay the remainder to the family, lender or utility company.

HOTMA further provides that the PHA may choose to make a single payment to the family for the entire monthly assistance amount rather than making the HAP directly to the owner of the manufactured home space the family is renting. HUD is not implementing this option at this time but is seeking comment on how to best implement this option, including how to best ensure the PHA may still take enforcement action when necessary against an owner who fails to fulfill his or her responsibilities under the HCV program.

Question for Comment

When implementing the option to allow the PHA to make a single HAP directly to the family, how would HUD ensure that a PHA take enforcement

action against an owner of a manufactured home space who fails to fulfill his or her responsibilities under the HCV program? Would a manufactured home park owner be willing to enter into a contract under which he or she would receive no direct payment?

III. Environmental Impact Certification

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations in 24 CFR part 50 that implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The FONSI is available for public inspection on www.regulations.gov.

Dated: January 10, 2017.

Nani Coloretti,

Deputy Secretary.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR 30

[178A2100DD/AAKC001030/
A0A501010.999900 253G]

Proposed Membership of the Bureau of Indian Education Accountability Negotiated Rulemaking Committee

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed membership of negotiated rulemaking committee; request for nominations; and request for comments.

SUMMARY: The Secretary of the Interior has selected proposed members to form the Bureau of Indian Education (BIE) Accountability Negotiated Rulemaking Committee (Committee) which will recommend revisions to the existing regulations to implement the Secretary's responsibility to define the standards, assessments, and accountability system for Bureau-funded schools, as required by the Every Student Succeeds Act (ESSA). Representatives were nominated by Tribes whose students attend Bureau-funded schools. After considering nominations, the Secretary proposes to appoint the persons named in this notice as Tribal Committee members. Tribes, Tribal organizations, and individual Tribal members may submit comments on the proposed Tribal Committee membership, apply for Tribal membership on the

Committee, or submit other nominations for Tribal membership on the Committee. The Secretary also proposes to appoint Federal representatives to the Committee as listed.

DATES: Comments on the proposed Tribal members of this Committee must be submitted no later than February 17, 2017.

ADDRESSES: Send comments and nominations to the Designated Federal Official: Sue Bement, Education Program Specialist, Bureau of Indian Education, C/O Office of Regulatory Affairs and Collaborative Action, 1001 Indian School Road NW., Suite 312, Albuquerque, NM 87104. Or email at: BIEcomments@bia.gov.

FOR FURTHER INFORMATION CONTACT: Sue Bement, Designated Federal Official; email BIEcomments@bia.gov.

SUPPLEMENTARY INFORMATION:

Background

The purpose of the BIE Committee is to serve as an advisory committee under the Federal Advisory Committee Act (FACA) and the Negotiated Rulemaking Act (NRA) in a manner that:

(1) Reflects the unique government-to-government relationship between American Indian Tribes and the United States;

(2) Ensures that the membership of the Committee includes only representatives of the Federal Government and Tribes; and

(3) To the extent possible, allots Tribal representation based upon the Tribes' proportionate share of the total enrollment in Bureau-funded schools.

The Secretary has determined that the proper functioning of the Committee requires that the Committee be limited to no more than the 25 members recommended by the NRA (5 U.S.C. 565). The Secretary has selected 19 Tribal representatives and 6 Federal representatives for the Committee, for a proposed total of 25 members.

The Secretary finds that the proposed Tribal representatives for the Committee:

(1) Represent a balance of interests that will be significantly affected by the final rules (*i.e.*, parents; teachers; school board members; and administrators of Tribal and Tribally operated contract day schools, grant day schools, grant boarding schools, and peripheral dormitories);

(2) Proportionately represent students from Tribes served by Bureau-funded schools;

(3) Reflect the different varieties of school size, type of school and facility, and geographical location; and

(4) Have been selected using a process that considers the nominees' experience and expertise in Indian education.

Every Student Succeeds Act (ESSA)

The ESSA reauthorizes and amends the Elementary and Secondary Education Act of 1965 (ESEA). ESSA Section 8007(2) directs the Secretary of the Interior, in consultation with the Secretary of Education, if so requested, to use a negotiated rulemaking process to develop regulations for implementation of the Secretary of the Interior's defined standards, assessments, and accountability system for Bureau-funded schools no later than the 2017–2018 academic year. The Committee will recommend revisions to the existing regulations (25 CFR part 30) to replace Adequate Yearly Progress (AYP) regulatory language and implement the Secretary's statutory responsibilities. The regulations will define the standards, assessments, and accountability system, consistent with Section 1111 of the ESEA, for Bureau-funded schools on a national, regional, or Tribal basis.

ESSA Section 8007(2) also provides that if a Tribal governing body or school board of a Bureau-funded school determines the requirements established by the Secretary of the Interior are inappropriate, they may waive, in part or in whole, such requirements. Where such requirements are waived, the Tribal governing body or school board must, within 60 days, submit to the Secretary of the Interior a proposal for alternative standards, assessments, and an accountability system, if applicable, consistent with ESEA Section 1111. The proposal must take into account the unique circumstances and needs of the school or schools and the students served. The proposal will be approved by the Secretary of the Interior and the Secretary of Education, unless the proposed standards, assessments, and accountability system do not meet the requirements of ESEA Section 1111. Additionally, a Tribal governing body or school board of a Bureau-funded school seeking a waiver may request, and the Secretary of the Interior and the Secretary of Education will provide, technical assistance.

Proposed Work of the Committee

The Committee will attempt to reach consensus on draft regulatory language for implementation by the 2017–2018 academic year. The objectives of the Committee are to represent the interests that will be significantly affected by the final regulations, negotiate in good faith, and reach consensus, where possible, on

recommendations to the Secretary for the proposed regulations.

The Committee will be charged, consistent with ESSA Section 8007, with developing draft regulations to implement the Secretary's responsibility to define the standards, assessments, and an accountability system, consistent with ESEA Section 1111, for Bureau-funded schools. The draft regulations will be considered by the Secretary and subject to government-to-government consultation. The Department must have final regulations for implementation by the 2017–2018 academic year. As a part of its deliberations, the Committee will consider the appropriate scope of the draft regulations, *e.g.*, national, regional, or Tribal basis, as appropriate, taking into account the unique circumstances and needs of such schools and the students served by such schools, and how BIE will implement such regulations.

The BIE encourages Tribal self-determination in Native education, by encouraging governing Tribes or school boards to develop alternative standards, assessments, and accountability systems, and by providing technical assistance. Therefore, the Committee will also be asked to provide recommendations on how BIE could best provide technical assistance under ESSA Section 8007(2) to Tribes who opt to exercise their authority to adopt their own standards, assessments, and an accountability system).

Since the Department must have final regulations in place by the 2017–2018 academic year, the Committee will be expected to meet frequently within a short time frame, *i.e.*, from the time of establishment through summer 2017. BIE currently anticipates up to six meetings, with each meeting lasting three days in length. The BIE has dedicated resources required to: ensure the Committee is able to conduct meetings, provide technical assistance, and provide any additional support required to fulfill the Committee's responsibilities.

Proposed Tribal Committee Members

On November 9, 2015, the BIE published a notice of intent (80 FR 69161) requesting comments and nominations for Tribal representatives for the Committee. The comment period for that notice of intent closed December 24, 2015. On April 14, 2016, the BIE reopened the comment and nomination period with a new deadline of May 31, 2016 (81 FR 22039). The BIE further extended the comment period for Tribes to nominate individuals for membership on the Committee on August 17, 2016

(81 FR 54768) with a closing date of October 3, 2016.

Within each of those notices, the BIE solicited comments on the proposal to establish the Committee, including comments on any additional interests not identified. Within each of those notices, the BIE solicited nominations from Tribes whose students attended Bureau-funded schools operated either by BIE or by a Tribe or tribal organization through a contract or grant, to nominate Tribal representatives to serve on the Committee and Tribal alternates to serve when the representative is unavailable. Based upon the proportionate share of students, some Tribes similar in affiliation or geography were grouped together for one seat. BIE asked those Tribes to either co-nominate a single Tribal representative to represent the multi-tribal jurisdiction or for each Tribe in the multi-Tribal jurisdiction to nominate a representative with the knowledge that the Secretary will be able to appoint only one of the nominees who will be responsible for representing the entire multi-Tribal jurisdiction on the Committee. A chart demonstrating the proportionate share of students attending Bureau-funded schools can be found in the **Federal Register** at 80 FR 69161, dated November 9, 2015.

The Secretary of the Interior proposes the following Tribal representatives for the BIE Committee, who:

- Have knowledge of school assessments and accountability systems;
- Have relevant experiences as past or present superintendents, principals, teachers, or school board members, or possess direct experience with AYP;
- Are able to coordinate, to the extent possible, with other Tribes and schools who may not be represented on the Committee;
- Are able to present the Tribe(s) with the authority to embody Tribal views, communicate with Tribal constituents, and have a clear means to reach agreement on behalf of the Tribe(s);
- Are able to negotiate effectively on behalf of the Tribe(s) represented;
- Are able to commit the time and effort required to attend and prepare for meetings; and
- Are able to collaborate among diverse parties in a consensus-seeking process.

The proposed Committee was selected based upon nominations submitted through the process identified in each of the **Federal Register** notices under the "Nominations" or "Submitting Nominations" section. The BIE did not consider nominations that were received in any other manner or were

received after the close of each comment period.

The Secretary proposes the following Tribal representatives for the Committee:

Tribe(s) represented	Proposed committee members	Nominated by
Navajo Nation (Total seats = 5)	Dr. Tommy Lewis, Superintendent of Schools, Department of Diné Education. Dr. Calvin White, Office of Diné School Improvement. Dr. Florinda Jackson, Office of Diné Accountability and Compliance. Lemual Adson, Superintendent, Shonto Preparatory School	Navajo Nation.
Sioux Tribes (Total seats = 2)	Charles Cuny, Jr., Superintendent, Little Wound School. Dr. Glori Coats-Kitsopoulos, Superintendent, American Horse School	Oglala Sioux Tribe.
Hopi and Pueblo Tribes (Total seats = 1).	E. David Atencio, Superintendent, Laguna Department of Education ..	Pueblo of Laguna.
Chippewa Tribes (Total seats = 2)	Leslie Harper, Executive Assistant, Leech Lake Band of Ojibwe Tribal Council.	Leech Lake Band of Ojibwe.
Gila River, Apache, Etc. (Total seats = 1).	Isaac Salcido, Director of Tribal Education, Gila River Indian Community.	Gila River Indian Community.
Choctaw (MS) & Cherokee (NC) (Total seats = 1).	Sherry Tubby, Exceptional Education Coordinator	Mississippi Band of Choctaw Indians.
Other Tribes (Total seats = 4)	Quinton Roman Nose, Executive Director, Tribal Education Departments National Assembly. Ron Etheridge, Deputy Executive Director for the Education Services at Cherokee Nation. Alban Naha, Interim Superintendent, Hopi Junior-Senior High School. Michael Dabrieo, Principal, Kha'p'o Community School.	Cheyenne Arapaho Tribes. Cherokee Nation of Oklahoma. Hopi Tribe. Santa Clara Pueblo.

The Secretary proposes the following alternate Tribal representatives for the BIE Committee:

Tribe(s) represented	Proposed alternate committee members	Nominated by
Chippewa Tribes	Jason Schlender, Tribal Governing Board Representative and Education Liaison.	Lac Courte Oreilles Band of Lake Superior Chippewa Indians.
Choctaw (MS) & Cherokee (NC)	Lucretia Williams, Project Coordinator, Tribal Education Department ..	Mississippi Band of Choctaw Indians.
Other Tribes	Chuck Hoskin, Chief of Staff, Cherokee Nation of Oklahoma Rebecca Fred, Instructional Coach, Moencopi Day School Paula Gutierrez, Board President, Kha'p'o Community School	Cherokee Nation of Oklahoma. Hopi Tribe. Santa Clara Pueblo.

Proposed Federal Committee Members

The Secretary proposes the following Federal representatives for the BIE Committee:

Name	Affiliation
Sue Bement ...	Designated Federal Officer, Bureau of Indian Education.
Dr. Jeffrey Hamley.	Associate Deputy Director, Division of Performance and Accountability, Bureau of Indian Education.
Brian Quint	Attorney-Advisor, Office of the Solicitor.

The Secretary proposes the following alternate Federal representatives for the BIE Committee:

Name	Affiliation
Regina Gilbert	Regulatory Policy Specialist, Office of Regulatory Affairs and Collaborative Action.

Name	Affiliation
Jim Hastings ..	Acting Associate Deputy Director and Education Program Administrator, Bureau of Indian Education.
Brenda Riel	Attorney-Advisor, Office of the Solicitor

If you are a Tribe with Bureau-funded schools, an Indian education organization, or an interested individual, we invite you to comment on the nominations in this notice or to nominate other persons for membership on the Committee. The Committee membership should reflect the diversity of Tribal interests, and Tribes should nominate representatives and alternates who will:

- Have knowledge of school assessments and accountability systems;
- Have relevant experiences as past or present superintendents, principals, teachers, or school board members, or possess direct experience with AYP;
- Be able to coordinate, to the extent possible, with other Tribes and schools

who may not be represented on the Committee;

- Be able to present the Tribe(s) with the authority to embody Tribal views, communicate with Tribal constituents, and have a clear means to reach agreement on behalf of the Tribe(s);

- Be able to negotiate effectively on behalf of the Tribe(s) represented;

- Be able to commit the time and effort required to attend and prepare for meetings; and

- Be able to collaborate among diverse parties in a consensus-seeking process.

We will consider nominations for Tribal committee representatives only if they are nominated through the process identified in this notice of intent and in the **Federal Register** notice of intent at 80 FR 69161. We will not consider any nominations that we receive in any other manner. We will also not consider nominations for Federal representatives. Only the Secretary may nominate Federal employees to the Committee.

Nominations must include the following information about each nominee:

(1) A letter from the Tribe supporting the nomination of the individual to serve as a Tribal representative for the Committee and a statement on whether the nominee is only representing one Tribe's views, or whether the expectation is that the nominee represents a specific group of Tribes. Also include the Tribal interest(s) to be represented by the nominee (see Section IV, Part F of **Federal Register** notice of intent at 80 FR 69161);

(2) A resume reflecting the nominee's qualifications and experience in Indian education; resume to include the nominee's name, Tribal affiliation, job title, major job duties, employer, business address, business telephone, and fax numbers (and business email address, if applicable); and

(3) A brief description of how the nominee will represent Tribal views, communicate with Tribal constituents, and have a clear means to reach agreement on behalf of the Tribe(s) they are representing.

We will consider only comments and nominations that we receive by the close of business Eastern Standard Time on the date listed in the **DATES** section, at the location indicated in the **ADDRESSES** section. Comments received will be available for inspection at the address listed above from 8 a.m. to 4 p.m., Monday through Friday, except Federal holidays. Before including your address, phone number, email address or other personal identifying information in your comment, please note that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comments to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: January 11, 2017.

Lawrence S. Roberts,
Principal Deputy Assistant Secretary—Indian Affairs.

Rules Regarding Inversions and Related Transactions; Partial Withdrawal of Notice of Proposed Rulemaking

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Partial withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws portions of a notice of proposed rulemaking (REG-135734-14) published on April 8, 2016, in the **Federal Register** (81 FR 20588). The withdrawn portions relate to exceptions to general rules addressing certain transactions that are structured to avoid the purposes of section 7874 of the Internal Revenue Code (Code).

DATES: Portions of the proposed rules published on April 8, 2016, in the **Federal Register** (81 FR 20588) are withdrawn as of January 18, 2017.

FOR FURTHER INFORMATION CONTACT: Joshua G. Rabon, (202) 317-6937.

SUPPLEMENTARY INFORMATION:

Background

On April 8, 2016, the Department of the Treasury (Treasury Department) and the IRS published in the **Federal Register** (81 FR 20588) proposed regulations (REG-135734-14), including in §§ 1.7874-7 and 1.7874-10, that address certain transactions that are structured to avoid the purposes of section 7874 of the Code. The regulations were proposed by cross-reference to temporary regulations (TD 9761) in the same issue of the **Federal Register** (81 FR 20858). In the Rules and Regulations section of this issue of the **Federal Register**, the Treasury Department and the IRS are amending certain aspects of the temporary regulations in §§ 1.7874-7T and 1.7874-10T. Accordingly, the Treasury Department and the IRS are issuing a notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register** that proposes rules in §§ 1.7874-7 and 1.7874-10 by cross-reference to the amended temporary regulations. This document withdraws the previously proposed regulations that are replaced by the notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register**.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Partial Withdrawal of a Notice of Proposed Rulemaking

Accordingly, under the authority of 26 U.S.C. 7805, §§ 1.7874-7(c)(2) and (h) and 1.7874-10(d)(2) and (i) of the notice of proposed rulemaking (REG-135734-14) published in the **Federal Register** on April 8, 2016 (81 FR 20588) are withdrawn.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the Department of the Treasury (Treasury Department) and the IRS are amending portions of temporary regulations that address certain transactions that are structured to avoid the purposes of section 7874 of the Internal Revenue Code (Code). The temporary regulations affect certain domestic corporations and domestic partnerships whose assets are directly or indirectly acquired by a foreign corporation and certain persons related to such domestic corporations and domestic partnerships. The text of the temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** also serves as the text of these proposed regulations.

DATES: Written or electronic comments and requests for a public hearing must be received by April 18, 2017.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG-135734-14), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20224. Submissions

may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG-135734-14), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, or sent electronically via the Federal eRulemaking Portal at <http://www.regulations.gov> (IRS REG-135734-14).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Joshua G. Rabon (202) 317-6937; concerning submissions of comments or requests for a public hearing, Regina Johnson, (202) 317-5177 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** amend portions of the regulations under section 7874 of the Code concerning the de minimis exceptions to the general rules of §§ 1.7874-7T (disregard of certain stock attributable to passive assets) and 1.7874-10T (disregard of certain distributions). The text of those temporary regulations also serves as the text of the proposed regulations herein. The preamble to those temporary regulations, which is also the preamble to certain final regulations under section 7874, explains the temporary regulations, the corresponding proposed regulations, and the final regulations.

Special Analyses

Certain IRS regulations, including these, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory assessment is not required. Because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f), this notice of proposed rulemaking has been submitted to the Chief Counsel of Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the "Addresses" heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be

available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person that timely submits electronic or written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Joshua G. Rabon of the Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding entries to read in part as follows:

Authority: 26 U.S.C. 7805 * * *
 Section 1.7874-7 also issued under 26 U.S.C. 7874(c)(6) and 7874(g).
 * * * * *
 Section 1.7874-10 also issued under 26 U.S.C. 7874(c)(4) and 7874(g).
 * * * * *

■ **Par. 2.** Section 1.7874-7 is added to read as follows.

§ 1.7874-7 Disregard of certain stock attributable to passive assets.

(a) through (c)(1) [Reserved]
 (2) [The text of proposed § 1.7874-7(c)(2) is the same as the text of § 1.7874-7T(c)(2) as revised elsewhere in this issue of the **Federal Register**.]
 (d) through (g) [Reserved]
 (h) [The text of proposed § 1.7874-7(h) is the same as the text of § 1.7874-7T(h) as revised elsewhere in this issue of the **Federal Register**.]

■ **Par. 3.** Section 1.7874-10 is added to read as follows:

§ 1.7874-10 Disregard of certain distributions.

(a) through (d)(1) [Reserved]
 (2) [The text of proposed § 1.7874-10(d)(2) is the same as the text of § 1.7874-10T(d)(2) as revised elsewhere in this issue of the **Federal Register**.]
 (e) through (h) [Reserved]
 (i) [The text of proposed § 1.7874-10(i) is the same as the text of § 1.7874-

10T(i) as revised elsewhere in this issue of the **Federal Register**.]

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG-131643-15]

RIN-1545-BN05

Definitions of Qualified Matching Contributions and Qualified Nonelective Contributions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed amendments to the definitions of qualified matching contributions (QMACs) and qualified nonelective contributions (QNECs) under regulations relating to certain qualified retirement plans that contain cash or deferred arrangements under section 401(k) or that provide for matching contributions or employee contributions under section 401(m). Under these regulations, employer contributions to a plan would be able to qualify as QMACs or QNECs if they satisfy applicable nonforfeitability and distribution requirements at the time they are allocated to participants' accounts, but need not meet these requirements when they are contributed to the plan. These regulations would affect participants in, beneficiaries of, employers maintaining, and administrators of tax-qualified plans that contain cash or deferred arrangements or provide for matching contributions or employee contributions.

DATES: Comments and requests for a public hearing must be received by April 18, 2017.

ADDRESSES: Send submissions to CC:PA:LPD:PR (REG-131643-15) Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG-131643-15), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, or sent electronically via the Federal eRulemaking Portal at

www.regulations.gov (IRS REG-131643-15).

FOR FURTHER INFORMATION CONTACT:

Concerning the proposed regulations, Rosemary Y. Oluwo at (202) 317-6060; concerning submissions of comments or to request a hearing, Regina Johnson at (202) 317-6901 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

Section 401(k)(1) provides that a profit-sharing or stock bonus plan, a pre-ERISA money purchase plan, or a rural cooperative plan shall not be considered as failing to satisfy the requirements of section 401(a) merely because the plan includes a qualified cash or deferred arrangement (CODA). To be considered a qualified CODA, a plan must satisfy several requirements, including: (i) Under section 401(k)(2)(B), amounts held by the plan's trust that are attributable to employer contributions made pursuant to an employee's election must satisfy certain distribution requirements; (ii) under section 401(k)(2)(C), an employee's right to such employer contributions must be nonforfeitable; and (iii) under section 401(k)(3), such employer contributions must satisfy certain nondiscrimination requirements.

Under section 401(k)(3)(D)(ii), the employer contributions taken into account for purposes of applying the nondiscrimination requirements may, under such rules as the Secretary may provide and at the election of the employer, include, in addition to contributions made pursuant to an employee's election, matching contributions that meet the distribution and nonforfeatability requirements of section 401(k)(2)(B) and (C) and qualified nonelective contributions within the meaning of section 401(m)(4)(C). Under section 401(m)(4)(C), a qualified nonelective contribution is an employer contribution, other than a matching contribution, with respect to which the distribution and nonforfeatability requirements of section 401(k)(2)(B) and (C) are met.

Under § 1.401(k)-1(b)(1)(ii), a CODA satisfies the applicable nondiscrimination requirements if it satisfies the actual deferral percentage (ADP) test of section 401(k)(3), described in § 1.401(k)-2. The ADP test limits the degree of disparity permitted between the percentage of compensation made as employer contributions to the plan for a plan year on behalf of eligible highly compensated employees and the percentage of compensation made as employer contributions on behalf of

eligible nonhighly compensated employees. If the ADP test limits are exceeded, the employer must take corrective action to ensure that the limits are met. In determining the amount of employer contributions made on behalf of an eligible employee, employers are allowed to take into account certain qualified matching contributions (QMACs) and qualified nonelective contributions (QNECs) made on behalf of the employee by the employer.

In lieu of applying the ADP test, an employer may choose to design its plan to satisfy an ADP safe harbor, including the ADP safe harbor provisions of section 401(k)(12), described in § 1.401(k)-3. Under § 1.401(k)-3, a plan satisfies the ADP safe harbor provisions of section 401(k)(12) if, among other things, it satisfies certain contribution requirements. With respect to the safe harbor under section 401(k)(12), an employer may choose to satisfy the contribution requirement by providing a certain level of QMACs or QNECs to eligible nonhighly compensated employees under the plan.

A defined contribution plan that provides for matching or employee after-tax contributions must satisfy the nondiscrimination requirements under section 401(m) with respect to those contributions for any plan year. Under § 1.401(m)-1(b)(1), the matching contributions and employee contributions under a plan satisfy the nondiscrimination requirements for a plan year if the plan satisfies the actual contribution percentage (ACP) test of section 401(m)(2) described in § 1.401(m)-2.

The ACP test limits the degree of disparity permitted between the percentage of compensation made as matching contributions and after-tax employee contributions for or by eligible highly compensated employees under the plan and the percentage of compensation made as matching contributions and after-tax employee contributions for or by eligible nonhighly compensated employees under the plan. If the ACP test limits are exceeded, the employer must take corrective action to ensure that the limits are met. In determining the amount of employer contributions made on behalf of an eligible employee, employers are allowed to take into account certain QNECs made on behalf of the employee by the employer. Employers must also take into account QMACs made on behalf of the employee by the employer unless an exclusion applies (including an exclusion for QMACs that are taken into account under the ADP test).

If an employer designs its plan to satisfy the ADP safe harbor of section 401(k)(12), it may avoid performing the ACP test with respect to matching contributions under the plan, as long as the additional requirements of the ACP safe harbor of section 401(m)(11) are met.

Under § 1.401(k)-6, QMACs and QNECs are matching contributions and employer contributions (other than elective or matching contributions) that satisfy the nonforfeatability requirements of § 1.401(k)-1(c) and the distribution requirements of § 1.401(k)-1(d) "when they are contributed to the plan." Similarly, § 1.401(m)-5 includes independent definitions of QMACs and QNECs, which are matching contributions and employer contributions (other than elective or matching contributions) that satisfy the nonforfeatability and distribution requirements of § 1.401(k)-1(c) and (d) "at the time the contribution is made."

The Treasury Department and the IRS have received comments with respect to the definitions of QMACs and QNECs in §§ 1.401(k)-6 and 1.401(m)-5. In particular, commenters assert that employer contributions should be able to qualify as QMACs and QNECs as long as they satisfy applicable nonforfeatability and distribution requirements at the time they are allocated to participants' accounts, rather than when they are first contributed to the plan. Commenters contend that interpreting sections 401(k)(3)(D)(ii) and 401(m)(4)(C) to require satisfaction of applicable nonforfeatability and distribution requirements at the time amounts are first contributed to the plan would preclude plan sponsors with plans that permit the use of amounts in plan forfeiture accounts to offset future employer contributions under the plan from applying such amounts to fund QMACs and QNECs. This is because the amounts would have been allocated to the forfeiture accounts only after a participant incurred a forfeiture of benefits and, thus, generally would have been subject to a vesting schedule when they were first contributed to the plan. Commenters have requested that QMAC and QNEC requirements not be interpreted to prevent the use of plan forfeitures to fund QMACs and QNECs. The commenters urge that the nonforfeatability and distribution requirements under § 1.401(k)-6 should apply when QMACs and QNECs are allocated to participants' accounts and not when the contributions are first made to the plan.

Explanation of Provisions

After consideration of the comments described in this preamble in the “Background” section, the Treasury Department and the IRS are proposing to amend § 1.401(k)–6 to provide that amounts used to fund QMACs and QNECs must be nonforfeitable and subject to distribution restrictions in accordance with § 1.401(k)–1(c) and (d) when allocated to participants’ accounts, and to no longer require that amounts used to fund QMACs and QNECs satisfy the nonforfeitable and distribution requirements when they are first contributed to the plan. Treasury and IRS note that while the second sentence of each of the current definitions of QMACs and QNECs refers to the “vesting” requirements of § 1.401(k)–1(c), those requirements are more appropriately characterized as “nonforfeitable” requirements consistent with section 401(k)(2)(C) and the title of § 1.401(k)–1(c). Accordingly, these proposed regulations would amend these definitions to clarify those references by replacing the word “vesting” with “nonforfeitable” in each definition; these changes are not otherwise intended to have any substantive impact on this or any other section of the regulations. These proposed regulations would also amend the definitions of QMACs and QNECs in § 1.401(m)–5 to provide cross-references to the definitions of QMACs and QNECs under § 1.401(k)–6. These amendments to § 1.401(m)–5 are being made to ensure a consistent definition of QMACs and QNECs in § 1.401(k)–6 and § 1.401(m)–5 (including the requirement that amounts used to fund QMACs and QNECs be made subject to nonforfeitable and distribution requirements when they are allocated to participants’ accounts as QMACs or QNECs) and are not otherwise intended to have any substantive impact on this or any other section of the regulations.

Proposed Effective/Applicability Date

These regulations are proposed to apply to taxable years beginning on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**. Taxpayers, however, may rely on these proposed regulations for periods preceding the proposed applicability date. If, and to the extent, the final regulations are more restrictive than the rules in these proposed regulations, those provisions of the final regulations will be applied without retroactive effect.

Special Analyses

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. Because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** heading. Treasury and the IRS request comments on all aspects of the proposed rules. All comments will be available at www.regulations.gov or upon request. A public hearing will be scheduled if requested in writing by any person who timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Rosemary Y. Oluwo, Office of Associate Chief Counsel (Tax Exempt and Governmental Entities). However, other personnel from the IRS and Treasury Department participated in the development of these regulations.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.401(k)–1 is amended by adding paragraph (g)(5) to read as follows:

§ 1.401(k)–1 Certain cash or deferred arrangements.

* * * * *

(g) * * *

(5) *Effective date for definitions of qualified matching contributions (QMACs) and qualified nonelective contributions (QNECs).* The revisions to the second sentence in the definitions of QMACs and QNECs in § 1.401(k)–6 apply to taxable years ending on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**.

■ **Par. 3.** Section 1.401(k)–6 is amended by revising the second sentence in the definitions of *Qualified matching contributions (QMACs)* and *Qualified nonelective contributions (QNECs)* to read as follows:

§ 1.401(k)–6 Definitions.

* * * * *

Qualified matching contributions (QMACs). * * * Thus, the matching contributions must satisfy the nonforfeitable requirements of § 1.401(k)–1(c) and be subject to the distribution requirements of § 1.401(k)–1(d) when they are allocated to participants’ accounts. * * *

Qualified nonelective contributions (QNECs). * * * Thus, the nonelective contributions must satisfy the nonforfeitable requirements of § 1.401(k)–1(c) and be subject to the distribution requirements of § 1.401(k)–1(d) when they are allocated to participants’ accounts. * * *

* * * * *

■ **Par. 4.** Section 1.401(m)–1 is amended by adding paragraph (d)(4) to read as follows:

§ 1.401(m)–1 Employee contributions and matching contributions.

* * * * *

(d) * * *

(4) *Effective date for definitions of qualified matching contributions (QMACs) and qualified nonelective contributions (QNECs).* The revisions to the definitions of QMACs and QNECs in § 1.401(m)–5 apply to taxable years ending on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**.

■ **Par. 5.** Section 1.401(m)–5 is amended by revising the definitions of *Qualified matching contributions (QMACs)* and *Qualified nonelective contributions (QNECs)* to read as follows:

§ 1.401(m)–5 Definitions.

* * * * *

Qualified matching contributions (QMACs). *Qualified matching contributions or QMACs* means qualified matching contributions or QMACs as defined in § 1.401(k)–6.

Qualified nonelective contributions (QNECs). *Qualified nonelective contributions or QNECs* means qualified nonelective contributions or QNECs as defined in § 1.401(k)–6.

John Dalrymple,

Deputy Commissioner for Services and Enforcement.

BILLING CODE 4830–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2016–1041]

RIN 1625–AA08

Special Local Regulation; Pago Pago Harbor, American Samoa

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a permanent special local regulation for the Annual Fautasi Ocean Challenge canoe race in Pago Pago Harbor, American Samoa. This annual event historically occurs during the weeks of Veteran's Day and Thanksgiving Day. This action is necessary to safeguard the participants and spectators, including all crews, vessels, and persons on the water in Pago Pago Harbor during the event. This regulation will functionally close the port to vessel traffic during the race, but will not require the evacuation of any vessels from the harbor. Entry into, transiting, or anchoring in the harbor would be prohibited to all vessels not registered with the sponsor as participants or not part of the race patrol, unless specifically authorized by the Captain of the Port (COTP) Honolulu or a designated representative. Vessels who are already moored or anchored in the harbor seeking permission to remain there shall request permission from the COTP unless deemed a spectator vessel that is moored to a waterfront facility within the regulated area. The area forming the subject of this permanent special local regulation is described below. We invite your comments on this notice of proposed rulemaking (NPRM).

DATES: Comments and related material must be received by the Coast Guard on or before February 17, 2017.

ADDRESSES: You may submit comments identified by docket number USCG–2016–1041 using the Federal eRulemaking Portal at [http://](http://www.regulations.gov)

www.regulations.gov. See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Lieutenant Commander Nicolas Jarboe, Waterways Management Division, U.S. Coast Guard Sector Honolulu; telephone (808) 541–4359, email nicolas.a.jarboe@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

COTP Captain of the Port, Honolulu
CFR Code of Federal Regulations
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

This annual event will consist of a series of races entirely within Pago Pago Harbor between longboats with paddling crews of 30–50 persons each. It is anticipated that a large number of spectator pleasure craft will be drawn to the event. Spectator vessels and commercial vessel traffic would pose a significant safety hazard to the longboats, longboat crew members, and other persons and vessels involved with the event due to the longboats limited maneuverability within the port.

The Captain of the Port, Honolulu (COTP), proposes to establish a permanent special local regulation for Pago Pago Harbor to minimize vessel traffic in Pago Pago Harbor before, during, and after the scheduled event to safeguard persons and vessels during the longboat races. A regulated area is a water area, shore area, or water and shore area, for safety or environmental purposes, of which access is limited to authorized persons, vehicles, or vessels. The statutory basis for this rulemaking is 33 U.S.C. 1233, which gives the Coast Guard, under a delegation from the Secretary of the Department of Homeland Security, regulatory authority to enforce the Ports and Waterways Safety Act.

III. Discussion of Proposed Rule

This rule will create a permanent special local regulation in Pago Pago Harbor. The regulated area will close the harbor to all vessels not authorized by the COTP for entry into, transiting, or anchoring within the port for the duration of the event. The COTP will authorize registered participants, support vessels, and enforcement vessels to enter and remain in the area.

No other vessels will be permitted to enter the regulated area without obtaining permission from the COTP or a designated representative. The harbor will remain closed until the Coast Guard issues an “All Clear” after races have concluded and the harbor is deemed safe for normal operations. This rule will not require any vessel already moored to evacuate the port, provided they are moored in such a way that they do not interfere with the event. The proposed regulatory text appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This NPRM has not been designated a “significant regulatory action,” under Executive Order 12866. This determination is based on the size, location, duration, and time-of-day of the safety zone. Accordingly, this NPRM has not been reviewed by the Office of Management and Budget.

Under this NPRM, the Coast Guard would issue a Broadcast Notice to Mariners with information pertaining to the regulated area via VHF–FM marine channel 16.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

Some owners or operators of vessels intending to transit the regulated area may be small entities and may not be authorized to do so. However, given the

short duration of this proposed temporary rule, this would not create a significant economic impact on a substantial number of these entities. Moreover, the rule would allow all vessels to seek permission from the Coast Guard to enter the regulated area.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

If you believe this proposed rule would have substantial direct effects on federalism or tribal governments, please

contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such expenditure, we discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a temporary and limited safety zone in Pago Pago Harbor. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure 2–1 of Commandant Instruction M16475.ID. A preliminary environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking,

indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, and Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 100 as follows:

PART 100—SPECIAL LOCAL REGULATIONS/REGATTAS AND MARINE PARADES.

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.1401 to read as follows:

§ 100.1401 Special Local Regulation; Annual Fautasi Ocean Challenge Canoe Race, Pago Pago Harbor, America Samoa.

(a) *Location.* The following regulated area is established as a special local regulation: Breakers Point (eastern edge of Pago Pago Harbor entrance) thence southeast to 14°18'47" S., 170°38'54.5" W. thence southwest to 14°19'03" S., 170°39'14" W., thence northwest to Tulutulu Point and then following the coastline encompassing Pago Pago Harbor. This regulated area extends from the surface of the water to the ocean floor.

(b) *Enforcement period.* This annual event historically occurs in November

during the weeks of Veterans Day and Thanksgiving Day. The Captain of the Port Honolulu, will establish enforcement dates that will be announced by Notice of Enforcement, Local Notice to Mariners, Broadcast Notice to Mariners, on-scene designated representatives, and outreach.

(c) *Regulations.* (1) All persons and vessels not registered with the sponsor as participants or support/enforcement vessels are considered spectators. The “support/enforcement vessels” consist of any territory, or local law enforcement and sponsor provided vessels assigned or approved by the Captain of the Port Honolulu to patrol the regulated area.

(2) No spectator shall anchor, block, loiter or impede the transit of participants or support/enforcement vessels in the regulated area during the enforcement dates and times, unless cleared for entry by or through a support/enforcement vessel.

(3) Spectator vessels may be moored to a waterfront facility within the regulated area in such a way that they shall not interfere with the progress of the event. Such mooring must be complete at least 30 minutes prior to the establishment of the regulated area and remain moored through the duration of the event.

(d) *Informational Broadcasts.* The Captain of the Port Honolulu, will establish enforcement dates and times with a Notice of Enforcement. If circumstances render enforcement of the regulated area unnecessary for the entirety of these periods, the Captain of the Port or his designated representative will inform the public through broadcast notices to mariners that the regulated area is no longer being enforced. The harbor will remain closed until the Coast Guard issues an “All Clear” for the harbor after the race has concluded and the harbor is deemed safe for normal operations.

(e) *Penalties.* Vessels or persons violating this rule may be subject to the penalties set forth in 33 U.S.C. 1233.

Dated: January 10, 2017.

M.C. Long,

Captain, U.S. Coast Guard, Captain of the Port Honolulu.

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2016–0836]

RIN 1625–AA00

Safety Zones; San Francisco, CA

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to amend, add, and delete several permanent safety zones located in the Captain of the Port San Francisco zone that are established to protect public safety during annual firework displays. These amendments will update listed events to accurately reflect the firework display locations. This proposed rulemaking would limit the movement of vessels within the established firework display areas unless authorized by the Captain of the Port (COTP) San Francisco or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before February 17, 2017.

ADDRESSES: You may submit comments identified by docket number USCG–2016–0836 using the Federal eRulemaking Portal at <http://www.regulations.gov>. See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Lieutenant Junior Grade Christina Ramirez, U.S. Coast Guard Sector San Francisco; telephone 415–399–3585, email D11-PF-MarineEvents@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
PATCOM Patrol Commander
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

The Coast Guard is conducting this rulemaking under the authority of 33 U.S.C. 1231. Fireworks displays are held annually on a recurring basis on the

navigable waters within the COTP San Francisco zone. One of the published annual fireworks events that require safety zones does not currently reflect the accurate location of the respective display sites. Three annual fireworks events that require safety zones are not published in 33 CFR 165.1191 and one published fireworks event has not occurred since 2009. These safety zones are necessary to provide for the safety of the crew, spectators, participants of the event, participating vessels, and other users and vessels of the waterway from the hazards associated with firework displays. The effect of these proposed safety zones will be to restrict general navigation in the vicinity of the events, from the start of each event until the conclusion of that event. Except for the persons or vessels authorized by the COTP San Francisco or a designated representative, no person or vessel may enter or remain in the regulated area. These regulations are needed to keep spectators and vessels a safe distance away from the fireworks displays to ensure the safety of participants, spectators, and transiting vessels.

III. Discussion of Proposed Rule

The Coast Guard has reviewed 33 CFR 165.1191 for accuracy. The Coast Guard is proposing to amend Table 1 in § 1191 to modify one event to reflect the current event locations, add three events, and delete one outdated event.

The event proposed to be modified is listed numerically in Table 1 of this section as item 9, “Fourth of July Fireworks, City of Richmond.” The display location currently listed, Richmond Harbor, has been deemed undesirable or hazardous by the event sponsors, and so it is being changed to a barge located in the harbor, and the area of the safety zone would be the area around the barge.

We are also proposing to add three events to Table 1 of 33 CFR 165.1191, as items 28, 29, and 30. These events are titled Execpro Services Fourth of July Fireworks, Monte Foundation Fireworks, Lake Tahoe, and Sausalito Lighted Boat Parade Fireworks, respectively. The events proposed to be added have taken place in 2011, 2013, and 2014, and we believe that they will likely be regularly scheduled in the future. For those reasons, we believe it is beneficial to include them in the permanent regulation.

Finally, we propose to remove item 2, “KFOG KaBoom,” as this event is outdated. It is unlikely to reoccur and its continued inclusion in the regulation offers the possibility of confusion.

The Coast Guard proposes this rulemaking under authority in 33 U.S.C.

1231; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Department of Homeland Security Delegation No. 0170.1.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This NPRM has not been designated a “significant regulatory action,” under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget.

This regulatory action determination is based on the size, location, duration, and time-of-day of each safety zone. Vessel traffic would be able to safely transit around each safety zone which would impact a small designated area of the COTP San Francisco zone for less than 1 hour during the evening when vessel traffic is normally low. Moreover, the Coast Guard would issue a Local Notice to Mariner and Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone, and the rule would allow vessels to seek permission to enter the zones.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above this proposed rule would not have a

significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a safety zones lasting less than 1 hour that would prohibit entry within 1,000 feet of a fireworks barge. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure 2–1 of Commandant Instruction M16475.ID. A preliminary environmental analysis checklist and Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protestors. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment

applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, you may review a Privacy Act notice regarding the Federal Docket

Management System in the March 24, 2005, issue of the **Federal Register** (70 FR 15086).

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that Web site's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend to 33 CFR part 165 as follows:

■ 1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. In § 165.1191, in Table 1 to § 165.1191, remove and reserve item 2, revise item 9, and add items 28, 29, and 30, to read as follows:

§ 165.1191 Northern California and Lake Tahoe Area Annual Fireworks Events.

* * * * *

TABLE 1 TO § 165.1191

* * * * *	
2. [Reserved]	
* * * * *	
9. Fourth of July Fireworks, City of Richmond	
Sponsor	Various Sponsors.
Event Description	Fireworks Display.
Date	Week of July 4th.
Location	A barge located in Richmond Harbor in approximate position 37°54'40" N, 122°21'05" W, Richmond, CA.
Regulated Area	100-foot radius around the fireworks barge during the loading, transit, setup, and until the commencement of the scheduled display. Increases to a 560-foot radius upon commencement of the fireworks display.
* * * * *	
28. Execpro Services Fourth of July Fireworks	
Sponsor	Execpro Services Inc.
Event Description	Fireworks Display.
Date	Week of July 4th.
Location	Off-shore from Incline Village, NV.
Regulated Area	100-foot radius around the fireworks barge during the loading, transit, setup, and until the commencement of the scheduled display. Increases to a 1,000-foot radius upon commencement of the fireworks display.
29. Monte Foundation Fireworks, Lake Tahoe	
Sponsor	Monte Foundation.
Event Description	Fireworks Display.
Date	Week of Labor Day.
Location	Carmelian Bay, Lake Tahoe, CA.
Regulated Area	100-foot radius around the fireworks barge during the loading, transit, setup, and until the commencement of the scheduled display. Increases to a 1,000-foot radius upon commencement of the fireworks display.
30. Sausalito Lighted Boat Parade Fireworks	
Sponsor	Various Sponsors.
Event Description	Fireworks Display.
Date	A Saturday or Sunday in December.
Location	Off-shore from Sausalito Point, Sausalito, CA.
Regulated Area	100-foot radius around the fireworks barge during the loading, transit, setup, and until the commencement of the scheduled display. Increases to a 1,000-foot radius upon commencement of the fireworks display.

Dated: December 13, 2016.

Anthony J. Ceraolo,

Captain, U.S. Coast Guard, Captain of the Port San Francisco.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Parts 1 and 2

[NPS-WASO-REGS-17326; GPO Deposit Account 4311H2]

RIN 1024-AE30

Withdrawal of the Proposed Rule To Revise General Provisions; Electronic Cigarettes

AGENCY: National Park Service; Interior.

ACTION: Proposed rule; withdrawal.

SUMMARY: The National Park Service withdraws the proposed rule that would revise the regulation that defines smoking to include the use of electronic cigarettes and other electronic nicotine delivery systems; and would allow a superintendent to close an area, building, structure, or facility to smoking when necessary to maintain public health and safety. The withdrawal is based upon a need to engage in additional interagency coordination and review of the proposal.

DATES: The January 6, 2017, proposed rule (82 FR 1647) is withdrawn as of January 18, 2017.

ADDRESSES: The withdrawal of the proposed rule, and comments, are available at www.regulations.gov by searching for Regulation Identifier Number (RIN) 1024-AE30.

FOR FURTHER INFORMATION CONTACT: Sara Newman, Director, Office of Public Health, by telephone 202-513-7225, or email sara_newman@nps.gov.

SUPPLEMENTARY INFORMATION: This withdrawal does not affect Director's Order #50D (Smoking Policy), originally issued in 2003 and then revised and reissued in 2009, and Policy Memorandum 15-03 (Use of Electronic Nicotine Delivery Systems), issued on September 10, 2015, which remain in effect and are available online on the NPS Office of Policy Web site at <http://www.nps.gov/applications/npspolicy/index.cfm> by clicking on the drop-down

menu and selecting "Smoking" from the list of policy subjects.

Michael Bean,

Principal Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4312-52-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

42 CFR Part 2

[SAMHSA-4162-20]

RIN 0930-ZA07

Confidentiality of Substance Use Disorder Patient Records

AGENCY: Substance Abuse and Mental Health Services Administration, HHS.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: On Feb. 9, 2016, the Substance Abuse and Mental Health Services Administration (SAMHSA) published a Notice of Proposed Rulemaking (NPRM) that proposed policy changes to update and modernize the Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR part 2). SAMHSA explained in the NPRM that these changes were intended to better align the regulations with advances in the U.S. health care delivery system while retaining important privacy protections for individuals seeking treatment for substance use disorders. The last substantive update to these regulations was in 1987. SAMHSA is issuing this Supplemental Notice of Proposed Rulemaking (SNPRM) to propose additional clarifications to the part 2 regulations as amended by the concurrently issued final rule. As noted in the final rule, 42 CFR part 2 Confidentiality of Substance Use Disorder Patient Records, questions raised by commenters highlighted varying interpretations of the 1987 rule's restrictions on lawful holders and their contractors and subcontractors' use and disclosure of part 2-covered data for purposes of carrying out payment, health care operations, and other health care related activities. In consideration of this feedback and given the critical role that third-party payers, other lawful holders, and their contractors, subcontractors, and legal representatives play in the provision of health care services, SAMHSA is issuing this SNPRM to seek further comments on our proposals to address and help

clarify these matters before establishing any appropriate restrictions on disclosures to contractors, subcontractors and legal representatives.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on February 17, 2017.

ADDRESSES: You may submit comments, identified by Regulatory Information Number (RIN) 0930-AA21, by any of the following methods:

Electronically: Federal eRulemaking Portal: Go to <http://www.regulations.gov> and follow the instructions for submitting comments.

Regular, Express or Overnight Mail, or Hand Delivery or Courier: Written comments sent by hand delivery, or mailed by regular, express, or overnight mail must be sent to the following address ONLY: The Substance Abuse and Mental Health Services Administration, Department of Health and Human Services, Attn: Danielle Tarino, SAMHSA, 5600 Fishers Lane, Room 13E89A, Rockville, Maryland 20857.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

Instructions: To avoid duplication, please submit only one copy of your comments by only one method. All submissions received must include the agency name and docket number or RIN for this rulemaking. All comments received will become a matter of public record and will be posted without change to <http://www.regulations.gov>, including any personal information provided. For detailed instructions on submitting comments and additional information on the rulemaking process and viewing public comments, see the "Request for Public Comments" heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Danielle Tarino, SAMHSA, 5600 Fishers Lane, Room 13E89A, Rockville, Maryland 20857, 240-276-2857, Email address: Danielle.Tarino@samhsa.hhs.gov

SUPPLEMENTARY INFORMATION:

Background

On February 9, 2016, SAMHSA published an NPRM in the **Federal Register** (81 FR 6987) proposing updates to regulations for the Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR part 2). These regulations implement title 42, section

290dd–2 of the United States Code pertaining to Confidentiality of Records. SAMHSA explained in that NPRM, it proposed to update these regulations, last substantively amended in 1987, to reflect development of integrated health care models and growing use of electronic means for exchanging patient information. At the same time, SAMHSA wished to maintain protections for (part 2) patient identifying information, as persons with substance use disorders still may encounter significant discrimination if their information is improperly disclosed.

Elsewhere in this issue of the **Federal Register** SAMHSA published a final rule. In response to public comments, the final rule provides for greater flexibility in disclosing (part 2) patient identifying information within the health care system while continuing to address the privacy concerns of patients seeking treatment for a substance use disorder. SAMHSA received 376 comments on the NPRM. SAMHSA received a number of comments to the NPRM that went beyond what SAMHSA was proposing. Some commenters to the NPRM urged SAMHSA to clarify the scope of permitted disclosures of (part 2) patient identifying information by third-party payers. Some commenters asked that the current and proposed Qualified Service Organization (QSO) (part 2) patient identifying information disclosure provisions be applied to disclosures by third-party payers and other lawful holders of (part 2) patient identifying information to support health care operations and payment. Some commenters suggested doing this through the expansion of the definition of QSO. For instance, one commenter suggested that the definition of qualified service organization include “lawful holders of [p]art 2 patient identifying information,” stating that ACOs often engage analytics companies to provide support in identifying those high-risk patients who would benefit from care management and other services. Another commenter suggested expanding provisions concerning audits and evaluations to permit CMS to disclose (part 2) patient identifying information to ACOs and bundled payment participating entities for program audit and evaluation purposes. Others noted that QSOs themselves, as well as state Medicaid programs often use software vendors and other contractors, subcontractors, and legal representatives to carry out administrative and claims processing functions. A commenter further urged that the tasks that could be carried out

under the QSO policies not only be broadened to include population health management activities but also “clinical professional support services (e.g., quality improvement initiatives, utilization review and management services); third-party liability and coordination of benefit support services; activities related to preventing fraud, waste and abuse; and other activities and functions typically performed by contractors for or on behalf of third-party payers.”

In developing the final rule, SAMHSA responded directly to several of these public comments about the NPRM. For instance, the “To Whom” discussion in the preamble to the final rule provides that: “[f]or purposes of payment-related activities, to the extent that federal or state law authorizes or requires that the Medicaid or Medicare agency or program share data or enter into a contractual arrangement or other formal agreements to do so, written consent to disclose patient identifying information to the agencies or programs (as a third-party payer) under section 2.31(a)(4)(iii)(A) is considered to extend to the contractors, subcontractors, and legal representatives of the agencies or programs.” SAMHSA discussed in the final rule preamble that a “lawful holder” of (part 2) patient identifying information is an individual or entity who has received such information as the result of a part 2-compliant patient consent (with a prohibition on re-disclosure notice) or as permitted under the part 2 statute, regulations, or guidance and, therefore, is bound by 42 CFR part 2.

One commenter indicated that state Medicaid agencies hire contractors for a wide array of “administrative functions”; and that those contractors and vendors accessed (part 2) patient identifying information to carry out these activities. Other comments noted the role of third-parties in Medicaid program claims processing. Another commenter suggested that, given the role of MCOs, state Medicaid agencies and other programs, whether a patient designated the “name of the state agency, the MCO or simply Medicaid, the rule should consider consent to apply to the State and its contracted delivery system.” Another commenter similarly urged that “In order to ensure that Medicaid programs can carry out its operational requirements, consent that names the Medicaid agency or the MCO should permit disclosure to the entity’s contractors, when necessary.”

With respect to lawful holders, certain commenters requested changes to or highlighted the need for additional guidance regarding how third-party

payers may use and disclose (part 2) patient identifying information (as defined in 42 CFR 2.11) as they carry out their payment and health care operations. One commenter asked for explicit confirmation that Medicaid plans were allowed to process claims through a contracted entity (e.g., Medicaid managed care organizations (MCOs)). Similarly, another commenter recommended that the rule clarify that a patient’s naming of the state agency, the MCO, or simply Medicaid were all adequate to consent to allowing the patient’s information to be released to whichever entity actually conducted the required functions on behalf of the third-party payer. One commenter suggested that such payers should be viewed as intermediaries for purposes of sharing substance use disorder information with treating providers. Other commenters noted that Medicaid agencies and MCOs both require access to (part 2) patient identifying information for the purposes of payment. Another commenter discussed the history of the part 2 rules and asserted that the governing statute, 42 U.S.C. 290dd–2, does not require treating third-party payers differently than other payers. The commenter further asserted that “[e]ssentially all third-party payers contract with third parties to obtain services and perform activities that involve specialized expertise, equipment or other resources that the payer does not maintain in-house due to the associated administrative and other costs.”

These comments, while not addressing specific changes proposed in the NPRM, have prompted SAMHSA to propose additional clarifications and modifications to the part 2 rules to clarify the scope of permissible disclosures. In an effort to address some of the commenters’ requests and recommendations for clarity SAMHSA is concurrently issuing this SNPRM with the final rule to elicit public comment on these additional proposals to further clarify and expound upon these pertinent comments. We seek comment on our proposals regarding the following concepts and provisions: The payment and health care operations-related disclosures that can be made to contractors, subcontractors, and legal representatives by lawful holders under the part 2 rule consent provisions; and the provisions governing disclosures for purposes of carrying out a Medicaid, Medicare or Children’s Health Insurance Program (CHIP) audit or evaluation. SAMHSA will take any such comments under consideration if it engages in further rulemaking in the future.

SAMHSA will consider the public comments on this SNPRM, any relevant comments already received on these subjects in response to the February 9, 2016, NPRM and relevant comments made at the June 11, 2014 listening session on part 2 (see 79 FR 26929) before issuing a final rule.

Proposed Provisions

SAMHSA seeks comment on proposals in this SNPRM to retain the notice found in § 2.32 but consider whether an abbreviated notice would be appropriate and in which circumstances, further revise § 2.33 (Disclosures permitted with written consent) define and limit the circumstances in which certain disclosures for the purposes of payment and health care operations can be made; and similarly to further revise § 2.53 (Audit and Evaluation) to expressly address further disclosures by contractors, subcontractors, and legal representatives for purposes of carrying out a Medicaid, Medicare, or CHIP audit or evaluation. SAMHSA also seeks comment on its proposals regarding the establishment of appropriate restrictions and safeguards on lawful holders and their contractors, subcontractors, and legal representatives' use and disclosure of (part 2) patient identifying information for the purposes discussed in this SNPRM. SAMHSA is not soliciting comments on any other issues relating to the final rule and will not consider comments at this time that address changes to part 2 other than those contemplated in this SNPRM.

Section 2.32 Prohibition on Re-Disclosure

SAMHSA does not propose to substantively modify the existing notice at 2.32, but seeks comment on whether it should add a shorter abbreviated statement in subsection (a) Notice to accompany re-disclosure to be used in certain circumstances (e.g., for particular types of disclosures or technical systems) where a shorter notice may be warranted. An abbreviated statement could read, for example, "Data is subject to 42 CFR part 2. Use/disclose in conformance with part 2."

Section 2.33 Disclosures Permitted With Written Consent

SAMHSA understands that contractors, subcontractors, and legal representatives play an integral role in the management, delivery, and payment of health care services, but believes that limits should be placed on disclosures of (part 2) patient identifying information to such entities to carry out

these activities. As such, SAMHSA seeks public comment on its proposal to explicitly list and limit under § 2.33(b), specific types of activities for which any lawful holder of (part 2) patient identifying information would be allowed to further disclose the minimal information necessary for specific payment and health care operations activities described below. While lawful holders may disclose (part 2) patient identifying information to contractors, subcontractors, and legal representatives for these purposes, this proposal makes clear the scope and requirements for those permitted disclosures. To the extent that a written consent permits the use of part 2 patient identifying information for payment or healthcare operations, this provision at § 2.33(b) specifies that the further disclosures specified below can be made. SAMHSA notes that this list of activities related to payment and health care operation is similar to the HIPAA Privacy Rule's definition of the terms "payment" and "health care operations," although SAMHSA is not adopting those definitions in their entirety. The payment and health care operation activities listed in this section does not include activities that SAMHSA considers to be related to the patient's diagnosis, treatment, or referral for treatment. SAMHSA believes it is important to maintain patient choice in disclosing information to health care providers with whom they will have direct contact. For these reasons, this provision will not cover care coordination or case management and the proposal provides that disclosures to contractors, subcontractors, and legal representatives to carry out other purposes are not permitted under this section. SAMHSA will consider certain payment or health care operations-related activities permissible for lawful holders to disclose to contractors, subcontractors, or legal representatives as long as the activities fit within the overall purpose of the written consent. See paragraphs (b)(1) through (17) of § 2.33

SAMHSA also solicits comment on whether the proposed listing of explicitly permitted activities is adequate and appropriate to ensure the health care industry's ability to conduct necessary payment and the described health care operational functions, while still affording adequate privacy protections for the individuals who were diagnosed, treated, or referred for treatment. We note that contractors, subcontractors, and legal representatives that would receive data under this provision would become lawful holders

upon receipt of such data, and, as such, would themselves be subject to the part 2 requirements. Moreover, consent would still be required and disclosures must be made in accordance with section 2.13(a), Confidentiality restrictions and safeguards, which states that "[a]ny disclosure made under these regulations must be limited to that information which is necessary to carry out the purpose of the disclosure." Consequently, the stated purpose of a written consent limits the scope of the disclosures with respect to the (part 2) patient identifying information disclosed. In addition, lawful holders that disclose (part 2) patient identifying information to contractors, subcontractors, and legal representatives for payment and the described health care operations may only disclose (part 2) patient identifying information to contractors, subcontractors, and legal representatives that perform a function that is consistent with the stated purpose of the consent and only to perform that function. SAMHSA seeks comments on the proper mechanisms to convey the scope of the consent to lawful holders, contractors, subcontractors, and legal representatives, including those who are downstream recipients of (part 2) patient identifying information given current electronic data exchange technical designs.

SAMHSA also believes that it is critical that contractors, subcontractors, and legal representatives understand their obligations with respect to (part 2) patient identifying information. Accordingly, SAMHSA proposes new regulatory text under § 2.33(c) requiring that lawful holders that engage contractors and subcontractors to carry out payment and the described health care operations that will entail using or disclosing (part 2) patient identifying information include specific contract and subcontract provisions requiring contractors and subcontractors to comply with the provisions of part 2. An appropriate comparable instrument will suffice in cases where there is otherwise no contract between the lawful holder and a legal representative who is retained voluntarily (as opposed to one who is required to represent the lawful holder by law, in which case the requirement for a contract or comparable instrument in 2.33(c) shall not apply). SAMHSA proposes to amend subsection (b) and add a new subsection (c) to the disclosure permitted with written consent provisions at § 2.33. SAMHSA seeks comment on the proposal to revise

disclosures permitted with written consent provision in § 2.33.

Section 2.53 Audit and Evaluation

SAMHSA recognized in the final rule the critical importance of audits and evaluations. Accordingly, SAMHSA made clear that disclosures of patient identifying information to ACO's and similar CMS-regulated entities to carry out Medicare, Medicaid and Children's Health Insurance Program (CHIP) audit and evaluation activities are permitted.

However, public comments requested further specification regarding the permitted disclosures of (part 2) patient identifying information for audit and evaluation purposes. Public commenters noted that, as with other payment and health care operations, contractors, subcontractors, and legal representatives may be tasked with conducting audit and evaluation activities. Such entities may not be CMS-regulated, and may be conducted for private payers as well as Medicare and Medicaid programs. In addition, commenters noted that audits and evaluations may include quality improvement activities, as well as efforts related to reimbursement and financing. As such, SAMHSA proposes further amendment as set out in the regulatory text of section 2.53.

Request for Public Comments

SAMHSA believes that the new proposals and clarifications discussed above will provide the desired solutions and understanding sought by commenters to the NPRM, while also offering patient protections appropriate to the current health care environment.

In making these proposals, SAMHSA notes that such payment and the described health care operations and audit and evaluation functions will still be governed by other applicable laws and regulations, such as the HIPAA Privacy and Security Rules, in addition to 42 CFR part 2.

SAMHSA notes that the fact that lawful holders and part 2 programs are permitted to disclose data in no way obviates the overarching purpose of part 2: to protect (part 2) patient identifying information for patients seeking diagnosis, treatment, or referral for treatment for substance use disorders. Lawful holders and part 2 programs have responsibility to exercise due diligence with respect to their contractors, subcontractors, or legal representatives to whom they disclose or with whom they exchange (part 2) patient identifying information. Should the changes in this SNPRM be adopted, SAMHSA anticipates issuing further guidance about these topics.

SAMHSA seeks specific comment on the implications of these proposed changes on the privacy and confidentiality of records concerning substance use disorder diagnosis, prognosis and treatment, and referral for treatment and overall goals of the part 2 rules, and the regulatory and financial impact, if any, of these proposals.

SAMHSA also seeks comments on the following for its consideration in future rulemaking and guidance:

(1) Additional purposes for which lawful holders should be able to disclose (part 2) patient identifying information,

(2) Further subregulatory guidance that SAMHSA and other agencies could provide to help facilitate implementation of 42 CFR part 2 in the current healthcare environment.

Regulatory Impact Analysis (RIA)

In this SNPRM, SAMHSA proposes clarifications and revisions of the following: The disclosures permitted with written consent (§ 2.33), the payment and health care operations activities for which lawful holders may disclose (part 2) patient identifying information to their contractors, subcontractors, and legal representatives; and the audit and evaluation provision that permit certain disclosures for purposes of carrying out a Medicaid, Medicare or CHIP audit and evaluation (§ 2.53).

SAMHSA has analyzed the costs of complying with the proposed regulations in this supplemental NPRM. SAMHSA does not believe these revisions, if ultimately adopted, will result in any additional costs to Part 2 programs. Based on public comments, SAMHSA anticipates that these modifications will enhance efficiency of such payment and health care operations as claims processing, business management, training and customer service. The proposal specifies that lawful holders who receive part 2 records under the terms of a patient's written consent are permitted to further disclose those records to their contractors, subcontractors, and legal representatives to carry out payment and certain health care operations described in the SNPRM. When information is shared with contractors, subcontractors, and legal representatives, contract and subcontract provisions (or provisions in an appropriate comparable instrument in the case of certain legal representatives) must be included requiring these entities to comply with the provisions of part 2. Changes proposed to the audit and evaluation provisions will make clear that the

individual or entity receiving (part 2) patient identifying information for audit and evaluation or quality improvement purposes is permitted to further disclose this information to contractor(s) or subcontractor(s) to complete these activities. Should these proposals ultimately be adopted, SAMHSA does not anticipate entities will incur any additional costs beyond those analyzed in the Final Rule. Nonetheless, SAMHSA seeks comments on costs and benefits of this change for part 2 programs and any burdens these proposed changes may impose on regulated entities.

Under the Paperwork Reduction Act of 1995 (PRA), agencies are required to provide a 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. PRA issues are discussed in the final rule. SAMHSA anticipates no substantive changes in PRA requirements should changes proposed in the SNPRM be adopted. SAMHSA seeks and will consider public comment on our assumptions as they relate to the PRA requirements.

SAMHSA has examined the impact of this proposed rule under Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, September 19, 1980), the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4, March 22, 1995), and Executive Order 13132 on Federalism (August 4, 1999).

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866. SAMHSA expects that the changes proposed in this SNPRM, if adopted, will not have an annual effect on the economy of \$100 million or more in at least 1 year. Therefore, this rule will not be an economically significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act (RFA) requires agencies that issue a regulation to analyze options for regulatory relief of small businesses if a rule has a

significant impact on a substantial number of small entities. The RFA generally defines a “small entity” as (1) a proprietary firm meeting the size standards of the Small Business Administration; (2) a nonprofit organization that is not dominant in its field; or (3) a small government jurisdiction with a population of less than 50,000 (States and individuals are not included in the definition of “small entity”). For similar rules, HHS considers a rule to have a significant economic impact on a substantial number of small entities if at least 5 percent of small entities experience an impact of more than 3 percent of revenue. SAMHSA anticipates that the proposals in this SNPRM, if adopted, will not have a significant economic impact on a substantial number of small entities.

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$146 million, using the most current (2015) implicit price deflator for the gross domestic product. The proposals in this SNPRM, if adopted, would not trigger the Unfunded Mandate Reform Act because it will not result in expenditures of this magnitude by states or other government entities.

List of Subjects in 42 CFR Part 2

Alcohol abuse, Alcoholism, Drug abuse, Grant programs—health, Health records, Privacy, Reporting, and Recordkeeping requirements.

For the reasons stated in the preamble, SAMHSA proposes to amend 42 CFR part 2 as follows:

PART 2—CONFIDENTIALITY OF SUBSTANCE USE DISORDER PATIENT RECORDS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: Sec. 408 of Pub. L. 92–255, 86 Stat. 79, as amended by sec. 303(a), (b) of Pub. L. 93–282, 83 Stat. 137, 138; sec. 4(c)(5)(A) of Pub. L. 94–237, 90 Stat. 244; sec. 111(c)(3) of Pub. L. 94–581, 90 Stat. 2852; sec. 509 of Pub. L. 96–88, 93 Stat. 695; sec. 973(d) of Pub. L. 97–35, 95 Stat. 598; and transferred to sec. 527 of the Public Health Service Act by sec. 2(b)(16)(B) of Pub. L. 98–24, 97 Stat. 182 and as amended by sec. 106 of Pub. L. 99–401, 100 Stat. 907 (42 U.S.C. 290ee–3)

and sec. 333 of Pub. L. 91–616, 84 Stat. 1853, as amended by sec. 122(a) of Pub. L. 93–282, 88 Stat. 131; and sec. 111(c)(4) of Pub. L. 94–581, 90 Stat. 2852 and transferred to sec. 523 of the Public Health Service Act by sec. 2(b)(13) of Pub. L. 98–24, 97 Stat. 181 and as amended by sec. 106 of Pub. L. 99–401, 100 Stat. 907 (42 U.S.C. 290dd–3), as amended by sec. 131 of Pub. L. 102–321, 106 Stat. 368, (42 U.S.C. 290dd–2).

Subpart B—General Provisions

■ 2. Revise § 2.33 to read as follows:

§ 2.33 Disclosures permitted with written consent.

(a) If a patient consents to a disclosure of their records under § 2.31, a program may disclose those records in accordance with that consent to any person or category of persons identified or general designated in the consent, except that disclosures to central registries and in connection with criminal justice referrals must meet the requirements of §§ 2.34 and 2.35, respectively.

(b) If a patient consents to a disclosure of their records under § 2.31 for payment and/or health care operations activities, a lawful holder who receives such records under the terms of the written consent may further disclose those records as may be necessary for its contractors, subcontractors, or legal representatives to carry out payment and/or the following health care operations on behalf of such lawful holder. Disclosures to contractors, subcontractors, and legal representatives to carry out other purposes are not permitted under this section. In accordance with § 2.13(a), disclosures under this section must be limited to that information which is necessary to carry out the stated purpose of the disclosure.

(1) Billing, claims management, collections activities, obtaining payment under a contract for reinsurance, claims filing and related health care data processing;

(2) Clinical professional support services (e.g., quality assessment and improvement; initiatives, utilization review and management services);

(3) Patient safety activities;

(4) Activities pertaining to:

(i) The training of student trainees and health care professionals;

(ii) The assessment of practitioner competencies; and

(iii) The assessment of provider and/or health plan performance;

(iv) Training of non-health care professionals;

(5) Accreditation, certification, licensing, or credentialing activities;

(6) Underwriting, enrollment, premium rating, and other activities

related to the creation, renewal, or replacement of a contract of health insurance or health benefits, and ceding, securing, or placing a contract for reinsurance of risk relating to claims for health care;

(7) Third-party liability coverage;

(8) Activities related to addressing fraud, waste and abuse;

(9) Conducting or arranging for medical review, legal services, and auditing functions;

(10) Business planning and development, such as conducting cost-management and planning-related analyses related to managing and operating, including formulary development and administration, development or improvement of methods of payment or coverage policies;

(11) Business management and general administrative activities, including, but not limited to, management activities relating to implementation of and compliance with the requirements of this or other statutes or regulations;

(12) Customer services, including the provision of data analyses for policy holders, plan sponsors, or other customers;

(13) Resolution of internal grievances;

(14) The sale, transfer, merger, consolidation, or dissolution of an organization;

(15) Determinations of eligibility or coverage (e.g. coordination of benefit services or the determination of cost sharing amounts), and adjudication or subrogation of health benefit claims;

(16) Risk adjusting amounts due based on enrollee health status and demographic characteristics;

(17) Review of health care services with respect to medical necessity, coverage under a health plan, appropriateness of care, or justification of charges.

(c) Lawful holders who wish to disclose patient identifying information pursuant to subsection (b) of this section must enter into a written contract with the contractor (or appropriate comparable instrument in the case of a legal representative retained voluntarily by the lawful holder), which provides that the contractor and any subcontractor or legal representative are or will be fully bound by the provisions of part 2 upon receipt of the patient identifying data, and, as such that each disclosure shall be accompanied by the notice required under § 2.32. In making such disclosure, the lawful holder should specify permitted uses of patient identifying information consistent with the written consent, by the contractor and any subcontractors or legal

representatives to carry out the payment and health care operations activities listed in the preceding subparagraph, require such recipients to implement appropriate safeguards to prevent unauthorized uses and disclosures and require such recipients to report any unauthorized uses, disclosures, or breaches of patient identifying information to the lawful holder. The lawful holder should only disclose information to the contractor or subcontractor or legal representative that is necessary for the contractor or subcontractor to perform its duties under the contract. Also, the contract does not permit a contractor or subcontractor or legal representative to re-disclose information to a third party unless that third party is a contract agent of the contractor or subcontractor, helping them provide services described in the contract, and only as long as the agent only further discloses the information back to the contractor or lawful holder from which the information originated.

■ 3. Amend § 2.53 by:

■ a. Revising paragraph (a)(1)(i).

■ b. Revising paragraphs (b)(2)(i) and (ii).

■ c. Revising paragraph (c)(5).

The revisions and addition read as follows:

§ 2.53 Audit and evaluation.

(a) * * *

(1) * * *

(i) Any Federal, State, or local governmental agency which provides financial assistance to the program or is authorized by law to regulate the activities of the part 2 program or those of the lawful holder;

* * * * *

(b) * * *

(2) * * *

(i) Any federal, state, or local governmental agency which provides financial assistance to the program or is authorized by law to regulate the activities of the part 2 program or those of the lawful holder; or

(ii) Any individual or entity which provides financial assistance to the part 2 program, which is a third-party payer covering patients in the part 2 program, or which is a quality improvement organization performing a utilization or quality control review, or such individual's or entity's or quality improvement organization's contractors, subcontractors, or legal representatives.

* * * * *

(c) * * *

(5) If a disclosure to an individual or entity is authorized under this section for a Medicare, Medicaid, or CHIP audit

or evaluation, including a civil investigation or administrative remedy, as those terms are used in paragraph (c)(2) of this section, the individual or entity may further disclose the patient identifying information that is received for such purposes to its contractor(s) or subcontractor(s) to carry out the audit or evaluation, and a quality improvement organization which obtains such information under paragraph (a) or (b) of this section may disclose the information to that individual or entity (or, to such individual's or entity's contractors, subcontractors, or legal representatives, but only for the purposes of this section).

* * * * *

Dated: January 5, 2017.

Kana Enomoto,

Acting Deputy Assistant Secretary for Mental Health and Substance Use.

Approved:

Sylvia M. Burwell,

Secretary.

[FAR Case 2015-033; Docket No. 2015-0033; Sequence No. 1]

RIN 9000-AN28

Federal Acquisition Regulation: Sustainable Acquisition

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: DoD, GSA, and NASA are proposing to amend the Federal Acquisition Regulation (FAR) to implement Executive Order, Planning for Federal Sustainability in the Next Decade, and the biobased product acquisition provisions of the Agricultural Act of 2014 (also known as the 2014 Farm Bill).

DATES: Interested parties should submit written comments to the Regulatory Secretariat Division at one of the addresses shown below on or before March 20, 2017 to be considered in the formation of the final rule.

ADDRESSES: Submit comments in response to FAR Case 2015-033 by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by searching for "FAR Case 2015-033". Select the link "Comment Now" that corresponds with "FAR Case 2015-033." Follow the instructions provided on the screen. Please include your name, company name (if any), and "FAR Case 2015-033" on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat, ATTN: Ms. Flowers, 1800 F Street NW., 2nd floor, Washington, DC 20405.

Instructions: Please submit comments only and cite "FAR Case 2015-033" in all correspondence related to this case. All comments received will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check www.regulations.gov, approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Mr. Charles Gray, Procurement Analyst, at 703-795-6328 for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202-501-4755. Please cite "FAR Case 2015-033."

SUPPLEMENTARY INFORMATION:

I. Background

DoD, GSA, and NASA are proposing to revise the FAR to implement policy that will improve agencies' environmental performance and Federal sustainability. Federal agencies have been the leaders in reducing building and fleet energy use, using renewable energy, and buying more sustainable products and services as the United States works to build a clean energy economy. Building on the progress achieved to date, President Obama issued Executive Order (E.O.) 13693, Planning for Federal Sustainability in the Next Decade, on March 19, 2015, published in the **Federal Register** at 80 FR 15869, on March 25, 2015, to plan for and further expand agency progress in reducing greenhouse gas emissions over the next decade.

The changes made in this proposed rule continue the improvements made by the Federal Government to lead by example in protecting the health of our environment by purchasing sustainable

products and services. This rule promotes the acquisition of sustainable products, services, and construction methods in order to reduce energy and water consumption, reliance on natural resources, and enhance pollution prevention, within the Federal Government. While the anticipated costs associated with this rule are not quantified in dollar amounts, the Councils anticipate that any such impact will be outweighed by the expected benefits of this rule.

This rule advances the policies put into effect by an interim rule issued under FAR case 2010–001, “Sustainable Acquisition” (published in the **Federal Register** at 76 FR 31395, and May 31, 2011), which established a culture within the Federal acquisition community to “leverage agency acquisitions to foster markets for sustainable technologies and materials, products and services.” The comments received on the interim rule will be addressed along with any comments received in response to this rule, in the formulation of the final rule.

The E.O. directs Federal agencies to continue their leadership in sustainable acquisition in order to drive national greenhouse gas reductions and support preparations for the impacts of climate change. The E.O. directs agencies, where life-cycle cost-effective, to promote sustainable acquisition and procurement by ensuring that environmental performance and sustainability factors are included to the maximum extent practicable for all applicable procurements. These factors include—

(1) Statutory mandates for purchase preferences for recycled content products, energy and water efficient products and services (e.g., ENERGY STAR® certified and Federal Energy Management Program (FEMP)-designated products, and biobased products;

(2) Sustainable products and services identified by the Environmental Protection Agency’s (EPA) Significant New Alternatives Policy (SNAP), WaterSense®, Safer Choice, and SmartWay® Transport Partners Programs; and

(3) EPA-recommended specifications, standards, or labels for environmentally preferable products or products meeting environmental performance criteria developed by voluntary consensus standards bodies consistent with the National Technology Transfer and Advancement Act and Office of Management and Budget (OMB) Circular A–119.

In addition to the changes to sustainable acquisition requirements

made by E.O. 13693, this proposed rule implements sections 9001 and 9002(a) of the Agricultural Act of 2014, Public Law 113–79 (also known as the 2014 Farm Bill), which revised the definition of “biobased product.” (See 7 U.S.C. 8101 and 8102.)

II. Discussion and Analysis

The initiatives conveyed in E.O. 13693 and reflected in this proposed rule build on the policies and procedures set in motion by earlier E.O.s, namely E.O. 13423, “Strengthening Federal Environmental, Energy, and Transportation Management,” and E.O. 13514, “Federal Leadership in Environmental, Energy, and Economic Performance,” so as to further promote sustainable acquisition practices throughout the Federal Government. Both of these E.O.s were revoked upon issuance of E.O. 13693.

A summary of the proposed changes is as follows:

A. Definitions

In FAR parts 2 and 23, several new definitions are added and existing definitions are revised, pursuant to E.O. 13693 and, in certain instances, the 2014 Farm Bill.

Under FAR subpart 2.1, the definitions of “biobased product,” “environmentally preferable,” and “sustainable acquisition” are revised to reflect the definitions in the 2014 Farm Bill and E.O. 13693. A new definition for the term “environmentally sustainable electronic product” is added and the definition for “renewable energy” has been removed.

A definition of “sustainable products and services” is added to FAR subpart 2.1. This definition includes the expanded scope of Federal sustainable requirements listed in the sustainable acquisition section of the E.O. (section 3(i)). E.O. section 3(i)(i) through (iii) also provides that sustainable products and services include products that meet EPA recommendations for the use of specifications, standards, and labels or, in the absence of EPA recommendations, other specifications, standards, and labels developed by voluntary consensus standards bodies. The definition of “sustainable products and services” reflects these new provisions.

The following definitions have been added or moved to FAR part 23:

The E.O. 13693 definitions of “clean energy,” “alternative energy” (along with definitions for specific types of alternative energy such as “active capture and storage”, “combined heat and power,” “fuel cell energy systems,” and “thermal renewable energy

technologies”), and “renewable electric energy” are added to the FAR.

A definition of “life-cycle cost-effective” is added, based on the definition of that term in E.O. 13693 and the discussion of life-cycle costs in the E.O. 13693 implementing instructions.

The definition for “water consumption intensity” while unchanged, has been moved from FAR subpart 2.1 to FAR 23.001 because this term is used only in FAR part 23, as opposed to multiple areas of the FAR.

The definition of the term “contract action” at FAR subpart 23.1 is revised to specify that the term includes task and delivery orders placed against both new contracts and existing contracts.

A definition of life-cycle cost is added, which echoes the definition at FAR 7.101.

Finally, the definitions at FAR 23.701, which were related to the “Electronic products environmental assessment tool” (EPEAT®), have been removed. This topic is discussed further at section II C. of this preamble.

B. FAR Parts 7 and 11

FAR parts 7 and 11 are updated to reflect the sustainability factors to be considered in acquisitions. The Web site URL for accessing the Guiding Principles for Sustainable Federal Buildings and Associated Instructions is updated in FAR 7.103(p)(3). At FAR 7.105(b)(17) and 11.002, agencies and contractors are referred to GSA’s Green Procurement Compilation, which consolidates all Federal designations of sustainable products and services into one tool. Also, in FAR 11.002, guidance is added to ensure agencies are aware they must acquire sustainable products and services to the maximum extent practicable.

C. FAR Part 23

The scope of FAR part 23 is revised to note that the sustainable acquisition prescriptions apply to construction and services contracts that require the supply or use of products falling within the sustainable products categories.

FAR 23.100 is revised to reflect the policy established in E.O. 13693 to build a clean energy economy, drive national greenhouse gas emissions reductions, and support preparations for the impacts of climate change. The policy continues to apply to contractors operating Government buildings and is amended to provide that it applies to contractors operating Government fleet vehicles, in accordance with the requirement in E.O. 13693.

FAR 23.103 is revised to reflect the E.O. 13693 requirement that agencies shall advance sustainable acquisition to

the maximum extent practicable. This is a change from E.O. 13514, which required that 95 percent of acquisitions include applicable sustainable product requirements, and is consistent with statutory requirements in the Resource Conservation and Recovery Act and the Farm Security and Rural Investment Act that agencies purchase recycled content and biobased products, respectively, to the maximum extent practicable.

The exceptions in FAR 23.104 are updated to reflect the exceptions provided under E.O. 13693. The methodology for determining whether a product or service is life-cycle cost-effective is provided at FAR 23.104(b).

At FAR 23.106, a prescription is added for the new contract clause at FAR 52.223-XX, Sustainable Products and Services Requirements, which replaces multiple individual clauses.

FAR subpart 23.2 is amended to implement the energy and water efficiency, and clean energy acquisition requirements of E.O. 13693. In particular, FAR 23.202 now focuses on agencies' obligation to improve water use efficiency and management through the acquisition of water efficient products and employing water conservation strategies. Since there will now be one contract clause for sustainable products and services, the energy-efficient product specific clause prescription in FAR 23.206 has been removed because it is no longer needed.

In FAR subpart 23.4, the URL for the U.S. Department of Agriculture's BioPreferred Web site is updated. One requirement from the 2014 Farm Bill was added: Agencies must add to their affirmative procurement programs provisions for reporting the quantities and types of biobased products purchased. Additionally, the prescription to use the clause at FAR 52.223-17, Affirmative Procurement of EPA-designated Items in Service and Construction Contracts, is removed. FAR 23.000 now specifies that sustainable acquisition applies to construction and services contracts and the new clause at FAR 52.223-XX, Sustainable Products and Services Requirements, covers products and services furnished for Government use, incorporated into the construction of a public building or public work, or furnished for contractor use at a Federally-controlled facility, so the clause at FAR 52.223-17 is no longer needed.

FAR subpart 23.7 is revised to reflect the new requirements in E.O. 13693. FAR 23.704, formerly titled "Electronic products environmental assessment tool" (EPEAT®), required agencies to purchase EPEAT®-registered electronic

products; however, the Office of Management and Budget, Office of Federal Procurement Policy has more recently determined that references to proprietary programs such as EPEAT® should be removed from the FAR. Furthermore, E.O. 13693 directs agencies to purchase "environmentally sustainable electronic products" and does not address EPEAT®-registered products. Accordingly, the definitions at FAR 23.701 are removed and FAR 23.703 and 23.704 are—updated to reiterate the environmentally preferable products and services acquisition requirements in E.O. 13693, and require purchase of "environmentally sustainable electronic products" unless an exception or an exemption applies. In addition, new direction has been placed in FAR 23.703 to require that the item being purchased must meet or exceed the applicable specifications, standards, or labels that are recommended by the U.S. Environmental Protection Agency. On September 25, 2015, published in the **Federal Register** at 80 FR 57809, EPA issued interim recommendations for non-Federal standards (e.g., state or local Government or third-party source) and labels for Federal purchasers to use to identify and procure environmentally preferable products. EPA recommends that agencies procure EPEAT®-registered computers, imaging equipment, and televisions. It is possible that in the future other options may be developed that align with EPA Guidelines and support the electronic stewardship mandates of E.O. 13693, section 3(l).

FAR 23.705 is amended to remove the requirements to insert the EPEAT® clauses. Whether an agency continues to purchase electronics listed on the EPEAT® registry, or purchases products verified to meet EPA recommended specifications, standards, or labels, it will be able to use the new, single sustainable products and services clause.

D. FAR Part 36

FAR 36.104 previously required agencies to divert at least 50 percent of their construction and demolition debris by the end of fiscal year (FY) 2015, in keeping with E.O. 13514. E.O. 13693 requires agencies to consistently meet the 50 percent diversion goal annually, rather than by a specific year. Accordingly, FAR 36.104 is revised to delete the FY 2015 date for meeting the construction and demolition debris diversion goal. The updated Web site URL for accessing the Guiding Principles for Sustainable Federal

Buildings and Associated Instructions also is provided.

E. FAR Part 39

FAR 39.101 is amended to delete the reference to EPEAT® and substitute EPA-recommended specifications, standards, or labels for environmentally sustainable electronic products. A new paragraph has been added, directing agencies to consider climate change-related risks when acquiring information technology. This guidance supports the requirement in section 13 of E.O. 13693, for agencies to identify and address the projected impacts of climate change in mission critical operations, such as communication.

F. FAR Part 52

FAR part 52 is revised to update E.O. references and incorporate the policies reflected in E.O. 13693. The modified clauses include—

- FAR 52.212-5, Contract Terms and Conditions Required to Implement Statutes or Executive Orders—Commercial Items—deletion of references to the EPEAT® clauses and addition of the new clause for sustainable products and services requirements;

- FAR 52.213-4, Terms and Conditions-Simplified Acquisitions (Other Than Commercial Items)—amendment of E.O. reference, addition of the new FAR clause 52.223-XX Sustainable Products and Services Requirements is added, and deletion of FAR 52.223-15;

- FAR 52.223-1, Biobased Product Certification—updated statutory reference

- FAR 52.223-2, Affirmative Procurement of Biobased Products Under Service and Construction Contracts—revised the title to reflect the clause focus on contractor reporting of biobased products supplied or used under service and construction contracts;

- FAR 52.223-5, Pollution Prevention and Right-to-Know Information—amendment of E.O. reference; and

- FAR 52.223-10, Waste Reduction Program—amendment of E.O. reference.

To address the removal of references to EPEAT from the FAR and move to a new single clause for sustainable products and services, the following FAR clauses are deleted:

FAR 52.223-13, Acquisition of EPEAT®-Registered Imaging Equipment.

FAR 52.223-14, Acquisition of EPEAT®-Registered Televisions.

FAR 52.223-15, Energy Efficiency in Energy-Consuming Products.

FAR 52.223–16, Acquisition of EPEAT®-Registered Personal Computer Products.

FAR 52.223–17, Affirmative Procurement of EPA-designated Items in Service and Construction Contracts.

A new clause at FAR 52.223–XX, Sustainable Products and Services Requirements, is added to implement E.O. 13693's expanded list of environmental and sustainability programs that agencies shall consider when purchasing products and services. Rather than adding new clauses when EPA recommends additional specifications, standards, and labels, this clause refers to GSA's Green Procurement Compilation for the current requirements and recommendations for purchasing sustainable products and services.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold and for Commercial Items, Including Commercially Available Off-the-Shelf Items

This rule proposes to add a new clause at FAR 52.223–XX, Sustainable Products and Services Requirements, which requires contractors performing on Federal contracts to furnish or incorporate into the performance of a service or construction of a public building or public work or use, in connection with the contractors' performance at a Federally-controlled facility, sustainable products and services. Application of this clause to solicitations and contracts at or below the simplified acquisition threshold (SAT) and to the acquisition of commercial items, including commercially available off-the-shelf (COTS) items, is necessary in order to comply with the Executive Order.

41 U.S.C. 1905 through 1907 make certain provisions of law inapplicable to solicitations and contracts at or below the simplified acquisition threshold (SAT) and to the acquisition of commercial items, including commercially available off-the-shelf (COTS) items, unless the FAR Council/Administrator for Federal Procurement Policy determine that such exemption from the statute would not be in the best interest of the Federal Government. However, 41 U.S.C. 1905 through 1907 are only applicable to statutory provisions, not Executive orders.

IV. Executive Orders 12866 and 13563

E.O.s 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential

economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under Section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

V. Regulatory Flexibility Act

The proposed rule may have significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* The Initial Regulatory Flexibility Analysis (IRFA) is summarized as follows:

The requirements for this proposed rule may impact acquisitions covering a wide array of the products and services and related industry sectors within the Federal supplier base including information technology and telecommunications, managerial and administrative support services, installation, maintenance, repair, and rebuilding of equipment, janitorial, construction, manufacturing, and energy. However, Federal contractors have already been required to provide products, services, and construction effort that meet the majority of sustainable acquisition requirements of E.O. 13693, under previous E.O.s, laws, and sustainability programs.

Some sustainable products, such as energy and water-efficient products and services, are less expensive than conventional options while other products and services will realize cost savings over the lifecycle of the product. The latter grouping of products and service may require a higher start-up investment on the part of the contractor, but as demand for products with reduced environmental and human health impacts grows, prices of greener products will decrease. In addition, the rule may have net benefits for small businesses by creating opportunities for them to supply sustainable products and services.

Federal Procurement Data System (FPDS) data obtained on June 21, 2016, reveals that approximately 112,150 unique contractors were awarded Federal contracts during fiscal year (FY) 2015. Of the total number of vendors that received contracts in FY 2015, approximately 75,000 or 67 percent were unique small business concerns. Based on this information, it is estimated that in future years, a similar number of small business concerns will receive contracts subject to the requirements of this rule.

This proposed rule does not include any new reporting, recordkeeping, or other compliance requirements for small businesses. The proposed rule does not duplicate, overlap, or conflict with any other Federal rules.

The Regulatory Secretariat Division has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small

Business Administration. A copy of the IRFA may be obtained from the Regulatory Secretariat Division. DoD, GSA and NASA invite comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the rule consistent with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (FAR Case 2015–033), in correspondence.

VI. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does apply; however, the proposed changes to the FAR do not impose additional information collection requirements to the paperwork burden. The pertinent, previously approved OMB control numbers include 9000–0147, “Pollution Prevention and Right-to-Know Information,” and 9000–0180, “Biobased Procurements.”

List of Subjects in 48 CFR Parts 2, 4, 7, 11, 23, 36, 39, 42, and 52

Government procurement.

Dated: January 5, 2017.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Therefore, DoD, GSA, and NASA are proposing to amend 48 CFR parts 2, 4, 7, 11, 23, 36, 39, 42, and 52 as set forth below:

■ 1. The authority citation for 48 CFR parts 2, 4, 7, 11, 23, 36, 39, 42, and 52 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 51 U.S.C. 20113.

PART 2—DEFINITIONS OF WORDS AND TERMS

- 2. Amend section 2.101, in paragraph (b)(2), by—
- a. Revising the definitions “Biobased product”, and “Environmentally preferable”;
- b. Adding, in alphabetical order, the definition “Environmentally sustainable electronic product”;
- c. Removing the definition “Renewable energy”;
- d. Revising the definition “Sustainable acquisition”;
- e. Adding, in alphabetical order, the definition “Sustainable products and Services”; and
- f. Removing the definition “Water consumption intensity”.

The revisions and additions read as follows:

2.101 Definitions.

- (b) * * *
- (2) * * *

Biobased product means a product determined by the U.S. Department of Agriculture to be a commercial or industrial product (other than food or feed) that is composed, in whole or in significant part, of biological products, including renewable domestic agricultural materials and forestry materials or that is an intermediate ingredient or feedstock. The term includes, with respect to forestry materials, forest products that meet biobased content requirements, notwithstanding the market share the product holds, the age of the product, or whether the market for the product is new or emerging.

* * * * *

Environmentally preferable means that products or services have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. This comparison may consider raw materials acquisition, production, manufacturing, packaging, distribution, reuse, operation, maintenance, or disposal related to the product or service.

Environmentally sustainable electronic product means an electronic product that is ENERGY STAR® certified or Federal Energy Management Program (FEMP) designated, as applicable, and meets or exceeds the applicable specifications, standards, or labels that are recommended by the U.S. Environmental Protection Agency, (see <https://www.epa.gov/greenerproducts>).

* * * * *

Sustainable acquisition means ensuring that environmental performance and other sustainability requirements, as prescribed in part 23, are included to the maximum extent practicable in the planning, award, and execution phases of acquisitions.

Sustainable products and services means products and services, including construction, that—

- (1) Meet statutory mandates for purchasing—
 - (i) Recycled content products designated by the U.S. Environmental Protection Agency (EPA) under the Comprehensive Procurement Guidelines;
 - (ii) Energy and water efficient products such as ENERGY STAR® certified and Federal Energy Management Program (FEMP)—designated products identified by EPA and the U.S. Department of Energy; and
 - (iii) Biobased content products meeting the content requirement of the

U.S. Department of Agriculture under the BioPreferred® program;

- (2) Are identified by EPA programs, including—

- (i) Significant New Alternatives Policy (SNAP) chemicals or other alternatives to ozone-depleting substances, and products and services that minimize or eliminate, when feasible, the use, release, or emission of high global warming potential hydrofluorocarbons, such as by using reclaimed instead of virgin hydrofluorocarbons;

- (ii) WaterSense® certified products and services (water efficient products);

- (iii) Safer Choice Certified products (chemically intensive products that contain safer ingredients); and
 - (iv) SmartWay® Transport partners and SmartWay® products (fuel efficient products and services); or

- (3) Are environmentally preferable products or services that—

- (i) Meet or exceed specifications, standards, or labels recommended by EPA, (see <https://www.epa.gov/greenerproducts>); or

- (ii) Where there is no specification, standard, or label recommended by EPA for a specific product or service category, meet environmental performance criteria developed or adopted by voluntary consensus standards bodies consistent with section 12(d) of the National Technology Transfer and Advancement Act of 1995 (Public Law 104–113) and Office of Management and Budget Circular A–119).

* * * * *

PART 4—ADMINISTRATIVE MATTERS

- 3. Amend section 4.302 by revising paragraph (a) to read as follows:

4.302 Policy.

(a) Section 3(j) of Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade, directs agencies to reduce and prevent waste. Electronic commerce methods (see 4.502) and double-sided printing and copying are examples of best practices for waste prevention.

* * * * *

PART 7—ACQUISITION PLANNING

- 4. Amend section 7.103 by revising paragraphs (p)(1) through (p)(3) to read as follows:

7.103 Agency-head responsibilities.

* * * * *

- (p) Ensuring that agency planners—
 - (1) Specify needs for uncoated printing and writing paper containing 30 percent postconsumer recycled

content or higher, consistent with section 3(i)(v) of Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade;

- (2) Comply with the policy in 11.002(d) regarding procurement of sustainable products and services (as defined in 2.101);

- (3) Comply with the Guiding Principles for Sustainable Federal and Associated Instructions (Guiding Principles), for the design, construction, renovation, repair, or deconstruction of Federal buildings. The Guiding Principles can be accessed at <https://www.wbdg.org/references/fhpsb.php>; and

* * * * *

- 4. Amend section 7.105 by revising paragraph (b)(17) to read as follows:

7.105 Contents of written acquisition plans.

* * * * *

- (b) * * *

- (17) *Environmental and energy conservation objectives.* Discuss—

- (i) The applicable environmental and energy conservation objectives associated with the acquisition (see part 23);

- (ii) The applicability of an environmental assessment or environmental impact statement (see 40 CFR 1502);

- (iii) The proposed resolution of environmental issues;

- (iv) Any environmentally-related requirements to be included in solicitations and contracts (see 11.002 and 11.303); and

- (v) The requirements for the acquisition or use of sustainable products and services (as defined in 2.101). A compilation of the Federal sustainability criteria for various products and services is found on GSA's Green Procurement Compilation at <https://www.sftool.gov/greenprocurement/>. The EPA's recommendations for specifications, standards or labels that can be used for purchasing sustainable products and services are available at <https://www.epa.gov/greenerproducts>.

* * * * *

PART 11—DESCRIBING AGENCY NEEDS

- 5. Amend section 11.002 by revising paragraph (d)(1) and the introductory text of paragraph (d)(2) to read as follows:

11.002 Policy.

* * * * *

- (d)(1) Statutes and Executive orders identified in part 23 require agencies to

acquire sustainable products and services (as defined in 2.101) to the maximum extent practicable. To find sustainable products and services, visit GSA's Green Procurement Compilation at <https://www.sftool.gov/greenprocurement>.

(2) Unless an exception applies and is documented by the requiring activity, Executive agencies shall, to the maximum extent practicable, require the use of sustainable products and services when—

* * * * *

■ 6. Amend section 11.303 by removing paragraphs (a) and (b); and adding a new introductory paragraph to read as follows:

11.303 Special requirements for paper.

When purchasing uncoated printing and writing paper (e.g., copier paper, envelopes, etc.), or products printed on uncoated printing and writing paper, agencies shall require that the paper contain at least 30 percent postconsumer recycled content or higher (Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade).

■ 7. Amend part 23 by revising the part heading to read as follows:

PART 23—ENVIRONMENT, ENERGY, OCCUPATIONAL SAFETY, AND DRUG-FREE WORKPLACE

■ 8. Revise section 23.000 to read as follows:

23.000 Scope.

This part prescribes acquisition policies and procedures supporting the Government's program for ensuring a drug-free workplace, for protecting and improving the quality of the environment, and to acquire and foster markets for sustainable technologies, materials, products, and services, including construction, (see GSA's Green Procurement Compilation at <https://sftool.gov/greenprocurement>) and encouraging the safe operations of vehicles by—

* * * * *

■ 9. Amend section 23.001 by—

■ a. Adding, in alphabetical order, the definitions “Active capture and storage”, “Alternative energy”, “Clean energy”, “Combined heat and power”, and “Fuel cell energy systems”;

■ b. Revising the definition “Greenhouse gases”; and

■ c. Adding, in alphabetical order, the definitions “Life-cycle cost”, “Life-cycle cost effective”, “Renewable electric energy”, “Thermal renewable energy technologies”, and “Water consumption intensity”.

The additions and revision read as follows:

23.001 Definitions.

* * * * *

Active capture and storage means a set of technologies that captures carbon dioxide from power plants, transports the captured carbon dioxide to a sequestration well, and injects the carbon dioxide into the sequestration well in a way that prevents the gas from escaping from the well and back into the atmosphere. These technologies are also referred to as carbon capture and storage technologies.

Alternative energy means energy generated from technologies and approaches that advance renewable heat sources, including biomass, solar thermal, geothermal, waste heat, and renewable combined heat and power processes; combined heat and power; fuel cell energy systems; and energy generation, where active capture and storage of carbon dioxide emissions associated with that energy generation is verified.

Clean energy means renewable electric energy and alternative energy.

Combined heat and power means systems that capture energy that is normally lost in centralized power generation and convert that energy to provide heating and cooling. They are also known as co-generation systems.

* * * * *

Fuel cell energy systems means stationary or distributed generation projects used for baseload power, backup power, power for remote locations, and cogeneration. Stationary fuel cells typically use natural gas, or a renewable energy equivalent such as biogas, to produce either electricity or combined heat and electricity.

Greenhouse gases means carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, nitrogen trifluoride, and sulfur hexafluoride.

Life-cycle cost means the total cost to the Government of acquiring, operating, supporting, and (if applicable) disposing of the items being acquired.

Life-cycle cost-effective means that the life-cycle costs of a product are estimated to be equal to or less than the base case (i.e., current or standard practice or product). In some cases, a life-cycle cost-effective product may result in a higher up front cost with lower operations or maintenance costs or longer life.

Renewable electric energy means energy produced by solar, wind, biomass, landfill gas, ocean (including tidal, wave, current, and thermal), geothermal, geothermal heat pumps,

microturbines, municipal solid waste, or new hydroelectric generation capacity achieved from increased efficiency or additions of new capacity at an existing hydroelectric project (Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade).

Thermal renewable energy technologies means solar, wood, biomass, and landfill gas systems that exclusively produce non-electric energy (i.e., heating or cooling).

* * * * *

Water consumption intensity means water consumption per square foot of building space.

23.002 [Reserved]

■ 10. Remove and reserve section 23.002.

■ 11. Add section 23.100 to read as follows:

23.100 Policy.

(a) This subpart prescribes the policies and procedures for the acquisition of sustainable products and services. The Government's policy is to build a clean energy economy that will sustain the environment for generations to come. Federal leadership in sustainable acquisition will continue to drive national greenhouse gas reductions and support preparations for the impacts of climate change.

(b) Except as provided at 23.104 and 23.105 of this subpart, the Government's policy on sustainable acquisition applies to—

(1) All acquisitions, including those using part 12 procedures and those at or below the micro-purchase threshold; and

(2) Contractors operating Government buildings and vehicles. Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade, section 7(d), requires that leases and contracts for lessor or contractor operation of Government-owned buildings or vehicles facilitate the agency's compliance with the Executive Order.

■ 12. Amend section 23.101 by revising the first sentence of the definition “Contract action” to read as follows:

23.101 Definition.

* * * * *

Contract action means any oral or written action, including task and delivery orders, that results in the purchase, rent, or lease of supplies or equipment, services, or construction using appropriated dollars, including purchases below the micro-purchase threshold.

* * * * *

■ 13. Revise section 23.102 to read as follows:

23.102 Authorities.

(a) Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

(b) All of the authorities specified in subparts 23.2, 23.4, 23.7, 23.8, and 23.10.

■ 14. Amend section 23.103 by—

■ a. Revising the section heading and paragraph (a); and

■ b. Removing paragraph (d).

The revisions read as follows:

23.103 Acquisition of sustainable products and services.

(a) Federal agencies shall advance sustainable acquisition by ensuring that new contract actions for the supply of products and for the acquisition of services (including construction) require sustainable products and services (as defined in 2.101) to the maximum extent practicable (see GSA's Green Procurement Compilation at <https://www.sftool.gov/greenprocurement>).

* * * * *

■ 15. Revise section 23.104 to read as follows:

23.104 Exceptions.

(a) This subpart does not apply to the following acquisitions:

(1) Contracts performed outside of the United States, unless the agency head determines that such application is in the interest of the United States.

(2) Acquisition of sustainable products or services that are not considered practicable due to one or more of the following conditions—

(i) A product or service cannot be acquired that meets reasonable performance requirements;

(ii) A product or service cannot be acquired competitively within the required delivery or performance schedule;

(iii) A product or service cannot be acquired at a reasonable price, *i.e.*, life-cycle cost-effective (see paragraph (b)); or

(iv) An ENERGY STAR® certified product or FEMP-designated product is not life-cycle cost-effective (see section 23.204).

(b)(1) The price shall be deemed unreasonable when the total life-cycle costs are significantly higher for the sustainable product or service compared to the non-sustainable product or service.

(2) Life-cycle costs are determined by combining the purchase price of a product or service with any net costs or savings revenues generated from that product or service during its life.

(c) If at any point during the acquisition it is determined that a contract action cannot comply with the sustainable requirements for one of the reasons listed in paragraph (a)(2) of this section, the contracting officer shall obtain the documented rationale from the requiring activity and ensure that this documentation is maintained in the contract file.

■ 16. Add section 23.106 to read as follows:

23.106 Contract clause.

When purchasing sustainable products or services, except as provided at 23.104 and 23.105, insert the clause at 52.223–XX, Sustainable Products and Services Requirements, in solicitations and contracts.

Subpart 23.2—Energy Efficient Products, Water Efficient Products and Services, Renewable Electric Energy, and Alternative Energy

■ 17. Revise subpart heading 23.2 as set forth above.

■ 18. Amend section 23.201 by revising paragraphs (g) and (h) to read as follows:

23.201 Authorities.

* * * * *

(g) Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

(h) Section 438 of the Energy Independence and Security Act of 2007 (42 U.S.C. 17094).

■ 19. Revise section 23.202 to read as follows:

23.202 Water efficient products and services.

Agencies shall improve water use efficiency and management, including stormwater management by—

(a) Reducing potable water consumption intensity by purchasing WaterSense® and other water efficient products and implementing water efficient strategies;

(b) Purchasing and installing water meters and water loss monitoring services; and

(c) Purchasing and installing appropriate green infrastructure features on Federally owned property to help with stormwater and wastewater management in accordance with section 438 of the Energy Independence and Security Act of 2007 (42 U.S.C. 17094). (See <https://www.epa.gov/greeningepa/technical-guidance-implementing-stormwater-runoff-requirements-federal-projects> for additional information regarding green infrastructure.)

■ 20. Amend section 23.203 by revising paragraph (b)(2) to read as follows:

23.203 Energy-efficient products.

* * * * *

(b) * * *

(2) FEMP at <http://energy.gov/eere/femp/energy-and-water-efficient-products>.

23.206 [Reserved]

■ 21. Remove and reserve section 23.206.

■ 22. Amend section 23.401 by revising paragraph (b)(2) to read as follows:

23.401 Definitions.

* * * * *

(b) * * *

(2) For which USDA has provided purchasing recommendations available at <http://www.biopreferred.gov/BioPreferred/faces/Welcome.xhtml>.

■ 23. Amend section 23.402 by revising paragraphs (c) and (d); and removing paragraph (e).

The revisions read as follows:

23.402 Authorities.

* * * * *

(c) The Energy Policy Act of 2005, Pub. L. 109–58.

(d) Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

■ 24. Amend section 23.404 by—

■ a. Removing from paragraph (a)(3)(iii) the word “and”;

■ b. Redesignating paragraph (a)(3)(iv) as paragraph (a)(3)(v); and

■ c. Adding a new paragraph (a)(3)(iv).

The revision and addition read as follows:

23.404 Agency affirmative procurement programs.

(a) * * *

(3) * * *

(iv) For USDA-designated items only, provisions for reporting quantities and types of biobased products purchased by the Federal agency; and

* * * * *

23.405 [Amended]

■ 25. Amend section 23.405 by removing from paragraph (a)(2) “<http://www.biopreferred.gov>” and adding “<https://www.biopreferred.gov/BioPreferred/>” in its place.

■ 26. Amend section 23.406 by revising paragraphs (b) and (c); and removing paragraph (e) to read as follows:

23.406 Solicitation provisions and contract clauses.

* * * * *

(b) Insert the clause at 52.223–2, Reporting of Biobased Products Under Service and Construction Contracts, in service or construction solicitations and contracts, unless the contract will not involve the use of USDA-designated

items at <https://www.biopreferred.gov/BioPreferred/> or 7 CFR part 3201.

(c) Except for the acquisition of commercially available off-the-shelf items, insert the provision at 52.223–4, Recovered Material Certification, in solicitations that require the delivery or specify the use of EPA-designated items.

* * * * *

■ 27. Revise 23.700 to read as follows:

23.700 Scope.

This subpart prescribes policies for acquiring environmentally preferable products and services, including environmentally sustainable electronic products.

23.701 [Reserved]

■ 28. Remove and reserve section 23.701.

■ 29. Amend section 23.702 by removing paragraphs (f) and (g); and adding a new paragraph (f) to read as follows:

23.702 Authorities.

* * * * *

(f) Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

■ 30. Revise section 23.703 to read as follows:

23.703 Policy.

Agencies must—

(a) Purchase environmentally preferable products or services that—

(1) Meet or exceed specifications, standards, or labels recommended by EPA (see <https://www.epa.gov/greenerproducts/>); or

(2) If no EPA recommendations are available for the product or service the agency is procuring, meet environmental performance criteria developed or adopted by voluntary consensus standards bodies consistent with section 12(d) of the National Technology Transfer and Advancement Act of 1995 (Pub. L. 104–113) and the Office of Management and Budget (OMB) Circular A–119; and

(b) Realize life-cycle cost savings.

■ 31. Revise section 23.704 to read as follows:

23.704 Environmentally sustainable electronic products.

(a) Agencies shall procure environmentally sustainable electronic products (as defined in 2.101), unless an exception in 23.104 or an exemption in 23.105 applies. The Web site at <https://www.epa.gov/greenerproducts/> identifies a registry of environmentally sustainable products that meet the EPA's recommended specifications, standards, or labels. The award of a contract to satisfy an agency's

requirement for an electronic product must be made to a contractor that offers products currently listed on the registry.

(b) This section applies to acquisitions of electronic products to be used in the United States, unless otherwise provided by agency procedures. When acquiring electronic products to be used outside the United States, agencies must use their best efforts to comply with this section.

23.705 [Amended]

■ 32. Amend section 23.705 by redesignating paragraph (a) as the introductory paragraph; and removing paragraphs (b) through (d).

■ 33. Revise section 23.901 to read as follows:

23.901 Authority.

Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

■ 34. Amend section 23.1001 by revising paragraph (c) and removing paragraph (d).

The revision reads as follows:

23.1001 Authorities.

* * * * *

(c) Executive Order 13693 of March 19, 2015, Planning for Federal Sustainability in the Next Decade.

■ 35. Amend section 23.1004 by—

■ a. Revising paragraph (a)(2); and

■ b. Removing from paragraph (b), introductory text, “E.O. 13423” and adding “E.O. 13693” in its place.

The revisions read as follows:

23.1004 Requirements.

(a) * * *

(1) * * *

(2) The toxic chemical and hazardous substance release and use reduction goals of sections 3(j) and (7)(d) of Executive Order 13693.

* * * * *

PART 36—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

■ 36. Amend section 36.104 by revising paragraphs (b)(1) and (5) to read as follows:

36.104 Policy.

* * * * *

(b) * * *

(1) Ensure that all new construction, major renovation, or repair and alteration of Federal buildings complies with the Guiding Principles for Sustainable Federal Buildings and Associated Instructions (available at <http://www.wbdg.org/references/fhpsb.php>);

* * * * *

(5) Ensure pollution prevention and eliminate waste by diverting at least 50

percent of construction and demolition materials and debris.

PART 39—ACQUISITION OF INFORMATION TECHNOLOGY

■ 37. Amend section 39.101 by revising paragraph (a)(1)(ii); and adding paragraph (a)(1)(v) to read as follows:

39.101 Policy.

(a)(1) * * *

(ii) Specifications, standards, or labels for environmentally sustainable electronic products recommended by the U.S. Environmental Protection Agency (see 23.704);

* * * * *

(v) Policies to prepare for climate change-related risks (such as increased frequency of extreme weather events, increases in maximum temperatures, and sea level rise), including risk to mission critical communications, such as telecommunications and data centers.

* * * * *

■ 38. Amend section 39.102 by revising paragraph (b) to read as follows:

39.102 Management of risk.

* * * * *

(b) Types of risk may include schedule risk, risk of technical obsolescence, cost risk, risk implicit in a particular contract type, technical feasibility, dependencies between a new project and other projects or systems, the number of simultaneous high risk projects to be monitored, funding availability, program management risk, and projected impacts of climate change.

* * * * *

PART 42—CONTRACT ADMINISTRATION AND AUDIT SERVICES

■ 39. Amend section 42.302 by revising paragraph (a)(68)(ii) to read as follows:

42.302 Contract administration functions.

(a) * * *

(68) * * *

(ii) Monitoring contractor compliance with specifications or other contractual requirements requiring the delivery or use of sustainable products and services (as defined in 2.101). This must occur as part of the quality assurance procedures set forth in Part 46; and

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 40. Amend section 52.204–8 by—

■ a. Revising the date of the provision;

■ b. Removing from paragraph

(c)(1)(xvi) “Affirmative Procurement” and adding “Reporting” in its place.

The revision reads as follows:

52.204–8 Annual Representations and Certifications.

* * * * *

Annual Representations and Certifications (Date)

* * * * *

- 41. Amend section 52.212–5 by—
- a. Revising the date of the clause and paragraph (b)(40);
- b. Removing paragraphs (b)(41) through (43); and
- c. Redesignate paragraphs (b)(44) through (60) as paragraphs (b)(41) through (b)(57), respectively.

The revisions read as follows:

52.212–5 Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items.

* * * * *

Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items (Date)

* * * * *

(b) * * *
 (40) 52.223–XX Sustainable Products and Services Requirements (Date) (E.O. 13693).

* * * * *

- 42. Amend section 52.213–4 by revising the date of the clause, paragraphs (b)(1)(x) and (b)(1)(xiii) to read as follows:

52.213–4 Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items).

* * * * *

Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items) (Date)

* * * * *

(b) * * *
 (1) * * *
 (x) 52.223–5, Pollution Prevention and Right-to-Know Information (Date) (E.O. 13693) (Applies to services performed on Federal facilities).

* * * * *

(xiii) 52.223–XX, Sustainable Products and Services Requirements (Date) (E.O. 13693) (Applies to acquisitions for sustainable products and services).

* * * * *

- 43. Amend section 52.223–1 by—
- a. Revising the date of the provision; and
- b. Removing from the provision “(7 U.S.C. 8102(c)(3))” and adding “(7 U.S.C. 8102(a)(2)(F))” in its place.

The revision reads as follows:

52.223–1 Biobased Product Certification.

* * * * *

Biobased Product Certification (Date)

* * * * *

- 44. Amend section 52.223–2 by revising the section heading, the date of the clause, and the clause to read as follows:

52.223–2 Reporting of Biobased Products Under Service and Construction Contracts.

* * * * *

Reporting of Biobased Products Under Service and Construction Contracts (Date)

(a) Report to <https://www.sam.gov>, with a copy to the Contracting Officer, on the product types and dollar value of any USDA-designated biobased products purchased by the Contractor during the previous Government fiscal year, between October 1 and September 30; and

- (b) Submit this report no later than—
- (1) October 31 of each year during contract performance; and
- (2) At the end of contract performance.

(End of clause)

- 45. Amend section 52.223–5 by—
- a. Revising the date on the clause;
- b. Removing from paragraph (c), introductory text, “all information” and adding “the following information as” in its place;
- c. Revising paragraph (c)(6);
- d. Revising the date of Alternate I and paragraph (c)(7);
- e. Revising the date of Alternate II and paragraph (c)(7).

The revisions read as follows:

52.223–5 Pollution Prevention and Right-to-Know Information.

* * * * *

Pollution Prevention and Right-to-Know Information (Date)

* * * * *

- (c) * * *
 (6) The toxic chemical and hazardous substance release and use reduction goals of section 3(j) of Executive Order 13693.

* * * * *

Alternate I (Date). * * *

(c)(7) The facility environmental management system.

Alternate II (Date). * * *

(c)(7) The facility compliance audits.

- 46. Amend section 52.223–10 by—
- a. Removing from the introductory paragraph “23.705(a)” and adding “23.705” in its place;
- b. Revising the date of the clause;
- c. Revising the first sentence of paragraph (b).

The revisions read as follows:

52.223–10 Waste Reduction Program.

* * * * *

Waste Reduction Program (Date)

* * * * *

(b) Consistent with the requirements of sections 3(j) and 7(d) of Executive Order 13693, the Contractor shall establish a program to promote cost-effective waste reduction in all operations and facilities covered by this contract. * * *

* * * * *

52.223–13 thru 52.223–17 [Reserved]

- 47. Remove and reserve sections 52.223–13 thru 52.223–17.
- 48. Add section 52.223–XX to read as follows:

52.223–XX Sustainable Products and Services Requirements

As prescribed in 23.106, insert the following clause,

Sustainable Products and Services Requirements (Date)

(a) *Definitions.* As used in this clause—
Green Procurement Compilation, means a public Web site that identifies Federal sustainable acquisition requirements and provides other guidance for the purchase of sustainable products and services.

Sustainable products and services means products and services, including construction, that—

(1) Meet statutory mandates for purchasing—

(i) Recycled content products designated by the U.S. Environmental Protection Agency (EPA) under the Comprehensive Procurement Guidelines;

(ii) Energy and water efficient products such as ENERGY STAR® certified and Federal Energy Management Program (FEMP)-designated products identified by EPA and the U.S. Department of Energy; and

(iii) Biobased content products meeting the content requirement of the U.S. Department of Agriculture under the BioPreferred® program;

(2) Are identified by EPA programs, including—

(i) Significant New Alternatives Policy (SNAP) chemicals or other alternatives to ozone-depleting substances, and products and services that minimize or eliminate, when feasible, the use, release, or emission of high global warming potential hydrofluorocarbons, such as by using reclaimed instead of virgin hydrofluorocarbons;

(ii) WaterSense® certified products and services (water efficient products);

(iii) Safer Choice Certified products (chemically intensive products that contain safer ingredients); and

(iv) SmartWay® Transport partners and SmartWay® products (fuel efficient products and services); or

(3) Are environmentally preferable products or services that—

(i) Meet or exceed specifications, standards, or labels recommended by EPA, (see <https://www.epa.gov/greenerproducts>); or

(ii) Where there is no specification, standard, or label recommended by EPA for a specific product or service category, meet

environmental performance criteria developed or adopted by voluntary consensus standards bodies consistent with section 12(d) of the National Technology Transfer and Advancement Act of 1995 (Pub. L. 104–113) and Office of Management and Budget Circular A–119.

(b) Unless approved in writing by the Contracting Officer, in the performance of this contract, the Contractor shall—

- (1) Deliver, furnish for Government use;
- (2) Incorporate into the construction of a public building or public work; or
- (3) Furnish for Contractor use at a Federally-controlled facility sustainable products and services as specified in the contract.

(c) Sustainable products and services must meet the applicable standard, specifications, or other program requirements at the time of submission of an offer or a quote.

(d) Visit the Green Procurement Compilation at <https://www.sftool.gov/greenprocurement> for a comprehensive list of Federal Governmentwide sustainable product and service requirements.

(End of clause)

BILLING CODE 6820–EP–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171, 172, 173, 174, 177, 178, 179, and 180

[Docket No. PHMSA–2016–0077 (HM–251D)]

RIN 2137–AF24

Hazardous Materials: Volatility of Unrefined Petroleum Products and Class 3 Materials

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT or Department).

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: PHMSA is considering revising the Hazardous Materials Regulations (HMR) to establish vapor pressure limits for unrefined petroleum-based products and potentially all Class 3 flammable liquid hazardous materials that would apply during the transportation of the products or materials by any mode. PHMSA is currently assessing the merits of a petition for rulemaking submitted by the Attorney General of the State of New York regarding vapor pressure standards for the transportation of crude oil. The petition requests that PHMSA implement a Reid Vapor Pressure (RVP) limit less than 9.0 pounds per square inch (psi) for crude oil transported by

rail. PHMSA will use the comments in response to this ANPRM to help assess and respond to the petition and to evaluate any other potential regulatory actions related to sampling and testing of crude oil and other Class 3 hazardous materials. PHMSA will also evaluate the potential safety benefits and costs of utilizing vapor pressure thresholds within the hazardous materials classification process for unrefined petroleum-based products and Class 3 hazardous materials.

DATES: Comments must be received by March 20, 2017.

ADDRESSES: You may submit comments identified by the docket number PHMSA–2016–0077 (HM–251D) and the relevant petition number by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov> Follow the instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System; U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, Routing Symbol M–30, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* To the Docket Management System; Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the agency name and docket number for this ANPRM at the beginning of the comment. To avoid duplication, please use only one of these four methods. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you provide. All comments received will be posted without change to the Federal Docket Management System (FDMS), including any personal information.

Docket: For access to the dockets to read background documents or comments received, go to <http://www.regulations.gov> or DOT's Docket Operations Office located at U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, Routing Symbol M–30, 1200 New Jersey Avenue SE., Washington, DC 20590.

Privacy Act: Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comments (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). DOT posts these comments, without edit, including

any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: Lad Falat, Director, Engineering and Research, (202) 366–4545, Office of Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Ave. SE., Suite E21–314, Washington, DC 20590–0001.

I. Executive Summary

On December 1, 2015, PHMSA received a petition for rulemaking from the New York State Office of the Attorney General (New York AG) proposing amendments to the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180) applicable to the transportation of crude oil by rail. PHMSA designated the petition as

Petition P-1669¹ (P-1669 or the petition). In P-1669, the New York AG asks PHMSA to add a new paragraph (a)(6) to existing § 174.310 requiring all crude oil transported by rail to have a Reid vapor pressure (RVP) of less than 9.0 pounds per square inch (psi).² The petition is based on the premise that limiting the product's vapor pressure will reduce the risk of death or damage from fire or explosion in the event of an accident. Separately, the North Dakota Industrial Commission (NDIC) implemented a maximum vapor pressure threshold of 13.7 psi, VPCR_x, Reid equivalent.³ Therefore, in this ANPRM, PHMSA is asking a series of questions seeking input as to whether there should be national vapor pressure thresholds for petroleum products and/or other Class 3 hazardous materials and, if so, what that thresholds should be.

PHMSA has long stressed that it is the offeror's responsibility under § 173.22 of the HMR to ensure that hazardous materials are properly classified. To reinforce this requirement, the HMR also require offerors of unrefined petroleum-based products, including crude oil, to institute a sampling and testing program in accordance with § 173.41.⁴ There are numerous industry standards for sampling and determining vapor pressure of crude oil and other Class 3 hazardous materials.

When taking additional steps to better understand hazardous materials and the risks those materials may pose in transportation, DOT always strives to rely on the best available science and information to inform its decision making. Section 7309 of the "Fixing America's Surface Transportation Act of 2015," or the "FAST Act," directs the Secretary of Energy, in cooperation with the Secretary of Transportation (Secretary), to submit a report to Congress that contains results of the Crude Oil Characteristics Research Sampling, Analysis and Experiment

(SAE) Plan⁵ (the Sandia Study discussed in Section IV.C of this ANPRM will implement the SAE Plan), as well as recommendations for regulations and legislation based on the findings to improve the safe transport of crude oil. The findings of the Sandia Study will help inform the Department as it moves forward.

II. Objective of This ANPRM

Federal hazardous materials law authorizes the Secretary to "prescribe regulations for the safe transportation, including security, of hazardous materials in intrastate, interstate, and foreign commerce." 49 U.S.C. 5103(b)(1). The Secretary has delegated this authority to PHMSA, 49 CFR 1.97(b). The HMR are designed to achieve three primary goals: (1) Help ensure that hazardous materials are packaged and handled safely and securely during transportation; (2) provide effective communication to transportation workers and emergency responders of the hazards of the materials being transported; and (3) minimize the consequences of an accident or incident should one occur. The hazardous material regulatory system is a risk management system that is prevention-oriented and focused on identifying safety or security hazards and reducing the probability and consequences of a hazardous material release.

Under the HMR, hazardous materials are categorized into hazard classes and packing groups based on analysis of and experience with the risks they present during transportation. The HMR: (1) Specify appropriate packaging and handling requirements for hazardous materials based on this classification and require a shipper to communicate the material's hazards through the use of shipping papers, package marking and labeling, and vehicle placarding; (2) require shippers to provide emergency response information applicable to the specific hazard or hazards of the material being transported; and (3) mandate training requirements for persons who prepare hazardous materials for shipment or transport hazardous materials in commerce. The HMR also include operational requirements applicable to each mode of transportation.

The Administrative Procedure Act (APA), 5 U.S.C. 551, *et seq.* requires Federal agencies to give interested persons the right to petition an agency to issue, amend, or repeal a rule. 5

U.S.C. 553(e). In accordance with PHMSA's rulemaking procedure regulations in 49 CFR part 106, interested persons may ask PHMSA to add, amend, or repeal a regulation by filing a petition for rulemaking along with information and arguments supporting the requested action (§ 106.95).

The petition is based on the premise that limiting the vapor pressure, as measured by RVP, of crude oil in rail transport below 9.0 psi will reduce the risk of death or damage from fire or explosion in the event of an accident. However, in order to grant the petition, PHMSA would have to:

- Determine the best metric or combination of metrics (vapor pressure or other metric) for measuring and controlling fire and explosion risk in crude oil transport;
- Quantify the improvement in safety, if any, due to risk reduction from implementation of vapor pressure thresholds at varying levels;
- Identify the measurement techniques necessary to establish compliance;
- Identify offerors' compliance strategies and market impacts with RVP standards at varying levels of stringency, and estimate their economic costs and environmental impacts;
- Identify other regulations and industry practices, such as volatile organic compound emissions standards imposed through the Clean Air Act, or State regulations, or pipeline operator RVP standards, potentially affecting compliance strategies and costs, and safety benefits;
- Evaluate the extent to which use of DOT Specification 117 tank cars mitigates the risk of transporting crude oil;
- Compare compliance costs of mitigation strategies with risk reduction from adoption of the petition; and
- Balance the benefits and costs in setting the level of the chosen metric. If RVP is the best metric, PHMSA would have to determine that a particular RVP limit is preferable to any other limit. For example, if 9.0 psi is chosen, PHMSA would need to show that 9.0 psi is preferable to some other potential limits, such as 8.0 or 11.0. This would include considering whether there is a "safe" level of RVP below which risks are minimal (which would lead to little safety benefit from reducing RVP further), or some level of RVP where risks do not further increase.

In this ANPRM, PHMSA is seeking public comment to obtain the views of those who are affected by the NDIC Order, as well as those who are likely to be impacted by the changes proposed

¹ PHMSA placed a copy of the petition in docket number PHMSA-2015-0253, which is accessible at <https://www.regulations.gov/docket?D=PHMSA-2015-0253>.

² RVP was a common measurement of the vapor pressure of flammable liquids such as gasoline and crude oil.

³ RVP uses different equipment and procedures than Reid equivalent. For example, Reid equivalent is done using closed conditions to preserve the lighter ends, while RVP is conducted in an open test chamber.

⁴ "Unrefined petroleum-based products" refers to hazardous hydrocarbons that are extracted from the earth and have not yet been refined. In the high-hazard flammable trains (HHFT) final rule, PHMSA replaced "mined liquids and gases" with "unrefined petroleum-based products" based on comments received in response to the HHFT NPRM.

⁵ <http://energy.gov/sites/prod/files/2016/06/f32/Crude%20Oil%20Characteristics%20Research%20SAE%20Plan.pdf>.

in the petition, including those who are likely to benefit from, be adversely affected by, or potentially be subject to additional regulation. Additionally, PHMSA seeks comment from stakeholders regarding the many factors PHMSA must consider when evaluating the need for and impacts of regulatory changes. In general, PHMSA requests comments on:

- Safety benefits of any proposed regulatory change, including the relevant scientific or other empirical support;
- Economic impacts, including data, on the costs and benefits; and
- Ease of compliance with the regulatory changes that Petition P-1669 requests.

This ANPRM will provide an opportunity for public participation in the development of regulatory amendments and promote greater exchange of information and perspectives among the various stakeholders. PHMSA issued this notice to help respond to Petition P-1669 and,

more broadly, to consider a focused and well-developed regulatory path forward that reflects the views of all relevant parties.

III. Petition P-1669 & Other Efforts To Set a Vapor Pressure Standard for Crude Oil

A. Summary & Supporting Data for P-1669

In Petition P-1669,⁶ the New York State Office of the Attorney General petitioned PHMSA to revise § 174.310 to establish a nationwide vapor pressure standard for crude oil shipped by rail throughout the United States. The petition states, “At present, no federal regulation exists to limit the volatility of crude oil shipped in railroad tank cars. This petition for rulemaking seeks to close that loophole and reduce the risk of harm to American communities.” The petition further requests PHMSA to “assert its rulemaking authority, as delegated by the Secretary of Transportation, and establish a federal RVP limit for crude oil transported by

rail in the United States at an appropriate level that is less than 9.0 psi.”

A copy of the petition is available in the public docket for this ANPRM, and can be viewed at either <http://www.regulations.gov> or DOT’s Docket Operations Office (see **ADDRESSES** section above).

Petition P-1669 makes the following claims to support the establishment of a vapor pressure threshold for crude oil. Specifically, the petition asserts:

1. Shipments of Bakken crude oil by rail are vastly expanding;
2. A disturbing trend of train explosions [exists] involving shipments of Bakken crude oil;
3. Bakken crude oil is highly volatile and extremely flammable; and
4. The volatility of crude oil can be effectively reduced with existing technology.

The petition also provides the following table to highlight the vapor pressures of the crude oil involved in several high-profile train accidents:

Source	Reid Vapor pressure of Bakken crude oil
Lac-Mégantic, Quebec (July 6, 2013)	Average between 9.0 to 9.5 psi. ⁷
Heimdal, North Dakota (May 6, 2015)	10.8 psi. ⁸
PHMSA Operation Safe Delivery	Average of 12.3 psi. ⁹
Mt. Carbon, West Virginia (February 16, 2015)	13.9 psi. ¹⁰
Lynchburg, Virginia (April 2015)	Average of 14.3 psi. ¹¹

In addition, Petition P-1669 summarizes the NDIC Standards (discussed in Section IV.E of this ANPRM) and the HHFT final rule (discussed in Section IV.B of this ANPRM) arguing in support of a new RVP limit of less than 9.0 psi for the safe transportation of crude oil by rail. However, the petition did not identify specific costs and benefits, or robust empirical information, to support the proposed limit.

B. North Dakota Industrial Commission Oil Conditioning Order No. 25417

In December 2014, NDIC issued Oil Conditioning Order No. 25417 (Order), which requires operators of Bakken crude oil produced in the state of North Dakota to separate the gaseous and light hydrocarbons from all Bakken crude oil.¹² The Order requires the use of a

gas-liquid separator and/or an emulsion heater-treater capable of separating the gaseous and liquid hydrocarbons, prohibits blending of Bakken crude oil with specific materials, and requires crude oil produced to have a Vapor Pressure (using ASTM D6377) not greater than 13.7 psi or 1 psi less than the vapor pressure of stabilized crude oil.

According to NDIC, the measurements taken under the Order use the ASTM D6377 with a vapor to liquid (V/L) ratio of 4 and a temperature of 100 °F (37.8 °C), which is equivalent to a Reid Vapor Pressure measurement. The Order requires the 13.7 psi limit to be measured as pounds per square inch absolute (psia) and not pounds per square inch gauge (psig). According to NDIC, psia is used to make clear that the

pressure is relative to a vacuum rather than the ambient atmospheric pressure.

IV. Background Information

In 1990, the Research and Special Programs Administration (RSPA), the predecessor agency to PHMSA, published a final rule under Docket HM-181 which adopted a new classification system for gases, which assigned new divisions for flammable gas (2.1), non-flammable, non-toxic compressed gas (2.2), and toxic/poisonous gases (2.3). The new system defined flammable gases according to their (1) state as a gas at ambient conditions (*i.e.*, 14.7 psia (101.4 kPa) and 68 °F (20 °C)) and (2) flammability, as determined by existing flammability limits. There were no vapor pressure requirements.

⁶ <https://www.regulations.gov/docket?D=PHMSA-2015-0253>.

⁷ See Transportation Safety Board (TSB) of Canada Laboratory Report LP148/2013, Aug. 19, 2014. The TSB Report notes that the vapor pressure measurements of these samples may be lower than the vapor pressure of the Bakken crude oil in the Lac-Mégantic accident: “The occurrence crude oil samples were taken at atmospheric pressure. This could lead to an underestimation of the crude oil[’]s

volatility due to evaporation loss of very light constituents.”

¹² See <https://www.dmr.nd.gov/oilgas/Approved-or25417.pdf>.

RSPA adopted the definition of a “gas” from the United Nations (UN) Transport of Dangerous Goods Model Regulation in an effort to harmonize its regulations with international standards in 1994. The HM-181 final rule did not address a particular method of testing vapor pressure, or otherwise address how the new definition would impact the existing definition of flammable gas in 49 CFR 173.115. However, as late as 1990, RSPA’s definitions of gases were limited to gases under pressure, *e.g.*, compressed gases, cryogenic liquids, and refrigerant or dispersant gases. Both the definition of compressed gas, and

the related definition of flammable compressed gas, contemplated using the RVP testing method described in ASTM D 323.

A. Current HMR Requirements for the Classification of Unrefined Petroleum-Based Products

Unrefined petroleum-based products, including crude oil, have variable chemical compositions. Differences in the chemical makeup of the raw material can vary across different times and wellheads. Typically, organic materials from oil and gas production at a wellhead are passed through a

“separator” to separate the gas, oil, and water from the crude oil produced. As such, there are multiple hazardous liquids that are commonly shipped from the well-site, including crude oil, condensate, and natural gas liquids.¹³ A limited separation process, which is insufficient to remove the lightest components, could increase the volatility of the crude oil. In accordance with § 173.22 of the HMR, the offeror must consider all hazards when classifying a hazardous material. The table below identifies key classification considerations for unrefined petroleum-based products.¹⁴

CURRENT CLASSIFICATION CONSIDERATIONS FOR UNREFINED PETROLEUM-BASED PRODUCTS¹⁵

Class	Division	Name	Definition
2	2.1	Flammable Gas	Any material which is a gas at 68 °F or less and 14.7 psia of pressure (a material which has a boiling point of 68 °F or less at 14.7 psia) which— (1) Is ignitable at 14.7 psia when in a mixture of 13 percent or less by volume with air; or (2) Has a flammable range at 14.7 psia with air of at least 12 percent regardless of the lower limit.
	2.2	Non-flammable, Non-poisonous compressed gas.	Any material (or mixture) which—(1) Exerts in the packaging a gauge pressure of 200 kPa (29.0 psig/43.8 psia) or greater at 68 °F, is a liquefied gas or is a cryogenic liquid, and (2) Does not meet the definition of Division 2.1 or 2.3.
	2.3	Gas Poisonous by Inhalation	A material which is a gas at 68 °F or less and a pressure of 14.7 psia (a material which has a boiling point of 68 °F or less at 14.7 psia) and which—(1) Is known to be so toxic to humans as to pose a hazard to health during transportation, or (2) In the absence of adequate data on human toxicity, is presumed to be toxic to humans because when tested on laboratory animals it has an LC ₅₀ value of not more than 5000 mL/m ³ (see § 173.116(a) for assignment of Hazard Zones A, B, C or D). LC ₅₀ values for mixtures may be determined using the formula in § 173.133(b)(1)(i) or CGA P-20 (IBR, see § 171.7).
3		Flammable and Combustible Liquids	<i>Flammable liquids</i> —liquid with a flash point of 140 °F or less. <i>Combustible liquids</i> —liquid with a flash point above 140 °F and below 200 °F that does not meet any other hazard class definition.
6	6.1	Poisonous material	A material, other than a gas, which is known to be so toxic to humans as to afford a hazard to health during transportation, or which, in the absence of adequate data on human toxicity: (1) Is presumed to be toxic to humans because it falls within any one of the categories specified in § 173.132(a)(1) (Oral Toxicity, Dermal Toxicity, or Inhalation Toxicity) when tested on laboratory animals (when-ever possible, animal test data that has been reported in the chemical literature should be used); or (2) Is an irritating material, with properties similar to tear gas, which causes extreme irritation, especially in confined spaces.
8		Corrosive material	A liquid or solid that causes full thickness destruction of human skin at the site of contact within a specified period of time. A liquid, or a solid which may become liquid during transportation, that has a severe corrosion rate on steel or aluminum based on the criteria in § 173.137(c)(2) is also a corrosive material. Whenever practical, in vitro test methods authorized in § 173.137 or historical data authorized in § 173.136(c) should be used to determine whether a material is corrosive.

¹³ Condensate refers to C₅–C₈, natural gas liquids (NGLs) refers to C₂–C₈, both separated from the crude oil during initial processing.

¹⁴ The HMR define three states of matter in 49 CFR 171.8: Solid, liquid, or gas. A liquid is a material, other than an elevated temperature

material, with a melting point or initial melting point of 20 °C (68 °F) or lower at a standard pressure of 101.3 kPa (14.7 psia). In other words, it is a liquid in its normal state at ambient temperature and standard pressure. A gas is a material which has a vapor pressure greater than 300 kPa (43.5 psia) at 50 °C (122 °F) or is

completely gaseous at 20 °C (68 °F) at a standard pressure of 101.3 kPa (14.7 psia). A solid is a material which is not a gas or a liquid.

¹⁵ kPa: kilopascals; psia: pounds per square inch absolute; psig: pounds per square inch gauge; LC₅₀: Lethal Concentration measure.

As illustrated in the above table, an offeror must account for whether their crude oil exhibits hazards beyond that of a Class 3 hazardous material. Below are some examples of the impacts of potential hazards and the risks posed if those properties are not identified and considered:

- Dissolved gases—may result in pressure build-up inside the tank car, increasing the volatility of the material and requiring a more robust packaging.
- Corrosivity—may corrode the tank car and its components, requiring an inner lining.
- Toxicity—may pose an inhalation hazard to human life upon release from the tank car without ignition.

Part 173 of the HMR contains testing methods for the various hazard classes and respective criteria for packing groups. In the event an offeror determines a hazardous material meets more than one hazard class, the offeror must determine the primary hazard. The

HMR (at § 173.2a) require a hazardous material to be classed according to the highest applicable hazard class. The following list illustrates the precedence of the hazard classes that are most frequently associated with unrefined petroleum-based products:

- (1) Division 2.3 (poisonous gases);
- (2) Division 2.1 (flammable gases);
- (3) Division 2.2 (non-flammable gases);
- (4) Division 6.1 (poisonous liquids), Packing Group I, poisonous-by-inhalation only;
- (5) Class 3 (flammable and combustible liquids);
- (6) Class 8 (corrosive materials) or Division 6.1 (poisonous liquids or solids other than Packing Group I, poisonous-by-inhalation); and
- (7) Combustible liquids.

When making classification determinations, the offeror of the hazardous material must also consider the packing groups associated with each hazard class. Packing group indicates a

grouping according to the severity of the hazard presented by hazardous materials. The packing group must be determined by applying the following criteria:

1. Class 2 Packing Group Assignment

Materials meeting the definition of Division 2.1 or 2.2 are not assigned packing groups. Division 2.3 materials are assigned hazard zones related to the toxicity of the material. *See* § 173.116.

2. Class 3 Packing Group Assignment

Packing group	Flash point (closed-cup)	Initial boiling point (°F)
I	≤95
II	<73 °F	>95
III	≥73 °F, ≤140 °F	>95

3. Class 6—Division 6.1 Packing Group Assignment

Packing group	Oral toxicity LD ₅₀ (mg/kg)	Dermal toxicity LD ₅₀ (mg/kg)	Inhalation toxicity by dusts and mists LC ₅₀ (mg/L)
I	≤5.0	≤50	≤0.2.
II	>5.0 and ≤50	>50 and ≤200	>0.2 and ≤2.0.
III	>50 and ≤300	>200 but ≤1000	>2.0 and ≤4.0.

Packing group	Vapor concentration and toxicity
I (Zone A)	V ≥ 500 LC ₅₀ and LC ₅₀ ≤200 mL/M ³ .
I (Zone B)	V ≥ 10 LC ₅₀ ; LC ₅₀ ≤1000 mL/m ³ ; and the criteria for Packing Group I, Hazard Zone A are not met.
II	V ≥ LC ₅₀ ; LC ₅₀ ≤3000 mL/m ³ ; and the criteria for Packing Group I, are not met.
III	V ≥ .2 LC ₅₀ ; LC ₅₀ ≤5000 mL/m ³ ; and the criteria for Packing Group I and II, are not met.

Note 1: V is the saturated vapor concentration in air of the material in mL/M³ at 20 °C and standard atmospheric pressure.

Note 2: A liquid in Division 6.1 meeting criteria for Packing Group I, Hazard Zones A or B stated in § 173.133(a)(2) is a poisonous by inhalation subject to additional hazard communication requirements in §§ 172.203(m), 172.313 and table 1 of 172.504(e).

4. Class 8—Packing Group Assignment

Packing group	Corrosivity
I	Material that causes full thickness destruction of intact skin tissue within 60 minutes, starting after an exposure time of three minutes or less.
II	Material (not meeting packing group I criteria) that causes full thickness destruction of intact skin tissue within 14 days starting after an exposure time of more than three minutes but not more than 60 minutes.
III	Material (not meeting packing group I or II criteria) that causes full thickness destruction of intact skin tissue within an observation period of up to 14 days starting after the exposure time of more than 60 minutes but not more than 4 hours; or Material that does not cause full thickness destruction of intact skin tissue but exhibits a corrosion rate on steel or aluminum surfaces exceeding 0.25 inch a year at a test temperature of 130 °F.

Proper classification is a critical step in the process for ensuring hazardous materials are transported safely. Following the selection of a proper hazard class or classes and an appropriate packing group for the material, an offeror must select the name from the Hazardous Materials Table (HMT; 49 CFR 172.101) most accurately describing the material being

shipped (e.g., Petroleum crude oil). The selected name must account for all hazards present. If there is no proper shipping name that accurately describes the material and its hazards, an offeror may use a generic shipping description (e.g., Hydrocarbon gas mixture, liquefied, n.o.s.). Generic descriptions are denoted in the HMT with an “n.o.s.,” meaning “not otherwise

specified.” The accurate selection of the shipping description is important in determining the proper packaging.

In 2014, the rail and oil industry, with PHMSA’s input, developed a recommended practice designed to improve crude oil rail safety through proper classification and loading practices. The American Petroleum Institute (API) led the effort, which

resulted in the development of an American National Standards Institute (ANSI) recognized recommended practice, API RP 3000, *Classifying and Loading of Crude Oil Into Rail Tank Cars*. The API RP 3000 provides guidance on the material characterization, transport classification, and quantity measurement for overfill prevention of crude oil for the loading of rail tank cars.

On July 23, 2014, PHMSA and the Federal Railroad Administration (FRA) released a report summarizing the analysis of Bakken crude oil data gathered from August 2013 to May 2014.¹⁶ PHMSA and FRA conducted tests and obtained results from 135 samples. The majority of crude oil analyzed from the Bakken region displayed characteristics consistent with those of a Class 3 flammable liquid, packing group I or II.

B. High-Hazard Flammable Train (HHFT) Rulemaking

On August 1, 2014, PHMSA, in coordination with FRA, published a notice of proposed rulemaking (NPRM) entitled “Hazardous Materials: Enhanced Tank Car Standards and Operational Controls for High-Hazard Flammable Trains” (HM–251; 79 FR 45015)¹⁷ proposing requirements to reduce the consequences and, in some instances, reduce the probability of accidents involving trains transporting large quantities of Class 3 flammable liquids. In the NPRM, PHMSA indicated that the properties of unrefined petroleum-based products, including crude oil, are variable based on time, method, and location of extraction, whereas manufactured goods often undergo a strict quality assurance process designed to ensure characteristics are within defined parameters. Unlike manufactured goods, organic materials from oil and gas production represent a unique challenge in regards to classification. The chemical makeup of the raw material can vary over time and geographical location. As noted earlier, typically, organic materials from oil and gas production at a wellhead are passed through a “separator” to remove most of the gas, sediment, and water from the crude oil. As such, there are multiple hazardous liquids that are commonly shipped from the well-site, including

crude, natural gas condensate, and natural gas liquid.

Given this variability, PHMSA stressed that it is the offeror’s responsibility, under § 173.22 of the HMR, to ensure hazardous materials are properly classified. To reinforce this requirement, PHMSA proposed a new § 173.41 explicitly requiring a sampling and testing program for unrefined petroleum-based products, including crude oil.

In the HHFT NPRM, PHMSA also sought comments from the public on the role of vapor pressure in classifying flammable liquids and selecting packagings, as well as whether vapor pressure thresholds should be established. PHMSA did this based on comments received to the HHFT ANPRM (78 FR 54849). Individuals, government organizations, and environmental groups, such as the Delaware Riverkeeper Network, supported mandating vapor pressure testing that in their words would “increase safety and accuracy.” Environmental groups and offeror Quantum Energy also suggested packaging selection should be based on vapor pressure. Industry stakeholders, such as the Dangerous Goods Advisory Council and the American Fuel and Petrochemical Manufacturers (AFPM), stated vapor pressure testing was unnecessary. For example, AFPM specifically stated “Bakken crude oil vapor pressures appear to be within operational limits required for transport in pipelines (facility piping and transmission lines) and for purposes of storage in floating roof tanks; thus operational vapor pressure limits do not necessitate stabilization in advance of rail transportation.”¹⁸

On May 8, 2015, PHMSA, in coordination with FRA, published a final rule entitled “Hazardous Materials: Enhanced Tank Car Standards and Operational Controls for High-Hazard Flammable Trains” (HM–251; 80 FR 26643) to codify requirements in the HMR to reduce the consequences and, in some instances, reduce the probability of accidents involving trains transporting large quantities of Class 3 flammable liquids. In regard to the classification of unrefined petroleum-based products, the final rule, like the NPRM before it, stressed the offeror’s responsibility to properly classify and describe a hazardous material. In the rule, PHMSA codified § 173.41 to require a sampling and testing program for unrefined petroleum-based products. PHMSA intended § 173.41 to provide

the industry with a direct way of establishing a program to consider the varying characteristics and properties of unrefined petroleum-based products. The program applies to all modes of transportation and offerors must certify that a program is in place, document the testing and sampling program outcomes, and make information available to DOT personnel upon request.

In the HHFT final rule, PHMSA indicated that it could not adopt any other specific changes related to vapor pressure, exceptions for packing group, or incentives to reduce volatility, because PHMSA did not propose them in the NPRM. 80 FR 26643, 26665.¹⁹ However, PHMSA indicated it might consider addressing these comments in a future action. Based on the comments received, and P–1669, PHMSA requests comments regarding the role of “vapor pressure” in the classification process and specifically in regards to unrefined petroleum-based products, such as crude oil.

C. Sandia Study

In 2014, the DOT and the U.S. Department of Energy (DOE) commissioned a review of available crude oil chemical and physical property data literature²⁰ to characterize and define tight crude oils based on their chemical and physical properties, and identify properties that could contribute to increased potential for accidental combustion.²¹ Sandia National Laboratories (Sandia) conducted this review and focused on crude oil’s potential for ignition, combustion, and explosion. A partial list of properties surveyed includes density (expressed as API gravity), vapor pressure, initial boiling point, boiling point distribution, flash point, gas-oil ratio, “light ends” (dissolved gases—including nitrogen, carbon dioxide, hydrogen sulfide, methane, ethane, and propane—and butanes and other volatile liquids) composition, and flash gas composition. Although the review yielded a large database encompassing a wide variety of crude oils and their properties, it also illustrated the difficulty in utilizing available data as the basis for accurately defining and meaningfully comparing crude oils.

¹⁹ <https://www.gpo.gov/fdsys/pkg/FR-2015-05-08/pdf/2015-10670.pdf>.

²⁰ See <http://prod.sandia.gov/techlib/access-control.cgi/2015/151823.pdf>.

²¹ Tight oil is a type of oil extracted from petroleum-bearing formations of low permeability (typically shale or tight sandstone). These formations produce oil through hydraulic fracturing.

¹⁶ See http://phmsa.dot.gov/staticfiles/PHMSA/DownloadableFiles/Hazmat/07_23_14_Operation_Safe_Delivery_Report_final_clean.pdf.

¹⁷ See <https://www.gpo.gov/fdsys/pkg/FR-2014-08-01/pdf/2014-17764.pdf>.

¹⁸ <https://www.regulations.gov/document?D=PHMSA-2012-0082-3274>.

An important outcome of the review was formal recognition of the wide-ranging variability in crude oil sample type, sampling method, and analytical method, as well as the acknowledgement that this variability limits the adequacy of the available crude oil property data set as the basis for establishing effective and affordable safe transport guidelines. In recognition of the need for improved understanding of crude oil, and especially tight crude oil properties, the Sandia Study was designed to characterize tight and conventional crudes based on key chemical and physical properties and to identify properties that may contribute to increased likelihood and/or severity of combustion events that could arise during handling and transport. The work scope represents a phased approach, in that knowledge gained from completing each task will inform the execution of subsequent tasks to maximize efficiency in achieving overall plan objectives. Through four tasks, the SAE Plan,²² will characterize tight and conventional crudes based on identified key chemical and physical qualities and identify properties that may contribute to increased likelihood and/or severity of combustion events that could arise during handling and transport. This project is currently in Task 2, which is designed to determine what methods of sampling and analysis are suitable for characterizing the physical and chemical properties of different crude oils.

D. PHMSA Actions

On January 2, 2014, PHMSA issued a safety alert to notify the public, emergency responders, shippers, and carriers that crude oil from the Bakken region may be more flammable than traditional heavy crude oil.²³ The alert was a follow-up to the PHMSA and FRA joint safety advisory entitled, "Safety and Security Plans for Class 3 Hazardous Materials Transported by Rail," 78 FR 69745, published November 20, 2013. The safety advisory stressed that offerors need to properly classify and describe hazardous materials being offered for transportation in accordance with § 173.22 of the HMR.

E. Pipeline Operators

In recent months, the volume of crude oil exported by rail from North Dakota has steadily declined to less than

400,000 barrels per day. The North Dakota State Pipeline Authority estimates that more than 500,000 barrels per day of Bakken crude oil moves by pipeline. Pipeline operators routinely set upper limits on RVP levels for crude oil that will be accepted for transport. A sample of six North Dakota pipeline operators indicates that they have set RVP upper limits ranging from 9.0 to 14.7 psia for acceptable crude oil.²⁴ Understanding how oil producers comply with pipeline operators' RVP standards, or possibly instead ship crude oil with RVP levels that exceed pipeline operator limits by rail, would provide useful insights for understanding the consequences of setting RVP limits for rail transport.

F. Accident History and Vapor Pressure Levels

As shown above, Petition P-1669 included a table highlighting the vapor pressures of the crude oil involved in several high-profile train accidents. According to the Petition, the vapor pressures of the oil involved in the five accidents was, at the low end, an "average between 9.0 and 9.5 psi," and at the high end, "an average of 14.3 psi." It likely would be useful to have more comprehensive information regarding the vapor pressure levels of Class 3 flammable liquid hazardous materials involved in rail accidents, and information about the nature, characteristics and consequences of the accidents. It would be useful to have such information for accidents involving other transportation modes as well. Such information may inform understanding of how a flammable liquid's vapor pressure affects the characteristics and consequences of accidents involving the liquid. PHMSA

began collecting this information for rail after July 2013. The information we have has uncertainty since testing may happen after the train is moved to a final destination and there may have been different sampling and testing techniques used, among other issues. PHMSA may consider publishing this information for the NPRM once we review and consolidate.

V. Comments and Questions

PHMSA requests comments on the merits of P-1669.²⁵ PHMSA is uncertain that the requested action in Petition P-1669 would provide a safety benefit and requests comments on the following questions:

A. General Questions

1. To what extent, if at all, would requiring crude oil shipped by rail to have a RVP of no greater than 9.0 psi decrease the expected degree, consequence, or magnitude of a release or the likelihood of a fire during an accident? Please provide relevant scientific or other empirical information to support your comment.

2. What, if any, peer-reviewed or other robust information is available that addresses the safety effectiveness and/or cost of setting vapor pressure limits for crude oil or other flammable liquids during transportation?

3. How do the consequences resulting from accidents involving low-vapor pressure flammable liquids (e.g., ethanol)²⁶ compare to accidents involving high vapor pressure flammable liquids (e.g., certain crude oil)? If the consequences are significantly similar, will adopting a vapor pressure limit address the magnitude of release or the likelihood of fire during an accident for both commodity types?

4. Would adopting a vapor pressure limit impact trans-border shipments? If so, how?

5. What methods can be employed to measure environmental and human health effects of setting a vapor pressure limit for the transport of crude oil by rail? How would the benefits of setting a vapor pressure limit be quantified?

6. What options are available for reducing the volatility of crude oil before it's offered for transportation and loaded into tank cars, such as existing consensus standards or operating practices used for conditioning (heating and treating) crude oil? What voluntary measures has industry taken to reduce the volatility of crude oil shipped in interstate commerce by any mode? If so, what are they?

7. What other regulatory and industry marketability measures are in place that restrict the volatility of crude oil in transport, such as RVP limits set by pipeline operators, or the impact of volatile organic compound emission standards for storage tanks and other petroleum facilities?

8. How many carloads and trains would be affected by setting a vapor pressure limit for

²² See <http://energy.gov/sites/prod/files/2016/06/f32/Crude%20Oil%20Characteristics%20Research%20SAE%20Plan.pdf>.

²³ See http://www.phmsa.dot.gov/staticfiles/PHMSA/DownloadableFiles/1_2_14%20Rail_Safety_Alert.pdf.

²⁵ <https://www.regulations.gov/docket?D=PHMSA-2015-0253>.

²⁶ The vapor pressure of ethanol is RVP (at 100 F) is 2.0 psi.

the transport of crude oil by rail? What portion of current carloads would be out of compliance with the standard proposed in P-1669? Similarly, how many cargo ship shipments, truck shipments and barrels of oil transported by pipeline would be affected by adopting the standard proposed in P-1669?

9. What are the expected impacts of establishing a nationwide vapor pressure standard for crude oil intended for transportation in commerce? Should that standard apply to all modes of transportation or be limited to specific modes? What are the costs and benefits of those impacts? Please provide information and data, and include references and sources for information and data provided.

10. Should there be different vapor pressure limits depending on the specific circumstances of the shipment, such as the mode, the quantity of material or whether the shipment will travel through populated areas?

11. Are there other risk factors that should be considered instead of, or in addition to, vapor pressure (e.g., a material's flammability range, specific heat or heat of vaporization)? How do these risk factors affect the magnitude of release or the likelihood of fire resulting from an accident?

12. While offerors would be legally responsible for compliance with a volatility standard, it may be that actual compliance would be more cost-effectively implemented at some other point in the supply chain. What physical, institutional, or legal arrangements would be needed for implementation of a vapor pressure standard?

13. What types of additional technology, equipment, labor, and changes to existing operations would be needed for the establishment of a nationwide vapor pressure standard for crude oil intended for transportation in commerce? What would be the initial and recurring, and fixed and variable costs? If changes to existing operations would involve additional labor, then please provide the additional time by activity and labor category.

14. To what extent can a vapor pressure standard be implemented within the existing system? At what point would additional investments be required? What level of infrastructure change would be needed? Is this level affected by seasonal and market demands? How do the answers to these questions change if crude oil production returned to historically high volume levels?

15. What additional types of training would be needed for the establishment of a nationwide vapor pressure standard for crude oil? What would be the initial and recurring costs?

16. Compared to the current baseline, what would be the changes to production, pre-treatment, conditioning or stabilization, loading, and transport of petroleum crude oil if PHMSA establishes a nationwide vapor pressure standard?

17. How should the effectiveness and benefits of a rulemaking establishing a nationwide vapor pressure standard for crude oil be measured?

18. In order to estimate benefits of a rulemaking, what consequences would be

mitigated or prevented by establishing a nationwide vapor pressure standard for crude oil? Have there been any U.S. crude-by-rail accidents where a lower vapor pressure would have made a difference in the outcome? If yes, please provide all relevant details to support the conclusion.

19. If PHMSA were to adopt the vapor pressure threshold requested by the petitioner (or another threshold), what timeframe would be needed to comply with the new requirements to implement the needed treatment infrastructure throughout the network of offerors?

20. If PHMSA were to establish a nationwide vapor pressure standard, should any other Class 3 hazardous materials besides crude oil be subject to a vapor pressure limit? If so, which ones? Please provide the basis for your comment.

21. If PHMSA were to establish a nationwide vapor pressure standard, should it apply to the highway mode of transportation? What is the impact of a vapor pressure standard on the current highway fleet capacity? If highway transportation is included, what is the increased exposure for highway deaths and injuries? How does this compare to exposure in rail transportation?

22. What other properties of Class 3 hazardous materials are important to consider when setting vapor pressure limits? For example, are the following properties important: Lower and upper explosive limits, evaporations rates, etc.?

23. Would the flammable gases removed from the crude oil be transported by tank cars or cargo tanks? If so, how many additional tank cars or cargo tank shipments of flammable gases would be required? What are the safety consequences of transporting such materials or how might PHMSA quantify such consequences? How would this impact the overall risk assessment?

24. Given the risks associated with transporting large quantities of flammable liquids, are there measures that PHMSA should consider as an alternative or in addition to addressing material properties such as vapor pressure or flammability range, etc.?

B. Safety Questions

1. Do the current HMR adequately consider the risks that flammable liquids containing dissolved flammable or nonflammable gases present?

2. Should vapor pressure be used to delineate gases (and liquids with high vapor pressures) from liquids with low vapor pressures? If so, is the current definition of a gas sufficient or should a different threshold (i.e., vapor pressure or temperature) be utilized? Answers should also include specification to measurement method (including V/L ratio) and sampling method, if necessary, for that determination when recommending different thresholds.

3. Should unrefined petroleum products not completely gaseous at 20 °C but having a vapor pressure greater than 300 kPa at 50 °C be subjected to the testing in § 173.115(a)(2) to determine whether that material should be regulated as flammable gas? If yes, what affect would this have on other Class 3 hazardous materials?

4. Should PHMSA consider adopting a new Hazardous Materials Table (HMT; § 172.101) entry for petroleum crude oil with a high-concentration of dissolved gases that is similar to the entry for UN3494, Petroleum sour crude oil, flammable, toxic?²⁷

5. Do flammable liquids containing dissolved flammable and nonflammable gases have implications for the response community, such as hazard communication or response considerations, that the agency should consider?

6. If Petition P-1669 were adopted, would there be an impact in the transportation of other flammable products, and if so, what would they be?

C. Vapor Pressure Questions

1. Would the use of RVP, True Vapor Pressure, VPCR_x, or some other standard be the best method for measuring vapor pressure for classification and packaging? Does this method appropriately account for liquids containing dissolved flammable and non-flammable gases under non-equilibrium conditions? What volume to liquid ratio and temperature would be most suitable? Why?

2. Would the definition for "live" and "dead" crude oils from ASTM D6377 and other standards be relevant or useful in setting a vapor pressure limit?

3. Is there a unit of measure for how much dissolved flammable and non-flammable gases contribute to the vapor pressure, volatility, and flammability of crude oil?

4. Are there any materials currently classified as a flammable liquid within the HMR that would be impacted by a vapor pressure threshold?

5. What are the observed vapor pressures of tight crude oil in various stages of production, stabilization, and transportation? Please explain the conditions under which sampling and testing was performed.

6. Have any other nations established vapor pressure limits for transporting crude oil or other flammable liquids by any mode? If so, which nations, what limits do they use, and what information did they use to support the specific limits?

7. Petition P-1669 recommends a RVP of no greater than 9.0 psi. In contrast, the NDIC implemented a maximum vapor pressure threshold of 13.7 psi (VPCR₄ as defined in ASTM D6377). If PHMSA were to establish a national vapor pressure limit, what should it be?

8. Has any source compiled comprehensive and reliable information regarding the vapor pressures of Class 3 flammable liquid hazardous materials involved in transportation accidents, as well as information about the nature, characteristics and consequences associated with those accidents? Has any source conducted statistical or other scientific analysis regarding the relationship between vapor pressure and the consequences of transportation accidents?

²⁷ 49 CFR 172.102(c)(1), Special Provision 343—A bulk packaging that emits hydrogen sulfide in sufficient concentration that vapors evolved from the crude oil can present an inhalation hazard must be marked as specified in § 172.327 of this part.

D. Packaging Questions

1. Would further limiting the filling capacity be an effective method for reducing the risks associated with Class 3 hazardous materials containing dissolved gases?

VI. Regulatory Review and Notices

A. Executive Order 12866, Executive Order 13563, Executive Order 13610, and DOT Regulatory Policies and Procedures

This ANPRM is considered a significant regulatory action under section 3(f) of Executive Order 12866 and was reviewed by the Office of Management and Budget (OMB). It is considered a significant regulatory action under the Regulatory Policies and Procedures order issued by the Department of Transportation. 44 FR 11034 (Feb. 26, 1979).

Executive Orders 12866, “Regulatory Planning and Review,” 58 FR 51735 (Oct. 4, 1993), and 13563, “Improving Regulation and Regulatory Review,” 76 FR 3821 (Jan. 21, 2011), require agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” Executive Order 13610, “Identifying and reducing Regulatory Burdens,” 77 FR 28469 (May 14, 2012), urges agencies to conduct retrospective analyses of existing rules to examine whether they remain justified and whether they should be modified or streamlined in light of changed circumstances, including the rise of new technologies.

Additionally, Executive Orders 12866, 13563, and 13610 require agencies to provide a meaningful opportunity for public participation. Accordingly, PHMSA invites comments on these considerations, including any cost or benefit figures or factors, alternative approaches, and relevant scientific, technical and economic data. These comments, along with the information provided by the New York State Office of the Attorney General, will help PHMSA evaluate whether regulatory action is warranted and appropriate.

B. Executive Order 13132

Executive Order 13132, “Federalism,” 64 FR 43255 (Aug. 10, 1999), requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have “substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.” PHMSA invites

State and local governments with an interest in this rulemaking to comment on any effect that may result if Petition P-1669 is adopted.

C. Executive Order 13175

Executive Order 13175, “Consultation and Coordination and Indian Tribal Governments,” 65 FR 67249 (Nov. 9, 2000), requires agencies to assure meaningful and timely input from Indian tribal government representatives in the development of rules that significantly or uniquely affect Indian communities by imposing “substantial direct compliance costs” or “substantial direct effects” on such communities or the relationship and distribution of power between the Federal Government and Indian tribes. PHMSA invites Indian tribal governments to provide comments on the costs and effects the petitions and recommendations could have on them, if adopted.

D. Regulatory Flexibility Act, Executive Order 13272, and DOT Policies and Procedures

Under the Regulatory Flexibility Act of 1980, 5 U.S.C. 601, *et seq.*, PHMSA must consider whether a rulemaking would have a “significant economic impact on a substantial number of small entities.” “Small entities” include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations under 50,000.

It is possible that if PHMSA proposes to adopt the revisions suggested in Petition P-1669, there may be a “significant economic impact on a substantial number of small entities.” As such, PHMSA would like small entities’ input on the issues presented in this ANPRM. If you believe that revisions to the HMR would have a significant economic impact on a substantial number of small entities, please provide information on such impacts.

Any future proposed rule would be developed in accordance with Executive Order 13272, “Proper Consideration of Small Entities in Agency Rulemaking,” 68 FR 7990 (Feb. 19, 2003), and DOT’s procedures and policies to promote compliance with the Regulatory Flexibility Act to ensure that potential impacts on small entities of a regulatory action are properly considered.

E. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, 5 CFR 1320.8(d) requires that PHMSA provide interested members of the public and affected agencies an

opportunity to comment on information collection and recordkeeping requests. This ANPRM does not impose new information collection requirements. PHMSA specifically requests comments on the information collection and recordkeeping burdens that may result if Petition P-1669 is adopted.

F. Environmental Assessment

The National Environmental Policy Act of 1969, 42 U.S.C. 4321–4375, requires that Federal agencies analyze proposed actions to determine whether the action will have a significant impact on the human environment. The Council on Environmental Quality (CEQ) regulations require Federal agencies to conduct an environmental review considering (1) the need for the proposed action, (2) alternatives to the proposed action, (3) probable environmental impacts of the proposed action and alternatives, and (4) the agencies and persons consulted during the consideration process. See 40 CFR 1508.9(b). PHMSA welcomes any data or information related to environmental impacts that may result if Petition P-1669 is adopted, as well as possible alternatives and their environmental impacts.

G. Privacy Act

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT’s complete Privacy Act Statement in the **Federal Register** published on April 11, 2000, see 65 FR 19477, or you may visit <http://www.regulations.gov>.

H. Executive Order 13609 and International Trade Analysis

Under Executive Order 13609, “Promoting International Regulatory Cooperation,” 77 FR 26413 (May 4, 2012), agencies must consider whether the impacts associated with significant variations between domestic and international regulatory approaches are unnecessary or may impair the ability of American businesses to export and compete internationally. In meeting shared challenges involving health, safety, labor, security, environmental, and other issues, regulatory approaches developed through international cooperation can provide equivalent protection to standards developed independently while also minimizing unnecessary differences.

Similarly, the Trade Agreements Act of 1979, Pub. L. 96–39, as amended by the Uruguay Round Agreements Act, Pub. L. 103–465, prohibits Federal agencies from establishing any standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. For purposes of these requirements, Federal agencies may participate in the establishment of international standards, so long as the standards have a legitimate domestic objective, such as providing for safety, and do not operate to exclude imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

PHMSA participates in the establishment of international standards in order to protect the safety of the American public, and PHMSA has assessed the effects of the proposed rule to ensure that it does not cause unnecessary obstacles to foreign trade. Accordingly, this rulemaking is consistent with Executive Order 13609 and PHMSA's obligations under the Trade Agreement Act, as amended.

PHMSA welcomes any data or information related to international impacts that may result if Petition P–1669 is adopted, as well as possible alternatives and their international impacts. Please describe the impacts and the basis for the comment.

I. Statutory/Legal Authority for This Rulemaking

This ANPRM is published under the authority of 49 U.S.C. 5103(b), which authorizes the Secretary of Transportation to “prescribe regulations for the safe transportation, including security, of hazardous materials in intrastate, interstate, and foreign commerce.” The intent of this ANPRM is to address the safety concerns raised by Petition P–1669 in respect to the transportation of hazardous materials in commerce. Our goal in this ANPRM is to gather the necessary information to determine a course of action in a potential Notice of Proposed Rulemaking (NPRM).

J. Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

K. Executive Order 13211

Executive Order 13211, 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare a Statement of Energy Effects for any “significant energy action.” Under the executive order, a “significant energy action” is defined as any action by an agency (normally published in the **Federal Register**) that promulgates, or is expected to lead to the promulgation of, a final rule or regulation (including a notice of inquiry, ANPRM, and NPRM) that (1)(i) is a significant regulatory action under Executive Order 12866 or any successor order and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (2) is designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action.

PHMSA welcomes any data or information related to energy impacts that may result if P–1669 is adopted, as well as possible alternatives and their energy impacts. Please describe the impacts and the basis for the comment.

Issued in Washington, DC, on January 10, 2017, under the authority of 49 U.S.C. 5103(b).

Anthony R. Foxx,

Secretary of Transportation.

[Docket No. 161031999–7017–01]

RIN 0648–BG41

International Fisheries; Pacific Tuna Fisheries; 2017 and 2018 Commercial Fishing Restrictions for Pacific Bluefin Tuna in the Eastern Pacific Ocean

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: The National Marine Fisheries Service (NMFS) is proposing regulations under the Tuna Conventions Act to implement Resolution C–16–08 (*Measures for the Conservation and Management of Bluefin Tuna in the Eastern Pacific Ocean*). This Inter-American Tropical Tuna Commission (IATTC) Resolution establishes annual and trip catch limits on commercial

catch of Pacific bluefin tuna (*Thunnus orientalis*) in waters of the eastern Pacific Ocean (EPO) for 2017 and 2018. This action is necessary for the United States to satisfy its obligations as a member of the IATTC.

DATES: Comments on the proposed rule and supporting documents must be submitted in writing by February 17, 2017.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2016–0141, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0141, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Celia Barroso, NMFS West Coast Region Long Beach Office, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802. Include the identifier “NOAA–NMFS–2016–0141” in the comments.

Instructions: Comments must be submitted by one of the above methods to ensure they are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

Copies of the draft Regulatory Impact Review (RIR) and other supporting documents are available via the Federal eRulemaking Portal:

www.regulations.gov, docket NOAA–NMFS–2016–0141, or contact with the Regional Administrator, Barry A. Thom, NMFS West Coast Region, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232–1274, or RegionalAdministrator.WCRHMS@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Celia Barroso, NMFS, 562–432–1850, Celia.Barroso@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background on the IATTC

The United States is a member of the IATTC, which was established in 1949 and operates under the Convention for the Strengthening of the IATTC Established by the 1949 Convention between the United States of America and the Republic of Costa Rica (Antigua Convention). See: www.iattc.org/PDFFiles2/Antigua_Convention_Jun_2003.pdf.

The IATTC consists of 21 member nations and four cooperating non-member nations, and facilitates scientific research into, as well as the conservation and management of, tuna and tuna-like species in the IATTC Convention Area (Convention Area). The Convention Area is defined as waters of the EPO within the area bounded by the west coast of the Americas and by 50° N. latitude, 150° W. longitude, and 50° S. latitude. The IATTC maintains a scientific research and fishery monitoring program, and regularly assesses the status of tuna, sharks, and billfish stocks in the EPO to determine appropriate catch limits and other measures deemed necessary to promote sustainable fisheries and prevent the overexploitation of these stocks.

International Obligations of the United States Under the Convention

As a Party to the Antigua Convention and a member of the IATTC, the United States is legally bound to implement decisions of the IATTC. The Tuna Conventions Act (16 U.S.C. 951 *et seq.*) directs the Secretary of Commerce, in consultation with the Secretary of State and, with respect to enforcement measures, the U.S. Coast Guard, to promulgate such regulations as may be necessary to carry out the United States' obligations under the Antigua Convention, including recommendations and decisions adopted by the IATTC. The authority of the Secretary of Commerce to promulgate such regulations has been delegated to NMFS.

Pacific Bluefin Tuna Stock Status

In 2011, NMFS determined overfishing was occurring on Pacific bluefin tuna (76 FR 28422, May 17, 2011), which is considered a single Pacific-wide stock. Based on the results of a 2012 stock assessment conducted by the International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean (ISC), NMFS determined Pacific bluefin tuna was not only subject to overfishing, but was also overfished (78 FR 41033, July 9, 2013). Subsequently, based on

the results of the 2014 ISC stock assessment, NMFS determined that Pacific bluefin tuna continued to be overfished and subject to overfishing (80 FR 12621, March 10, 2015).

Pacific Bluefin Tuna Resolution

Recognizing the need to reduce fishing mortality of Pacific bluefin tuna, the IATTC has adopted catch limits in the Convention Area since 2012 (see the final rule implementing Resolution C-14-06 for more information on previous management measures (80 FR 38986, July 8, 2015)). At its resumed 90th Meeting in October 2016, the IATTC adopted Resolution C-16-08. The resolution and subject of this rulemaking was approved by the Secretary of State, thereby prompting implementation by NMFS. Resolution C-16-08 reaffirms that, “. . . the IATTC scientific staff recommend[ed] extending the measures established in the current resolution [Resolution C-14-06] for two more years.”

In 2015, the Western and Central Pacific Fisheries Commission (WCPFC), which has purview over the management of highly migratory fish stocks in the western and central Pacific Ocean, revised a 2014 conservation and management measure for Pacific bluefin tuna intended to decrease the level of fishing mortality (CMM 2015-04). Additionally, the IATTC and the WCPFC have agreed to hold annual joint working group meetings intended to develop a Pacific-wide approach to the management of Pacific bluefin tuna. The first meeting took place August 29 through September 2, 2016, and the second meeting is scheduled for late August 2017. Future conservation measures adopted by the IATTC and WCPFC for Pacific bluefin tuna are also expected to be based, in part, on information and advice from the ISC, which recently completed a stock assessment in 2016 and intends to provide an update in 2018.

Similar to Resolution C-14-06 (applicable 2015 to 2016), the main objective of Resolution C-16-08 is to reduce overfishing and to conserve and rebuild the stock by setting limits on the commercial catch of Pacific bluefin tuna in the IATTC Convention Area during 2017 and 2018. C-16-08 establishes a combined catch limit of 600 metric tons (mt) for 2017 and 2018 applicable to commercial vessels of each member or cooperating non-member, except Mexico, with a historical record of Pacific bluefin tuna catch from the EPO (such as the United States). Total catch is not to exceed 425 mt in a single year.

Council Recommendations for the Implementation of C-16-08

In accordance with a November 2014 Pacific Fishery Management Council (Council) recommendation, NMFS established trip limits when implementing Resolution C-14-06. At its November 2016 meeting, the Council again recommended that the same two trip limits be established: (1) an initial 25 mt trip limit from the start of the year until catch is within 50 mt of the catch limit and (2) a 2 mt trip limit through the end of the year (or until fishing is closed) when the catch for the year is within 50 mt of the catch limit.

Pacific Bluefin Tuna Catch History

While Pacific bluefin tuna catch by U.S. commercial vessels fishing in the Convention Area exceeded 1,000 mt per year in the early 1990s, annual catches have remained below 500 mt for more than a decade. The U.S. commercial catch of Pacific bluefin tuna in the Convention Area for the years 2002 to 2016 can be found in Table 1 below. The average annual Pacific bluefin tuna catch landed by U.S. commercial vessels fishing in the Convention Area from 2011 to 2015 represents only one percent of the average annual landings for all fleets fishing in the Convention Area during that period. For information on Pacific bluefin tuna harvests in the Convention Area through 2015, see http://isc.fra.go.jp/fisheries_statistics/index.html; for preliminary information on Pacific bluefin tuna harvest in the Convention Area in 2016, see www.iattc.org/CatchReportsDataENG.htm.

*Preliminary estimate of 2016 Pacific bluefin tuna landed catch by United States based on communications with California Department of Fish and Wildlife on December 9, 2016.

Proposed Regulations for Pacific Bluefin Tuna for 2017–2018

This proposed rule would establish catch limits for U.S. commercial vessels that catch Pacific bluefin tuna in the Convention Area for 2017 and 2018. In 2017, the catch limit for the entire U.S. fleet is 425 mt. In 2018, NMFS will announce the catch limit in a **Federal Register** notice, which will be calculated to correspond with the limits established in Resolution C–16–08 (*i.e.*, not to exceed 425 mt in a year). The 2018 catch limit will be calculated as the remainder from 2017 (*i.e.*, how much of 425 mt was not caught) added to 175 mt, except as follows: 1) if 175 mt or less is caught in 2017, then the 2018 catch limit is 425 mt; or 2) if greater than 425 mt is caught in 2017, then the catch limit in 2018 will be further reduced by the amount in excess of 425 mt (*i.e.*, the remainder of the 600 mt limit for 2017–2018).

In each year, a 25 mt trip limit would be in effect until catch is within 50 mt of the annual limit, at which time NMFS would impose a 2 mt trip limit through the end of the year or until fishing is closed. NMFS will publish a notice in the **Federal Register** when the 2 mt trip limit is imposed.

When NMFS determines that the catch limit is expected to be reached in 2017 or 2018 (based on landings receipts, data submitted in logbooks, and other available fishery information), NMFS will prohibit commercial fishing for, or retention of, Pacific bluefin tuna for the remainder of the calendar year. NMFS will also publish a notice in the **Federal Register** announcing that the targeting, retaining, transshipping or landing of Pacific bluefin tuna will be prohibited on a specified effective date through the end of that calendar year. Upon that effective date, a commercial fishing vessel of the United States may not be used to target, retain on board, transship, or land Pacific bluefin tuna

captured in the Convention Area during the period specified in the announcement. However, any Pacific bluefin tuna already on board a fishing vessel on the effective date may be retained on board, transshipped, and/or landed, to the extent authorized by applicable laws and regulations, provided that they are landed within 14 days after the effective date. NMFS is also proposing to revise a paragraph in the prohibitions section solely to update its reference to another paragraph—the proposed revised Pacific bluefin tuna regulations.

Proposed Catch Monitoring

NMFS would provide updates on Pacific bluefin tuna catches in the Convention Area to the public via the IATTC listserv and the NMFS West Coast Region Web site: www.westcoast.fisheries.noaa.gov/fisheries/migratory_species/bluefin_tuna_harvest_status.html. NMFS would also report preliminary estimates of Pacific bluefin tuna catch between monthly intervals if and when total catch approaches the limits to help participants in the U.S. commercial fishery plan for the possibility of the catch limit being reached.

Endangered Species Act Petition

In June 2016, NMFS received a petition to list Pacific bluefin tuna as endangered or threatened under the Endangered Species Act, 16 U.S.C. 1531 *et seq.* NMFS subsequently found that the petition may be warranted and has initiated a status review (81 FR 70074, October 11, 2016). The petition under the Endangered Species Act regarding a scientific determination about the status of Pacific bluefin tuna is distinct from this proposed rulemaking to restrict commercial fisheries under the Tuna Conventions Act.

Classification

The NMFS Assistant Administrator has determined that this proposed rule is consistent with the Tuna Conventions Act and other applicable laws.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

Additionally, although there are no new collection-of-information requirements associated with this action that are subject to the Paperwork Reduction Act, existing collection-of-information requirements associated with the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (HMS FMP) still apply. These requirements have been approved by the Office of Management and Budget under Control Number

0648–0204. Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection-of-information subject to the requirements of the PRA, unless that collection-of-information displays a currently valid OMB control number.

Pursuant to the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b), the Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The rationale for the certification is provided in the following paragraphs.

The U.S. Small Business Administration (SBA) defines a “small business” (or “small entity”) as one with annual revenue that meets or is below an established size standard. On December 29, 2015, NMFS issued a final rule establishing a small business size standard of \$11 million in annual gross receipts for all businesses primarily engaged in the commercial fishing industry (NAICS 11411) for Regulatory Flexibility Act (RFA) compliance purposes only (80 FR 81194). The \$11 million standard became effective on July 1, 2016, and is to be used in place of the U.S. SBA current standards of \$20.5 million, \$5.5 million, and \$7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine fishing (NAICS 114119) sectors of the U.S. commercial fishing industry in all NMFS rules subject to the RFA after July 1, 2016. *Id.* at 81194.

U.S. commercial catch of Pacific bluefin tuna from the Convention Area is primarily made in waters off of California by the coastal pelagic small purse seine fleet, which targets Pacific bluefin tuna opportunistically, and other fleets (*e.g.*, California large-mesh drift gillnet, surface hook-and-line, west coast longline, and Hawaii’s pelagic fisheries), which catch Pacific bluefin tuna incidentally. The small entities the proposed action would directly affect are all U.S. commercial fishing vessels that may target (*e.g.*, coastal pelagic purse seine vessels) or incidentally catch (*e.g.*, drift gillnet) Pacific bluefin tuna in the Convention Area; however, not all vessels that have participated in this fishery decide to do so every year. Implementation of the annual catch limits for 2017 and 2018 in this proposed action is not expected to result in changes in current fishery operations as the annualized catch limit is above recent annual average catch by all fleets

(average annual catch from 2006 to 2015 was 114 mt). Additionally, from 2006 to 2015, incidental landings of Pacific bluefin tuna have not exceeded 2 mt per trip.

Revenues of coastal purse seine vessels are not expected to be significantly altered as a result of this proposed rule. Since 2006, the average annual revenue per vessel from all finfish fishing activities for the U.S. purse seine fleet that have landed Pacific bluefin tuna has been less than \$11 million, whether considering an individual vessel or per vessel average. Since 2006, in years Pacific bluefin tuna was landed, purse seine vessels that caught Pacific bluefin tuna had an average annual income of about \$1.7 million per vessel (based on all species landed). Annually, from 2011 to 2015, the number of small coastal pelagic purse seine vessels that landed Pacific bluefin tuna in the Convention Area ranged from zero to five. In 2011 and 2012, fewer than three vessels targeted Pacific bluefin tuna; therefore, their landings and revenue are confidential. In 2013, the coastal purse seine fishery did not land Pacific bluefin tuna. In 2014 and 2015, four and five vessels landed Pacific bluefin tuna, respectively. In 2014, eight purse seine vessels fishing in the Convention Area landed HMS in California, but only four of them were involved in landing roughly 401 mt of Pacific bluefin tuna, worth about \$588,000, in west coast ports. Similarly, in 2015, 11 vessels fishing in the Convention Area landed HMS in California, but only 5 vessels landed approximately 86 mt of Pacific bluefin tuna, worth about \$75,000.

The revenue derived from Pacific bluefin tuna is a fraction of the overall revenue for coastal pelagic purse seine vessels (3.9 percent annually from 2006–2015) as they typically harvest other species, including Pacific sardine, Pacific mackerel, squid, and anchovy. The value of Pacific bluefin tuna in coastal pelagic purse seine fishery from 2006–2015 is \$1.31/kilogram. This amount is negligible relative to the fleet's annual revenue resulting from other species. Prior to 2015, the Pacific bluefin tuna fishery was not subject to trip limits. From 2006 through 2014, 62.5 percent of trips by coastal purse seine vessels targeting Pacific bluefin tuna landed greater than 25 mt of Pacific bluefin tuna. However, landings did not exceed 25 mt in 2015 after the trip limits became effective on July 9, 2015. Future regulatory discards, if any, will be negligible both in volume and value because a vessel is likely to end fishing for Pacific bluefin tuna when the 25 mt trip limit is met.

Since 2006, the average annual revenue per vessel from all finfish fishing activities for the U.S. fleet with incidental landings of Pacific bluefin tuna has been less than \$11 million. These vessels include drift gillnet, surface hook-and-line, and longline gear-types. As stated earlier, the revenues of these vessels are also not expected to be significantly altered by the rule. From 2011 to 2015, the number of drift gillnet, surface hook-and-line, and longline vessels that participated in this fishery range from 11 to 12, 1 to 50, and 1 to 8, respectively. During these years, vessels with incidental landings landed an annual average of 6.3 mt of Pacific bluefin tuna, worth approximately \$32,600, without exceeding 2 mt per trip. As a result, it is anticipated that the annual and trip limits will not impact vessels landing incidentally-caught Pacific bluefin tuna.

Pursuant to the RFA and NMFS' December 29, 2015, final rule (80 FR 81194), this certification was developed for this action using NMFS' revised size standards. NMFS considers all entities subject to this action to be small entities as defined by both the former, lower size standards and the revised size standards. Because each affected vessel is a small business, there are no disproportional affects to small versus large entities. Based on profitability analysis above, the proposed action, if adopted, will not have significant adverse economic impacts on these small business entities. As a result, an Initial Regulatory Flexibility Analysis is not required, and was not prepared for this proposed rule.

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Fish, Fisheries, Fishing, Marine resources, Reporting and recordkeeping requirements, Treaties.

Dated: January 9, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 300 is proposed to be amended as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 1. The authority citation for part 300, subpart C, continues to read as follows:

Authority: 16 U.S.C. 951et seq.

■ 2. In § 300.24, revise paragraph (u) to read as follows:

§ 300.24 Prohibitions.

* * * * *

(u) Use a United States commercial fishing vessel in the Convention Area to target, retain on board, transship or land Pacific bluefin tuna in contravention of § 300.25(g)(3) through (5).

* * * * *

■ 4. In § 300.25, revise paragraph (g) to read as follows:

§ 300.25 Eastern Pacific fisheries management.

* * * * *

(g) *Pacific bluefin tuna* (*Thunnus orientalis*) commercial catch limits in the eastern Pacific Ocean for 2017–2018. The following is applicable to the U.S. commercial fishery for Pacific bluefin tuna in the Convention Area in the years 2017 and 2018.

(1) For the calendar year 2017, all commercial fishing vessels of the United States combined may capture, retain, transship, or land no more than 425 metric tons in the Convention Area.

(2) In 2018, NMFS will publish a notice in the **Federal Register** announcing the 2018 catch limit. For the calendar year 2018, all commercial fishing vessels of the United States combined may capture, retain on board, transship, or land no more than the 2018 annual catch limit. The 2018 catch limit is calculated by adding any amount of the 425 metric ton catch limit that was not caught in 2017, as determined by NMFS, to 175 metric tons, except as follows:

(i) If 175 metric tons or less are caught in 2017, as determined by NMFS, then the 2018 catch limit is 425 metric tons; or,

(ii) If greater than 425 metric tons are caught in 2017, as determined by NMFS, then the 2018 catch limit is calculated by subtracting the amount caught in 2017 from 600 metric tons.

(3) In 2017 and 2018, a 25 metric ton trip limit will be in effect until NMFS anticipates that catch will be within 50 metric tons of the catch limit, after which a 2 metric ton trip limit will be in effect upon publication of a notice in the **Federal Register** by NMFS.

(4) After NMFS determines that the catch limits under paragraphs (g)(1) and (2) of this section are expected to be reached by a future date, NMFS will publish a fishing closure notice in the **Federal Register** announcing the effective date that targeting, retaining on board, transshipping or landing Pacific bluefin tuna in the Convention Area shall be prohibited as described in paragraph (g)(5) of this section.

(5) Beginning on the date announced in the fishing closure notice published under paragraph (g)(4) of this section through the end of the calendar year, a commercial fishing vessel of the United

States may not be used to target, retain on board, transship, or land Pacific bluefin tuna captured in the Convention Area, with the exception that any Pacific bluefin tuna already on board a fishing vessel on the effective date of the notice may be retained on board, transshipped, and/or landed, to the extent authorized by applicable laws and regulations, provided such Pacific bluefin tuna is landed within 14 days after the effective date published in the fishing closure notice.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 161020986-7012-01]

RIN 0648-BG38

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Amendment 36

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations to implement Amendment 36 to the Fishery Management Plan (FMP) for the Snapper-Grouper Fishery of the South Atlantic Region as prepared and submitted by the South Atlantic Fishery Management Council (Council). If implemented, this proposed rule would modify the FMP framework procedures to allow spawning special management zones (SMZs) to be established or modified through the framework process; establish spawning SMZs off North Carolina, South Carolina, and Florida; establish transit and anchoring provisions in the spawning SMZs; and establish a sunset provision for most of the spawning SMZs. This proposed rule would also move the boundary of the existing Charleston Deep Artificial Reef Marine Protected Area (MPA). The purpose of this proposed rule is to protect spawning snapper-grouper species and their spawning habitat, and to reduce bycatch and bycatch mortality for snapper-grouper species, including speckled hind and warsaw grouper.

DATES: Written comments on the proposed rule must be received by February 17, 2017.

ADDRESSES: You may submit comments on the proposed rule, identified by “NOAA-NMFS-2016-0153,” by either of the following methods:

- *Electronic submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0153, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Frank Helies, NMFS Southeast Regional Office, 263 13th Avenue South, St. Petersburg, FL 33701.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in required fields if you wish to remain anonymous).

Electronic copies of Amendment 36 may be obtained from www.regulations.gov or the Southeast Regional Office Web site at <http://sero.nmfs.noaa.gov>. Amendment 36 includes an environmental assessment, Regulatory Flexibility Act (RFA) analysis, regulatory impact review, and fishery impact statement.

FOR FURTHER INFORMATION CONTACT: Frank Helies, NMFS Southeast Regional Office, telephone: 727-824-5305, or email: frank.helies@noaa.gov.

SUPPLEMENTARY INFORMATION: The snapper-grouper fishery in the South Atlantic region is managed under the FMP and includes speckled hind and warsaw grouper, along with other snapper-grouper species. The FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Background

The Council developed Amendment 36 to protect spawning snapper-grouper species and their spawning habitat by prohibiting fishing for or harvest of snapper-grouper species in certain areas

year-round in Federal waters of the South Atlantic. Areas designated for protection would include habitat characteristics, bottom topography (hard and live bottom), and currents that provide essential fish habitat important for spawning snapper-grouper species. The Council determined that protecting spawning snapper-grouper and their associated habitats would allow these species to produce more larvae, and may subsequently increase snapper-grouper populations.

The Council also developed Amendment 36 to reduce bycatch and bycatch mortality of snapper-grouper species, including speckled hind and warsaw grouper. The snapper-grouper fishery in the South Atlantic is a highly regulated, multi-species fishery. Discards in the fishery can occur due to regulations, such as closed seasons, possession or size limits, or from catch and release of these species. For snapper-grouper species prohibited from harvest, such as speckled hind and warsaw grouper, fish discarded due to regulations are considered bycatch. The deep-water snapper-grouper species are further impacted due to high discard mortality rates (low survivability due to barotrauma). The Council concluded that prohibiting the use of certain fishing gear in specified areas where snapper-grouper are known to occur and possibly spawn would reduce encounters with these species and subsequently provide protection for reproduction. Spawning SMZs could provide long-term beneficial biological and socio-economic effects if spawning fish are sufficiently protected.

The Council has identified a total of five areas proposed to be considered as spawning SMZs in the South Atlantic off North Carolina, South Carolina, and Florida. These areas have been identified based on the documented occurrence of snapper-grouper species and analysis of spawning data, recommendations from the Council’s MPA Expert Work Group and Snapper-Grouper Advisory Panel, as well as cooperative research and public recommendations.

Amendment 36 also contains a 10-year sunset provision that would apply to most of the proposed spawning SMZs. The sunset provision would allow for most of the spawning SMZs to expire 10 years following the implementation date unless they are renewed. When deciding whether to renew a spawning SMZ, the Council may consider the evidence of spawning by snapper-grouper species in the spawning SMZ and whether a spawning SMZ is being monitored. The Council concluded that a 10-year sunset

provision would help to ensure that spawning SMZs are monitored and evaluated during this period to document snapper-grouper spawning within the sites.

The Council developed a system management plan (SMP) for the spawning SMZs proposed in Amendment 36. The SMP describes in detail the monitoring and evaluation requirements for the proposed spawning SMZs. The Council recognizes that monitoring the proposed spawning SMZs by academic, state, or NMFS personnel is necessary to evaluate their effectiveness. Therefore, the SMP outlines the potential monitoring partners and their roles.

In addition to the spawning SMZs proposed for a similar purpose through Amendment 36, the Council originally designated the Charleston Deep Artificial Reef MPA, located off South Carolina, in Amendment 14 to the Snapper-Grouper FMP (74 FR 1621, January 13, 2009) to add protected snapper-grouper habitat and contribute to adding fish biomass. Recently, the State of South Carolina worked with the U.S. Army Corps of Engineers to modify the boundary of this site to include additional substrate material that was sunk by the state in the area of this MPA. The State of South Carolina requested the Council shift the boundary of the existing Charleston Deep Artificial Reef MPA to match the new boundary of the artificial reef site. This proposed rule would align the Charleston Deep Artificial Reef MPA boundary with the site permitted by the U.S. Army Corps of Engineers, while retaining the size of the current MPA. This proposed rule would move the existing boundary around the Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) to the northwest.

Management Measures Contained in This Proposed Rule

This proposed rule would modify the FMP framework procedures to allow spawning SMZs to be established or modified through the framework process; establish spawning SMZs off North Carolina, South Carolina, and Florida; establish transit and anchoring provisions in the spawning SMZs; establish a sunset provision for most of the spawning SMZs; and move the existing Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) northwest to match the permitted site boundary.

Modify the FMP Framework Procedures for Spawning SMZs

Amending the FMP can require more detailed analyses and requires a lengthier prescribed timeline prior to

implementation. However, the current FMP contains framework procedures to allow the Council to modify certain management measures, such as annual catch limits and other management measures, via an expedited process (see 50 CFR 622.194; 56 FR 56016, October 31, 1991). Currently, SMZs cannot be modified under the framework process, so any changes to SMZs are required to be done through an FMP amendment. In Amendment 36 and this proposed rule, the Council has decided to include changes to spawning SMZs, such as boundary modifications and the establishment or removal of spawning SMZs, under the framework process. For example, this proposed rule would allow the Council to remove a spawning SMZ if monitoring efforts do not document evidence of spawning snapper-grouper species within the boundary. The proposed revisions to the FMP framework procedures would also allow the Council to remove the proposed 10-year sunset provision for a proposed spawning SMZ if monitoring efforts document snapper-grouper species' spawning inside a spawning SMZ. The Council has decided that changing spawning SMZs through an expedited process can have beneficial biological and socio-economic impacts, especially if the changes respond to newer information, such as spawning locations for snapper-grouper species. The Council has concluded that the framework process will allow adequate time for the public to comment on any proposed change related to a spawning SMZ.

Establish Spawning SMZs Off North Carolina, South Carolina, and Florida

The existing South Atlantic SMZs restrict the use of certain fishing gear in areas including artificial reefs, fish attraction devices, and other modified areas of habitat for fishing (50 CFR 622.182). Possession limits can also be regulated in SMZs. The original FMP established SMZs for artificial reefs to restrict certain fishing gear on artificial reefs (48 FR 49463, August 31, 1983). Currently, there are no spawning SMZs for snapper-grouper in the South Atlantic. The Council is proposing to establish five snapper-grouper spawning SMZs in the South Atlantic off North Carolina, South Carolina, and Florida. The proposed spawning SMZ off North Carolina would be called South Cape Lookout (5.1 sq mi; 13.2 sq km). The Council is proposing three spawning SMZs off South Carolina that would be called Devil's Hole/Georgetown Hole (3.03 sq mi; 7.8 sq km), Area 51 (approximately 3 sq mi; 7.8 sq km), and Area 53 (approximately 3 sq mi; 7.8 sq

km). The proposed spawning SMZ off the east coast of the Florida Keys would be called Warsaw Hole/50 Fathom Hole (3.64 sq mi; 9.4 sq km).

This proposed rule would prohibit fishing for or harvest of snapper-grouper species year-round in the proposed spawning SMZs. Certain other activities in the spawning SMZs would be restricted, including transiting with snapper-grouper species on board and anchoring.

Another purpose of spawning SMZs is to reduce bycatch and bycatch mortality of snapper-grouper species, including speckled hind and warsaw grouper. Currently, retention of speckled hind and warsaw grouper is prohibited in Federal waters in the South Atlantic. Prohibiting the targeting or harvest of snapper-grouper species in specified areas where these species are known to occur and possibly spawn would reduce encounters with these deep-water species and provide protection for reproduction. The Council concluded that protecting snapper-grouper species within the spawning SMZs could enhance the opportunity for these species to reproduce and provide more larvae into the environment. Spawning SMZs would also allow opportunities to monitor population changes in snapper-grouper species and further refine protection of spawning habitat.

Establish Transit and Anchoring Provisions in Spawning SMZs

This proposed rule would allow vessels to transit through the proposed spawning SMZs with snapper-grouper species on board when fishing gear is properly stowed. "Properly stowed" means that trawl or try nets and the attached doors must be out of the water, but would not be required to be on deck or secured below deck. Terminal gear (hook, leader, sinker, flasher, or bait) used with automatic reels, bandit gear, buoy gear, handline, or rod and reel would have to be disconnected and stowed separately from such fishing gear and sinkers would have to be disconnected from down riggers and stowed separately. Vessels in the spawning SMZs would be prohibited from fishing for, harvest, or possession of snapper-grouper species year-round in these areas. Except for the experimental artificial reefs Area 51 and Area 53 off South Carolina, persons on board a fishing vessel would not be allowed to anchor, use an anchor or chain, or use a grapple and chain while in spawning SMZs. Fishermen would continue to be allowed to troll for pelagic species such as dolphin, tuna, and billfish in spawning SMZs.

Establish a Sunset Provision for Most Spawning SMZs

This proposed rule would implement a 10-year sunset provision for the establishment of the spawning SMZs, except for the Area 51 and Area 53 Spawning SMZs, which will remain in effect indefinitely. Thus, except for the latter two areas, the proposed spawning SMZs and their associated management measures would be effective for 10 years following the implementation of a final rule for Amendment 36. For the proposed spawning SMZs and management measures subject to the sunset provision to extend beyond 10 years, the Council would need to evaluate the effectiveness of the spawning SMZs for conserving and protecting spawning snapper-grouper species, and subsequently take further action. The Council will regularly evaluate all of the spawning SMZs over the 10-year period. They concluded that this period was an appropriate timeframe to monitor the sites and determine whether a sufficient level of spawning by snapper-grouper species occurs to justify continued protection as spawning SMZs.

Move the Existing Charleston Deep Artificial Reef MPA

This proposed rule would move the existing Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) northwest to match the boundary of the U.S. Army Corps of Engineers' permitted artificial reef area at that location. This proposed rule would not change the size of the existing MPA. The Council originally designated the current area as an artificial reef site in Amendment 14. The State of South Carolina has worked with the U.S. Army Corps of Engineers to modify the boundary of this site to include material recently sunk by the state in the area and has requested that the Council shift their boundary of the existing Charleston Deep Artificial Reef MPA to match the new boundary of the U.S. Army Corps of Engineers' permitted artificial reef area.

Management Measure Contained in Amendment 36 but Not in This Proposed Rule

In addition to the management measures that this proposed rule would implement, Amendment 36 includes an action to modify the SMZ procedures in the FMP to allow for the designation of spawning SMZs. The Council would be able to designate important spawning areas as spawning SMZs to provide additional protection to some existing Essential Fish Habitat-Habitat Areas of Particular Concern for snapper-grouper

species. The Council concluded that designating areas as spawning SMZs is important to protect snapper-grouper species and habitat where snapper-grouper species spawn. Furthermore, the Council concluded that the designation of spawning SMZ sites in this proposed rule, and subsequent changes to regulations, would enhance reproduction for snapper-grouper species and thus increase the number of larvae that are produced by the species.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with Amendment 36, the FMP, the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Counsel for Regulation of the Department of Commerce certifies to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The factual basis for this determination is as follows:

A description of this proposed rule, why it is being considered, and the objectives of this proposed rule are contained in the preamble and in the **SUMMARY** section of the preamble. The Magnuson-Stevens Act provides the statutory basis for this proposed rule.

This proposed rule would apply to all federally-permitted commercial vessels, federally-permitted charter vessels and headboats (for-hire vessels), and private recreational anglers that fish for or harvest any of the species managed under the FMP in Federal waters. The RFA does not consider recreational anglers to be small entities, thus they are outside the scope of this analysis; only the effects on commercial and for-hire vessels will be analyzed.

As of May 25, 2016, there were 552 valid or renewable Federal South Atlantic snapper-grouper unlimited permits and 116 valid or renewable 225-lb (102.1-kg) trip-limited permits. Each of these commercial permits is associated with an individual vessel. Data from the years of 2010 through 2014 were used in Amendment 36 and these data provided the basis for the Council's decision. Although this proposed rule would apply to all commercial snapper-grouper Federal permit holders, it is expected that the vessels that harvest the species NMFS assumes to be most commonly

harvested within the proposed spawning SMZ areas would be most likely to be affected. These species include red porgy, vermilion snapper, scamp, greater amberjack, blueline tilefish, gag, and red grouper. On average from 2010 through 2014, there were 438 federally-permitted commercial vessels with reported landings of one or more of these species. Their average annual vessel-level revenue from all species for 2010 through 2014 was approximately \$47,000 (2014 dollars). In 2014, the maximum annual revenue reported by a single one of these vessels was approximately \$1 million (2014 dollars).

As of May 25, 2016, there were 1,502 valid Federal charter vessel/headboat (for-hire) permits for South Atlantic snapper-grouper. Although the for-hire permit application collects information on the primary method of operation, the permit itself does not identify the permitted vessel as either a charter vessel or a headboat and vessels may operate in both capacities. However, only federally-permitted headboats are required to submit harvest and effort information to the NMFS Southeast Region Headboat Survey (SRHS). Participation in the SRHS is based on determination by the Southeast Fishery Science Center that the vessel primarily operates as a headboat. As of February 22, 2016, 73 South Atlantic headboats were registered in the SRHS. As a result, the estimated 1,502 for-hire vessels that may be affected by this proposed rule are expected to consist of 1,429 charter vessels and 73 headboats. The average charter vessel is estimated to receive approximately \$117,000 (2014 dollars) in annual revenue. The average headboat is estimated to receive approximately \$207,000 (2014 dollars) in annual revenue.

For RFA purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of \$11 million for all its affiliated operations worldwide. All of the commercial vessels directly regulated by this proposed rule are believed to be small entities based on the NMFS size standard.

The SBA has established size standards for all major industry sectors in the U.S. including for-hire businesses (NAICS code 487210). A business

primarily involved in the for-hire fishing industry is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of \$7.5 million for all its affiliated operations worldwide. All of the for-hire vessels directly regulated by this proposed rule are believed to be small entities based on the SBA size criteria.

No other small entities that would be directly affected by this proposed rule have been identified.

There are currently 668 commercial vessels eligible to fish for the snapper-grouper species managed under the FMP. Based on the analysis included in Amendment 36, NMFS expects 438 of these vessels would be affected by this proposed rule (approximately 66 percent). In addition, there are 1,502 for-hire vessels eligible to fish for snapper-grouper species, all of which have the potential to be affected by this proposed rule. Because all of these commercial and for-hire fishing businesses are believed to be small entities, the issue of disproportionate effects on small versus large entities does not arise in the present case.

Amendment 36 would modify the SMZ procedures in the FMP to include protection of any area important for snapper-grouper spawning, including natural habitat, by designating spawning SMZs. Amendment 36 and this proposed rule would also modify the framework procedures for the FMP to include modifying or establishing spawning SMZs. These procedural changes would allow the Council to create or modify spawning SMZs, including areas of natural habitat, under the FMP framework process. However, the procedural changes to allow the Council to create or modify spawning SMZs would not directly regulate, nor restrict access to specific fishing grounds. As such, they would not be expected to directly affect the small entities identified in this analysis.

In addition to the procedural changes described above, this proposed rule would create specific spawning SMZs off North Carolina, South Carolina, and the east coast of Florida. Within each proposed spawning SMZ, fishing for, harvest, or possession of snapper-grouper species would be prohibited year-round. In addition, this proposed rule would move the existing Charleston Deep Artificial Reef MPA 1.4 mi (2.3 km) to the northwest to match the boundary of the U.S. Army Corps of Engineers' permitted artificial reef area. The size of the MPA would remain the same. No spawning SMZ would be

designated off Georgia. This proposed rule would allow vessels in possession of snapper-grouper species to transit through spawning SMZs as long as their fishing gear is properly stowed; however, anchoring would be prohibited in all spawning SMZs, except for Area 51 and Area 53.

The proposed 5.1-sq mi (13.2-sq km) South Cape Lookout Spawning SMZ off North Carolina is estimated to result in an annual decrease in total commercial ex-vessel revenues of \$588 (2014 dollars), assuming commercial vessels are unable to substitute landings from other areas. The proposed 3.03-sq mi (7.8-sq km) Devil's Hole/Georgetown Hole Spawning SMZ off South Carolina is estimated to result in an annual decrease in total ex-vessel revenue of \$86 (2014 dollars) using the same assumptions. Designation of the artificial reef sites, Area 51 and Area 53 (each 2.99 sq mi, 7.8 sq km), off South Carolina as spawning SMZs is not expected to affect ex-vessel revenue, because these artificial habitat locations were previously undisclosed to the public, and it is assumed there is very little fishing activity occurring there. The 3.6-sq mi (9.4-sq km) Warsaw Hole/50 Fathom Hole Spawning SMZ off the east coast of Florida is estimated to reduce total annual ex-vessel revenue by \$931 (2014 dollars). Again, this estimate assumes that commercial vessels will not substitute landings from other areas for the landings that are displaced by the spawning SMZs. For the proposed change to the Charleston Deep Artificial Reef MPA, because the size of the MPA would remain the same and there is little known fishing effort occurring near the existing MPA boundary, it is not expected to have a measurable effect on commercial ex-vessel revenue.

When all of the proposed spawning SMZs are analyzed together, they are estimated to result in an annual decrease in ex-vessel revenue of \$1,605 (2014 dollars). Divided across all of the commercial vessels expected to be affected by this proposed rule, this would result in a per-vessel annual decrease of only \$4. Even if the entire estimated reduction in revenue was borne by a single commercial vessel, it would represent a less than 4 percent reduction in total ex-vessel revenue on average. The model employed in this analysis assumed uniformly distributed effort within each logbook-reported area and did not account for potential redistribution of effort after each closure. If fishermen are harvesting species within the proposed spawning SMZ areas at a much higher rate than elsewhere in the South Atlantic, the effects of these closures on ex-vessel

revenue could be more substantial. Nevertheless, based on the small size of each area and the high likelihood that commercial vessels would substitute landings in other areas, it is assumed that any reduction in ex-vessel revenue from this proposed rule would be minimal. Also, because transit would be permitted through the spawning SMZs, any impact to travel costs resulting from the proposed rule is expected to be minimal as well. Finally, because commercial vessels would not be allowed to fish for snapper-grouper species in the spawning SMZs, the prohibition on anchoring would not be expected to result in any additional adverse economic effects.

With respect to for-hire businesses, the spawning SMZs in this proposed rule would place restrictions on where charter vessels and headboats can take paying customers but would not directly alter the services sold by these vessels. Therefore, direct effects on for-hire vessels resulting from this proposed rule would be limited to potential increases in travel time and fuel consumption from having to change their usual fishing locations, travel around the proposed spawning SMZs, or transit through them with their gear properly stowed. Because of the small size of the proposed spawning SMZs relative to all available fishing grounds, their substantial distance from shore, and the negligible amount of harvest from for-hire vessels estimated to occur in those areas, this proposed rule is not expected to have a measurable effect on for-hire vessel costs. With respect to potential changes in for-hire revenue, any impact that results from the proposed spawning SMZs would be a consequence of a change in recreational angler demand for for-hire services and, therefore, an indirect effect of the proposed rule. Because these potential revenue effects are indirect, they fall outside the scope of the RFA.

Finally, the sunset provision contained in this proposed rule would remove most of the spawning SMZs 10 years after implementation if not reauthorized by the Council, except for the Area 51 and Area 53 Spawning SMZs, which would remain. Although this sunset provision sets a deadline for evaluating the success of spawning SMZs and reauthorizing them, it is not expected to directly influence the duration of each spawning SMZ, because the Council would have the authority to modify the spawning SMZs at any time through the FMP framework procedures as described in this proposed rule. Therefore, the sunset provision would not be expected to

directly affect commercial or for-hire fishing businesses.

No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting, record-keeping, or other compliance requirements are introduced by this proposed rule. Accordingly, this proposed rule does not implicate the Paperwork Reduction Act.

The information provided above supports a determination that this proposed rule would not have a significant economic impact on a substantial number of small entities. Because this proposed rule, if implemented, is not expected to have a significant economic impact on any small entities, an initial regulatory flexibility analysis is not required and none has been prepared.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Marine protected area, South Atlantic, Special management zone.

Dated: January 10, 2017.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is proposed to be amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.183, revise the table in paragraph (a)(1)(i)(D) and add paragraph (a)(2) to read as follows:

§ 622.183 Area and seasonal closures.

- (a) * * *
- (1) * * *
- (i) * * *
- (D) * * *

Point	North lat.	West long.
A	32°05.04'	79°13.575'.
B	32°09.65'	79°09.2'.
C	32°07.155'	79°05.595'.
D	32°02.36'	79°09.975'.
A	32°05.04'	79°13.575'.

* * * * *

(2) *Spawning SMZs.* (i) Any fishing vessel in a spawning SMZ is prohibited to fish for or harvest species in the snapper-grouper fishery management unit year-round. For a fishing vessel to possess snapper-grouper species on board while in a spawning SMZ, the vessel must be in transit and fishing

gear must be appropriately stowed, as specified in paragraph (a)(2)(vii) of this section. Except for spawning SMZs of Area 51 and Area 53, the spawning SMZs in this paragraph are effective until [date 10 years and 30 days from the publication of the final rule in the *Federal Register*]. A person on board a fishing vessel may not anchor, use an anchor and chain, or use a grapple and chain while in the spawning SMZs specified in paragraph (a)(2) of this section. The anchoring prohibition does not apply to fishing vessels in the spawning SMZs of Area 51 and Area 53.

(ii) *South Cape Lookout Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Point	North lat.	West long.
A	33°53.040' ...	76°28.617'.
B	33°52.019' ...	76°27.798'.

C	32°21.15'	79°20.5'.
D	32°21.15'	79°22.25'.
A	32°22.65'	79°22.25'.

(vi) *Warsaw Hole/50 Fathom Hole Spawning SMZ* is bounded by rhumb lines connecting, in order, the following points:

Points	North lat.	West long.
A	24°22.277' ...	82°20.417'.
B	24°22.277' ...	82°18.215'.
C	24°20.932' ...	82°18.215'.
D	24°20.932' ...	82°20.417'.
A	24°22.277' ...	82°20.417'.

(vii) For the purpose of paragraph (a)(2)(i) of this section, transit means direct, non-stop progression through the spawning SMZ. Fishing gear appropriately stowed means—

(A) A longline may be left on the drum if all gangions and hooks are disconnected and stowed below deck. Hooks cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

(B) Trawl doors and nets must be out of the water, but the doors are not required to be on deck or secured on or below deck.

(C) A gillnet, stab net, or trammel net must be left on the drum. Any additional such nets not attached to the drum must be stowed below deck.

(D) Terminal gear (*i.e.*, hook, leader, sinker, flasher, or bait) used with an automatic reel, bandit gear, buoy gear, handline, or rod and reel must be disconnected and stowed separately from such fishing gear. Sinkers must be disconnected from the down rigger and stowed separately.

(E) A crustacean trap, golden crab trap, or sea bass pot cannot be baited. All buoys must be disconnected from the gear; however, buoys may remain on deck.

* * * * *

■ 3. In § 622.194, revise paragraph (a) to read as follows:

§ 622.194 Adjustment of management measures.

* * * * *

(a) Biomass levels, age-structured analyses, target dates for rebuilding overfished species, MSY (or proxy), OY, ABC, TAC, quotas (including a quota of zero), annual catch limits (ACLs), annual catch targets (ACTs), AMs, maximum fishing mortality threshold (MFMT), minimum stock size threshold (MSST), trip limits, bag limits, size limits, gear restrictions (ranging from regulation to complete prohibition), seasonal or area closures, fishing year, rebuilding plans, definitions of essential fish habitat, essential fish habitat, essential fish habitat HAPCs or Coral HAPCs, restrictions on gear and fishing activities applicable in essential fish habitat and essential fish habitat

HAPCs, and establish or modify spawning SMZs.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 665

[Docket No. 160422356-7026-01]

RIN 0648-XE587

Pacific Island Fisheries; 2016 Annual Catch Limits and Accountability Measures

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Proposed specifications; request for comments.

SUMMARY: NMFS proposes annual catch limits (ACLs) for Pacific Island bottomfish, crustacean, precious coral, and coral reef ecosystem fisheries, and accountability measures (AMs) to correct or mitigate any overages of catch limits. The proposed ACLs and AMs would be effective for fishing year 2016. The fishing year for each fishery begins on January 1 and ends on December 31, except for precious coral fisheries, which begin July 1 and end on June 30 the following year. Although the 2016 fishing year has ended for most stocks, we will evaluate 2016 catches against these proposed ACLs when data become available in mid-2017. The proposed ACLs and AMs support the long-term sustainability of fishery resources of the U.S. Pacific Islands.

DATES: NMFS must receive comments by February 2, 2017.

ADDRESSES: You may submit comments on this document, identified by NOAA-NMFS-2016-0049, by either of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <http://www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0049>, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- **Mail:** Send written comments to Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Region (PIR), 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818.

Instructions: NMFS may not consider comments sent by any other method, to

any other address or individual, or received after the end of the comment period. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible.

NMFS prepared environmental analyses that describe the potential impacts on the human environment that would result from the proposed ACLs and AMs. NMFS provided additional background information in the 2015 proposed and final specifications (80 FR 43046, July 21, 2015; 80 FR 52415, August 31, 2015). Copies of the environmental analyses and other documents are available at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Matt Dunlap, NMFS PIR Sustainable Fisheries, 808-725-5177.

SUPPLEMENTARY INFORMATION: Fisheries in the U.S. Exclusive Economic Zone (EEZ, or Federal waters) around the U.S. Pacific Islands are managed under archipelagic fishery ecosystem plans (FEPs) for American Samoa, Hawaii, the Pacific Remote Islands, and the Mariana Archipelago (Guam and the Commonwealth of the Northern Mariana Islands (CNMI)). A fifth FEP covers pelagic fisheries. The Western Pacific Fishery Management Council (Council) developed the FEPs, and NMFS implemented them under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, 16 U.S.C. 1801, *et seq.*).

Each FEP contains a process for the Council and NMFS to specify ACLs and AMs; that process is codified at Title 50, Code of Federal Regulations, Section 665.4 (50 CFR 665.4). The regulations require NMFS to specify, every fishing year, an ACL for each stock and stock complex of management unit species (MUS) included in an FEP, as recommended by the Council and considering the best available scientific, commercial, and other information about the fishery. If a fishery exceeds an ACL, the regulations require the Council to take action, which may include reducing the ACL for the subsequent fishing year by the amount of the overage, or other appropriate action.

NMFS proposes to specify ACLs for bottomfish, crustacean, precious coral, and coral reef ecosystem fishery MUS in American Samoa, Guam, the CNMI, and Hawaii. NMFS based the proposed

specifications on recommendations from the Council at its 164th meeting held October 21–22, 2015, and at its 166th meeting held June 6–10, 2016. In all, the Council recommended 112 ACLs: 26 in American Samoa, 26 in Guam, 26 in the CNMI, and 34 in Hawaii. The Council also recommended that NMFS specify multi-year ACLs and AMs in fishing years 2015–2018. NMFS proposes to implement the specifications for 2017 and 2018 separately, prior to each fishing year.

Except for bottomfish in American Samoa, Guam, and the CNMI, and Guam jacks, Hawaii crabs, and Hawaii octopus, the proposed 2016 ACLs are identical to those that NMFS specified for 2015 (80 FR 52415, August 31, 2015).

For bottomfish in American Samoa, Guam, and the Northern Mariana Islands, the 2016 ACLs are based on new estimates of maximum sustainable yield (MSY) contained in a 2016 stock assessment updated by the NMFS Pacific Islands Fisheries Science Center (PIFSC). This stock assessment update represents the best scientific information available for specifying ACLs.

For Guam jacks, Hawaii crabs, and Hawaii octopus, NMFS and the Council determined that the average 2013–2015 catch for each of these three stock complexes exceeded their respective 2015 ACLs. Specifically, average 2013–2015 catch for Guam jacks was 37,399 lb and exceeded the 2015 ACL of 29,300 lb by 8,099 lb. For Hawaii crabs, average 2013–2015 catch was 40,363 lb and exceeded the 2015 ACL of 33,500 lb by 6,863 lb. For Hawaii octopus, average 2013–2015 catch was 40,237 lb and exceeded the 2015 ACL of 35,700 lb by 4,537 lb. In accordance with the 2015 AMs (80 FR 52415, August 31, 2015), and in consideration of the best available scientific information available, NMFS proposes to reduce the 2016 ACLs from the 2015 ACL by the amount of the 2015 overages for each of the three stocks. As a result, the proposed ACL for Guam jacks is 21,201 lb, 26,637 lb for Hawaii crabs, and 31,163 lb for Hawaii mollusks.

In addition, NMFS prepared an updated environmental assessment for Pacific Island crustacean and precious coral fisheries to account for new information on the fisheries. In December 2015, NMFS and the Council received new information on the historical and projected stock status of Hawaii Kona crab. The information indicates that the Hawaii Kona crab stock was likely to be overfished as of 2006. However, an independent review identified data gaps and methodological

concerns with the 2015 stock assessment. NMFS PIFSC also noted concerns with the data used in the recent stock assessment, but found the assessment provided useful information regarding stock status within the last decade. Because of the uncertainty in the projected stock status and structure of Hawaii Kona crab after 2006, the Council did not account for this information with other relevant information in recommending the 2016 Hawaii Kona crab ACL. For this reason, NMFS will not set an ACL for Hawaii Kona crab for fishing year 2016. Instead, NMFS will continue to work with the Council and other partners to review the available data and to set an acceptable biological catch and an ACL for the Hawaii Kona crab stock, consistent with the Magnuson-Stevens Act, for fishing year 2017.

NMFS is also not proposing ACLs for MUS that are currently subject to Federal fishing moratoria or

prohibitions. These MUS include all species of gold coral (78 FR 32181, May 29, 2013), the three Hawaii seamount groundfish (pelagic armorhead, alfonsin, and raftfish (75 FR 69015, November 10, 2010), and deepwater precious corals at the Westpac Bed Refugia (75 FR 2198, January 14, 2010). The current prohibitions on fishing for these MUS serve as the functional equivalent of an ACL of zero.

Additionally, NMFS is not proposing ACLs for bottomfish, crustacean, precious coral, or coral reef ecosystem MUS identified in the Pacific Remote Islands Area (PRIA) FEP. This is because fishing is prohibited in the EEZ within 12 nm of emergent land, unless authorized by the U.S. Fish and Wildlife Service (USFWS) (78 FR 32996, June 3, 2013). To date, NMFS has not received fishery data that would support any such approvals. In addition, there is no suitable habitat for these stocks beyond the 12-nm no-fishing zone, except at

Kingman Reef, where fishing for these resources does not occur. Therefore, the current prohibitions on fishing serve as the functional equivalent of an ACL of zero. However, NMFS will continue to monitor authorized fishing within the Pacific Remote Islands Monument in consultation with the U.S. Fish and Wildlife Service, and may develop additional fishing requirements, including monument-specific catch limits for species that may require them.

NMFS is also not proposing ACLs for pelagic MUS at this time, because NMFS previously determined that pelagic species are subject to international fishery agreements or have a life cycle of approximately one year and, therefore, are statutorily excepted from the ACL requirements.

Proposed Annual Catch Limit Specifications

The following four tables list the proposed ACL specifications for 2016.

TABLE 1—AMERICAN SAMOA

Fishery	Management unit species	Proposed ACL specification (lb)
Bottomfish	Bottomfish multi-species stock complex	106,000
Crustacean	Deepwater shrimp	80,000
	Spiny lobster	4,845
	Slipper lobster	30
	Kona crab	3,200
Precious Coral	Black coral	790
	Precious corals in the American Samoa Exploratory Area	2,205
Coral Reef Ecosystem	<i>Selar crumenophthalmus</i> —atule, bigeye scad	37,400
	Acanthuridae—surgeonfish	129,400
	Carangidae—jacks	19,900
	Carcharhinidae—reef sharks	1,615
	Crustaceans—crabs	4,300
	Holocentridae—squirrelfish	15,100
	Kyphosidae—rudderfishes	2,000
	Labridae—wrasses	16,200
	Lethrinidae—emperors	19,600
	Lutjanidae—snappers	63,100
	Mollusks—turbo snail; octopus; giant clams	18,400
	Mugilidae—mullets	4,600
	Mullidae—goatfishes	11,900
	Scaridae—parrotfish	272,000
	Serranidae—groupers	25,300
	Siganidae—rabbitfishes	200
	<i>Bolbometopon muricatum</i> —bumphead parrotfish	235
	<i>Cheilinus undulatus</i> —Humphead (Napoleon) wrasse	1,743
	All other CREMUS combined	18,400

TABLE 2—MARIANA ARCHIPELAGO—GUAM

Fishery	Management unit species	Proposed ACL specification (lb)
Bottomfish	Bottomfish multi-species stock complex	66,000
Crustaceans	Deepwater shrimp	48,488
	Spiny lobster	3,135
	Slipper lobster	20
	Kona crab	1,900
Precious Coral	Black coral	700
	Precious corals in the Guam Exploratory Area	2,205
Coral Reef Ecosystem	<i>Selar crumenophthalmus</i> —atulai, bigeye scad	50,200

TABLE 2—MARIANA ARCHIPELAGO—GUAM—Continued

	Serranidae—groupers	128,400
	All other CREMUS combined	485,000

Accountability Measures

Each year, NMFS and local resource management agencies in American Samoa, Guam, the CNMI, and Hawaii collect information about MUS catches and apply them toward the appropriate ACLs. Pursuant to 50 CFR 665.4, when the available information indicates that a fishery is projected to reach an ACL for a stock or stock complex, NMFS must notify permit holders that fishing for that stock or stock complex will be restricted in Federal waters on a specified date. The restriction serves as the AM to prevent an ACL from being exceeded, and may include closing the fishery, closing specific areas, changing to bag limits, or restricting effort.

However, local resource management agencies do not have the resources to process catch data in near-real time, so fisheries statistics are generally not available to NMFS until at least six months after agencies collect and analyze the data. Additionally, Federal logbook information and other reporting from fisheries in Federal waters is not sufficient to monitor and track catches for the evaluation of fishery performance against the proposed ACL specifications. This is because most fishing for bottomfish, crustacean, precious coral, and coral reef ecosystem MUS occurs in state waters, generally 0–3 nm from shore. For these reasons, NMFS proposes to continue to specify the Council's recommended AM, which is to apply a three-year average catch to

evaluate fishery performance against the proposed ACLs. Specifically, NMFS and the Council would use the average catch of fishing years 2014, 2015, and 2016 to evaluate fishery performance against the 2016 ACL for a particular fishery. At the end of each fishing year, the Council would review catches relative to each ACL. If NMFS and the Council determine the three-year average catch for any fishery exceeds the specified ACL, NMFS would reduce the ACL in the subsequent year for that fishery by the amount of the overage.

NMFS will consider public comments on the proposed ACLs and AMs and will announce the final specifications in the **Federal Register**. NMFS must receive any comments by the date provided in the **DATES** heading, not postmarked or otherwise transmitted by that date. Regardless of the final ACL specifications and AMs, all other management measures will continue to apply in the fisheries.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator for Fisheries has determined that these proposed specifications are consistent with the applicable FEPs, other provisions of the Magnuson-Stevens Act, and other applicable laws, subject to further consideration after public comment.

Certification of Finding of No Significant Impact on Substantial Number of Small Entities

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that these proposed specifications, if adopted, would not have a significant economic impact on a substantial number of small entities. A description of the proposed action, why it is being considered, and the legal basis for it are contained in the preamble to these proposed specifications.

The proposed action would specify annual catch limits (ACLs) and accountability measures (AMs) for Pacific Island bottomfish, crustacean, precious coral, and coral reef ecosystem fishery management unit species (MUS) for 2016. Except for Hawaii kona crab, the 2016 ACLs and AMs for all crustaceans, spiny lobster, Hawaii non-Deep 7 bottomfish, and precious corals MUS are identical to those NMFS specified for the 2015 fishing year (80 FR 52415, August 31, 2015). The proposed ACL for bottomfish MUS in American Samoa is 106,000 lb, which is 5,000 lb higher than the 2015 ACL. The proposed ACL for Guam bottomfish MUS is 66,000 lb, which is 800 lb lower than the 2015 ACL. The proposed ACL for CNMI bottomfish MUS would remain the same as the 2015 ACL of 228,000 lb.

The proposed ACLs and AMs for coral reef ecosystem MUS are identical to those implemented in 2015 (80 FR 52415, August 31, 2015), with three exceptions. For Guam jacks, Hawaii crabs and Hawaii octopus, NMFS determined that the average 2013–2015 catch for each of these three stock complexes exceeded their respective 2015 ACLs. Specifically, average 2013–2015 catch for Guam jacks was 37,399 lb and exceeded the 2015 ACL of 29,300 lb by 8,099 lb. For Hawaii crabs, average 2013–2015 catch was 40,363 lb and exceeded the 2015 ACL of 33,500 lb by 6,863 lb. For Hawaii octopus, average 2013–2015 catch was 40,237 lb and exceeded the 2015 ACL of 35,700 lb by 4,537 lb. In accordance with the 2015 AMs (80 FR 52415, August 31, 2015), and in consideration of the best available scientific information, NMFS proposes to reduce the 2016 ACLs from the 2015 ACL by the amount of the 2015 overages for each of the three stocks. As a result, the proposed ACL for Guam jacks is 21,201 lb, 26,637 lb for Hawaii crabs and 31,163 lb for Hawaii mollusks.

The vessels impacted by this action are federally permitted to fish under the FEPs for American Samoa, the Marianas Archipelago (Guam and the CNMI), and Hawaii. The numbers of vessels permitted under these Fishery Ecosystem Plans affected by this action are as follows: American Samoa (0), Marianas Archipelago (19), and Hawaii (8). For Regulatory Flexibility Act purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial

fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of \$11 million for all its affiliated operations worldwide. Based on available information, NMFS has determined that all impacted entities are small entities under the SBA definition of a small entity, *i.e.*, they are engaged in the business of fish harvesting, are independently owned or operated, are not dominant in their field of operation, and have annual gross receipts not in excess of \$11 million. Therefore, there would be no disproportionate economic impacts between large and small entities. Furthermore, there would be no disproportionate economic impacts among the universe of vessels based on gear, home port, or vessel length.

Even though this proposed action would apply to a substantial number of vessels, the implementation of this action should not result in significant adverse economic impact to individual vessels. The Council and NMFS are not considering in-season closures in any of the fisheries to which these ACLs apply because fishery management agencies are not able to track catch relative to the ACLs during the fishing year. As a result, fishermen would be able to fish throughout the entire year. In addition, the ACLs, as proposed, would not change the gear types, areas fished, effort, or participation of the fishery during the 2016 fishing year. A post-season review of the catch data is

required to determine whether any fishery exceeded its ACL by comparing the ACL to the most recent three-year average catch for which data is available. If an ACL is exceeded, the Council and NMFS would take action in future fishing years to correct the operational issue that caused the ACL overage. NMFS and the Council would evaluate the environmental, social, and economic impacts of future actions, such as changes to future ACLs or AMs, after the required data are available. Specifically, if NMFS and the Council determine that the three-year average catch for a fishery exceeds the specified ACL, NMFS would reduce the ACL in the subsequent year for that fishery by the amount of the overage.

The proposed action does not duplicate, overlap, or conflict with other Federal rules, and is not expected to have significant impact on small entities (as discussed above), organizations, or government jurisdictions. The proposed action also will not place a substantial number of small entities, or any segment of small entities, at a significant competitive disadvantage to large entities. As such, an initial regulatory flexibility analysis is not required and none has been prepared.

This action has been determined to be exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 11, 2017.

Samuel D. Rauch III,

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0069]

Availability of a Final Environmental Assessment and Finding of No Significant Impact for a Biological Control Agent for Giant Reed

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared a final environmental assessment and finding of no significant impact relative to the release of *Lasioptera donacis* for the biological control of giant reed, *Arundo donax*, in the continental United States. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

FOR FURTHER INFORMATION CONTACT: Dr. Colin D. Stewart, Assistant Director, Pests, Pathogens, and Biocontrol Permits, Permitting and Compliance Coordination, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1231; (301) 851–2327, email: Colin.D.Stewart@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: Giant reed (*Arundo donax*), a native of the Mediterranean and Middle East, has become one of the most pervasive non-native plants to invade the riparian areas of the Southwest United States, especially in California and the Rio Grande area of Texas. Giant reed infestations in riparian habitats lead to loss of biodiversity, stream bank erosion, altered channel morphology, enhanced survival of cattle fever ticks, damage to bridges, increased costs for chemical and mechanical control along transportation corridors, and impede

law enforcement activities on the international border. Many Federal and State agencies, as well as private entities, conduct programs to manage giant reed, as well as other -invasive weeds.

The Animal and Plant Health Inspection Service (APHIS) is proposing to issue permits for the field release of a gall-forming fly, *Lasioptera donacis*, into the continental United States to reduce the severity of giant reed infestations.

On November 8, 2016, we published in the **Federal Register** (81 FR 78567–78568, Docket No. APHIS–2016–0069) a notice¹ in which we announced the availability, for public review and comment, of an environmental assessment (EA) that examined the potential environmental impacts associated with the proposed release of this biological control agent into the continental United States.

We solicited comments on the EA for 30 days ending December 8, 2016. We received 14 comments by that date. A written response to all comments received on the EA can be found in appendix 5 of the final EA (see footnote 1).

In this document, we are advising the public of our finding of no significant impact (FONSI) regarding the release of *L. donacis* into the continental United States for use as a biological control agent to reduce the severity of giant reed infestations. The finding, which is based on the EA, reflects our determination that release of this biological control agent will not have a significant impact on the quality of the human environment.

The EA and FONSI may be viewed on the *Regulations.gov* Web site (see footnote 1). Copies of the EA and FONSI are also available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 799–7039 to facilitate entry into the reading room. In addition, copies may be obtained by calling or writing to the individual listed under **FOR FURTHER INFORMATION CONTACT**.

¹ To view the notice, environmental assessment, finding of no significant impact, and the comments we received, go to <https://www.regulations.gov/docket?D=APHIS-2016-0069>.

The EA and FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0070]

Availability of an Environmental Assessment for Field Testing a Vaccine for Use Against Infectious Bursal Disease, Marek's Disease, and Newcastle Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has prepared an environmental assessment concerning authorization to ship for the purpose of field testing, and then to field test, an unlicensed Bursal Disease-Marek's Disease-Newcastle Disease Vaccine, Serotype 3, Live Marek's Disease Vector. Based on the environmental assessment, risk analysis, and other relevant data, we have reached a preliminary determination that field testing this veterinary vaccine will not have a significant impact on the quality of the human environment. We are making the documents available to the public for review and comment.

DATES: We will consider all comments that we receive on or before February 17, 2017.

ADDRESSES: You may submit comments by either of the following methods:

• *Federal eRulemaking Portal: Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0070>.*

• *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2016–0070, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0070> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 7997039 before coming.

FOR FURTHER INFORMATION CONTACT: Dr. Donna Malloy, Operational Support Section, Center for Veterinary Biologics, Policy, Evaluation, and Licensing, VS, APHIS, 4700 River Road, Unit 148, Riverdale, MD 20737–1231; phone (301) 851–3426, fax (301) 734–4314.

For information regarding the environmental assessment or the risk analysis, or to request a copy of the environmental assessment (as well as the risk analysis with confidential business information redacted), contact Dr. Patricia L. Foley, Risk Manager, Center for Veterinary Biologics, Policy, Evaluation, and Licensing, VS, APHIS, 1920 Dayton Avenue, P.O. Box 844, Ames, IA 50010; phone (515) 337–6100, fax (515) 337–6120.

SUPPLEMENTARY INFORMATION: Under the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) is authorized to promulgate regulations designed to ensure that veterinary biological products are pure, safe, potent, and efficacious before a veterinary biological product license may be issued. Veterinary biological products include viruses, serums, toxins, and analogous products of natural or synthetic origin, such as vaccines, antitoxins, or the immunizing components of microorganisms intended for the diagnosis, treatment, or prevention of diseases in domestic animals.

APHIS issues licenses to qualified establishments that produce veterinary biological products and issues permits to importers of such products. APHIS also enforces requirements concerning production, packaging, labeling, and shipping of these products and sets standards for the testing of these products. Regulations concerning

veterinary biological products are contained in 9 CFR parts 101 to 124.

A field test is generally necessary to satisfy preclicensing requirements for veterinary biological products. Prior to conducting a field test on an unlicensed product, an applicant must obtain approval from APHIS, as well as obtain APHIS' authorization to ship the product for field testing.

To determine whether to authorize shipment and grant approval for the field testing of the unlicensed product referenced in this notice, APHIS considers the potential effects of this product on the safety of animals, public health, and the environment. Based upon a risk analysis and other relevant data, APHIS has prepared an environmental assessment (EA) concerning the field testing of the following unlicensed veterinary biological product:

Requester: Biomune Company.

Product: Bursal Disease-Marek's Disease-Newcastle Disease Vaccine, Serotype 3, Live Marek's Disease Vector.

Possible Field Test Locations:

Alabama, Delaware, Georgia, Maryland, North Carolina, Pennsylvania, and Virginia.

The above-mentioned product is a live Marek's Disease serotype 3 vaccine virus containing a gene from the Newcastle disease virus and a gene from the infectious bursal disease virus. This vaccine would be the recombinant fraction used in combination with a conventional live Marek's disease vaccine virus, either a serotype 1 or serotype 2 strain, during the field safety tests. The attenuated vaccine is intended for use in healthy 18-day-old or older embryonated eggs or day-old chickens, as an aid in the prevention of infectious bursal disease, Marek's disease, and Newcastle disease.

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

We are publishing this notice to inform the public that we will accept written comments regarding the EA from interested or affected persons for a period of 30 days from the date of this notice. Unless substantial issues with adverse environmental impacts are raised in response to this notice, APHIS intends to issue a finding of no significant impact (FONSI) based on the

EA and authorize shipment of the above product and the two products with a conventional live Marek's disease vaccine virus, either a serotype 1 or serotype 2 strain, that incorporate it as a recombinant fraction, for the initiation of field tests following the close of the comment period for this notice.

Because the issues raised by field testing and by issuance of a license are identical, APHIS has concluded that the EA that is generated for field testing would also be applicable to the proposed licensing action. Provided that the field test data support the conclusions of the original EA and the issuance of a FONSI, APHIS does not intend to issue a separate EA and FONSI to support the issuance of the associated product licenses, and would determine that an environmental impact statement need not be prepared. APHIS intends to issue a veterinary biological product license for this vaccine and the two associated products containing it following satisfactory completion of the field test, provided no adverse impacts on the human environment are identified and provided the product meets all other requirements for licensing.

Authority: 21 U.S.C. 151–159.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2017–01010 Filed 1–17–17; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2016–0079]

Updates to the Biotechnology Regulatory Services BQMS Program

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that Biotechnology Regulatory Services of the Animal and Plant Health Inspection Service (APHIS) is updating its Biotechnology Quality Management System Program and renaming it the Biotechnology Quality Management Support Program to offer a more flexible, more customizable, and less costly program that is easily accessible to a wider universe of researchers and developers conducting biotechnology activities under APHIS' regulations. These updates represent the next step in

the continual improvement to this voluntary quality management program.

FOR FURTHER INFORMATION CONTACT: Ms. Rochelle Langley, Quality Management Specialist, Biotechnology Regulatory Services, APHIS, 4700 River Road Unit 146, Riverdale, MD 20737-1228; 301-851-3906, *Rochelle.A.Langley@aphis.usda.gov*.

SUPPLEMENTARY INFORMATION: The U.S. Department of Agriculture's Animal and Plant Health Inspection Service (APHIS), regulates the importation, interstate movement, and environmental release of genetically engineered (GE) organisms that are, or may be, plant pests. In September 2007, APHIS' Biotechnology Regulatory Services (BRS) announced a voluntary, audit-based compliance assistance program known as the Biotechnology Quality Management System (BQMS) Program to assist the regulated community in achieving and maintaining compliance with requirements for field trials and movements of GE organisms under its regulations in 7 CFR part 340.

Under the BQMS Program, APHIS-BRS has provided support for the voluntary adoption by participants of a quality management system to improve their management of domestic research and development of regulated GE organisms in order to fully comply with regulations. The BQMS Program included a mandatory audit standard that provided extensive criteria for the development, implementation, and an objective evaluation of the participant's quality management system.

We are notifying the public that BRS is updating its BQMS Program and renaming it the Biotechnology Quality Management Support Program, which will use the same BQMS acronym, in order to reach a broader audience. After engaging with current and prospective BQMS participants, APHIS-BRS determined a modularized, more flexible, Web-based approach reaches a wider universe of researchers and developers conducting biotechnology activities. Small organizations, academics, and first-time users now have access to a program that previously was only within the means of a select few with considerable resources. The new BQMS Program is no longer audit-based, and no longer requires an "all or nothing" quality management system that relies on a BRS-developed audit standard, a required 3-day BRS-led training session for all participants, and a third-party audit cycle to maintain Program recognition. The new BQMS Program remains a voluntary compliance assistance program but with fewer impediments to users—no

required multi-day training, no cost-prohibitive third-party audits and associated travel expenses, and no exhaustive resource commitments.

The new BQMS Program is a flexible, Web-based, modular approach designed to enhance compliance by enabling organizations large and small to develop sound quality management practices. Users can select any or all critical control points applicable to their organizations' compliance assistance needs such as: Site selection planning, procedures for storage, transportation (interstate movement and importation), environmental release planning and monitoring, post-harvest handling and transfer, devitalization and final disposition, potential regulatory compliance incidents, and a reporting form for regulatory compliance incidents. User costs should decrease with the ability to easily choose only the modules they need to meet their unique compliance assistance needs.

The new BQMS Program offers a comprehensive repository of user-friendly, Web-based templates, guidelines, and checklists to assist users in the implementation of processes, procedures, and the foundation for a quality management system. No matter how big or small their organization, BQMS users will continue to have the option of requesting one-on-one tailored assistance from BRS staff, as in the past.

Organizations participating in the voluntary program will be encouraged to use BQMS resources as a foundation to ensure all personnel are properly trained regarding the requirements for working with GE organisms; identify and develop control measures to minimize the risk or occurrence of unauthorized releases; and monitor quality management practices and procedures.

These updates are the next step in the continual improvement of the voluntary BQMS Program.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2016-0113]

Notice of Request for Extension of Approval of an Information Collection; Interstate Movement of Fruit From Hawaii

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the interstate movement of fruit from Hawaii.

DATES: We will consider all comments that we receive on or before March 20, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0113>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2016-0113, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0113> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the interstate movement of fruit from Hawaii, contact Dr. Robert Baca, Assistant Director, Permitting and Compliance Coordination, Compliance and Environmental Coordination Branch, PPQ, APHIS, 4700 River Road, Unit 150, Riverdale, MD 20737; (301) 851-2292. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Interstate Movement of Fruit From Hawaii.

OMB Control Number: 0579–0331.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. The regulations in 7 CFR part 318, State of Hawaii and Territories Quarantine Notices, prohibit or restrict the interstate movement of fruits, vegetables, and other products from Hawaii, Puerto Rico, the U.S. Virgin Islands, and Guam to the continental United States to prevent the spread of plant pests or noxious weeds.

In accordance with the regulations in § 318.13–26, breadfruit, jackfruit, fresh pods of cowpea and its relatives, dragon fruit, mangosteen, moringa pods, and melon must meet certain conditions for interstate movement from Hawaii into the continental United States. These conditions involve information collection activities, such as compliance agreements, certificates and limited permits, among other things.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.22 hours per response.

Respondents: Importers of fruit from Hawaii.

Estimated annual number of respondents: 110.

Estimated annual number of responses per respondent: 25.

Estimated annual number of responses: 2,782.

Estimated total annual burden on respondents: 618 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2017–01009 Filed 1–17–17; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2015–0096]

The Scotts Co. and Monsanto Co.; Determination of Nonregulated Status of Creeping Bentgrass Genetically Engineered for Resistance to Glyphosate

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our determination that creeping bentgrass designated as event ASR368, which has been genetically engineered for resistance to the herbicide glyphosate by the Scotts Company and Monsanto Company is no longer considered a regulated article under our regulations governing the introduction of certain genetically engineered organisms. Our determination is based on our evaluation of data submitted by the Scotts Company and Monsanto Company in its petition for a determination of nonregulated status, our analysis of publically available scientific data, and comments received from the public on the petition for nonregulated status and its associated environmental impact statement and plant pest risk assessment. This notice also announces the availability of our written determination and record of decision.

DATES: Effective January 18, 2017.

ADDRESSES: You may read the documents referenced in this notice and

any comments we received in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming. Those documents are also available on the Internet at http://www.aphis.usda.gov/biotechnology/petitions_table_pending.shtml under APHIS Petition Number 15–300–01p and are posted with the comments we received on the *Regulations.gov* Web site at <http://www.regulations.gov/#/docketDetail;D=APHIS-2015-0096>.

FOR FURTHER INFORMATION CONTACT: Dr. John Turner, Director, Environmental Risk Analysis Programs, Biotechnology Regulatory Services, APHIS, 4700 River Road, Unit 147, Riverdale, MD 20737–1236; (301) 851–3954, email: john.t.turner@aphis.usda.gov. To obtain copies of the documents referenced in this notice, contact Ms. Cindy Eck at (301) 851–3892, email: cynthia.a.eck@aphis.usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, “Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests,” regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered (GE) organisms and products are considered “regulated articles.”

The regulations in § 340.6(a) provide that any person may submit a petition to APHIS seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

APHIS received a petition from the Scotts Company of Marysville, OH, and Monsanto Company of St. Louis, MO (Scotts/Monsanto), seeking a determination of nonregulated status of creeping bentgrass (*Agrostis stolonifera* L.) designated as event ASR368, which has been genetically engineered for resistance to the herbicide glyphosate. The Scotts/Monsanto petition states that information collected during field trials

and laboratory analyses indicates that ASR368 bentgrass is not likely to be a plant pest and therefore should not be a regulated article under APHIS' regulations in 7 CFR part 340.

In a notice¹ published in the **Federal Register** on January 8, 2016 (81 FR 902–903, Docket No. APHIS–2015–0096), APHIS announced the availability of the Scotts/Monsanto petition for public comment. APHIS solicited comments on the petition for 60 days ending on March 8, 2016. The notice also announced that APHIS would prepare either an environmental assessment or an environmental impact statement (EIS) in accordance with the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*, NEPA) to provide the Agency with a review and analysis of any potential environmental impacts associated with the petition request.

Following review of public comments, we published another notice² in the **Federal Register** on August 3, 2016 (81 FR 51174–51176, Docket No. APHIS–2015–0096), advising the public of our intent to prepare an EIS for the potential determination of nonregulated status requested by the petition. APHIS decided to prepare an EIS in order to perform a comprehensive environmental analysis of the potential environmental impacts that may occur as a result of granting determinations of nonregulated status for this event.

National Environmental Policy Act and Record of Decision

To provide the public with documentation of APHIS' review and analysis of the potential environmental impacts associated with a determination of nonregulated status of ASR368 bentgrass, an EIS has been prepared in accordance with: (1) NEPA, as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

A notice of availability regarding the draft EIS prepared by APHIS was published by the Environmental Protection Agency (EPA) in the **Federal Register** on September 30, 2016 (81 FR

67348–67349, Docket No. ER–FRL–9029–3). Along with the draft EIS, APHIS also made available the plant pest risk assessment (PPRA) for the petition. APHIS reviewed and evaluated all of the public comments received on the draft EIS and prepared formal responses to them as part of the final EIS.

A notice of availability regarding the final EIS prepared by APHIS was published by EPA in the **Federal Register** on December 9, 2016 (81 FR 89095–89096, Docket No. ER–FRL–9030–6). The NEPA implementing regulations in 40 CFR 1506.10 require a minimum 30-day review period between the time the notice of availability of a final EIS is published and the time an agency makes a decision on an action covered by the EIS. APHIS has reviewed and evaluated the comments received during the 30-day review period and has concluded that it has fully and appropriately analyzed the relevant environmental issues covered by the final EIS and those comments. Based on our final EIS, the response to public comments, and other pertinent scientific data, APHIS has prepared a record of decision for the final EIS.

Determination of Nonregulated Status

Based on APHIS' analysis of field and laboratory data submitted by Scotts/Monsanto, references provided in the petitions, peer-reviewed publications, information analyzed in the EIS, the PPRA, comments provided by the public, and APHIS' evaluation of and response to those comments, APHIS has determined that is unlikely to pose a plant pest risk. Accordingly, the petition requesting a determination of nonregulated status is approved and ASR368 bentgrass is no longer subject to our regulations governing the introduction of certain genetically engineered organisms and to the plant pest provisions of the Plant Protection Act.

Copies of the signed determination document and the signed record of decision, as well as copies of the final EIS and the PPRA are available as indicated in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** sections of this notice.

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 12th day of January 2017.

Michael C. Gregoire,

Acting Administrator, Animal and Plant Health Inspection Service.

Notice of Request for Extension of Approval of an Information Collection; Importation of Emerald Ash Borer Host Material From Canada

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the importation of emerald ash borer host material from Canada to prevent the introduction and spread of emerald ash borer in the United States.

DATES: We will consider all comments that we receive on or before March 20, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0107>.

- **Postal Mail/Commercial Delivery:** Send your comment to Docket No. APHIS–2016–0107, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0107> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of emerald ash borer host

¹ To view the notice, the petition, the comments we received, and other supporting documents, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2015-0096>.

material from Canada, contact Dr. Robert Baca, Assistant Director, Permitting and Compliance Coordination, Compliance and Environmental Coordination Branch, PPQ, APHIS, 4700 River Road Unit 150, Riverdale, MD 20737; (301) 851-2292. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Emerald Ash Borer Host Material from Canada.

OMB Control Number: 0579-0319.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States.

As authorized by the PPA, the Animal and Plant Health Inspection Service (APHIS) regulates the importation of plants for planting into the United States from certain parts of the world as provided in "Subpart—Plants for Planting" (7 CFR 319.37 through 319.37-14). This subpart restricts, among other things, the importation of living plants, plant parts, and seeds for propagation. In addition, APHIS regulates the importation of lumber and other wood articles as provided in "Subpart—Logs, Lumber, and Other Wood Articles" (7 CFR 319.40-1 through 319.40-11). This subpart lists requirements for the importation of various logs, lumber, and other unmanufactured wood products into the United States. Both subparts contain regulations that restrict or prohibit the importation of emerald ash borer (EAB) host material from Canada to prevent the introduction and spread of EAB into the United States. EAB (*Agrilus planipennis*) is a destructive wood-boring insect that attacks ash trees. These regulations involve information collection activities, including phytosanitary certificates, permit applications, notices, notifications, agreements, records, and certificates of inspection.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.56 hours per response.

Respondents: Importers of plants for planting and logs, lumber, and other wood articles from Canada; and the Canadian Food Inspection Agency.

Estimated annual number of respondents: 7.

Estimated annual number of responses per respondent: 6.

Estimated annual number of responses: 39.

Estimated total annual burden on respondents: 22 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

Animal and Plant Health Inspection Service

[Docket No. APHIS-2016-0110]

Notice of Request for Extension of Approval of an Information Collection; Importation of Fresh Beans, Shelled or in Pods, From Jordan Into the Continental United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the regulations for the importation of fresh beans, shelled or in pods, from Jordan into the continental United States.

DATES: We will consider all comments that we receive on or before March 20, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0110>.

- *Postal Mail/Commercial Delivery:*

Send your comment to Docket No. APHIS-2016-0110, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0110> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the importation of fresh beans, shelled or in pods, from Jordan into the continental United States, contact Dr. Robert Baca, Assistant Director, Permitting and Compliance Coordination, Compliance and Environmental Coordination Branch, PPQ, APHIS, 4700 River Road Unit 150, Riverdale, MD 20737; (301) 851-2292. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Fresh Beans, Shelled or in Pods, From Jordan Into the Continental United States.

OMB Control Number: 0579-0405.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate

movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. As authorized by the PPA, the Animal and Plant Health Inspection Service (APHIS) regulates the importation of certain fruits and vegetables in accordance with the regulations in "Subpart—Fruits and Vegetables" (7 CFR 319.56–1 through 319.56–76).

Section 319.56–62 provides the requirements for the importation of fresh beans (*Phaseolus vulgaris* L.), shelled or in pods (French, green, snap, and string) from Jordan into the continental United States. These commodities may be imported into the United States under certain conditions to prevent the introduction of plant pests into the United States. The regulations require information collection activities, including packinghouse registration, box labeling, and a phytosanitary certificate attesting that the conditions in § 319.56–62 have been met and that each consignment has been inspected and found free the pests listed in that section.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.78 hours per response.

Respondents: Importers of fresh beans, shelled or in pods, from Jordan and the national plant protection organization of Jordan.

Estimated annual number of respondents: 6.

Estimated annual number of responses per respondent: 7.

Estimated annual number of responses: 40.

Estimated total annual burden on respondents: 31 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Importation of Avocados From Continental Spain.

OMB Control Number: 0579–0400.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests, including fruit flies, into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in "Subpart—Fruits and Vegetables" (7 CFR 319.56–1 through 319.56–76).

In accordance with § 319.56–64, fresh avocados from continental Spain are subject to certain conditions before entering the United States to ensure that certain quarantine plant pests are not introduced into the United States. The regulations require the use of information collection activities, including an operational workplan, trust fund agreement, production site and packinghouse registration, agreements, box labeling and shipping documents, a phytosanitary certificate, and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.03 hours per response.

Respondents: Growers and importers of avocados from continental Spain and the national plant protection organization of Spain.

Estimated annual number of respondents: 28.

Estimated annual number of responses per respondent: 517.

Estimated annual number of responses: 14,484.

Estimated total annual burden on respondents: 484 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2016-0106, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0106> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the Cooperative Agricultural Pest Survey, contact Dr. Robert Baca, Assistant Director, Permitting and Compliance

Coordination, Compliance and Environmental Coordination Branch, PPQ, APHIS, 4700 River Road, Unit 150, Riverdale, MD 20737; (301) 851-2292. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Cooperative Agricultural Pest Survey.

OMB Control Number: 0579-0010.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Plant Protection Act (7 U.S.C. 7701 *et seq.*), the Secretary of Agriculture is authorized, either independently or in cooperation with the States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests and noxious weeds that are new to or not widely distributed within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS).

To carry out this mission, APHIS' Plant Protection and Quarantine (PPQ) program has joined forces with the States and other agencies to create a program called the Cooperative Agricultural Pest Survey (CAPS). The CAPS program coordinates efforts through cooperative agreements with the States and other agencies to collect and manage data on plant pests, noxious weeds, and biological control agents, which may be used to control plant pests or noxious weeds.

This program allows the States and PPQ to conduct surveillance activities to detect and measure the presence of exotic plant pests and weeds and to input surveillance data into a uniform national system. Among other things, this allows APHIS to obtain a more comprehensive picture of plant pest conditions in the United States.

The CAPS program involves certain information collection activities, such as cooperative agreements, pest detection surveys, a disclosure form, a form for determination of specimens, and various application forms.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the

Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.24 hours per response.

Respondents: State cooperators participating in CAPS and not-for-profit organizations.

Estimated annual number of respondents: 54.

Estimated annual number of responses per respondent: 271.

Estimated annual number of responses: 14,634.

Estimated total annual burden on respondents: 3,573 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

Animal and Plant Health Inspection Service

[Docket No. APHIS-2016-0111]

Notice of Request for Extension of Approval of an Information Collection; Federally Recognized State Managed Phytosanitary Program

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to

request an extension of approval of an information collection associated with Federal recognition of a State's plant pest containment, eradication, or exclusion program as a Federally Recognized State Managed Phytosanitary Program.

DATES: We will consider all comments that we receive on or before March 20, 2017.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0111>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2016-0111, Regulatory Analysis and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road Unit 118, Riverdale, MD 20737-1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2016-0111> or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799-7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the Federally Recognized State Managed Phytosanitary Program, contact Dr. Robert Baca, Assistant Director, Permitting and Compliance Coordination, Compliance and Environmental Coordination Branch, PPQ, APHIS, 4700 River Road Unit 150, Riverdale, MD 20737; (301) 851-2292. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851-2483.

SUPPLEMENTARY INFORMATION:

Title: Federally Recognized State Managed Phytosanitary Program.

OMB Control Number: 0579-0365.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to prohibit or restrict the importation, entry, or interstate movement of plants, plant products, or other articles if the Secretary determines that the prohibition or restriction is necessary to prevent a plant pest or noxious weed from being introduced into or disseminated within the United States. This authority has been delegated to the

Animal and Plant Health Inspection Service (APHIS).

As part of this mission, APHIS' Plant Protection and Quarantine (PPQ) program responds to introductions of plant pests to eradicate, suppress, or contain them through various programs to prevent their interstate spread. APHIS' plant pest containment and eradication programs qualify as "official control programs," as defined by the International Plant Protection Convention (IPPC), recognized by the World Trade Organization as the standard-setting body for international plant quarantine issues. "Official control" is defined as "the active enforcement of mandatory phytosanitary regulations and the application of mandatory phytosanitary procedures with the objective of containment or eradication of quarantine pests or for the management of regulated non-quarantine pests." As a contracting party to the IPPC, the United States has agreed to observe IPPC principles as they relate to international trade.

APHIS is aware that individual States enforce phytosanitary regulations and procedures within their borders to address pests of concern, and that those pests are not always also the subject of an APHIS response program or activity. To strengthen APHIS' safeguarding system to protect agriculture and to facilitate agriculture trade through effective management of phytosanitary measures, APHIS initiated the Federally Recognized State Managed Phytosanitary (FRSMP) Program, which establishes an administrative process for granting Federal recognition to certain State-managed official control programs for plant pest eradication or containment and State-managed pest exclusion programs. (The FRSMP Program was previously referred to as the Official Control Program.) Federal recognition of a State's pest control activities will justify actions by Federal inspectors at ports of entry to help exclude pests that are under a phytosanitary program in a destination State. This process involves the use of information collection activities, including the submission of a petition for protocol for quarantine pests of concern, a petition for regulated non-quarantine pests, State cooperative agreements, and audit review annual accomplishment reports.

We are asking OMB to approve these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our

information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 34.7 hours per response.

Respondents: State plant health regulatory officials.

Estimated annual number of respondents: 1.

Estimated annual number of responses per respondent: 7.

Estimated annual number of responses: 7.

Estimated total annual burden on respondents: 243 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of January 2017.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Rural Housing Service

Section 538 Guaranteed Rural Rental Housing Program 2017 Industry Forums—Open Teleconference and/or Web Conference Meetings

AGENCY: Rural Housing Service, USDA.

ACTION: Notice.

SUMMARY: This Notice announces a series of teleconference and/or web conference meetings regarding the U.S. Department of Agriculture (USDA) Section 538 Guaranteed Rural Rental

Housing (GRRH) program, which are scheduled to occur during 2017 and 2018. This Notice also outlines suggested discussion topics for the meetings and is intended to notify the general public of their opportunity to participate in the teleconference and/or web conference meetings.

DATES: The dates and times for the teleconference and/or web conference meetings will be announced via email to parties registered as described below.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing to register for the calls and obtain the call-in number, access code, web link and other information for any of the public teleconference and/or web conference meetings may contact Monica Cole, Financial and Loan Analyst, at: (202) 720-1251, fax: (844) 875-8075, or email: monica.cole@wdc.usda.gov. Those who request registration less than 15 calendar days prior to the date of a teleconference and/or web conference meetings may not receive notice of that teleconference and/or web conference meeting, but will receive notice of future teleconference and/or web conference meetings. The Agency expects to accommodate each participant's preferred form of participation by telephone or via web link. However, if it appears that existing capabilities may prevent the Agency from accommodating all requests for one form of participation, each participant will be notified and encouraged to consider an alternative form of participation. Individuals who plan to participate and need reasonable accommodations or language translation assistance should inform Monica Cole within 10 business days in advance of the meeting date.

SUPPLEMENTARY INFORMATION: The objectives of this series of teleconferences are as follows:

- Enhance the effectiveness of the Section 538 GRRH program.
- Update industry participants and Rural Housing Service (RHS) staff on developments involving the Section 538 GRRH program.

- Enhance RHS' awareness of the market and other forces that impact the Section 538 GRRH program.

Topics to be discussed could include, but will not be limited to, the following:

- Updates on USDA's Section 538 GRRH program activities.
- Perspectives on the current state of debt financing and its impact on the Section 538 GRRH program.
- Enhancing the use of Section 538 GRRH program financing with the transfer and/or preservation of Section 515 developments.

- The impact of the Low Income Housing Tax Credits program changes on Section 538 GRRH program financing.

Non-Discrimination Requirements

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

- (1) *By mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW., Washington, DC 20250-9410
- (2) *Fax:* (202) 690-7442; or
- (3) *Email:* program.intake@usda.gov.

Dated: January 6, 2017.

David Lipsetz,

Acting Administrator, Rural Housing Service.

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Bureau 2020 Advisory Committee; Extension of Nominations Submission Period

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Notice of request for nominations; extension of nominations submission period.

SUMMARY: The Bureau of the Census (Census Bureau) is issuing this document to extend the nominations submission period for the Census Bureau 2020 Advisory Committee; Notice of Request for Nominations, which was published in the **Federal Register** on December 20, 2016. The nominations submission period, which would have ended on January 19, 2017, is now extended until February 17, 2017.

DATES: Nomination submissions on the notice of request for nominations published on December 20, 2016 (81 FR 92776) must be received by February 17, 2017.

ADDRESSES: Please submit nominations to Tara Dunlop Jackson, Branch Chief for Advisory Committees, Customer Liaison and Marketing Services Office, tara.t.dunlop@census.gov, Department of Commerce, U.S. Census Bureau, Room 8H177, 4600 Silver Hill Road, Washington, DC 20233, telephone 301-763-5222.

FOR FURTHER INFORMATION CONTACT: Tara Dunlop Jackson, Branch Chief for Advisory Committees, Customer Liaison Marketing Services Offices, U.S. Census Bureau, Room 8H177, 4600 Silver Hill Road, Washington, DC 20233, telephone (301) 763-5222 or tara.t.dunlop@census.gov. For TTY callers, please use the Federal Relay Service 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Background

The Census Bureau 2020 Advisory Committee is established in accordance with the Federal Advisory Committee Act, Title 5, United States Code, Appendix 2. For more information about the Committee, membership, and the nomination process, please see the original document on the notice of request for nominations published on December 20, 2016 (81 FR 92776).

In response to individuals and organizations who have requested more time to submit nominations of members to serve on the Census Bureau 2020 Advisory Committee, the Census Bureau

has decided to extend the nominations submission period to February 17, 2017. This document announces the extension of the nominations submission period.

Dated: January 11, 2017.

John H. Thompson,

Director, Bureau of the Census.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of National Advisory Council on Innovation and Entrepreneurship Meeting

AGENCY: Economic Development Administration, Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The National Advisory Council on Innovation and Entrepreneurship (NACIE) will hold a public meeting on Thursday, February 2, 2017, from 1:00–3:00 p.m. Eastern Time (ET) and Friday, February 3, 2017, from 8:45 a.m.–12:30 p.m. ET. During this time, members will further develop their policy proposals and work plan for their two-year term. Topics to be covered include increasing access to capital in underserved markets, inclusive entrepreneurship practices, improving entrepreneurship education in schools and career development programs, and better aligning federal innovation and entrepreneurship programing.

DATES:

Thursday, February 2, 2017

Time: 1:00 p.m.–3:00 p.m. Eastern Time (ET)

Friday, February 3, 2017

Time: 8:45 a.m.–12:30 p.m. ET.

ADDRESSES: Herbert Clark Hoover Building, 1401 Constitution Ave. NW., Washington, DC 20230, Room 1894. Please enter through the library, located on the corner of 15th St. & Pennsylvania Ave. NW., Washington, DC 20230. Please note that pre-clearance is required in order to make a statement during our public comment portion. Please be sure to keep all comments to 5 minutes or less, and submit a brief statement summarizing your comment to Craig Buerstatte (see contact information below) no later than 11:59 p.m. ET on Monday, January 30, 2017.

Teleconference:

February 2–3, 2017

Dial-In: +1888-949-2793

Passcode: 4819803

SUPPLEMENTARY INFORMATION: The NACIE was chartered on November 10,

2009, to advise the Secretary of Commerce on matters related to innovation and entrepreneurship in the United States. NACIE's overarching focus is recommending transformational policies to the Secretary that will help U.S. communities, businesses, and the workforce become more globally competitive.

The NACIE operates as an independent entity within the Office of Innovation and Entrepreneurship (OIE), which is housed within the U.S. Commerce Department's Economic Development Administration. NACIE members are a diverse and dynamic group of successful entrepreneurs, innovators, and investors, as well as leaders from nonprofit organizations and academia.

The final agenda for the meeting will be posted on the NACIE Web site at <http://www.eda.gov/oie/nacie/> prior to the meeting. Any member of the public may submit pertinent questions and comments concerning the NACIE's affairs at any time before or after the meeting. Comments may be submitted to the Office of Innovation and Entrepreneurship at the contact information below. Those unable to attend the meetings in person but wishing to listen to the proceedings can do so through a conference call line accessible via +1888-949-2793 with passcode 4819803. Copies of the meeting minutes will be available by request within 90 days of the meeting date.

FOR FURTHER INFORMATION CONTACT:

Craig Buerstatte, Office of Innovation and Entrepreneurship, Room 78018, 1401 Constitution Avenue NW., Washington, DC 20230; email: nacie@doc.gov; telephone: +1202-482-8001; fax: +1202-273-4781. Please reference "NACIE February 2017 Meeting" in the subject line of your correspondence.

Dated: January 12, 2017.

Craig Buerstatte,

Acting Director, Office of Innovation and Entrepreneurship.

Fisheries of the Exclusive Economic Zone Off Alaska; Groundfish of the Gulf of Alaska; Central Gulf of Alaska Rockfish Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of standard prices and fee percentage.

SUMMARY: NMFS publishes the standard ex-vessel prices and fee percentage for cost recovery under the Central Gulf of Alaska Rockfish Program. This action is intended to provide participants in a rockfish cooperative with the standard prices and fee percentage for the 2016 fishing year, which was authorized from May 1 through November 15. The fee percentage is 2.54 percent. The fee payments are due from each rockfish cooperative on or before February 15, 2017.

DATES: Effective January 18, 2017.

FOR FURTHER INFORMATION CONTACT: Carl Greene, 907-586-7105.

SUPPLEMENTARY INFORMATION:

Background

The rockfish fisheries are conducted in Federal waters near Kodiak, AK, by trawl and longline vessels. Regulations implementing the Central Gulf of Alaska (GOA) Rockfish Program (Rockfish Program) are set forth at 50 CFR part 679. Exclusive harvesting privileges are allocated as quota share under the Rockfish Program for rockfish primary and secondary species. Each year, NMFS issues rockfish primary and secondary species cooperative quota (CQ) to rockfish quota share holders to authorize harvest of these species. The rockfish primary species are northern rockfish, Pacific ocean perch, and dusky rockfish. In 2012, dusky rockfish replaced the pelagic shelf rockfish species group in the GOA Groundfish Harvest Specifications (77 FR 15194, March 14, 2012). The rockfish secondary species include Pacific cod, rougheye rockfish, shortraker rockfish, sablefish, and thornyhead rockfish. Rockfish cooperatives began fishing under the Rockfish Program on May 1, 2012.

The Rockfish Program is a limited access privilege program established under the provisions of section 303A of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Sections 303A and 304(d) of the Magnuson-Stevens Act require NMFS to collect fees to recover the actual costs directly related to the management, data collection and analysis, and enforcement of any limited access privilege program. Therefore, NMFS is required to collect fees for the Rockfish Program under sections 303A and 304(d)(2) of the Magnuson-Stevens Act. Section 304(d)(2) of the Magnuson-Stevens Act also limits the cost recovery fee so that it may not exceed 3 percent of the ex-

vessel value of the fish harvested under the Rockfish Program.

Standard Prices

NMFS calculates cost recovery fees based on standard ex-vessel value price, rather than actual price data provided by each rockfish CQ holder. Use of a standard ex-vessel price is allowed under sections 303A and 304(d)(2) of the Magnuson-Stevens Act. NMFS generates a standard ex-vessel price for each rockfish primary and secondary species on a monthly basis to determine the average price paid per pound for all shoreside processors receiving rockfish primary and secondary species CQ.

Regulations at § 679.85(b)(2) require the Regional Administrator to publish rockfish standard ex-vessel values during the first quarter of each calendar year. The standard prices are described in U.S. dollars per pound for rockfish primary and secondary species CQ landings made during the previous year.

Fee Percentage

NMFS assesses a fee on the standard ex-vessel value of rockfish primary species and rockfish secondary species CQ harvested by rockfish cooperatives in the Central GOA and waters adjacent to the Central GOA when rockfish primary species caught by a cooperative are deducted from the Federal total allowable catch. The rockfish entry level longline fishery and trawl vessels that opt out of joining a cooperative are not subject to cost recovery fees because those participants do not receive rockfish CQ. Specific details on the Rockfish Program's cost recovery provision may be found in the implementing regulations set forth at § 679.85.

NMFS informs—by letter—each rockfish cooperative of the fee percentage applied to the previous year's landings and the total amount due. Fees are due on or before February 15 of each year. Failure to pay on time will result in the permit holder's

rockfish quota share becoming non-transferable, and the person will be ineligible to receive any additional rockfish quota share by transfer. In addition, cooperative members will not receive any rockfish CQ the following year until full payment of the fee is received by NMFS.

NMFS calculates and publishes in the **Federal Register** the fee percentage in the first quarter of each year according to the factors and methods described in Federal regulations at § 679.85(c)(2). NMFS determines the fee percentage that applies to landings made in the previous year by dividing the total Rockfish Program management, data collection and analysis, and enforcement costs (direct program costs) during the previous year by the total standard ex-vessel value of the rockfish primary species and rockfish secondary species for all rockfish CQ landings made during the previous year (fishery value). NMFS captures the direct program costs through an established accounting system that allows staff to track labor, travel, contracts, rent, and procurement. Fee collections in any given year may be less than, or greater than, the direct program costs and fishery value for that year, because, by regulation, the fee percentage is established in the first quarter of the calendar year based on the program costs and the fishery value of the previous calendar year.

Using the fee percentage formula described above, the estimated percentage of program costs to value for the 2016 calendar year is 2.54 percent of the standard ex-vessel value. The fee percentage for 2016 is a decrease from the 2015 fee percentage of 3.0 percent (81 FR 10591, March 1, 2016). Program costs for 2016 were lower than in 2015, with a specific reduction in the costs of observer coverage for the Alaska Fisheries Science Center due to efficiencies achieved in the deployment of observers in the Rockfish Program.

TABLE 1—STANDARD EX-VESSEL PRICES BY SPECIES FOR THE 2016 ROCKFISH PROGRAM SEASON IN KODIAK, ALASKA

Species	Period ending	Standard ex-vessel price per pound

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Coral Reef Conservation Program

AGENCY: Coral Reef Conservation Program, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of public meeting, notice of public comment.

SUMMARY: Notice is hereby given of a public meeting of the U.S. Coral Reef Task Force (USCRTF). The meeting will be held Thursday, February 23, 2017, at

9:00 a.m. in Washington, DC, at the U.S. Department of Interior, 1925 Constitution Avenue NW., 20006. The meeting provides a forum for coordinated planning and action among federal agencies, state and territorial governments, and nongovernmental partners. Registration is requested for all events associated with the meeting. This meeting has time allotted for public comment. All public comments must be submitted in written format. A written summary of the meeting will be posted on the USCRTF Web site within two months of occurrence. For information about the meeting, registering and submitting public comments, go to <http://www.coralreef.gov>.

Commenters may address the meeting, the role of the USCRTF, or general coral reef conservation issues. Before including your address, phone number, email address, or other personal identifying information in your comments, you should be aware that your entire comment, including personal identifying information may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Established by Presidential Executive Order 13089 in 1998, the U.S. Coral Reef Task Force mission is to lead, coordinate and strengthen U.S. government actions to better preserve and protect coral reef ecosystems. Co-chaired by the Departments of Commerce and Interior, Task Force members include leaders of 12 federal agencies, seven U.S. states and territories and three freely associated states.

FOR FURTHER INFORMATION CONTACT: Jennifer Koss, NOAA USCRTF Steering Committee Point of Contact, NOAA Coral Reef Conservation Program, 1305 East-West Highway, N/OCRM, Silver Spring, MD 20910 at 301-533-0777 or Liza Johnson, USCRTF Executive Secretary, U.S. Department of Interior, MS-3530-MIB, 1849 C Street NW., Washington, DC 20240 at (202) 208-5004 or visit the USCRTF Web site at <http://www.coralreef.gov>

Dated: January 10, 2017.

Fisheries of the Gulf of Mexico and the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Pre-Workshop Webinar for Southeastern U.S. Black Grouper; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 48 pre-Data Workshop webinar for Southeastern U.S. black grouper.

SUMMARY: The SEDAR 48 assessment process of Southeastern U.S. black grouper will consist of a Data Workshop, an Assessment Workshop and a series of assessment webinars, and a Review Workshop. See

SUPPLEMENTARY INFORMATION.

DATES: The SEDAR 48 pre-Data Workshop webinar will be held February 14, 2017, from 11 a.m. to 1 p.m. Eastern Time.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571-4366; email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) a Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and

NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the pre-data workshop webinar are as follows:

Panelists will present summary data and discuss data needs and treatments.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 11, 2017.

Jeffrey N. Lonergan,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Endangered Species; File Nos. 19641, 17861, 20314, 20340, 20347, 20351, 20528, 20548, and 20651

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of applications.

SUMMARY: Notice is hereby given that nine applicants have applied in due form for permits to take Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) and shortnose sturgeon (*Acipenser brevirostrum*) for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before February 17, 2017.

ADDRESSES: The applications and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting corresponding File No. from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on the applications should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on the application(s) would be appropriate.

FOR FURTHER INFORMATION CONTACT: Malcolm Mohead or Erin Markin, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permits are requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

Each application is summarized below. Please refer to the associated application for specific take numbers. Permits may be valid for up to 10 years.

File No. 19641: Tom Savory, Connecticut Department of Energy and Environmental Protection, Marine Fisheries, P.O. Box 719, Old Lyme, CT 06371, requests a permit to collect, examine and tag shortnose and Atlantic sturgeon in Connecticut waters. Shortnose sturgeon research would be conducted in the Connecticut River from the mouth to the Holyoke Dam. Researchers would monitor for presence, abundance, age and sex composition, habitat utilization, and seasonal movement. Atlantic and shortnose sturgeon would be measured, tissue sampled, passive integrated transponder (PIT) tagged, photographed, and weighed prior to release. A subset of fish also would be fin ray sampled, blood sampled, acoustic tagged, and gastric lavaged. Up to three sturgeon of

each species may unintentionally die annually during research.

File No. 17861: Douglas Peterson, University of Georgia Warnell School of Forestry and Natural Resources Fisheries Division, Athens, GA 30602, requests a permit to better understand the ecology, population dynamics, and status of Atlantic and shortnose sturgeon in Georgia and Florida river systems. Spring and fall sampling would occur for Atlantic and shortnose. Fish would be PIT tagged, tissue sampled, measured, and weighed prior to release. A subset of fish would be acoustically tagged, fin ray sampled for aging, blood sampled, gonadal sampled, and endoscopic sex determination. Early life stages of each species would be intentionally collected and killed to document occurrence of spawning in systems. Up to eight Atlantic sturgeon and six shortnose sturgeon may unintentionally die annually in all river systems.

File No. 20314: Albert Spells, U.S. Fish and Wildlife Service, 11110 Kimages Road, Charles City 23030, requests a permit to conduct research in Maryland and Virginia tributaries to the Chesapeake Bay as well as within the Chesapeake Bay proper. The objectives of the research are to (1) identify the overall health of the DPS, (2) monitor reproductive success, spawning adult and juvenile abundance in tributaries, and (3) evaluate movement patterns and habitat preferences in and between tributaries of the Bay. Sampling gear would include anchored/floating gillnets and other nets. Fish would be PIT tagged, tissue sampled, measured, and weighed prior to release. Individual fish would receive a T-bar, acoustic, and/or satellite tag. A subset of fish would be fin ray sampled. Early life stages of Atlantic sturgeon would be intentionally collected and killed to document occurrence of spawning in systems. Up to two Atlantic sturgeon may unintentionally die annually during research.

File No. 20340: Kim McKown, New York State Department of Environmental Conservation, 205 Belle Mead Road, East Setuaket, NY 11733, requests a permit to conduct research on Atlantic and shortnose sturgeon to determine movement of adult sturgeon in the Hyde Park area, movement of age-1 sturgeon in the Hudson River, population estimates, and habitat utilization. Fish would be collected by gill nets year-round during ice-free periods. Studies would involve acoustic telemetry and mark-recapture. Upon capture, fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. A subset of fish

would be externally and/or internally tagged, fin ray sampled for aging, gastric lavaged, gonadal biopsied, and blood sampled. Early life stages of Atlantic sturgeon would be intentionally collected and killed to document occurrence of spawning in systems. Up to four Atlantic sturgeon and three shortnose sturgeon may unintentionally die annually during research.

File 20347: Gayle Zydlewski, University of Maine, requests a permit to conduct research on Atlantic and shortnose sturgeon to (1) determine spawning periodicity and age class distribution, and (2) identify critical habitat and movement within and between river systems. Research on Atlantic and shortnose sturgeon in the Gulf of Maine would continue in several river systems: Penobscot River, Kennebec River, Saco River, and Merrimack River. All sampling would occur in riverine or near coastal areas annually. Adults, subadults, and juveniles would be sampled with gill nets, trammel nets, trot lines, and a miniature Missouri trawl in the spring, summer, and fall annually. Upon capture, fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. A subset of fish would be acoustically tagged, fin ray, apical scute sampled, gastric lavaged, borescopy, and blood sampled. Early life stages of each species would be intentionally collected and killed to document occurrence of spawning in systems. Up to four sturgeon of each species may unintentionally die annually during research.

File No. 20351: Michael Frisk, the School of Marine and Atmospheric Sciences, Stony Brook University, Stony Brook, NY 11794, requests a permit to conduct research on Atlantic and shortnose sturgeon to continue a long-term study examining the movements among and within Atlantic sturgeon marine aggregation areas located in New York, New Jersey, Delaware, and Connecticut waters and to conduct research to examine (1) sex-specific movements, (2) genetic stock identification, and (3) acquisition of diet, age, and parasite-prevalence data. Additional research would target adults within the marine aggregation areas, and target early life stage and juvenile Atlantic and shortnose sturgeon within riverine and estuarine areas of the Hudson and Delaware Rivers. Upon capture, fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. A subset of fish would be externally and/or internally tagged, fin ray sampled, gastric lavaged, gonadal sampled, apical scute sampled, ultrasound, and blood sampled. Early

life stages of each species would be intentionally collected and killed to document occurrence of spawning in systems. Up to three Atlantic sturgeon and two shortnose sturgeon may unintentionally die annually during research.

File No. 20528: Bill Post, South Carolina Department of Natural Resources, 217 Fort Johnson Road, Charleston, SC 29412, requests a permit to conduct research on Atlantic and shortnose sturgeon to determine their presence, status, health, habitat use, and movements in South Carolina waters. Studies would involve using gill nets to capture fish. Upon capture, fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. A subset of individuals would be acoustically tagged, fin ray sampled, and gonadal biopsied. Early life stages of each species would be intentionally collected and killed to document occurrence of spawning in systems. Up to two sturgeon of each species may unintentionally die annually during research.

File No. 20548: Dewayne Fox, Delaware State University, Department of Agriculture and Natural Resources, 1200 North DuPont Highway, Dover, DE 19901, requests a permit to conduct research on Atlantic and shortnose sturgeon using gillnets, D-ring nets, egg pad collectors, biotelemetry, and hydroacoustic tools in the Delaware River/Estuary, Hudson River/Estuary, and coastal environment between Virginia and New York to develop quantitative estimates of run size, recruitment, and habitat assessment. Upon capture, fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. A subset of individuals would be externally and/or internally tagged, fin ray sampled, blood sampled, and gonadal biopsied. Early life stages of Atlantic sturgeon would be intentionally collected and killed to document occurrence of spawning in systems. Up to one sturgeon of each species may unintentionally die annually during research.

File No. 20651: Anthony Vitale, Entergy Indian Point, 450 Broadway, Buchanan, NY 10511, requests a permit to conduct research on Atlantic and shortnose sturgeon for the Hudson River Biological Monitoring Program (HRBMP) using trawls and seines. The HRBMP takes place within in the Hudson River estuary and involves fisheries sampling to monitor ichthyoplankton and juvenile fish abundance and distribution from Battery Park, Manhattan, upstream to Troy Dam during March through October, and in portions of New York

Harbor during November through April. Upon capture, individual fish would be measured, weighed, PIT tagged, tissue sampled, and photographed. Early life stages of each species would be intentionally collected and killed to document occurrence of spawning in systems.

Dated: January 11, 2017.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF148

Marine Mammals; File No. 20294

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Robert DiGiovanni, Jr., 6 Wakefield Rd. Hampton Bays, New York 11946, has applied in due form for a permit to conduct research on North Atlantic right whales (*Eubalaena glacialis*) and 44 other protected marine mammal and sea turtle species.

DATES: Written, telefaxed, or email comments must be received on or before February 17, 2017.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 20294 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request

to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Courtney Smith or Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

The applicant proposes to conduct aerial, vessel, and ground surveys of North Atlantic right whales (*Eubalaena glacialis*) and 44 other protected cetaceans, pinnipeds, and sea turtles in the Mid-Atlantic U.S. waters, from Massachusetts to North Carolina. Nine of the target species are threatened or endangered: North Atlantic right, blue (*Balaenoptera musculus*), fin (*B. physalus*), sei (*B. borealis*), and sperm (*Physeter macrocephalus*) whales; and green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), loggerhead (*Caretta caretta*), and leatherback (*Dermochelys coriacea*) sea turtles. Surveys will be conducted using fixed wing aircraft and vessels to assess seasonal abundance and distribution of marine mammals in the area. Ground surveys will be conducted on foot and with remote cameras to obtain counts of seals throughout different tidal cycles and to document prevalence of human interaction around seal haul-out sites accessible to the public. Seal scat will be collected for health assessment studies. The permit would be valid for five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: January 11, 2017.

Julia Harrison,

Chief, Permits and Conservation Division,
Office of Protected Resources, National
Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF160

Fisheries of the Exclusive Economic Zone Off Alaska; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries
Service (NMFS), National Oceanic and
Atmospheric Administration (NOAA),
Commerce.

ACTION: Notice; receipt of application to
renew an exempted fishing permit.

SUMMARY: This notice announces receipt of an application from the Alaska Seafood Cooperative and co-applicants to renew exempted fishing permit (EFP) 2016-01 as modified on January 10, 2017. NMFS announced receipt of the application for EFP 2016-01 on January 25, 2016. NMFS issued EFP 2016-01 on May 6, 2016, and modified the EFP on January 10, 2017. If granted, this renewal would extend the expiration date of modified EFP 2016-01 from April 30, 2017, to December 31, 2017. The objective of EFP 2016-01 is to allow the applicants to remove halibut from a trawl codend on the deck, and release those halibut back to the water in a timely manner to increase survivability. Under the EFP, halibut are sampled by NMFS-trained observers for length and physical condition using standard International Pacific Halibut Commission halibut mortality assessment methods. The objectives of EFP 2016-01 are to (1) test methods for sorting halibut on deck for suitability as an allowable fish handling mode for the non-pollock catcher/processor trawl fisheries (Amendment 80, community development quota, and trawl limited access) in the Bering Sea and Aleutian Islands under an eventual regulated program; and (2) simplify and improve on elements that worked under a 2015 deck sorting EFP project. This experiment has the potential to promote the objectives of the Magnuson-Stevens Fishery Conservation and Management Act and the Northern Pacific Halibut Act of 1982.

DATES: Comments on this EFP application must be submitted to NMFS on or before February 7, 2017. The

North Pacific Fishery Management Council (Council) will consider the application at its meeting from January 30 through February 6, 2017, in Seattle, WA.

ADDRESSES: The Council meeting will be held at the Renaissance Seattle Hotel, 515 Madison Street, Seattle, WA 98104. The agenda for the Council meeting is available at <http://www.npfmc.org>. You may submit comments on this document, identified by NOAA-NMFS-2017-0006, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov#!/docketDetail;D=NOAA-NMFS-2017-0006, click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802-1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address) submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Electronic copies of the EFP application, modified EFP 2016-01, and the basis for a categorical exclusion under the National Environmental Policy Act are available from the Alaska Region, NMFS Web site at <http://alaska.fisheries.noaa.gov/>.

FOR FURTHER INFORMATION CONTACT:
Brandee Gerke, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the domestic groundfish fisheries in the Bering Sea and Aleutian Islands management area (BSAI) under the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP), which the Council prepared under the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing the BSAI groundfish fisheries appear at 50 CFR parts 600 and 679. The FMP and the implementing regulations at § 600.745(b) and § 679.6 allow the NMFS Regional Administrator to

authorize, for limited experimental purposes, fishing that would otherwise be prohibited. Procedures for issuing EFPs are contained in the implementing regulations.

The International Pacific Halibut Commission (IPHC) and NMFS manage fishing for Pacific halibut (*Hippoglossus stenolepis*) through regulations established under the authority of the Convention between the United States and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea (Convention) and the Northern Pacific Halibut Act of 1982. The IPHC promulgates regulations pursuant to the Convention. The IPHC's regulations are subject to approval by the Secretary of State with concurrence from the Secretary of Commerce (Secretary).

Background

Regulations implemented by the IPHC allow Pacific halibut to be commercially harvested by the directed North Pacific longline fishery. Halibut is a prohibited species in the groundfish fishery, requiring immediate return to the sea with a minimum of injury. Halibut caught incidentally by catcher/processors in the nonpelagic trawl groundfish fisheries must be weighed on a NMFS-approved scale, sampled by observers, and returned to the ocean as soon as possible. The Council establishes annual maximum halibut bycatch allowances and seasonal apportionments adjusted by an estimated halibut discard mortality rate (DMR) for groundfish fisheries. The DMRs are based on the best information available, including information contained in the annual Stock Assessment and Fishery Evaluation report, available at <http://www.alaskafisheries.noaa.gov/>. NMFS approves the halibut DMRs developed and recommended by the IPHC and the Council for the BSAI groundfish fisheries for use in monitoring the halibut bycatch allowances and seasonal apportionments.

Directed fishing in a groundfish fishery closes when the halibut mortality apportionment for the fishery is reached, even if the target species catch is less than the seasonal or annual quota for the directed fishery. In the case of the Bering Sea flatfish fishery, seasons have been closed before fishery quotas have been reached to prevent the fishery from exceeding the halibut mortality apportionment.

With the implementation of Amendment 80 to the FMP on September 14, 2007 (72 FR 52668), halibut mortality apportionments were established for the Amendment 80

sector and for Amendment 80 cooperatives. Amendment 80 is a catch share program that allocates several BSAI non-pollock trawl groundfish fisheries (including the flatfish fishery) among fishing sectors, and facilitates the formation of harvesting cooperatives in the non-American Fisheries Act trawl catcher/processor sector. Though halibut mortality apportionments provide Amendment 80 cooperatives more flexibility to use available mortality, halibut mortality continues to constrain fishing in some Amendment 80 fisheries. Therefore, this sector is actively exploring ways to continue to reduce halibut mortality.

Before incidentally caught halibut are returned to the sea, at-sea observers must estimate halibut and groundfish catch amounts. Regulations in 50 CFR part 679 assure that observer estimates of halibut and groundfish catch are credible and accurate, and that potential bias is minimized. For example, NMFS requires that all catch be made available for sampling by an observer; prohibits tampering with observer samples; prohibits removal of halibut from a codend, bin, or conveyance system prior to being observed and counted by an at-sea observer; and prohibits fish (including halibut) from remaining on deck unless an observer is present.

In 2009 and 2012, halibut mortality experiments were conducted by members of the Amendment 80 sector under EFP 09–02 (74 FR 12113, March 23, 2009) and EFP 12–01 (76 FR 70972, November 16, 2011). By regulation, all catch including halibut is moved across a flow scale below deck before the halibut is returned to the sea. Halibut mortality increases with increased handling and time out of water. Under the 2009 and 2012 EFPs, experimental methods for sorting catch on a vessel's deck allowed halibut to be returned to the sea in less time, with less handling relative to halibut routed below deck and over the flow scale. The halibut mortality during flatfish fishing under the 2009 and 2012 EFPs was estimated to be approximately 17 metric tons (mt) and 10.8 mt, respectively, less than the amounts estimated from the DMR for this fishery. The reduced halibut mortality under the 2009 and 2012 EFPs is attributed to the improved condition of halibut through reduced handling and time out of water.

In 2015, test fishing under EFP 2015–02 (80 FR 3222, January 22, 2015) expanded on results of the 2009 and 2012 EFPs to explore the feasibility of deck sorting halibut in additional fisheries, on more vessels, and during a longer interval of time during the fishing season. The primary objective

was to reduce halibut mortality in the Amendment 80 groundfish fisheries in 2015. Fishing under the EFP began in May and continued through November. The most prominent result from the 2015 EFP was that substantial halibut mortality savings were achieved from deck sorting on catcher/processors operating in Bering Sea non-pelagic trawl fisheries. The 2015 EFP is estimated to have saved 175 mt of halibut. For the nine vessels that participated in the 2015 EFP, all but one achieved mortality rates in the range of 41 percent to 53 percent, compared to the standard mortality rate of 80 percent in the Bering Sea flatfish fisheries without deck sorting (average across target fisheries of interest for the 2015 EFP).

Test fishing under EFP 2016–01 from May through November 2016 resulted in more participating vessels over more fisheries and yielded greater halibut savings relative to prior years. Twelve boats participated in test fishing under EFP 2016–01. In prior deck sorting EFPs, test fishing primarily occurred in the flathead sole and arrowtooth flounder fisheries. In 2016, test fishing expanded to fisheries for yellowfin sole, Pacific cod, Pacific ocean perch, and Atka mackerel to a much larger extent than in prior years. Based on preliminary results, EFP 2016–01 is estimated to have saved 288 mt of halibut in 2016. Though modified EFP 2016–01 is valid through April 30, 2017, no halibut savings data from 2017 are available to report at this time.

Through the course of EFP fishing in 2016, NMFS and the EFP participants identified modifications to EFP 2016–01 that would improve the effectiveness of the EFP and reduce the burden on industry to participate in the EFP. For example, EFP 2016–01 required participating vessels to carry three observers to collect data during EFP fishing. Through the course of the year, it became apparent that two observers could sufficiently collect the requisite data for EFP hauls. As a result, NMFS subsequently modified EFP 2016–01 to make it optional for participating vessels to carry more than two observers on EFP trips. Under modified EFP 2016–01 (see **ADDRESSES**) vessel operators may opt to carry more than two observers to maintain the pace at which fish are run through the factory while halibut are being sorted and sampled by an observer on deck or they may carry two observers with the condition that fish may not be run into the factory while the observer is on deck sampling the sorted halibut. Additional modifications to EFP 2016–01 included (a) changes in observer sampling

methods designed to increase consistency of observer sampling for the EFP with other, routine observer sampling in the fisheries; (b) changes to the persons named on the EFP as designated representatives; and (c) the addition of new vessels to the EFP.

Proposed Action

On January 10, 2017, the Alaska Seafood Cooperative (AKSC), an Amendment 80 cooperative, submitted an application to renew modified EFP 2016–01 through the end of 2017 to continue to build on the information collected in prior deck sorting EFPs and further reduce halibut mortality in the Amendment 80, community development quota (CDQ), and trawl limited access sectors. The proposed action would extend the effective date of modified EFP 2016–01 (see **ADDRESSES**) from April 30, 2017 to December 31, 2017. No other changes to modified EFP 2016–01 are proposed.

The renewed EFP would allow halibut to continue to be sorted, sampled, and released prior to being weighed on a flow scale, to achieve the experimental objectives of modified EFP 2016–01 and reduce halibut mortality. Halibut prohibited species catch (PSC) mortality for vessels engaged in experimental fishing would not exceed the 2017 halibut PSC mortality apportionments set out in Table 14 of the Final 2016 and 2017 Harvest Specifications (available at https://alaskafisheries.noaa.gov/sites/default/files/16_17bsaitable14.pdf). Participants request no additional groundfish or halibut quota as part of this EFP renewal application, and all groundfish catch will accrue against the appropriate Amendment 80, CDQ, or trawl limited access sector catch and PSC allowances.

Under the EFP, participants would be limited to their groundfish allocations under the 2017 harvest specifications (81 FR 14773, March 18, 2016). The amount of halibut mortality applied to the EFP activities would be subject to review and approval by NMFS.

In 2018, the AKSC would be required to submit to NMFS a report of the EFP results after EFP experimental fishing has ended in 2017. The report would include a comparison of halibut mortality from halibut sampled during the EFP and an estimate of halibut mortality under standard IPHC halibut mortality rates for those target fisheries. Additionally, the report should compare the estimated amount of halibut sampled by observers in the factory with the census of halibut collected in the factory by vessel crew to evaluate the precision and associated variance of sampled-based extrapolations and to

inform a decision of the best way to account for factory halibut in a regulated program.

This EFP would be valid upon renewal until either the end of 2017 or when the annual halibut mortality apportionment is reached in areas of the BSAI open to directed fishing by the various sectors, whichever occurs first. EFP-authorized fishing activities would not be expected to change the nature or duration of the groundfish fishery, gear used, or the amount or species of fish caught by the participants.

The fieldwork that would be conducted under this EFP is not expected to have a significant impact on the human environment as detailed in the categorical exclusion prepared for this action (see **ADDRESSES**).

In accordance with § 679.6, NMFS has determined that the renewal application warrants further consideration and has forwarded the application to the Council to initiate consultation. The Council is scheduled to consider the EFP renewal application during its February 2017 meeting, which will be held at the Renaissance Seattle Hotel, Seattle WA. The applicant has been invited to appear in support of the renewal application.

Public Comments

Interested persons may comment on the application at the February 2017 Council meeting during public testimony or until February 7, 2017. Information regarding the meeting is available at the Council's Web site at <http://www.npfmc.org>. Copies of the renewal application and categorical exclusion are available for review from NMFS (see **ADDRESSES**). Comments also may be submitted directly to NMFS (see **ADDRESSES**) by the end of the comment period (see **DATES**).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 12, 2017.

Samuel D. Rauch III,

*Deputy Assistant Administrator for
Regulatory Programs, National Marine
Fisheries Service.*

BILLING CODE 3510-22-P

BUREAU OF CONSUMER FINANCIAL PROTECTION

Compliance Bulletin 2016-03: Detecting and Preventing Consumer Harm From Production Incentives

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Compliance Bulletin.

SUMMARY: The Bureau recognizes that many supervised entities may choose to implement incentive programs to achieve business objectives. When properly implemented and monitored, reasonable incentives can benefit consumers and the financial marketplace as a whole.

This bulletin compiles guidance that has previously been given by the CFPB in other contexts and highlights examples from the CFPB's supervisory and enforcement experience in which incentives contributed to substantial consumer harm. It also describes compliance management steps supervised entities should take to mitigate risks posed by incentives.

DATES: The Bureau released this Compliance Bulletin on its Web site on November 28, 2016

FOR FURTHER INFORMATION CONTACT: Vanessa Careiro, Attorney-Advisor, Office of Supervision Policy, 1700 G Street NW., 20552, (202) 435-9394.

SUPPLEMENTARY INFORMATION:

1. Compliance Bulletin

Financial services companies, including entities supervised by the Consumer Financial Protection Bureau (CFPB or Bureau), may accomplish business objectives through programs that tie outcomes to certain benchmarks, both required and optional. Companies may apply these production incentives, including sales and other incentives, ("incentives") to employees or service providers or both. The risks these incentives may pose to consumers are significant and both the intended and unintended effects of incentives can be complex, which makes this subject worthy of more careful attention by institutional leadership, compliance officers, and regulators alike. We thus will continue to invite further dialogue and discussion around the issues addressed in this Bulletin.

The Bureau acknowledges that incentives have been common across many economic sectors, including the market for consumer financial products and services. When properly implemented and monitored, reasonable incentives can benefit all stakeholders and the financial marketplace as a whole. For instance, companies may be able to attract and retain high-performing employees to enhance their overall competitive performance. Consumers may also benefit if these programs lead to improved customer service or introduce them to products or services that are beneficial to their financial interests.

Such incentives can affect a wide range of outcomes for employees or

service providers, from their compensation levels to whether they will continue to be employed or retained at all. Incentives are found in many markets for consumer financial products and services, and span the life cycle from marketing to sales, servicing, and collection. Common examples include sales or referrals of new products or services to existing consumers ("cross-selling"), sales of products or services to new customers, sales at higher prices where pricing discretion exists, quotas for customer calls completed, and collections benchmarks.

This Bulletin compiles guidance the CFPB has already given in other contexts and highlights examples from the CFPB's supervisory and enforcement experience in which incentives contributed to substantial consumer harm. It also describes compliance management steps that supervised entities should take to mitigate risks posed by incentives.

A. Risks to Consumers From Incentives

Despite their potential benefits, incentive programs can pose risks to consumers, especially when they create an unrealistic culture of high-pressure targets. When such programs are not carefully and properly implemented and monitored, they may create incentives for employees or service providers to pursue overly aggressive marketing, sales, servicing, or collections tactics. Through its supervisory and enforcement programs, the CFPB has taken action where employees have opened accounts or enrolled consumers in services without consent or where employees or service providers have misled consumers into purchasing products the consumers did not want, were unaware would harm them financially, or came with an unexpected ongoing periodic fee.

Depending on the facts and circumstances, such incentives may lead to outright violations of Federal consumer financial law¹ and other risks to the institution, such as public enforcement, supervisory actions, private litigation, reputational harm,

¹ Selected examples of these violations previously identified by the Bureau include the Dodd-Frank Act's prohibition of unfair, deceptive, and/or abusive acts or practices (UDAAPs) (Dodd-Frank Act, §§ 1031 & 1036(a), codified at 12 U.S.C. 5531 & 5536(a); the Electronic Fund Transfer Act (EFTA), as implemented by Regulation E (15 U.S.C. 1693 *et seq.*; 12 CFR part 1005); the Fair Credit Reporting Act, as implemented by Regulation V (15 U.S.C. 1681-1681x; 12 CFR part 1022); the Truth in Lending Act (TILA), as implemented by Regulation Z (15 U.S.C. 1601 *et seq.*; 12 CFR part 1026); and the Fair Debt Collection Practices Act (15 U.S.C. 1692-1692p).

and potential alienation of existing and future customers. Specific examples of problems include:

- Sales goals may encourage employees, either directly or indirectly, to open accounts or enroll consumers in services without their knowledge or consent. Depending on the type of account, this may further result in, for example:

- Improperly incurred fees;
- Improper collections activities;

and/or

- Negative effects on consumer credit scores.

- Sales benchmarks may encourage employees or service providers to market a product deceptively to consumers who may not benefit from or even qualify for it;

- Paying compensation based on the terms or conditions of transactions (such as interest rate) may encourage employees or service providers to overcharge consumers, to place them in less favorable products than they qualify for, or to sell them more credit or services than they had requested or needed;

- Paying more compensation for some types of transactions than for others that were or could have been offered to meet consumer needs, which could lead employees or service providers to steer consumers to transactions not in their interests; and

- Unrealistic quotas to sign consumers up for financial services may incentivize employees to achieve this result without actual consent or by means of deception.

Whether conduct like that described in this Bulletin violates Federal consumer financial law will depend on all relevant facts related to the practices encouraged by the incentives. Further detail on some of the Bureau's work and findings in these areas is recapped below:

Credit Card Add-On Matters

To date, the CFPB has resolved 12 different cases involving improper practices to market credit card add-on products or to retain consumers once enrolled in these products.² The Bureau notes that incentives frequently enhanced the risk that banks would engage in such improper practices. In some cases, employees or service providers received incentives, and a lack of proper controls allowed deceptive marketing practices to continue unchecked for many years.

Tapes of sales calls showed that employees and service providers deviated from the prepared call scripts in order to market the add-on products more aggressively, and often deceptively, to sign up more consumers. In all these matters, the companies' compliance monitoring, vendor management, and quality assurance programs failed to prevent, identify, or correct these practices in a timely manner.

Overdraft Opt-In Matters

Incentives played a role in at least one matter where consumers were deceived into opting in to overdraft services. The Bureau found that, as a result of incentives for hitting specific targets, a bank's telemarketing service provider had deceptively marketed overdraft services and enrolled certain bank consumers in those services without their consent.

Unfair and Abusive Sales Practices

In another public enforcement action, a Bureau investigation revealed that thousands of bank employees had opened unauthorized deposit and credit card accounts to satisfy sales goals and earn financial rewards under the bank's incentives. Specifically, the Bureau found that employees engaged in "simulated funding" by opening hundreds of thousands of deposit accounts without consumers' knowledge or consent, which caused consumers to incur improper fees. The Bureau also found that employees issued tens of thousands of unauthorized credit cards that incurred improper fees, opened debit cards and created PINs to activate them without consumers' knowledge or consent, and enrolled consumers in online banking services using false email addresses.

B. The CFPB's Expectations

The CFPB expects supervised entities that choose to utilize incentives to institute effective controls for the risks these programs may pose to consumers, including oversight of both employees and service providers involved in these programs. As the CFPB has emphasized repeatedly, a robust compliance management system (CMS) is necessary to detect and prevent violations of Federal consumer financial law.³ An entity's CMS should reflect the risk, nature, and significance of the incentive

programs to which they apply.

Accordingly, the strictest controls will be necessary where incentives concern products or services less likely to benefit consumers or that have a higher potential to lead to consumer harm, reward outcomes that do not necessarily align with consumer interests, or implicate a significant proportion of employee compensation. While the CFPB does not mandate any particular CMS structure and recognizes that CMS structures may appropriately vary based on the size and complexity of an organization, the Bureau's supervisory experience has found that an effective CMS commonly has the following components:

- Board of directors and management oversight;

- *Compliance program, which includes:*

- Policies and procedures;
- Training; and
- Monitoring and corrective action;
- Consumer complaint management program; and

- Independent compliance audit.

To limit incentives from leading to violations of law, supervised entities should take steps to ensure their CMS is effective. These steps may include, but are not limited to:

- *Board of directors and management oversight:* Fostering a culture of strong customer service related to incentives. In product sales, for example, ensuring that consumers are only offered products likely to benefit their interests;

- Board members and senior management should consider not only the outcomes these programs seek to achieve, but also how they may incidentally incentivize outcomes that harm consumers. They should authorize compliance personnel to design and implement CMS elements that address both intended and unintended outcomes, and provide adequate resources to do so.

- The "tone from the top" should empower all employees to report suspected incidents of improper behavior without fear of retaliation, providing easily accessible means to do so.

- *Policies and procedures:* Ensuring that the policies and procedures for incentives contain:

- Employee sales/collections quotas that, if a part of an entity's incentive program, are transparent to employees and reasonably attainable;

- Clear controls for managing the risk inherent in each stage of the product life cycle (as applicable): marketing, sales (including account opening), servicing, and collections;

² For more information on all of the matters noted in this Bulletin, please refer to the Bureau's Web site at <http://www.consumerfinance.gov/policy-compliance/enforcement/actions/>.

³ Supervision and Examination Manual: Compliance Management Review, available at <http://www.consumerfinance.gov/policy-compliance/guidance/supervision-examinations/>; Supervisory Highlights, multiple editions, available at <http://www.consumerfinance.gov/policy-compliance/guidance/supervisory-highlights/>.

- Mechanisms to identify potential conflicts of interest posed for supervisory personnel who are covered by incentives but also are responsible for monitoring the quality of customer treatment and customer satisfaction; and
- Fair and independent processes for investigating reported issues of suspected improper behavior.

- **Training:** Implementing comprehensive training that addresses:
 - Expectations for incentives, including standards of ethical behavior;
 - Common risky behaviors for employees and service providers to foster greater awareness of primary risk areas;

- Terms and conditions of the institution's products and services so that they can be effectively described to consumers; and

- Regulatory and business requirements for obtaining and maintaining evidence of consumer consent.

- **Monitoring:** Designing overall compliance monitoring programs that track key metrics—and outliers—that may indicate incentives are leading to improper behavior by employees or service providers. Examples of possible monitoring metrics include, but are not limited to:

- Overall product penetration rates by consumer and household;
- Specific penetration rates for products and services (such as overdraft, add-on products, and online banking), as well as penetration rates by consumer segment;

- Employee turnover and employee satisfaction or complaint rates;

- Spikes and trends in sales (both completed and failed sales) by specific individuals and by units;

- Financial incentive payouts; and

- Account opening/product enrollment and account closure/product cancellation statistics, including by specific individuals and by units, taking into account the terms of the incentive programs (*i.e.*, requirements that accounts be open for a period of time or funded in order for employees to obtain credit under the program).

- **Corrective Action:** Promptly implementing corrective actions to address any incentive issues identified by monitoring reviews as areas of weakness:

- Corrective actions should include the termination of employees, service providers, and managers, as necessary, and these termination statistics should be analyzed for trends and root cause(s);

- Corrective actions should include changes to the structure of incentives, training on these programs, and return of funds to all affected consumers as

appropriate in light of failed sales or heightened levels of customer dissatisfaction;

- All corrective actions should ensure that the root causes of deficiencies are identified and resolved; and

- Findings should be escalated to management and the board, particularly where they appear to pose significant risks to consumers.

- **Consumer complaint management program:** Collecting and analyzing consumer complaints for indications that incentives are leading to violations of law or harm to consumers in order to identify and resolve the root causes of any such issues; and

- **Independent compliance audit:** Scheduling audits to address incentives and consumer outcomes across all products or services to which they apply, ensuring audits are conducted independently of both the compliance program and the business functions, and ensuring that all necessary corrective actions are promptly implemented.

For more information pertaining to the oversight of incentive programs, please review the CFPB's Supervision and Examination Manual.⁴ Specific modules referencing these programs include: Compliance Management Review, Unfair, Deceptive, and Abusive Acts or Practices, Debt Collection, Credit Card Account Management, Consumer Reporting, Mortgage Origination, Short-Term Small Dollar Lending, and the Equal Credit Opportunity Act. Other relevant Bureau guidance includes: CFPB Bulletin 2012–06 (Marketing of Credit Card Add-on Products),⁵ and CFPB Bulletin 2016–02 (Service Providers, amending and reissuing CFPB Bulletin 2012–03).⁶

2. Regulatory Requirements

This Compliance Bulletin is a non-binding general statement of policy articulating considerations relevant to the Bureau's exercise of its supervisory and enforcement authority. It is therefore exempt from notice and comment rulemaking requirements under the Administrative Procedure Act pursuant to 5 U.S.C. 553(b). Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final

BILLING CODE 4810–AM–P

DEPARTMENT OF THE ARMY

Notice of Intent To Prepare an Environmental Impact Statement in Connection With Dakota Access, LLC's Request for an Easement To Cross Lake Oahe, North Dakota

AGENCY: Department of the Army, DoD.

ACTION: Notice.

SUMMARY: This notice advises the public that the Department of the Army (Army), as lead agency, is gathering information necessary to prepare an environmental impact statement (EIS) in connection with Dakota Access, LLC's request to grant an easement to cross Lake Oahe, which is on the Missouri River and owned by the US Army Corps of Engineers (Corps). This notice opens the public scoping phase and invites interested parties to identify potential issues, concerns, and reasonable alternatives that should be considered in an EIS.

DATES: To ensure consideration during the development of an EIS, written comments on the scope of an EIS should be sent no later than February 20, 2017. The date of all public scoping meetings will be announced at least 15 days in advance through a notice to be published in the local North Dakota newspaper (The Bismarck Tribune) and online at <https://www.army.mil/asacw>.

ADDRESSES: You may mail or hand deliver written comments to Mr. Gib Owen, Office of the Assistant Secretary of the Army for Civil Works, 108 Army Pentagon, Washington, DC 20310–0108. Advance arrangements will need to be made to hand deliver comments. Please include your name, return address, and “NOI Comments, Dakota Access Pipeline Crossing” on the first page of your written comments. Comments may also be submitted via email to Mr. Gib Owen, at gib.a.owen.civ@mail.mil. If

emailing comments, please use “NOI Comments, Dakota Access Pipeline Crossing” as the subject of your email.

The location of all public scoping meetings will be announced at least 15 days in advance through a notice to be published in the local North Dakota newspaper (The Bismarck Tribune) and online at <https://www.army.mil/asacw>.

FOR FURTHER INFORMATION CONTACT: Mr. Gib Owen, Water Resources Policy and Legislation, Office of the Assistant Secretary of the Army for Civil Works, Washington, DC 20310-0108; telephone: (703) 695-6791; email: gib.a.owen.civ@mail.mil.

SUPPLEMENTARY INFORMATION: The proposed crossing of Lake Oahe by Dakota Access, LLC is approximately 0.5 miles upstream of the northern boundary of the Standing Rock Sioux Tribe’s reservation. The Tribe protests the crossing primarily because it relies on Lake Oahe for water for a variety of purposes, the Tribe’s reservation boundaries encompass portions of Lake Oahe downstream from the proposed crossing, and the Tribe retains water, treaty fishing, and hunting rights in the Lake.

The proposed crossing of Corps property requires the granting of a right-of-way (easement) under the Mineral Leasing Act (MLA), 30 U.S.C. 185. To date, the Army has not made a final decision on whether to grant the easement pursuant to the MLA. The Army intends to prepare an EIS to consider any potential impacts to the human environment that the grant of an easement may cause.

Specifically, input is desired on the following three scoping concerns:

- (1) Alternative locations for the pipeline crossing the Missouri River;
- (2) Potential risks and impacts of an oil spill, and potential impacts to Lake Oahe, the Standing Rock Sioux Tribe’s water intakes, and the Tribe’s water, treaty fishing, and hunting rights; and
- (3) Information on the extent and location of the Tribe’s treaty rights in Lake Oahe.

On July 25, 2016, the Corps granted permission to applicant Dakota Access, LLC, under Section 14 of the Rivers and Harbors Act of 1899, 33 U.S.C. 408 (408 permission), for a proposed pipeline crossing of Lake Oahe. Lake Oahe is on the Missouri River and owned by the Corps. The approximate 1,172-mile pipeline connects the Bakken and Three Forks oil production areas in North Dakota to an existing crude oil market near Patoka, Illinois. The pipeline is 30 inches in diameter and is projected to transport approximately 570,000 barrels per day.

The 408 permission was accompanied by a Finding of No Significant Impact based on an Environmental Assessment (EA), as contemplated under the National Environmental Policy Act (NEPA). The EA included a brief description and characterization of factors used in evaluating a potential alternative crossing location that was considered and eliminated during the analysis phase. The alternative route, which was eliminated, would cross the Missouri River approximately 10 miles north of Bismarck, ND.

On December 4, 2016, the Army determined that a decision on whether to authorize the pipeline to cross Lake Oahe at the proposed location merits additional analysis, more rigorous exploration and evaluation of reasonable siting alternatives, and greater public and tribal participation and comments as contemplated in the Council on Environmental Quality’s (CEQ’s) NEPA implementing regulations, 40 CFR 1502.14 and 1503.1. Currently, the Corps is developing a plan to implement the Army’s December 4, 2016 direction. This notice of public scoping should be integrated into the Corps’ plan of action.

Consistent with CEQ’s NEPA implementing regulations, an EIS will analyze, at a minimum:

- (1) Alternative locations for the pipeline crossing the Missouri River;
- (2) Potential risks and impacts of an oil spill, and potential impacts to Lake Oahe, the Standing Rock Sioux Tribe’s water intakes, and the Tribe’s water, treaty fishing, and hunting rights; and
- (3) Information on the extent and location of the Tribe’s treaty rights in Lake Oahe.

The range of issues, alternatives, and potential impacts may be expanded based on comments received in response to this notice and at public scoping meetings.

Public Comment Availability: Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask in your comment that your personal identifying information be withheld from public review, the Army cannot guarantee that this will occur.

Authority: This notice is published in accordance with sections 1503.1 and 1506.6 of the CEQ’s Regulations (40 CFR parts 1500–1508) implementing the procedural requirements of NEPA, as amended (42 U.S.C. 4321 *et seq.*), and the Army and Corps’ NEPA

implementation policies (32 CFR part 651 and 33 CFR part 230), and exercises the authority delegated to the Assistant Secretary of the Army (Civil Works) by General Orders No. 2017–1, January 5, 2017.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 5001–03–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board; Notice of Federal Advisory Committee Meetings

AGENCY: Department of Defense.

ACTION: Notice of Federal Advisory Committee Meetings.

SUMMARY: The 2017 Defense Science Board (DSB) Summer Study Task Force on Nuclear Deterrence in the 21st Century’s Multi-Polar, Multi-Threat Strategic Environment (“the Nuclear Deterrence Summer Study Task Force”) will meet in closed session on Tuesday, January 24, 2017, from 8:15 a.m. to 12:00 p.m. and 12:30 p.m. to 6:00 p.m. at the Virginia Tech Advanced Research Center, 900 Glebe Road, 7th Floor, Arlington, VA and Wednesday, January 25, 2017, from 8:00 a.m. to 3:00 p.m. at the Executive Conference Center, 4075 Wilson Blvd., Suite 350, Arlington, VA. **DATES:** Tuesday, January 24, 2017, from 8:15 a.m. to 6:00 p.m.; and Wednesday, January 25, 2017, from 8:00 a.m. to 3:00 p.m.

ADDRESSES: Virginia Tech Advanced Research Center, 900 Glebe Road, 7th Floor, Arlington, VA (January 24, 2017); and Executive Conference Center, 4075 Wilson Blvd., Suite 350, Arlington, VA (January 25, 2017).

FOR FURTHER INFORMATION CONTACT: Ms. Debra Rose, Executive Officer, Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301–3140, via email at debra.a.rose20.civ@mail.mil, or via phone at (703) 571–0084 or the Defense Science Board Designated Federal Officer (DFO) Ms. Karen D.H. Saunders, Executive Director, Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301, via email at karen.d.saunders.civ@mail.mil or via phone at (703) 571–0079.

SUPPLEMENTARY INFORMATION: Due to circumstances beyond the control of the Designated Federal Officer and the Department of Defense, the 2017 Defense Science Board Summer Study Task Force on Nuclear Deterrence in the

21st Century's Multi-Polar, Multi-Threat Strategic Environment was unable to provide public notification of its meetings on January 24–25, 2017, as required by 41 CFR 102–3.150(a). Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

These meetings are being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C. Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

The mission of the Defense Science Board is to provide independent advice and recommendations on matters relating to the Department of Defense's (DoD) scientific and technical enterprise. The objective of the Nuclear Deterrence Summer Study Task Force is to address the topic of nuclear force modernization and recapitalization, focusing on ways to reduce the affordability problem and on ways to respond to the changing strategic environment through technical, programmatic, and operational innovation. The Nuclear Deterrence Summer Study Task Force will consider the critical issues associated with the status and trends in major power threats and proliferators that could threaten the United States or its allies, to include their nuclear, advanced conventional, and cyber capabilities that might threaten the operational viability of our nuclear deterrent; make our ability to control escalation through non-nuclear means problematic; or impact the assurance of U.S. extended deterrence globally. This two-day session will focus on providing general and nuclear threat briefings, to include briefings on China, Russia, and the Democratic Republic of Korea, from the National Intelligence Council and Defense Intelligence Agency, and the International Nuclear Deterrence Efforts and Perspective from the Executive Secretary of Nuclear Weapons Council on the Future of Nuclear Deterrence; a briefing on the 'Perspective of the Office of Net Assessment on the Future of Nuclear Deterrence' by the Office of Net Assessment; a DoD Policy Brief on the Nuclear Posture Review by Assistant Secretary of Defense for Nuclear and Missile Defense Policy; and a U.S. Nuclear Weapons Policy brief from Mr. Frank Miller.

In accordance with section 10(d) of the FACA and 41 CFR 102–2.155, the DoD has determined that the Nuclear Deterrence Summer Study Task Force meeting will be closed to the public.

Specifically, the Under Secretary of Defense (Acquisition, Technology, and Logistics), in consultation with the DoD Office of General Counsel, has determined in writing that all sessions will be closed to the public because matters covered by 5 U.S.C. 552b(c)(1) will be considered. The determination is based on the consideration that it is expected that discussions throughout will involve classified matters of national security concern. Such classified material is so intertwined with the unclassified material and non-proprietary information that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meetings. To permit the meetings to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DSB's findings or recommendations to the Secretary of Defense and to the Under Secretary of Defense for Acquisition, Technology and Logistics.

In accordance with section 10(a)(3) of the FACA and 41 CFR 102–3.105(j) and 102–3.140, interested persons may submit a written statement for consideration by the Nuclear Deterrence Summer Study Task Force at any time regarding its mission or in response to the stated agenda of a planned meeting. Individuals submitting a written statement must submit their statement to the DSB's DFO—Ms. Karen D.H. Saunders, Executive Director, Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301, via email at Karen.d.saunders.civ@mail.mil or via phone at (703) 571–0079 at any point; however, if a written statement is not received at least 3 calendar days prior to the meeting, which is the subject of this notice, then it may not be provided to or considered by the Nuclear Deterrence Summer Study Task Force. The DFO will review all submissions with the Nuclear Deterrence Summer Study Task Force co-Chairs and ensure they are provided to Nuclear Deterrence Summer Study Task Force members prior to the end of the two-day meeting on January 25, 2017.

Dated: January 12, 2017.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0126]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Principal Follow-Up Survey (PFS 2016–17) to the National Teacher and Principal Survey (NTPS 2015–16)

AGENCY: National Center for Education Statistics (NCES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a new information collection. **DATES:** Interested persons are invited to submit comments on or before February 17, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2016–ICCD–0126. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 224–84, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact NCES Information Collections at NCES.Information.Collections@ed.gov.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that

is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Principal Follow-Up Survey (PFS 2016–17) to the National Teacher and Principal Survey (NTPS 2015–16).

OMB Control Number: 1850–NEW.

Type of Review: A new information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 7,240.

Total Estimated Number of Annual Burden Hours: 603.

Abstract: This request is to conduct data collection for the 2016–17 Principal Follow-up Survey (PFS), a one-year follow up of principals who responded to the 2015–16 National Teacher and Principal Survey (NTPS). PFS is conducted by the National Center for Education Statistics (NCES), of the Institute of Education Sciences (IES), within the U.S. Department of Education (ED). The PFS has been conducted two times previously: Beginning in 2008–09 as a follow up to the Schools and Staffing Survey (SASS) in 2007–08 (OMB# 1850–0598 v.5) and, subsequently, as a follow-up to SASS in 2012–2013 (OMB# 1850–0598 v.9). During the 2015–16 school year, NCES conducted the first NTPS (OMB #1850–0598 v.11), a redesign of SASS to improve the flexibility, efficiency, and timeliness of NCES data on the nation's K–12 schools, principals, and teachers. The 2016–17 PFS will be the first to launch from the redesigned NTPS. The PFS survey design and content remain highly consistent with earlier administrations. The 2016–17 PFS, like earlier PFS collections, will measure the one-year attrition rates of principals who leave the profession and will permit comparisons of stayers, movers, and leavers. “Stayers” are principals who remain in the same school between the NTPS year of data collection and the follow-up year; “movers” are principals who stay in the profession but change schools between the NTPS year and the

follow-up year; and “leavers” are NTPS respondents who leave the principal profession between the NTPS year and the follow-up year. The data collected in the 2016–17 PFS will be combined with data collected in the 2015–16 NTPS on principal characteristics, qualifications, and perceptions of the school environment. Together, NTPS and PFS provide national data on turnover in the principal workforce, including rates of entry and attrition from principalship, sources and characteristics of newly hired principals, and characteristics and destinations of leavers. The cross-sectional repeated design of PFS allows for analyses of trends related to these topics.

Dated: January 11, 2017

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2016–ICCD–0118]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; GEPA Section 427 Guidance for All Grant Applications

AGENCY: Office of the Secretary (OS), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension of an existing information collection.

DATES: Interested persons are invited to submit comments on or before February 17, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2016–ICCD–0118. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance

Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 224–82, Washington, DC 20202–4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Alfreida Pettiford, 202–245–6110.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: GEPA Section 427 Guidance for All Grant Applications.

OMB Control Number: 1894–0005.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 12,396.

Total Estimated Number of Annual Burden Hours: 18,594.

Abstract: On October 20, 1994, the Improving America's Schools Act, Public Law 103–382(The Act), became law. The Act added a provision to the General Education Provisions Act (GEPA). Section 427 of GEPA requires an applicant for assistance under Department programs to develop and describe in the grant application the steps it proposes to take to ensure equitable access to, and equitable participation in, its proposed project for students, teachers, and other program beneficiaries with special needs. The

current GEPA Section 427 guidance for discretionary grant applications and formula grant applications has approval through March 31, 2014 the Department is requesting an extension of this approval.

Dated: January 12, 2017.

BILLING CODE 4000-01-P

DEPARTMENT OF EDUCATION

[Docket No.: ED-2016-ICCD-0119]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Evaluation of the Comprehensive Technical Assistance Centers

AGENCY: Institute of Education Sciences (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a new information collection.

DATES: Interested persons are invited to submit comments on or before February 17, 2017.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED-2016-ICCD-0119. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 224-84, Washington, DC 20202-4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Amy Johnson, 202-208-7849.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an

opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Evaluation of the Comprehensive Technical Assistance Centers.

OMB Control Number: 1850-NEW (previously 1850-0914).

Type of Review: A new information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 649.

Total Estimated Number of Annual Burden Hours: 236.

Abstract: The National Evaluation of the Comprehensive Technical Assistance Centers will examine and document how the Comprehensive Center program and its individual centers intend to build SEA capacity and what types of activities they actually conduct to build capacity. The study will use surveys and interviews of center staff and technical assistance recipients, as well as technical assistance event observations, to collect information about how the Comprehensive Centers design their work, how they operate, and the results of their work.

The 60 day **Federal Register** notice for this collection (Vol. 81 FR 75388 on 10/31/2016) was issued under OMB #1850-0914. The Department of Education is requesting a new OMB number for this collection since the current collection was incorrectly issued as a common form. Once a new OMB number is issued for this collection, the current

OMB number #1850-0914 will be discontinued.

Dated: January 12, 2017.

This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Integrated Postsecondary Education Data System (IPEDS) 2017–18 through 2019–20.

OMB Control Number: 1850–0582.

Type of Review: A revision of an existing information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 77,600.

Total Estimated Number of Annual Burden Hours: 1,030,893.

Abstract: The National Center for Education Statistics (NCES) seeks authorization from OMB to make a change to the Integrated Postsecondary Education Data System (IPEDS) data collection. Current authorization expires 08/31/2019 (OMB# 1850–0582). NCES is requesting a new clearance for the 2017–18, 2018–19, and 2019–20 data collections to enable us to make a change to two of the IPEDS data collection components and to continue the IPEDS collection of postsecondary data over the next 3 years. IPEDS is a web-based data collection system designed to collect basic data from all postsecondary institutions in the United States and the other jurisdictions. IPEDS enables NCES to report on key dimensions of postsecondary education such as enrollments, degrees and other awards earned, tuition and fees, average net price, student financial aid, graduation rates, student outcomes, revenues and expenditures, faculty salaries, and staff employed. The IPEDS web-based data collection system was

implemented in 2000–01, and it collects basic data from approximately 7,500 postsecondary institutions in the United States and the other jurisdictions that are eligible to participate in Title IV Federal financial aid programs. All Title IV institutions are required to respond to IPEDS (Section 490 of the Higher Education Amendments of 1992 [Pub. L. 102–325]). IPEDS allows other (non-title IV) institutions to participate on a voluntary basis. About 200 elect to respond. IPEDS data are available to the public through the College Navigator and IPEDS Data Center Web sites. This clearance package includes a number of proposed changes to the data collection.

Dated: January 11, 2017.

Kate Mullan,

Acting Director, Information Collection Clearance Division, Office of the Chief Privacy Officer, Office of Management.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[OE Docket No. EA–315–B]

Application To Export Electric Energy; BP Energy Company

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of application.

SUMMARY: BP Energy Company (BP Energy or Applicant) has applied to renew its authority to transmit electric energy from the United States to Canada pursuant to section 202(e) of the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before February 17, 2017.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity Delivery and Energy Reliability, Mail Code: OE–20, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585–0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to Electricity.Exports@hq.doe.gov, or by facsimile to 202–586–8008.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of

the Federal Power Act (16 U.S.C. 824a(e)).

On January 17, 2012, DOE issued Order No. EA–315–A to BP Energy, which authorized the Applicant to transmit electric energy from the United States to Canada as a power marketer for a five-year term using existing international transmission facilities. That authority expires on January 17, 2017. On December 29, 2016, BP Energy filed an application with DOE for renewal of the export authority contained in Order No. EA–315 for an additional five-year term.

In its application, BP Energy states that it does not own or operate any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that BP Energy proposes to export to Canada would be purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by BP Energy have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning BP Energy's application to export electric energy to Canada should be clearly marked with OE Docket No. EA–315–B. An additional copy is to be provided directly to both Betsy Carr, BP America Inc., 201 Helios Way, Houston, TX 77079, and Eric Schubert, BP Energy Company, 201 Helios Way, Houston, TX 77079.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the

sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Issued in Washington, DC, on January 11, 2017.

Christopher Lawrence,

Electricity Policy Analyst, Office of Electricity Delivery and Energy Reliability.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

[OE Docket No. EA-314-B]

Application To Export Electric Energy; BP Energy Company

AGENCY: Office of Electricity Delivery and Energy Reliability, DOE.

ACTION: Notice of application.

SUMMARY: BP Energy Company (BP Energy or Applicant) has applied to renew its authority to transmit electric energy from the United States to Mexico pursuant to section 202(e) of the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before February 17, 2017.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity Delivery and Energy Reliability, Mail Code: OE-20, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585-0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to Electricity.Exports@hq.doe.gov, or by facsimile to 202-586-8008.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On May 3, 2012, DOE issued Order No. EA-314-A to BP Energy, which authorized the Applicant to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. That authority

expires on February 21, 2017. On December 29, 2016, BP Energy filed an application with DOE for renewal of the export authority contained in Order No. EA-314 for an additional five-year term.

In its application, BP Energy states that it does not own or operate any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that BP Energy proposes to export to Mexico would be purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by BP Energy have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning BP Energy's application to export electric energy to Mexico should be clearly marked with OE Docket No. EA-314-B. An additional copy is to be provided directly to both Betsy Carr, BP America Inc., 201 Helios Way, Houston, TX 77079, and Eric Schubert, BP Energy Company, 201 Helios Way, Houston, TX 77079.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program Web site at <http://energy.gov/node/11845>, or by emailing Angela Troy at Angela.Troy@hq.doe.gov.

Issued in Washington, DC, on January 11, 2017.

Christopher Lawrence,

Electricity Policy Analyst, Office of Electricity Delivery and Energy Reliability.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

Request for Information—Challenges and Opportunities for Sustainable Development of Hydropower in Undeveloped Stream Reaches of the United States; Notice of Reopening of Comment Period

AGENCY: Water Power Technologies Office, Office of Energy Efficiency and Renewable Energy, Department of Energy (DOE).

ACTION: Notice of reopening of comment period.

SUMMARY: On November 9, 2016, the Water Power Technologies Office (WPTO) within the Department of Energy (DOE) issued a request for information (RFI) in the **Federal Register** to invite input from the public regarding challenges and opportunities associated with hydropower development in undeveloped stream-reaches. The WPTO is reopening the comment period until February 10, 2017, to provide interested parties with additional time to submit comments.

DATES: Responses must be received no later than 5:00 p.m. (ET) on Friday, February 10, 2017.

ADDRESSES: Responses to this RFI must be submitted electronically to HydroNextFOA@ee.doe.gov as Microsoft Word (.docx) attachments to an email, and be no more than 6 pages in length, 12 point font, 1 inch margins. It is recommended that attachments with file sizes exceeding 25 MB be compressed (i.e., zipped) to ensure message delivery. Please include in the subject line "Comments for RFI". Only electronic responses will be accepted.

FOR FURTHER INFORMATION CONTACT:

Questions may be directed to: Rajesh Dham, Water Power Technologies Office, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, Phone: (202) 287-6675, Email: Rajesh.Dham@ee.doe.gov.

SUPPLEMENTARY INFORMATION: On November 9, 2016, the Water Power Technologies Office (WPTO) within the Department of Energy (DOE) issued a request for information (RFI) in the

Federal Register (81 FR 78795) inviting input from the public regarding challenges and opportunities associated with hydropower development in undeveloped stream-reaches. Through the RFI, the WPTO also sought input on the focus and structure of a potential funding opportunity to support research and development of advanced and/or non-traditional transformative hydropower technologies and project designs capable of avoiding or minimizing environmental and social effects of new cost-competitive hydropower development in undeveloped stream-reaches of the United States. The comment period ended December 16, 2016. After receiving several requests for additional time to prepare and submit comments, the WPTO has decided to reopen the period for submitting comments.

The WPTO will accept responses to the RFI received no later than February 10, 2017, and deems any comments received by that time to be timely submitted.

Guidance for Submitting Documents: DOE invites all interested parties to submit responses by no later than 5:00 p.m. (ET) on February 10, 2017. Responses to this RFI must be submitted electronically to HydroNextFOA@ee.doe.gov as Microsoft Word (.docx) attachments to an email, and be no more than 6 pages in length, 12 point font, 1 inch margins. Only electronic responses will be accepted.

Respondents are requested to provide the following information at the start of their response to this RFI:

- Company/institution name;
- Company/institution contact;
- Contact's address, phone number, and email address.

Pursuant to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery/courier two well marked copies: One copy of the document marked "confidential" including all the information believed to be confidential, and one copy of the document marked "non confidential" with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is

generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person that would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

Issued in Washington, DC on January 11, 2017.

Jim Ahlgrimm,

Acting Director, Water Power Technologies Office.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17-766-000]

Stream Energy Indiana LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Stream Energy Indiana LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure

(18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is January 31, 2017.

The Commission encourages electronic submission of protests and

interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street N.E., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: January 11, 2017.

Sunshine Act Meeting Notice

The following notice of meeting is published pursuant to section 3(a) of the government in the Sunshine Act (Pub. L. 94–409), 5 U.S.C. 552b:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: January 19, 2017 10:00 a.m.

PLACE: Room 2C, 888 First Street NE., Washington, DC 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Agenda

* *Note*—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kimberly D. Bose, Secretary, Telephone (202) 502–8400.

For a recorded message listing items struck from or added to the meeting, call (202) 502–8627.

This is a list of matters to be considered by the Commission. It does not include a listing of all documents relevant to the items on the agenda. All public documents, however, may be viewed on line at the Commission's Web site at <http://ferc.capitolconnection.org/> sing the eLibrary link, or may be examined in the Commission's Public Reference Room.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2305-058]

Sabine River Authority of Texas, Sabine River Authority, State of Louisiana; Notice of Application Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Request for approval of Final Drought Contingency Plan.

b. *Project No.:* 2305-058.

c. *Date Filed:* December 15, 2016.

d. *Applicant:* Sabine River Authority of Texas, Sabine River Authority, State of Louisiana.

e. *Name of Project:* Toledo Bend Hydroelectric Project.

f. *Location:* Sabine River on the Texas-Louisiana border in Panola, Shelby, Sabine, and Newton Counties in Texas and DeSoto, Sabine, and Vernon Parishes in Louisiana.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Jim Brown, Compliance Officer, Toledo Bend Project Joint Operation, Sabine River Authority, Texas, P.O. Box 579, Orange, TX 77631-0579, (409) 746-2192, jbrown@sratx.org.

i. *FERC Contact:* Mr. John Aedo, (415) 369-3335, or john.aedo@ferc.gov.

j. *Deadline for filing comments, motions to intervene, protests, and recommendations is February 9, 2017.* The Commission strongly encourages electronic filing. Please file motions to intervene, protests, comments, or recommendations using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Please include the project number (P-2305-058) on any comments, motions to intervene, protests, or recommendations filed. Comments emailed to Commission staff are not considered part of the Commission record.

k. *Description of Request:* The licensee requests Commission approval of its Drought Contingency Plan under License Article 416. The plan identifies the public access measures and reservoir public access measures that the licensees would implement during drought conditions. Specifically, the plan outlines actions that the licensee would implement when reservoir elevations drop to 168 feet-msl and lower, including changes to hydropower generation and water deliveries, implementation of conservation measures, public announcements, and agency notification.

1. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. This filing may also be viewed on the Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number excluding the last three digits in the docket number field to access the document (P-2305-058). You may also register online at <http://www.ferc.gov/>

[docs-filing/esubscription.asp](http://www.ferc.gov/docs-filing/esubscription.asp) to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email FERCOnlineSupport@ferc.gov, for TTY, call (202) 502-8659. A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to project works which are the subject of the license surrender. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the

Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: January 10, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17-764-000]

Stream Ohio Gas & Electric LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Stream Ohio Gas & Electric LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is January 31, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: January 11, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL17-37-000]

Notice of Complaint

American Municipal Power, Inc.
v.

PJM Interconnection, L.L.C.

Take notice that on January 9, 2017, pursuant to sections 206, 306, and 309 of the Federal Power Act, 16 U.S.C. 824e, 825e, and 825h, and Rules 206 and 212 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206 and 385.212, American Municipal Power, Inc. (AMP or Complainant) filed a formal complaint against PJM Interconnection, L.L.C. (PJM or Respondent) alleging that PJM violated its Open Access Transmission Tariff and its Operating Agreement by improperly charging AMP for certain congestion charges associated with the transmission of energy from its facility, all as more fully explained in the complaint.

AMP certifies that copies of the complaint were served on the contacts for PJM as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of

intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an "eSubscription" link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5:00 p.m. Eastern Time on February 8, 2017.

Dated: January 9, 2017.

Kimberly D. Bose,
Secretary.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16-493-000]

Columbia Gas Transmission L.L.C.; Notice of Schedule for Environmental Review of the Central Virginia Connector Project

On August 12, 2016, Columbia Gas Transmission L.L.C. (Columbia) filed an application in Docket No. CP16-493-000 requesting a Certificate of Public Convenience and Necessity pursuant to section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Central Virginia Connector Project (Project), and would provide an additional 45,000 dekatherms per day of natural gas capacity on Columbia's system and modernize compression at the Louisa Compressor Station.

On August 25, 2016 the Federal Energy Regulatory Commission

(Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA: February 28, 2017.
90-day Federal Authorization Decision
Deadline: May 29, 2017.

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

Columbia proposes to replace three Solar Saturn units with one Solar Centaur 50 unit at the existing Louisa Compressor Station, convert the replaced units to standby, increase the certificated horsepower (HP) at the Louisa Compressor Station from 4,050 HP to 6,130 HP, install pipe and valve modifications to make the existing point of delivery between Columbia's Mainline VM-108 and VM-109 at Boswell's Tavern Compressor Station bi-directional, install a new point of delivery meter station adjacent to Columbia's Goochland Compressor Station, and install other appurtenant facilities. All work would be performed in Louisa and Goochland Counties, Virginia.

Background

On September 27, 2016 the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed Central Virginia Connector Project and Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received a comment from the Virginia Department of Conservation and Recreation, which recommended strict adherence to the erosion and sediment control measures during all land disturbing activities.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in

specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208-FERC or on the FERC Web site (www.ferc.gov). Using the "eLibrary" link, select "General Search" from the eLibrary menu, enter the selected date range and "Docket Number" excluding the last three digits (*i.e.*, CP16-493), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208-3676, TTY (202) 502-8659, or at FERCOnlineSupport@ferc.gov. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TX17-1-000]

Wheatridge Wind Energy, LLC; Notice of Filing

Take notice that on January 6, 2017, pursuant to sections 210, 211, and 212 of the Federal Power Act, 16 U.S.C. 824i, 824j, and 824k, and Part 36 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR part 36, Wheatridge Wind Energy, LLC submitted an application for an order directing the provision of interconnection and transmission service.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or

protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5:00 p.m. Eastern time on January 27, 2017.

Dated: January 9, 2017.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98-1-000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt

of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the

document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for electronic review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. Western Area Power Administration; Notice of Filing

Take notice that on December 29, 2016, Western Area Power Administration submitted tariff filing per: Rate Order No. WAPA-176 to be effective 10/1/2017.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of

the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the “eFiling” link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the “eLibrary” link and is available for review in the Commission’s Public Reference Room in Washington, DC. There is an “eSubscription” link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17–765–000]

Stream Energy Illinois LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Stream Energy Illinois LLC’s application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission’s Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant’s request for blanket authorization, under 18 CFR part 34, of

future issuances of securities and assumptions of liability, is January 31, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission’s eLibrary system by clicking on the appropriate link in the above list. [Docket No. OR17-5-000]

Stakeholder Midstream Crude Oil Pipeline, LLC; Notice of Petition for Declaratory Order

Take notice that on January 9, 2017, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2016), Stakeholder Midstream Crude Oil Pipeline, LLC ("Stakeholder"), filed a petition for a declaratory order seeking approval of the overall tariff and rate structure and terms of service for its new crude oil gathering and transportation project in the San Andres formation of the Permian Basin in New Mexico and Texas, as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the

Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the “eFiling” link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the

Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the “eLibrary” link and is available for review in the Commission’s Public Reference Room in Washington, DC. There is an “eSubscription” link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Comment Date: 5:00 p.m. Eastern time on February 9, 2017.

Dated: January 10, 2017.

On October 27, 2016, the Commission issued an order announcing its intent to revoke the market-based rate authority of the public utilities listed in the caption of that order, which had failed to file their required Electric Quarterly Reports.¹ The Commission directed those public utilities to file the required Electric Quarterly Reports within 15 days of the date of issuance of the order or face revocation of their authority to sell power at market-based rates and termination of their electric market-based rate tariffs.²

The time period for compliance with the October 27 Order has elapsed. The above-captioned companies failed to file their delinquent Electric Quarterly Reports. The Commission hereby revokes the market-based rate authority and terminates the electric market-based rate tariff of each of the companies who are named in the caption of this order.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16-28-000]

National Fuel Gas Supply Corporation; Notice of Schedule for Environmental Review of the Proposed Line QP, Line Q, and Queen Storage Project

On December 3, 2015, National Fuel Gas Supply Corporation (National Fuel) filed an application in Docket No. CP16-28-000 requesting a Certificate of Public Convenience and Necessity pursuant to Sections 7(b) and 7(c) of the Natural Gas Act to abandon, construct and operate certain natural gas pipeline facilities. The proposed project is known as the Line QP, Line Q, and Queen Storage Project (Project) located

¹ *Electric Quarterly Reports*, 157 FERC 61,058 (2016) (October 27 Order).

² *Id.* at Ordering Paragraph A.

¹ *Dominion Cove Point LNG, LP*, 157 FERC ¶ 61,249 (2016).

in Forest and Warren Counties, Pennsylvania.

On December 16, 2015, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff's planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA: April 13, 2017
90-day Federal Authorization Decision
Deadline: July 12, 2017

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

National Fuel seeks authorization to abandon by sale all of its facilities comprising its Queen Storage Field, including the base gas in the field, its Queen Compressor Station, and a segment of its Line Q, approximately 5.5 miles in length, beginning at the Queen Compressor Station and traversing northwest to a location just south of the Allegheny River (the "Line Q Segment"). Also, National Fuel seeks authorization to construct and operate approximately 5 miles of new 4-inch-diameter plastic pipeline ("Line QP") beginning at a point just north of the Allegheny River, and traversing southeast along or adjacent to the existing Line Q right-of-way, to a point approximately 2,000 feet west of the Queen Compressor Station.

Background

On January 20, 2016, the Commission issued a *Notice of Intent to Prepare an Environmental Assessment for the Proposed Line QP, Line Q, and Queen Storage Project and Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the NOI, the Commission received comments from the United States Army Corps of Engineers, Pittsburgh District (USACE). The USACE stated concern regarding the proposed Project's impact on

federally listed species within the Wild and Scenic River portion of the Allegheny River. The U.S. Forest Service, Allegheny National Forest office; USACE; and the Pennsylvania Fish and Boat Commission are cooperating agencies in the preparation of the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to www.ferc.gov/docs-filing/esubscription.asp.

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208-FERC or on the FERC Web site (www.ferc.gov). Using the "eLibrary" link, select "General Search" from the eLibrary menu, enter the selected date range and "Docket Number" excluding the last three digits (i.e., CP16-28), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208-3676, TTY (202) 502-8659, or at FERCOnlineSupport@ferc.gov. The eLibrary link on the FERC Web site also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: January 10, 2017.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER17-769-000]

Stream Energy Massachusetts LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Stream Energy Massachusetts LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is January 31, 2017.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email FERCOnlineSupport@ferc.gov, or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP17–28–000; PF16–7–000]

Eastern Shore Natural Gas Company; Notice of Application for Certificate of Public Convenience and Necessity

Take notice that on December 30, 2016 Eastern Shore Natural Gas Company (Eastern Shore), 1110 Forrest Avenue, Dover, Delaware 19904, filed in the above referenced docket an

application pursuant to section 7(c) of the Natural Gas Act (NGA) and part 157 of the Commission's regulations, requesting a certificate of public convenience and necessity authorizing Eastern Shore to construct, own, operate and maintain the 2017 Expansion Project. The Project is designed to provide 61,162 dekatherms per day of additional firm transportation service to seven of Eastern Shore's existing customers. Eastern Shore proposes to construct seven segments of buried natural gas pipeline totaling approximately 39.6 miles with miscellaneous appurtenances in Chester County, Pennsylvania, Cecil County, Maryland, as well as New Castle and Sussex Counties, Delaware and install additional 3,750 horsepower at the existing Daleville Compressor Station in Chester County, Pennsylvania. Eastern Shore proposes incremental recourse rate, as more fully set forth in the application which is on file with the Commission and open to public inspection.

The filing may also be viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll free at (866) 208–3676, or TTY, contact (202) 502–8659.

Any questions concerning this application may be directed to Mark Parker P.E., Engineering Manager, Eastern Shore Natural Gas Company 1110 Forrest Avenue, Dover, DE 19904 by phone 1–844–366–3764 use or by email maparker@esng.com.

Specifically, Eastern Shore proposes (1) six 10-, 16-, and 24-inch-diameter pipeline loop segments totaling 22.7 miles, (2) 10-inch-diameter 16.9-mile-long mainline extension, (3) upgrades to an existing Meter and Regulator station and lateral piping at the existing interconnect with Texas Eastern in Lancaster County, Pennsylvania, and (4) the addition of two pressure control stations in Sussex County, Delaware. Eastern Shore requests that the Commission issue the requested authorizations by May 2017 in order to meet November 1, 2017 in-service date requested by the project shippers who are local utility, power, and industrial manufacturing companies. The total cost of the Project is estimated to be approximately \$98,578,673.

On May 17, 2016, the Commission staff granted Eastern Shore's request to utilize the Pre-Filing Process and assigned Docket No. PF16–7–000 to staff activities involved in the above

referenced project. Now, as of the filing of the December 30, 2016 application, the Pre-Filing Process for this project has ended. From this time forward, this proceeding will be conducted in Docket No. CP17–28–000, as noted in the caption of this Notice.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit five copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party

to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit original and five copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: 5:00 p.m. Eastern Time on February 1, 2017.

Dated: January 11, 2017.

Kimberly D. Bose,
Secretary.

[FR Doc. 2017-00986 Filed 1-17-17; 8:45 am]

BILLING CODE 6717-01-P

FARM CREDIT ADMINISTRATION

Market Access Agreement

AGENCY: Farm Credit Administration.

ACTION: Notice of approval of the Draft Third Amended and Restated Market Access Agreement.

SUMMARY: The Farm Credit Administration (FCA) announces that it has approved the Draft Third Amended and Restated Market Access Agreement (Draft Third Restated MAA) proposed to be entered into by all of the banks of the Farm Credit System (System or FCS) and the Federal Farm Credit Banks Funding Corporation (Funding Corporation). The Draft Third Restated MAA sets forth the rights and

responsibilities of each of the parties when the condition of a System bank falls below pre-established financial thresholds. In prior draft amended and restated MAAs, although not required, the FCA published the draft document for comment prior to its approval. The revisions in this draft are minor, consisting primarily of replacing references to the previous FCA regulatory capital standards with references to the new FCA regulatory capital standards that became effective on January 1, 2017, as well as updating addresses. Therefore, the FCA has determined to approve the Draft Third Restated MAA without a request for comments prior to approval; we will, however, review and consider any subsequent comments we may receive.

DATES: You may send comments on or before February 17, 2017.

ADDRESSES: For accuracy and efficiency reasons, commenters are encouraged to submit comments by e-mail or through the FCA's Web site. We are no longer accepting comments submitted by facsimile (fax). Please do not submit your comment multiple times via different methods. You may submit comments by any of the following methods:

- **E-mail:** Send us an e-mail at reg-comm@fca.gov.
- **FCA Web site:** <http://www.fca.gov>. Select "Public Commenters," then "Public Comments," and follow the directions for "Submitting a Comment."
- **Federal E-Rulemaking Web site:** <http://www.regulations.gov>. Follow the instructions for submitting comments.
- **Mail:** Send mail to Barry F. Mardock, Deputy Director, Office of Regulatory Policy, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102-5090.

You may review copies of comments we receive at our office in McLean, Virginia, or on our Web site at <http://www.fca.gov>. Once you are in the Web site, select "Public Commenters," then "Public Comments," and follow the directions for "Reading Submitted Public Comments." We will show your comments as submitted, but for technical reasons we may omit items such as logos and special characters. Identifying information that you provide, such as phone numbers and addresses, will be publicly available. However, we will attempt to remove e-mail addresses to help reduce Internet spam.

FOR FURTHER INFORMATION, CONTACT:

David J. Lewandowski, Senior Policy Analyst, Office of Regulatory Policy, Farm Credit Administration, McLean,

VA 22102-5090, (703) 883-4212, TTY (703) 883-4434,
or

Rebecca S. Orlich, Senior Counsel, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4020, TTY (703) 883-4020.

SUPPLEMENTARY INFORMATION: System banks and the Funding Corporation entered into the original Market Access Agreement (original MAA) on September 1, 1994, to help control the risk of each System bank by outlining each party's respective rights and responsibilities in the event the condition of a System bank fell below certain financial thresholds. As part of the original MAA, System banks and the Funding Corporation agreed to periodic reviews of the terms of the MAA to consider whether any amendments were appropriate. The original MAA was updated by the parties in 2003 in the Amended and Restated MAA and received FCA approval following notice and request for public comments in the **Federal Register**.¹

On December 3, 2010, the FCA Board approved amendments to the Amended and Restated MAA that would conform its provisions to the System banks' proposed Joint and Several Liability Reallocation Agreement (Reallocation Agreement) to ensure that the MAA provisions did not impede operation of the Reallocation Agreement; the amendments also provided that the MAA and the Reallocation Agreement are separate agreements, and invalidation of one does not affect the other. The FCA published these amendments in the **Federal Register**.² The proposed Reallocation Agreement is an agreement among the banks and the Funding Corporation that establishes a procedure for non-defaulting banks to pay maturing System-wide debt on behalf of defaulting banks prior to a statutory joint and several call by the FCA under section 4.4 of the Farm Credit Act of 1971, as amended (Act).³ The FCA Board approved the proposed Reallocation Agreement on October 14, 2010, and notice of the approval was published in the **Federal Register**.⁴

The MAA was updated again by the parties in 2011 in the Second Amended and Restated MAA, as the first Amended and Restated MAA was set to expire at the end of 2011. The FCA approved the draft document on December 9, 2011 following notice and request for public comments, and notice

¹ 68 FR 19539 (April 21, 2003).

² 75 FR 76729 (December 9, 2010).

³ 12 U.S.C. 2155.

⁴ 75 FR 64727 (October 20, 2010).

of approval was published in the **Federal Register**.⁵

The Second Amended and Restated MAA established certain financial thresholds at which conditions are placed on the activities of a bank or restrictions are placed on a bank's access to participation in System-wide and consolidated obligations. The MAA established three categories, which are based on each bank's net collateral ratio, permanent capital ratio, and scores under the Contractual Inter-bank Performance Agreement, which is an agreement among the banks and the Funding Corporation that establishes certain financial performance criteria.

The Second Amended and Restated MAA has a termination date of December 31, 2025. The System banks and the Funding Corporation have requested the FCA to approve the Draft Third Restated MAA at this time in order to incorporate references to the FCA's new capital regulations, which became effective at on January 1, 2017. The parties propose to enter into the Draft Third Restated MAA by January 31, 2017, with a retroactive effective date of January 1, 2017.

The Draft Third Restated MAA retains the same general framework and most of the provisions of the Second Amended and Restated MAA. In Sections 1.04 through 1.07, the Net Collateral and Permanent Capital ratio levels would be replaced with the Tier 1 Leverage and Total Capital ratio levels, respectively, that would place a bank in either Category I, Category II, or Category III. The revisions take into account the new capital requirements set forth in § 628.10—Minimum Capital Standards and § 628.11—Capital Buffer Amounts. A bank would fall into revised Category I when either its Tier 1 Leverage or its Total Capital ratio drops below the relevant Capital Buffer floor. Further declines in either or both ratios below specified thresholds would cause the bank to fall into Category II and Category III. In addition, paragraph (g) of Section 6.03 has been revised to include "whether the Bank has evaluated and disclosed that it has substantial doubt about its ability to continue as a Going Concern" in addition to the criterion in the Second Amended and Restated MAA that the committee consider whether a Bank's independent public accountants have included a Going Concern qualification in the Bank's most recent combined financial statements. In addition, the addresses of the System banks and the Funding Corporation have been updated.

The FCA Board hereby approves the Draft Third Amended and Restated MAA pursuant to sections 4.2(c), 4.2(d) and 4.9(b)(2) of the Farm Credit Act of 1971, as amended. The FCA's approval of the Draft Third Amended and Restated MAA is conditioned on the board of directors of each bank and the Funding Corporation approving the Draft Third Amended and Restated MAA. Neither the Draft Third Amended and Restated MAA, when it becomes effective, nor FCA approval of it shall in any way restrict or qualify the authority of the FCA or the FCSIC to exercise any powers, rights, or duties granted by law to the FCA or the FCSIC. Finally, the FCA retains the right to modify or revoke its approval of the Draft Third Amended and Restated MAA at any time.

The Draft Third Amended and Restated MAA, together with the recitals to the amendment, is as follows:

THIRD AMENDED AND RESTATED MARKET ACCESS AGREEMENT AMONG

AgFirst Farm Credit Bank, AgriBank, FCB, CoBank, ACB, Farm Credit Bank of Texas and Federal Farm Credit Banks Funding Corporation

This THIRD AMENDED AND RESTATED MARKET ACCESS AGREEMENT (the "Restated MAA") is entered into among AgFirst Farm Credit Bank, AgriBank, FCB, CoBank, ACB, the Farm Credit Bank of Texas, (collectively, the "Banks") and the Federal Farm Credit Banks Funding Corporation ("Funding Corporation"). Capitalized terms used herein shall be as defined in Article IX.

Whereas, the Banks and the Funding Corporation entered into that certain Market Access Agreement dated September 1, 1994 and effective as of November 23, 1994, (the "Original Agreement") for the reasons stated therein; and

Whereas, the Original Agreement was subsequently amended by that certain Amended and Restated Market Access Agreement, dated July 1, 2003, referred to herein as the "First Restated MAA," for the reasons stated therein; and

Whereas, the First Restated MAA was subsequently amended by that certain Second Amended and Restated Market Access Agreement, dated December 14, 2011, and effective January 1, 2012, referred to herein as the "Second Restated MAA," for the reasons stated therein; and

Whereas, pursuant to Section 7.05 of the Second Restated MAA, the Banks and the Funding Corporation have reviewed the Second Restated MAA to

consider whether any amendments to it are appropriate in view of recent changes to new FCA capital requirements applicable to the Banks; and

Whereas, representatives of the Banks and the Funding Corporation met various times in connection with such review and recommended certain amendments to the Second Restated MAA for presentation to the Committee; and

Whereas, the Committee met various times in connection with the review and recommended certain amendments to the Second Restated MAA for presentation to the Banks and the Funding Corporation; and

Whereas, the boards of directors of the Banks and of the Funding Corporation approved this Restated MAA in principle; and

Whereas, thereafter, this Restated MAA was submitted to the FCA for approval and to the Insurance Corporation for an expression of support; and

Whereas, the FCA published this Restated MAA in the **Federal Register** and sought comments thereon; and

Whereas, the FCA approved this Restated MAA, subject to approval of this Restated MAA by the boards of directors of the Banks and the Funding Corporation, and a notice of such approval was published in the **Federal Register**; and

Whereas, the Insurance Corporation expressed its support of this Restated MAA; and

Whereas, the Parties are mindful of the FCA's independent authority under section 5.17(a)(10) of the Act to ensure the safety and soundness of the Banks, the FCA's independent authority under sections 4.2 and 4.9 of the Act to approve the terms of specific issuances of Debt Securities, the Insurance Corporation's independent authority under section 5.61 of the Act to assist troubled Banks, and the Banks' independent obligations under section 4.3(c) of the Act to maintain necessary collateral levels for Debt Securities; and

Whereas, the Banks are entering into this Restated MAA pursuant to, *inter alia*, section 4.2(c) and (d) of the Act; and

Whereas, the Funding Corporation is prepared to adopt as the "conditions of participation" that it understands to be required by section 4.9(b)(2) of the Act each Bank's compliance with the terms and conditions of this Restated MAA; and

Whereas, the Funding Corporation believes the execution and implementation of this Restated MAA will materially accomplish the

⁵ 76 FR 77998 (December 15, 2011).

objectives which it has concluded are appropriate for a market access program under section 4.9(b)(2) of the Act; and

Whereas, prior to the adoption of the Original Agreement, the Funding Corporation adopted and maintained in place a Market Access and Risk Alert Program designed to fulfill what it understood to be its responsibilities under section 4.9(b)(2) of the Act with respect to determining “conditions of participation,” which Program was discontinued by the Funding Corporation in accordance with the terms of the Original Agreement; and

Whereas, the Funding Corporation is entering into this Restated MAA pursuant to, *inter alia*, section 4.9(b)(2) of the Act; and

Whereas, the Parties believe that the execution and implementation of this Restated MAA will accomplish the objectives intended to be achieved by the Original Agreement,

Now therefore, in consideration of the foregoing, the mutual promises and agreements herein contained, and other good and valuable consideration, receipt of which is hereby acknowledged, the Parties, intending to be legally bound hereby, agree as follows:

ARTICLE I—CATEGORIES

Section 1.01. *Scorekeeper*. The Scorekeeper, for purposes of this Restated MAA, shall be the Funding Corporation.

Section 1.02. *CIPA Oversight Body*. The CIPA Oversight Body, for purposes of this Restated MAA, shall be the same as the Oversight Body under Section 5.1 of CIPA.

Section 1.03. *CIPA Scores*. Net Composite Scores and Average Net Composite Scores, for purposes of this Restated MAA, shall be the same as those determined under Article II of CIPA and the Model referred to therein, as in effect on June 30, 2011, and as amended under CIPA or replaced by successor provisions under CIPA in the future, to the extent such future amendments or replacements are by agreement of all the Banks.

Section 1.04. *Tier 1 Leverage Ratio and Total Capital Ratio*. Each Bank shall report to the Scorekeeper within 15 days after the end of each month its Tier 1 Leverage Ratio and Total Capital Ratio as of the last day of that month. Should any Bank later correct or revise, or be required to correct or revise, any past financial data in a way that would cause any previously reported Tier 1 or Total Capital Ratio hereunder to have been different, the Bank shall promptly report a revised Ratio to the Scorekeeper. Should the Scorekeeper consider it necessary to verify any Tier

1 Leverage Ratio and Total Capital Ratio, it shall so report to the Committee, or, if the Committee is not in existence, to the CIPA Oversight Body, and the Committee or the CIPA Oversight Body, as the case may be, may verify the Ratios as it deems appropriate, through reviews of Bank records by its designees (including experts or consultants retained by it) or otherwise. The reporting Bank shall cooperate in any such verification, and the other Banks shall provide such assistance in conducting any such verification as the Committee or the CIPA Oversight Body, as the case may be, may reasonably request.

Section 1.05. *Category I*. A Bank shall be in Category I if it (a) has an Average Net Composite Score of 50.0 or more, but less than 60.0, for the most recent calendar quarter for which an Average Net Composite Score is available, (b) has a Net Composite Score of 45.0 or more, but less than 60.0, for the most recent calendar quarter for which a Net Composite Score is available, (c) has a Tier 1 Leverage Ratio of 4.00 percent or more, but less than 5.00 percent for the last day of the most recent month or (d) has a Total Capital Ratio of 8.00 percent or more, but less than 10.50 percent for the period ending on the last day of the most recent month.

Section 1.06. *Category II*. A Bank shall be in Category II if it (a) has an Average Net Composite Score of 35.0 or more, but less than 50.0, for the most recent calendar quarter for which an Average Net Composite Score is available, (b) has a Net Composite Score of 30.0 or more, but less than 45.0, for the most recent calendar quarter for which a Net Composite Score is available, (c) has a Tier 1 Leverage Ratio of 3.00 percent or more, but less than 4.00 percent for the last day of the most recent month, (d) has a Total Capital Ratio of 7.00 percent or more, but less than 8.00 percent for the period ending on the last day of the most recent month, or (e) is in Category I and has failed to provide information to the Committee as required by Article III within 2 Business Days after receipt of written notice from the Committee of such failure.

Section 1.07. *Category III*. A Bank shall be in Category III if it (a) has an Average Net Composite Score of less than 35.0 for the most recent calendar quarter for which an Average Net Composite Score is available, (b) has a Net Composite Score of less than 30.0 for the most recent calendar quarter for which a Net Composite Score is available, (c) has a Tier 1 Leverage Ratio of less than 3.00 percent for the last day of the most recent month, (d) has a Total Capital Ratio of less than 7.00 percent

for the period ending on the last day of the most recent month, or (e) is in Category II and has failed to provide information to the Committee as required by Article III within 2 Business Days after receipt of written notice from the Committee of such failure.

Section 1.08. *Highest Category*. If a Bank would come within more than one Category by reason of the various provisions of Sections 1.05 through 1.07, it shall be considered to be in the highest-numbered Category for which it qualifies (e.g., Category III rather than Category II).

Section 1.09. *Notice by Scorekeeper*. Within 20 days of the end of each month, after receiving the reports due under Section 1.04 within 15 days of the end of the prior month, the Scorekeeper shall provide to all Banks, all Associations discounting with or otherwise receiving funding from a Bank that is in Category I, Category II or Category III, the FCA, the Insurance Corporation, the Funding Corporation, and either the CIPA Oversight Body or, if it is in existence, the Committee a notice identifying the Banks, if any, that are in Categories I, II and III, or stating that no Banks are in such Categories.

ARTICLE II—THE COMMITTEE

Section 2.01. *Formation*. A Monitoring and Advisory Committee (the “Committee”) shall be formed at the instance of the CIPA Oversight Body within 7 days of the date that it receives a notice from the Scorekeeper under Section 1.09 that any Bank is in Category I, Category II or Category III (unless such a Committee is already in existence). The Committee shall remain in existence thereafter for so long as the most recent notice from the Scorekeeper under Section 1.09 indicates that any Bank is in Category I, Category II or Category III. If not already in existence, the Committee may also be formed (a) at the instance of the CIPA Oversight Body at any other time, in order to consider a Continued Access Request that has been submitted or is expected to be submitted, (b) for purposes of preparing the reports described in Section 7.05, and (c) as provided for in Section 8.04(b).

Section 2.02. *Composition*. The Committee shall be made up of two representatives of each Bank and two representatives of the Funding Corporation. One of the representatives of each Bank shall be that Bank’s representative on the CIPA Oversight Body. The other representative of each Bank shall be an individual designated by the Bank’s board of directors, who may be a member of the Bank’s board of directors or a senior officer of the

Bank, in the discretion of the Bank's board. One of the representatives of the Funding Corporation shall be an outside director of the Funding Corporation designated by the Funding Corporation board of directors. The other representative of the Funding Corporation shall be designated by the board of directors of the Funding Corporation from among the members of its board and/or its senior officers. The removal and replacement of the Committee members designated directly by Bank boards of directors and by the Funding Corporation shall be in the sole discretion of each Bank board and of the Funding Corporation, respectively. A replacement for a member of the CIPA Oversight Body shall automatically replace such member on the Committee.

Section 2.03. *Authority and Responsibilities.* The Committee shall have the authority and responsibilities specified in this Article II, in Sections 1.04, 3.01, 3.02, 3.05, 3.06, 4.02, 7.05, 8.04 and 8.08, and in Article VI, and such incidental powers as are necessary and appropriate to effectuating such authority and responsibilities.

Section 2.04. *Meetings.* Notwithstanding anything herein to the contrary, at all times, the Banks entitled to vote on Committee business shall be all Banks other than (i) those in Category II and Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and (ii) in the case of a Bank requesting a Continued Access Decision, such Bank. The initial meeting of the Committee shall be held at the call of the Chairman of the CIPA Oversight Body or a majority of the Parties entitled to vote on Committee business. Thereafter, the Committee shall meet at such times and such places at the call of the Chairman of the Committee or a majority of the Parties entitled to vote on Committee business. For all voting and quorum purposes each Party entitled to vote on Committee business shall act through at least one of its representatives. Written notice of each meeting shall be given to each member by the Chairman or his or her designee not less than 48 hours prior to the time of the meeting. A meeting may be held without such notice upon the signing of a waiver of notice by all of the Parties entitled to vote on Committee business. All of the Parties entitled to vote on Committee business shall constitute a quorum for the conduct of business. A meeting may be held by a telephone conference arrangement or similar communication method allowing each speaker to be heard by all others in attendance at the same time.

Section 2.05. *Action Without a Meeting.* Action may be taken by the Committee without a meeting if each Bank and the Funding Corporation consent in writing to consideration of a matter without a meeting and all of the Parties entitled to vote on Committee business approve the action in writing, which writings shall be kept with the minutes of the Committee.

Section 2.06. *Voting.* The Funding Corporation and each Bank entitled to vote on Committee business shall have one vote on Committee business. Voting on Committee business (including recommendations on Continued Access Decisions, but not the ultimate vote on Continued Access Decisions, which is addressed in Article VI) shall be by unanimity of the Parties entitled to vote on Committee business that are present (physically, by telephone conference or similar communication method allowing each speaker to be heard by all others in attendance at the same time) through at least one representative. If a Bank or the Funding Corporation has two representatives present, they shall agree in casting the vote of the Bank or the Funding Corporation, and if they cannot agree on a particular matter, that Bank or the Funding Corporation shall not cast a vote on that matter, and, in determining unanimity, shall not be counted as a Party entitled to vote on that matter.

Section 2.07. *Officers.* The Committee shall elect from among its members a Chairman, a Vice Chairman, a Secretary and such other officers as it shall from time to time deem appropriate. The Chairman shall chair the meetings of the Committee and have such other duties as the Committee may delegate to him or her. The Vice Chairman shall perform such duties of the Chairman as the Chairman is unable or fails to perform, and shall have such other duties as the Committee may delegate to him or her. The Secretary shall keep the minutes and maintain the minute book of the Committee. Other officers shall have such duties as the Committee may delegate to them. Should the Chairman be a representative of either a Category II or Category III Bank, such individual will no longer be eligible to serve as Chairman. The Vice Chairman will thereafter perform the duties of Chairman, and if the Vice Chairman is unable, the Committee may elect a new Chairman from among its members.

Section 2.08. *Retention of Staff, Consultants and Experts.* The Committee shall be authorized to retain staff, consultants and experts as it deems necessary and appropriate in its sole discretion.

Section 2.09. *Expenses.* Any compensation of each member of the Committee for time spent on Committee business and for his or her out-of-pocket expenses, such as travel, shall be paid by the Party that designated that member to the Committee or to the CIPA Oversight Body. All other expenses incurred by the Committee shall be borne by the Banks and assessed by the Funding Corporation based on the formula then used by the Funding Corporation to allocate its operating expenses.

Section 2.10. *Custody of Records.* All information received by the Committee pursuant to this Restated MAA, and all Committee minutes, shall be lodged, while not in active use by the Committee, at the Funding Corporation, and shall be deemed records of the Funding Corporation for purposes of FCA examination. The Parties agree that documents in active use by the Committee may also be examined by the FCA.

ARTICLE III—PROVISION OF INFORMATION

Section 3.01. *Information To Be Provided By All Banks in Categories I, II and III.* If a Bank is in Category I, Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and if the prior monthly notice by the Scorekeeper did not indicate that the Bank was in any Category, then the Bank shall within 30 days of receipt of the latest notice provide to the Committee: (a) a detailed explanation of the causes of its being in that Category, (b) an action plan to improve its financial situation so that it is no longer in any of the three Categories, (c) a timetable for achieving that result, (d) at the discretion of the Committee, the materials and information listed in Attachment 1 hereto (in addition to fulfilling the other obligations specified in Attachment 1 hereto) and (e) such other pertinent materials and information as the Committee shall, within 7 days of receiving notice from the Scorekeeper, request in writing from the Bank. Such Bank shall summarize, aggregate or analyze data, as well as provide raw data, in such manner as the Committee may request. Such information shall be promptly updated (without any need for a request by the Committee) whenever the facts significantly change, and shall also be updated or supplemented as the Committee so requests in writing of the Bank by such deadlines as the Committee may reasonably specify.

Section 3.02. *Additional Information To Be Provided By Banks in Categories*

II and III. If a Bank is in Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and if the prior monthly notice by the Scorekeeper did not indicate that the Bank was in Category II or Category III, then the Bank shall within 30 days of receipt of the latest notice provide to the Committee, in addition to the information required by Section 3.01, at the discretion of the Committee, the materials and information listed in Attachment 2 hereto (in addition to fulfilling the other obligations specified in Attachment 2 hereto). Such information shall be promptly updated (without any need for a request by the Committee) whenever the facts significantly change, and shall also be updated or supplemented as the Committee so requests in writing of the Bank by such deadlines as the Committee may reasonably specify.

Section 3.03. *Documents or Information Relating to Communications With FCA or the Insurance Corporation.* Notwithstanding Sections 3.01 and 3.02, a Bank shall not disclose to the Committee any communications between the Bank and the FCA or the Insurance Corporation, as the case may be, or documents describing such communications, except as consented to by, and subject to such restrictive conditions as may be imposed by, the FCA or the Insurance Corporation, as the case may be. However, facts regarding the Bank's condition or plans that pre-existed a communication with the FCA or the Insurance Corporation and then were included in such a communication are not barred from disclosure by this section. The Committee shall decide on a case-by-case basis whether to request copies of such communications and documents from the FCA or the Insurance Corporation, as the case may be. Each Bank hereby consents to the disclosure of such communications and documents to the Committee if consented to by the FCA or the Insurance Corporation, as the case may be. Nothing in this section shall preclude a Bank from making disclosures to the System Disclosure Agent necessary to allow the System Disclosure Agent to comply with its obligations under the securities laws or other applicable law or regulations with regard to disclosure to investors.

Section 3.04. *Sources of Information; Certification.* Information provided to the Committee under Sections 3.01 and 3.02 shall, to the extent applicable, be data used in the preparation of financial statements in accordance with generally accepted accounting principles, or data used in the preparation of call reports

submitted to the FCA pursuant to 12 CFR 621, as amended from time to time, or any successor thereto. A Bank shall certify, through its chief executive officer or, if there is no chief executive officer, a senior executive officer, the completeness and accuracy of all information provided to the Committee under Sections 3.01 and 3.02.

Section 3.05. *Failure to Provide Information.* If a Bank fails to provide information to the Committee as and when required under Sections 3.01 and 3.02, and does not correct such failure within 2 Business Days of receipt of the written notice by the Committee of the failure, then the Committee shall so advise the Scorekeeper.

Section 3.06. *Provision of Information to Banks.* Any information provided to the Committee under Sections 3.01 and 3.02 shall be provided by the Committee to any Bank upon request. A Bank shall not have the right under this Restated MAA to obtain information directly from another Bank.

Section 3.07. *Cessation of Obligations.* A Bank's obligation to provide information to the Committee under Section 3.01 shall cease as soon as the Bank is no longer in Category I, Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09. A Bank's obligation to provide to the Committee information under Section 3.02 shall cease as soon as the Bank is no longer in Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09.

ARTICLE IV—RESTRICTIONS ON MARKET ACCESS

Section 4.01. *Final Restrictions.* As of either,

(i) The 10th day after a Bank receives a notification from the Scorekeeper that it is in Category II, as indicated in the most recent notice from the Scorekeeper under Section 1.09, if it has not by said 10th day submitted a Continued Access Request to the Committee; or

(ii) If the Bank has submitted a Continued Access Request to the Committee by the 10th day after its receipt of notice from the Scorekeeper that it is in Category II, the 7th day following the day a submitted Continued Access Request is denied,

A Bank in Category II, as indicated in the most recent notice from the Scorekeeper under Section 1.09, (a) shall be permitted to participate in issues of Debt Securities only to the extent necessary to roll over the principal (net of any original issue discount) of maturing debt, and (b) shall comply with the Additional Restrictions.

Section 4.02. *Category II Interim Restrictions.* From the day that a Bank receives a notice from the Scorekeeper that it is in Category II until: (a) 10 days thereafter, if the Bank does not by that day submit a Continued Access Request to the Committee, or (b) if the Bank by such 10th day after it has received a notice from the Scorekeeper that it is in Category II does submit a Continued Access Request to the Committee, the 7th day following the day that notice is received by the Bank that the Continued Access Request is granted or denied, the Bank (i) may participate in issues of Debt Securities only to the extent necessary to roll over the principal (net of any original issue discount) of maturing debt unless the Committee, taking into account the criteria in Section 6.03, shall specifically authorize participation to a greater extent, and (ii) shall comply with the Additional Restrictions. Notwithstanding the foregoing, the Category II Interim Restrictions shall not go into effect if a Continued Access Request has already been granted in anticipation of the formal notice that the Bank is in Category II.

Section 4.03. *FCA Action.* The Final Restrictions and the Category II Interim Restrictions shall go into effect without the need for case-by-case approval by FCA.

Section 4.04. *Cessation of Restrictions.* The Final Restrictions and the Category II Interim Restrictions shall cease as soon as the Bank is no longer in Category II, as indicated in the most recent notice from the Scorekeeper under Section 1.09. The Bank shall continue, however, to be subject to such other obligations under this Restated MAA as may apply to it by reason of its being in another Category.

Section 4.05. *Relationship to the Joint and Several Liability Reallocation Agreement.* A Category II Bank shall not be subject to the Final Restrictions and Category II Interim Restrictions, to the extent that the Final Restrictions and Category II Interim Restrictions would prohibit such Category II Bank from issuing debt required to fund such Category II Bank's liabilities and obligations under the Joint and Several Liability Reallocation Agreement, if and when the Joint and Several Liability Reallocation Agreement is in effect among the Parties.

ARTICLE V—PROHIBITION OF MARKET ACCESS

Section 5.01. *Final Prohibition.* As of either,

(i) The 10th day after a Bank receives a notification from the Scorekeeper that it is in Category III, as indicated in the

most recent notice from the Scorekeeper under Section 1.09, if it has not by said 10th day submitted a Continued Access Request to the Committee; or

(ii) If the Bank has submitted a Continued Access Request to the Committee by the 10th day after its receipt of notice from the Scorekeeper that it is in Category III, the 7th day following the day a submitted Continued Access Request is denied,

A Bank in Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, (a) shall be prohibited from participating in issues of Debt Securities, and (b) shall comply with the Additional Restrictions.

Section 5.02. Category III Interim Restrictions. From the day that a Bank receives a notice from the Scorekeeper that it is in Category III until: (a) 10 days thereafter, if the Bank does not by that day submit a Continued Access Request to the Committee, or (b) if the Bank by such 10th day after it has received a notice from the Scorekeeper that it is in Category III does submit a Continued Access Request to the Committee, the 7th day following the day that notice is received by the Bank that the Continued Access Request is granted or denied, the Bank (i) may participate in issues of Debt Securities only to the extent necessary to roll over the principal (net of any original issue discount) of maturing debt, and (ii) shall comply with the Additional Restrictions. Notwithstanding the foregoing, the Category III Interim Restrictions shall not go into effect if a Continued Access Request has already been granted in anticipation of the formal notice that the Bank is in Category III.

Section 5.03. FCA Action. The Category III Interim Restrictions shall go into effect without the need for case-by-case approval by the FCA. The Parties agree that the Final Prohibition shall go into effect without the need for approval by the FCA; *provided, however*, that the FCA may override the Final Prohibition, for such time period up to 60 days as the FCA may specify (or, if the FCA does not so specify, for 60 days), by so ordering before the date upon which the Final Prohibition becomes effective pursuant to Section 5.01, and may renew such an override once only, for such time period up to 60 additional days as the FCA may specify (or, if the FCA does not so specify, for 60 days), by so ordering before the expiration of the initial override period. If the Final Prohibition is overridden by the FCA, the Category III Interim Restrictions shall remain in effect.

Section 5.04. Cessation of Restrictions. The Final Prohibition and

the Category III Interim Restrictions shall cease as soon as the Bank is no longer in Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09. The Bank shall continue, however, to be subject to such other obligations under this Restated MAA as may apply to it by reason of its being in another Category.

Section 5.05. Relationship to the Joint and Several Liability Reallocation Agreement. A Category III Bank shall not be subject to the Final Prohibition or Category III Interim Restrictions, to the extent that the Final Prohibition or Category III Interim Restrictions would prohibit such Category III Bank from issuing debt required to fund such Category III Bank's liabilities and obligations under the Joint and Several Liability Reallocation Agreement, if and when the Joint and Several Liability Reallocation Agreement is in effect among the Parties.

ARTICLE VI—CONTINUED ACCESS DECISIONS

Section 6.01. Process. The process for action on Continued Access Requests shall be as follows:

(a) **Submission of Request.** A Bank may submit a Continued Access Request for consideration by the Committee at any time, including (i) prior to formal notice from the Scorekeeper that it is in Category II or Category III, if the Bank anticipates such notice, and (ii) prior to the 10th day after a Bank receives a notification from the Scorekeeper that it is in Category II or the 10th day after a Bank receives a notification from the Scorekeeper that it is in Category III.

(b) **Committee Recommendation.** After a review of the Request, the supporting information and any other pertinent information available to the Committee, the Committee shall arrive at a recommendation regarding the Request (including, if the recommendation is to grant the Request, recommendations as to the expiration date of the Continued Access Decision and as to any conditions to be imposed on the Decision). The Funding Corporation, drawing upon its expertise and specialized knowledge, shall provide to the Committee all pertinent information in its possession (and the Banks authorize the Funding Corporation to provide such information to the Committee for its use as provided herein, and, to that limited extent only, waive their right to require the Funding Corporation to maintain the confidentiality of such information). The Committee shall send its recommendation and a statement of the reasons therefor, including a description of any considerations that were

expressed for and against the recommendation by members of the Committee during its deliberations, together with the Request, the supporting information, a report of how the members of the Committee voted on the recommendation, a report by the Funding Corporation concerning its position on the recommendation, and any other material information that was considered by the Committee, to all Banks and the Funding Corporation by a nationally recognized overnight delivery service within 14 days after receiving the Request. If the Committee fails to act within such 14-day period, the Continued Access Request shall be deemed forwarded to all Banks entitled to vote thereon for their consideration. If the Committee has failed to act, the Funding Corporation shall send to all Banks, within 2 days following the deadline for Committee action, a report concerning the position of the Funding Corporation on the Continued Access Request.

(c) **Vote on the Request.** Unless otherwise expressly stated herein, the Banks entitled to vote on the Request shall be all Banks other than those in Category II and Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and other than the Bank requesting the Continued Access Decision. Within 10 days of receiving the Committee's recommendation and the accompanying materials (or, if the Committee failed to act within 14 days, within 10 days following the 14th day), the board of directors of each Bank entitled to vote on the Request, or its designee, after review of the recommendation, the accompanying materials, the report of the Funding Corporation, and any other pertinent information, shall vote to grant or deny the Request (as modified or supplemented by any recommendations of the Committee as to the expiration date of the Continued Access Decision and as to conditions to be imposed on the Decision), and shall provide written notice of its vote to the Committee. If the Committee has recommended in favor of a Continued Access Decision, the vote of a Bank shall be either to accept or reject the Committee's recommendation, including the recommended expiration date and conditions; if the Committee has recommended against a Continued Access Decision or has failed to act, the vote of a Bank shall be either to grant the Continued Access Request on the terms requested by the requesting Bank, or to deny it. Failure to vote within the 10-day period shall be considered a "no" vote. A Continued Access Request

shall be granted only upon a 100-percent Vote within the 10-day period, and shall be considered denied if a 100-percent Vote is not forthcoming by that day.

(d) *Notice.* The Committee shall promptly provide written notice to the Parties, the FCA and the Insurance Corporation of the granting or denial of the Continued Access Request, and, if the Continued Access Request was granted, of all the particulars of the Continued Access Decision.

Section 6.02. *Provision of Information to FCA and the Insurance Corporation.* The FCA and the Insurance Corporation shall be advised by the Committee of the submission of a Continued Access Request, shall be provided by the Committee with appropriate materials relating to the Request, and shall be advised by the Committee of the recommendation made by the Committee concerning the Request.

Section 6.03. *Criteria.* The Committee, in arriving at its recommendation on a Continued Access Request, and the voting Banks, in voting on a Continued Access Request, shall consider (a) the present financial strength of the Bank in issue, (b) the prospects for financial recovery of the Bank in issue, (c) the probable costs of particular courses of action to the Banks and the Insurance Fund, (d) any intentions expressed by the Insurance Corporation with regard to assisting or working with the Bank in issue, (e) any existing lending commitments and any particular high-quality new lending opportunities of the Bank, (f) seasonal variations in the borrowing needs of the Bank, (g) whether either the Bank has evaluated and disclosed that it has substantial doubt about its ability to continue as a Going Concern or the Bank's independent public accountants have included a Going Concern Qualification in the most recent combined financial statements of the Bank and its constituent Associations, and (h) any other matters deemed pertinent.

Section 6.04. *Expiration Date.* A Continued Access Decision shall have such expiration date as the Committee recommends and is approved by a 100-percent Vote. If the Committee recommends against or fails to act on a Continued Access Request, and it is subsequently approved by a 100-percent Vote, the expiration date of the Continued Access Decision shall be the earlier of the date requested by the Bank or 180 days from the date the Request is granted. A Continued Access Decision may be terminated prior to that date, or renewed for an additional term, upon a new recommendation by the Committee and 100-percent Vote.

Section 6.05. *Conditions.* A Continued Access Decision shall be subject to such conditions as the Committee recommends and are approved by a 100-percent Vote. If specifically approved by a 100-percent Vote, administration of the details of the conditions and ongoing refinement of the conditions to take account of changing circumstances can be left to the Committee or such subcommittee as it may establish for that purpose. Among the conditions that may be imposed on a Continued Access Decision are (a) a requirement of remedial action by the Bank, failing which the Continued Access Decision will terminate, (b) a requirement of other appropriate conduct on the part of the Bank (such as compliance with the Additional Restrictions), failing which the Continued Access Decision will terminate, and (c) specific restrictions on continued borrowing by the Bank, such as a provision allowing a Bank in Category II to borrow only for specified types of business in addition to rolling over the principal of maturing debt, or allowing such a Bank only to roll over interest on maturing debt in addition to rolling over the principal of maturing debt, or a provision allowing a Bank in Category III to roll over a portion of its maturing debt. The Committee shall be responsible for monitoring and determining compliance with conditions, and shall promptly advise the Parties of any failure by a Bank to comply with conditions. The Committee's determination with respect to compliance with conditions shall be final, until and unless overturned or modified in arbitration pursuant to Section 7.08.

Section 6.06. *FCA Action.* The Parties agree that a Continued Access Decision shall go into effect without the need for approval by the FCA, but that the FCA may override the Continued Access Decision, for such time period as the FCA may specify (or, if the FCA does not so specify, until a new Continued Access Decision is made pursuant to a recommendation of the Committee and a 100-percent Vote, in which case it is again subject to override by the FCA), by so ordering at any time.

Section 6.07. *Notice to FCA of Intent to File Continued Access Request.* A Bank that receives notice that it is in Category III shall advise the FCA, within 10 days of receiving such notice, whether it intends to file a Continued Access Request.

ARTICLE VII—OTHER

Section 7.01. *Conditions Precedent.* This Restated MAA shall go into effect on January 1, 2017, *provided, however*, that on or before January 31, 2017 each

Party has executed a certificate in substantially the form of Attachment 3 hereto that all of the following conditions precedent have been satisfied: (a) the delivery to the Banks of an opinion by an outside law firm reasonably acceptable to all of the Parties and in substantially the form of Attachment 4 hereto, (b) the delivery to the Funding Corporation of an opinion by an outside law firm reasonably acceptable to all of the Parties and in substantially the form of Attachment 5 hereto, (c) adoption by each of the Banks and the Funding Corporation of a resolution in substantially the form of Attachment 6 hereto, (d) action by the Insurance Corporation, through its board, expressing its support for this Restated MAA, and (e) action by FCA, through its board, approving this Restated MAA pursuant to section 4.2(c) and (d) of the Act, and (without necessarily expressing any view as to the proper interpretation of section 4.9(b)(2) of the Act) approving this Restated MAA pursuant to section 4.9(b)(2) of the Act insofar as such approval may be required, which action shall (i) indicate that the entry into and compliance with this Restated MAA by the Funding Corporation fully satisfy such obligations as the Funding Corporation may have with respect to establishing "conditions of participation" for market access under section 4.9(b)(2), and (ii) contain no reservations or other conditions or qualifications except for those which may be specifically agreed to by the Funding Corporation's board of directors and the other Parties.

Upon execution of its certificate, each Party shall forward a copy to the Funding Corporation, attn. General Counsel, which shall advise all other Parties when a complete set of certificates is received.

If this Restated MAA becomes effective in accordance with this Section 7.01, the Second Restated MAA shall be amended and restated by this Restated MAA as of that date without further action of the Parties. If any term, provision, covenant or restriction of this Restated MAA is held by a court of competent jurisdiction or other authority to be invalid, void or unenforceable, the remainder of the terms, provisions, covenants and restrictions of this Restated MAA shall remain in full force and effect and shall in no way be affected, impaired or invalidated. If any term, provision, covenant or restriction of this Restated MAA that purports to amend a term, provision, covenant or restriction of the Original Agreement, the First Restated MAA or the Second Restated MAA is

held by a court of competent jurisdiction or other authority to be invalid, void or unenforceable, such term, provision, covenant or restriction of the Original Agreement, the First Restated MAA or the Second Restated MAA shall be considered to have continued and to be continuing in full force and effect at all times since this Restated MAA has purported to be in effect. The Parties agree that notwithstanding the occurrence of any of the foregoing events they will treat, to the maximum extent permitted by law, all actions theretofore taken pursuant to this Restated MAA as valid and binding actions of the Parties.

Section 7.02. *Representations and Warranties.* Each Party represents and warrants to the other Parties that (a) it has duly executed and delivered this Restated MAA, (b) its performance of this Restated MAA in accordance with its terms will not conflict with or result in the breach of or violation of any of the terms or conditions of, or constitute (or with notice or lapse of time or both constitute) a default under any order, judgment or decree applicable to it, or any instrument, contract or other agreement to which it is a party or by which it is bound, (c) it is duly constituted and validly existing under the laws of the United States, (d) it has the corporate and other authority, and has obtained all necessary approvals, to enter into this Restated MAA and perform all of its obligations hereunder, and (e) its performance of this Restated MAA in accordance with its terms will not conflict with or result in the breach of or violation of any of the terms or conditions of, or constitute (or with notice or lapse of time or both constitute) a default under its charter (with respect to the Banks), or its bylaws.

Section 7.03. *Additional Covenants.*

(a) Each Bank agrees to notify the other Parties and the Scorekeeper if, at any time, it anticipates that within the following 3 months it will come to be in Category I, Category II or Category III, or will move from one Category to another.

(b) Whenever a Bank is subject to Final Restrictions, a Final Prohibition, Category II Interim Restrictions, Category III Interim Restrictions, or a Continued Access Decision, the Committee shall promptly so notify the Funding Corporation, and the Funding Corporation shall take all necessary steps to ensure that the Bank participates in issues of Debt Securities only to the extent permitted thereunder. The Funding Corporation may rely on the determination of the Committee as to whether a Bank has complied with a

condition to a Continued Access Decision.

(c) Each Bank agrees that it will not at any time that it is in Category I, Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and will not without 12-months' prior notice to all other Banks and the Funding Corporation at any other time, either (i) withdraw, or (ii) modify, in a fashion that would impede the issuance of Debt Securities, the funding resolution it has adopted pursuant to section 4.4(b) of the Act. Should a violation of this covenant be asserted, and should the Bank deny same, the funding resolution shall be deemed still to be in full effect, without modification, until arbitration of the matter is completed, and each Bank, by entering into this Restated MAA, consents to emergency injunctive relief to enforce this provision. Nothing in this Restated MAA shall be construed to restrict any Party's ability to take the position that a Bank's withdrawal or modification of its funding resolution is not authorized by law.

(d) Each Bank agrees that it will not at any time that it is in Category I, Category II or Category III, as indicated in the most recent notice from the Scorekeeper under Section 1.09, and will not without 12-months' prior notice to all other Banks and the System Disclosure Agent at any other time, fail to report information to the System Disclosure Agent pursuant to the Disclosure Program for the issuance of Debt Securities and for the System Disclosure Agent to have a reasonable basis for making disclosures pursuant to the Disclosure Program. Should the System Disclosure Agent assert a violation of this covenant, and should the Bank deny same, the Bank shall furnish such information as the System Disclosure Agent shall request until arbitration of the matter is completed, and each Bank, by entering into this Restated MAA, consents to emergency injunctive relief to enforce this provision. Nothing in this Restated MAA shall be construed to restrict the ability of the System Disclosure Agent to comply with its obligations under the securities laws or other applicable law or regulations with regard to disclosure to investors.

(e) Without implying that suit may be brought on any other matter, each Bank and the Funding Corporation specifically agree not to bring suit to challenge this Restated MAA or to challenge any Final Prohibition, Final Restrictions, Category II Interim Restrictions, Category III Interim Restrictions, Continued Access Decision, denial of a Continued Access

Request or recommendation of the Committee with respect to a Continued Access Request arrived at in accordance with this Restated MAA. This provision shall not be construed to preclude judicial actions under the U.S. Arbitration Act, 9 U.S.C. sections 1–15, to enforce or vacate arbitration decisions rendered pursuant to Section 7.08, or for an order that arbitration proceed pursuant to Section 7.08.

(f) The Funding Corporation agrees that it will not reinstitute the Market Access and Risk Alert Program, or adopt a similar such program for so long as both (i) this Restated MAA is in effect and (ii) section 4.9(b)(2) of the Act is not amended in a manner which would require, nor is there any other change in applicable law or regulations which would require, the Funding Corporation to establish "conditions of participation" different from those contained in this Restated MAA. Should the condition described in (ii) no longer apply and the Funding Corporation adopt a market access program, this Restated MAA shall be deemed terminated. All Banks reserve the right to argue, if the conditions described in clauses (i) or (ii) of the preceding sentence should no longer apply and the Funding Corporation should adopt such a program, that any such program adopted by the Funding Corporation is contrary to law, either because section 4.9(b)(2) of the Act does not authorize such a program, or for any other reason, and the entry by any Bank into this Restated MAA shall not be construed as waiving such right.

(g) It is expressly agreed that the Original Agreement, the FCA approval of the Original Agreement, the First Restated MAA, the Second Restated MAA and the FCA approval of this Restated MAA do not provide any grounds for challenging the FCA or Insurance Corporation actions with respect to the creation of or the conduct of receiverships or conservatorships. Without limiting the preceding statement, each Bank specifically and expressly agrees and acknowledges that it cannot, and agrees that it shall not, attempt to challenge the FCA's appointment of a receiver or conservator for itself or any other System institution or the FCA's or the Insurance Corporation's actions in the conduct of any receivership or conservatorship (i) on the basis of this Restated MAA or the FCA's approval of this Restated MAA; or (ii) on the grounds that Category II Interim Restrictions, Final Restrictions, Category III Interim Restrictions, or Final Prohibitions were or were not imposed, whether by reason of the FCA's or the Insurance Corporation's

action or inaction or otherwise. The Banks jointly and severally agree that they shall indemnify and hold harmless the FCA and the Insurance Corporation against all costs, expenses, and damages, including without limitation, attorneys' fees and litigation costs, resulting from any such challenge by any Party.

Section 7.04. *Termination.* This Restated MAA shall terminate upon the earliest of (i) December 31, 2025, (ii) an earlier date if so agreed in writing by 100-percent Vote of the Banks, or (iii) in the event that all Banks shall be in either Category II or Category III. Commencing a year before December 31, 2025, the Parties shall meet to consider its extension. Except as provided in Section 7.03(f), it is understood that the termination of this Restated MAA shall not affect (i) any rights and obligations of the Funding Corporation under section 4.9(b)(2) of the Act, and (ii) any Bank's rights pursuant to any Final Restrictions, a Final Prohibition, Category II Interim Restrictions, Category III Interim Restrictions, or a Continued Access Decision then-in-effect.

Section 7.05. *Periodic Review.* Commencing every third anniversary of the effective date of this Restated MAA, beginning January 1, 2020, and at such more frequent intervals as the Parties may agree, the Banks and the Funding Corporation, through their boards of directors, shall conduct a formal review of this Restated MAA and consider whether any amendments to it are appropriate. In connection with such review, the Committee shall report to the boards on the operation of the Restated MAA and recommend any amendments it considers appropriate.

Section 7.06. *Confidentiality.* The Parties may disclose this Restated MAA and any amendments to it and any actions taken pursuant to this Restated MAA to restrict or prohibit borrowing by a Bank. All other information relating to this Restated MAA shall be kept confidential and shall be used solely for purposes of this Restated MAA, except that, to the extent permitted by applicable law and regulations, such information may be disclosed by (a) the System Disclosure Agent under the Disclosure Program, (b) a Bank, upon coordination of such disclosure with the System Disclosure Agent, as the Bank deems appropriate for purposes of the Bank's disclosures to borrowers or shareholders; (c) a Bank as deemed appropriate for purposes of disclosure to transacting parties (subject, to the extent the Bank reasonably can obtain such agreement, to such a transacting party's agreeing to keep the information

confidential) of material information relating to that Bank, or (d) any Party in order to comply with legal or regulatory obligations. Notwithstanding the preceding sentence, the Parties shall make every effort, to the extent consistent with legal requirements, securities disclosure obligations and other business necessities, to preserve the confidentiality of information provided to the Committee by a Bank and designated as "Proprietary and Confidential." Any expert or consultant retained in connection with this Restated MAA shall execute a written undertaking to preserve the confidentiality of any information received in connection with this Restated MAA. Notwithstanding the foregoing, nothing in this Restated MAA shall prevent Parties from disclosing information to the FCA or the Insurance Corporation.

Section 7.07. *Amendments.* This Restated MAA may be amended only by the written agreement of all the Parties.

Section 7.08. *Dispute Resolution.* All disputes between or among Parties relating to this Restated MAA shall be submitted to final and binding arbitration pursuant to the U.S. Arbitration Act, 9 U.S.C. sections 1–15, *provided, however*, that any recommendation by the Committee regarding a Continued Access Request (including, if the recommendation is to grant the Request, recommendations as to the expiration date of the Continued Access Decision and as to any conditions to be imposed on the Decision), and any vote by a Bank on a Continued Access Request, shall be final and not subject to arbitration. Arbitrations shall be conducted under the Commercial Arbitration Rules of the American Arbitration Association before a single arbitrator. An arbitrator shall be selected within 14 days of the initiation of arbitration by any Party, and the arbitrator shall render a decision within 30 days of his or her selection, or as otherwise agreed to by the parties thereto.

Section 7.09. *Governing Law.* This Restated MAA shall be governed by and construed in accordance with the Federal laws of the United States of America, and, to the extent of the absence of Federal law, in accordance with the laws of the State of New York excluding any conflict of law provisions that would cause the law of any jurisdiction other than New York to be applied; *provided, however*, that in the event of any conflict between the U.S. Arbitration Act and applicable Federal or New York law, the U.S. Arbitration Act shall control.

Section 7.10. *Notices.* Any notices required or permitted under this Restated MAA shall be in writing and shall be deemed given if delivered in person or by a nationally recognized overnight courier, in each case addressed as follows, unless such address is changed by written notice hereunder:

To AgFirst Farm Credit Bank: AgFirst Farm Credit Bank, 1901 Main Street, Columbia, SC 29201, Attention: President and Chief Executive Officer.
To AgriBank, FCB: AgriBank, FCB, 30 East 7th Street, Suite 1600, St. Paul, MN 55101, Attention: President and Chief Executive Officer.
To CoBank, ACB: CoBank, ACB, 6340 S. Fiddlers Green Circle, Greenwood Village, CO 80111, Attention: President and Chief Executive Officer
To the Farm Credit Bank of Texas: Farm Credit Bank of Texas, 4801 Plaza on the Lake Drive, Austin, TX 78746, Attention: President and Chief Executive Officer
To Federal Farm Credit Banks Funding Corporation: Federal Farm Credit Banks Funding Corporation, 101 Hudson Street, Suite 3505, Jersey City, NJ 07302, Attention: President and Chief Executive Officer
To the Farm Credit System Insurance Corporation: Farm Credit System Insurance Corporation, 1501 Farm Credit Drive, McLean, Virginia 22102, Attention: Chair
To the Farm Credit Administration: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090, Attention: Chair
To the CIPA Oversight Body: At such address and e-mail address as shall be supplied to the Parties from time to time by the Chairman of the CIPA Oversight Body.
To the Committee: At such address and e-mail address as shall be supplied by the Committee, which the Committee shall promptly transmit to each Party.

Any notice sent by the courier shall be deemed given 1 Business Day after depositing with the overnight courier. Any notice given in person, or by e-mail shall be deemed given instantaneously.

Section 7.11. *Headings; Conjunctive/Disjunctive; Singular/Plural.* The headings of any article or section of this Restated MAA are for convenience only and shall not be used to interpret any provision of the Restated MAA. Uses of the conjunctive include the disjunctive, and vice versa, unless the context clearly requires otherwise. Uses of the singular include the plural, and vice versa, unless the context clearly requires otherwise.

Section 7.12. *Successors and Assigns.* Except as provided in the definitions of

“Bank” and “Banks” in Article IX, this Restated MAA shall inure to the benefit of and be binding upon the successors and assigns of the Parties, including entities resulting from the merger or consolidation of one or more Banks.

Section 7.13. *Counterparts.* This Restated MAA, and any document provided for hereunder, may be executed in one or more counterparts. Transmission by facsimile or other form of electronic transmission of an executed counterpart of this Restated MAA shall be deemed to constitute due and sufficient delivery of such counterpart.

Section 7.14. *Waiver.* Any provision of this Restated MAA may be waived, but only if such waiver is in writing and is signed by all Parties to this Restated MAA.

Section 7.15. *Entire Agreement.* Except as provisions of CIPA are cited in this Restated MAA (which provisions are expressly incorporated herein by reference), this Restated MAA sets forth the entire agreement of the Parties and supersedes all prior understandings or agreements, oral or written, among the Parties with respect to the subject matter hereof.

Section 7.16. *Relation to CIPA.* This Restated MAA and CIPA are separate agreements, and invalidation of one does not affect the other. Should CIPA be invalidated or terminated, the Parties will take the necessary steps to maintain those aspects of CIPA that are referred to in Sections 1.01, 1.02 and 1.03 of this Restated MAA, and to replace the CIPA Oversight Body for purposes of continued administration of this Restated MAA.

Section 7.17. *Third Parties.* Except as provided in sections 2.10, 3.03, 7.03(g), 7.21 and 7.22, this Restated MAA is for the benefit of the Parties and their respective successors and assigns, and no rights are intended to be, or are, created hereunder for the benefit of any third party.

Section 7.18. *Time Is Of The Essence.* Time is of the essence in interpreting and performing this Restated MAA.

Section 7.19. *Statutory Collateral Requirement.* Nothing in this Restated MAA shall be construed to permit a Bank to participate in issues of Debt Securities or other obligations if it does not satisfy the collateral requirements of section 4.3(c) of the Act. For purposes of this Section, “Bank” shall include any System bank in conservatorship or receivership.

Section 7.20. *Termination of System Status.* Nothing in this Restated MAA shall be construed to preclude a Bank from terminating its status as a System institution pursuant to section 7.10 of

the Act, or from at that time withdrawing, as from that time forward, the funding resolution it has adopted pursuant to section 4.4(b) of the Act. A Bank that terminates its System status shall cease to have any rights or obligations under this Restated MAA, except that it shall continue to be subject to Article VIII with respect to claims accruing through the date of such termination of System status.

Section 7.21. *Restrictions Concerning Subsequent Litigation.* It is expressly agreed by the Banks that (a) characterization or categorization of Banks, (b) information furnished to the Committee or other Banks, and (c) discussions or decisions of the Banks or Committee under this Restated MAA shall not be used in any subsequent litigation challenging the FCA’s or the Insurance Corporation’s action or inaction.

Section 7.22. *Effect of this Agreement.* Neither this Restated MAA nor the FCA approval hereof shall in any way restrict or qualify the authority of the FCA or the Insurance Corporation to exercise any of the powers, rights, or duties granted by law to the FCA or the Insurance Corporation.

Section 7.23. *Relationship to the Joint and Several Liability Reallocation Agreement.* This Restated MAA and the Joint and Several Liability Reallocation Agreement are separate agreements, and invalidation of one does not affect the other.

ARTICLE VIII—INDEMNIFICATION

Section 8.01. *Definitions.* As used in this Article VIII:

(a) “Indemnified Party” means any Bank, the Funding Corporation, the Committee, the Scorekeeper, or any of the past, present or future directors, officers, stockholders, employees or agents of the foregoing.

(b) “Damages” means any and all losses, costs, liabilities, damages and expenses, including, without limitation, court costs and reasonable fees and expenses of attorneys expended in investigation, settlement and defense (at the trial and appellate levels and otherwise), which are incurred by an Indemnified Party as a result of or in connection with a claim alleging liability to any non-Party for actions taken pursuant to or in connection with this Restated MAA. Except to the extent otherwise provided in this Article VIII, Damages shall be deemed to have been incurred by reason of a final settlement or the dismissal with prejudice of any such claim, or the issuance of a final non-appealable order by a court of competent jurisdiction which ultimately

disposes of such a claim, whether favorably or unfavorably.

Section 8.02. *Indemnity.* To the extent consistent with governing law, the Banks, jointly and severally, shall indemnify and hold harmless each Indemnified Party against and in respect of Damages, *provided, however*, that an Indemnified Party shall not be entitled to indemnification under this Article VIII in connection with conduct of such Indemnified Party constituting gross negligence, willful misconduct, intentional tort or criminal act, or in connection with civil money penalties imposed by the FCA. In addition, the Banks, jointly and severally, shall indemnify an Indemnified Party for all costs and expenses (including, without limitation, fees and expenses of attorneys) incurred reasonably and in good faith by an Indemnified Party in connection with the successful enforcement of rights under any provision of this Article VIII.

Section 8.03. *Advancement of Expenses.* The Banks, jointly and severally, shall advance to an Indemnified Party, as and when incurred by the Indemnified Party, all reasonable expenses, court costs and attorneys’ fees incurred by such Indemnified Party in defending any proceeding involving a claim against such Indemnified Party based upon or alleging any matter that constitutes, or if sustained would constitute, a matter in respect of which indemnification is provided for in Section 8.02, so long as the Indemnified Party provides the Banks with a written undertaking to repay all amounts so advanced if it is ultimately determined by a court in a final non-appealable order or by agreement of the Banks and the Indemnified Party that the Indemnified Party is not entitled to be indemnified under Section 8.02.

Section 8.04. *Assertion of Claim.*

(a) Promptly after the receipt by an Indemnified Party of notice of the assertion of any claim or the commencement of any action against him, her or it in respect of which indemnity may be sought against the Banks hereunder (an “Assertion”), such Indemnified Party shall apprise the Banks, through a notice to each of them, of such Assertion. The failure to so notify the Banks shall not relieve the Banks of liability they may have to such Indemnified Party hereunder, except to the extent that failure to give such notice results in material prejudice to the Banks.

(b) Any Bank receiving a notice under paragraph (a) shall forward it to the Committee (which, if not in existence, shall be formed at the instance of such

Bank to consider the matter). The Banks, through the Committee, shall be entitled to participate in, and to the extent the Banks, through the Committee, elect in writing on 30-days' notice, to assume, the defense of an Assertion, at their own expense, with counsel chosen by them and satisfactory to the Indemnified Party. Notwithstanding that the Banks, through the Committee, shall have elected by such written notice to assume the defense of any Assertion, such Indemnified Party shall have the right to participate in the investigation and defense thereof, with separate counsel chosen by such Indemnified Party, but in such event the fees and expenses of such separate counsel shall be paid by such Indemnified Party and shall not be subject to indemnification by the Banks unless (i) the Banks, through the Committee, shall have agreed to pay such fees and expenses, (ii) the Banks shall have failed to assume the defense of such Assertion and to employ counsel satisfactory to such Indemnified Party, or (iii) in the reasonable judgment of such Indemnified Party, based upon advice of his, her or its counsel, a conflict of interest may exist between the Banks and such Indemnified Party with respect to such Assertion, in which case, if such Indemnified Party notifies the Banks, through the Committee, that such Indemnified Party elects to employ separate counsel at the Banks' expense, the Banks shall not have the right to assume the defense of such Assertion on behalf of such Indemnified Party. Notwithstanding anything to the contrary in this Article VIII, neither the Banks, through the Committee, nor the Indemnified Party shall settle or compromise any action or consent to the entering of any judgment (x) without the prior written consent of the other, which consent shall not be unreasonably withheld, and (y) without obtaining, as an unconditional term of such settlement, compromise or consent, the delivery by the claimant or plaintiff to such Indemnified Party of a duly executed written release of such Indemnified Party from all liability in respect of such Assertion, which release shall be satisfactory in form and substance to counsel to such Indemnified Party. The Funding Corporation shall not be entitled to vote on actions by the Committee under this paragraph (b) or Section 8.08.

Section 8.05. *Remedies; Survival.* The indemnification, rights and remedies provided to an Indemnified Party under this Article VIII shall be (i) in addition to and not in substitution for any other rights and remedies to which any of the Indemnified Parties may be entitled,

under any other agreement with any other Person, or otherwise at law or in equity, and (ii) provided prior to and without regard to any other indemnification available to any Indemnified Party. This Article VIII shall survive the termination of this Restated MAA.

Section 8.06. *No Rights in Third Parties.* This Restated MAA shall not confer upon any Person other than the Indemnified Party any rights or remedies of any nature or kind whatsoever under or by reason of the indemnification provided for in this Article VIII.

Section 8.07. *Subrogation; Insurance.* Upon the payment by the Banks to an Indemnified Party of any amounts for which an Indemnified Party shall be entitled to indemnification under this Article VIII, if the Indemnified Party shall also have the right to recover such amount under any commercial insurance, the Banks shall be subrogated to such rights to the extent of the indemnification actually paid. Where coverage under such commercial insurance may exist, the Indemnified Party shall promptly file and diligently pursue a claim under said insurance. Any amounts paid pursuant to such claim shall be refunded to the Banks to the extent the Banks have provided indemnification payments under this Article VIII, *provided, however*, that recovery under such insurance shall not be deemed a condition precedent to the indemnification obligations of the Banks under this Article VIII.

Section 8.08. *Sharing in Costs.* The Banks shall share in the costs of any indemnification payment hereunder as the Committee shall determine.

ARTICLE IX—DEFINITIONS

The following definitions are used in this Restated MAA:

"Act" means the Farm Credit Act of 1971, 12 U.S.C. section 2001, *et seq.*, as amended from time to time, or any successors thereto.

The "Additional Restrictions" are that a Bank (a) shall manage its asset/liability mix so as not to increase, and, to the extent possible, so as to reduce or eliminate, any Interest-Rate Sensitivity Deduction in its Net Composite Score, and (b) shall not increase the dollar amount of any liabilities, or take any action giving rise to a lien or pledge on its assets, senior to its liability on Debt Securities other than (i) tax liabilities and secured liabilities arising in the ordinary course of business through activities other than borrowing, such as mechanic's liens or judgment liens, and (ii) secured liabilities, or an action giving rise to such a lien or pledge,

incurred in the ordinary course of business as the result of issuing secured debt or entering into repurchase agreements, *provided, however*, that such debt issuances and agreements may be undertaken to the extent that the proceeds therefrom are used to repay the principal of outstanding Debt Securities and the value of the collateral securing the debt issuances or the agreements (computed in the same manner as provided under section 4.3(c) of the Act) does not exceed the amount of principal so repaid.

"Associations" means agricultural credit associations, federal land bank associations, Federal land credit associations and production credit associations.

"Average Net Composite Score" is defined in Section 1.03.

"Bank" means a bank (including its consolidated subsidiaries) of the Farm Credit System, other than (except where noted) any bank in conservatorship or receivership (and its consolidated subsidiaries).

"Banks" means the banks (including their consolidated subsidiaries) of the Farm Credit System, other than (except where noted) any banks in conservatorship or receivership (and their consolidated subsidiaries).

"Business Day" means any day other than a Saturday, Sunday or Federal holiday.

"Business Plan" means the business plan required under 12 CFR 618.8440, as amended from time to time, or any successors thereto.

"Category" means Category I, Category II, or Category III, as the circumstances require.

"Category I" is defined in Section 1.05.

"Category II" is defined in Section 1.06.

"Category II Interim Restrictions" means the requirements set forth in Section 4.02.

"Category III" is defined in Section 1.07.

"Category III Interim Restrictions" means the requirements set forth in Section 5.02.

"CIPA" means that certain Amended and Restated Contractual Interbank Performance Agreement among the Banks of the Farm Credit System and the Federal Farm Credit Banks Funding Corporation, the Scorekeeper, dated as of June 30, 2011, as amended from time to time, or any successor thereto.

"CIPA Oversight Body" is defined in Section 1.02.

"Collateral" is defined as in section 4.3(c) of the Act and the regulations thereunder, as amended from time to time, or any successors thereto.

The "Committee" is defined in Section 2.01.

"Continued Access Decision(s)" means a decision, subject to the procedures, terms and conditions described in Article VI, that Final Restrictions or a Final Prohibition not go into effect, or be lifted.

"Continued Access Request" means a request for a Continued Access Decision.

"Days" means calendar days, unless the term Business Days is used.

"Debt Securities" means System-wide and consolidated obligations issued through the Funding Corporation, within the meaning of sections 4.2(c), 4.2(d) and 4.9 of the Act.

"Disclosure Program" means the program established, pursuant to resolutions of the Banks and the Funding Corporation as approved on December 6, 2007 and amended in 2008, 2011 and 2013, for disclosure at the System-wide level of financial and other information in connection with the issuance of Debt Securities, as amended from time to time, or any successor thereto.

"FCA" means the Farm Credit Administration.

"Final Prohibition" means the requirements set forth in Section 5.01.

"Final Restrictions" means the requirements set forth in Section 4.01.

"First Restated MAA" means that certain Amended and Restated Market Access Agreement, dated July 1, 2003, among the Banks and the Funding Corporation.

"Funding Corporation" means the Federal Farm Credit Banks Funding Corporation.

"Going Concern" means an entity that is able to continue as a going concern as set forth in Financial Accounting Standards Board Accounting Standards Update 2014-15.

"Insurance Corporation" means the Farm Credit System Insurance Corporation.

"Insurance Fund" means the Farm Credit Insurance Fund maintained by the Insurance Corporation pursuant to section 5.60 of the Act.

"Interest-Rate Sensitivity Deduction" is defined as in Article II of CIPA, and the Model referred to therein, as amended from time to time, or any successor thereto.

"Joint and Several Liability Reallocation Agreement" means that certain Joint and Several Liability Reallocation Agreement among the Banks and the Funding Corporation.

"Liquidity Deficiency Deduction" is defined as in Article II of CIPA, and the Model referred to therein, as amended from time to time, or any successor thereto.

"Model" means the term Model as it is defined in the CIPA.

"Net Composite Score" is defined in Section 1.03.

"100-Percent Vote" means an affirmative vote, through each voting Bank's board of directors or its designee, of all Banks that are entitled to vote on a matter.

"Original Agreement" means that certain Market Access Agreement, dated September 1, 1994 and effective as of November 23, 1994, among the Banks and the Funding Corporation.

"Parties" mean the parties to this Restated MAA. A bank in conservatorship or receivership is not a party to this Restated MAA.

"Person" means any human being, partnership, association, joint venture, corporation, legal representative or trust, or any other entity.

"Ratio(s)" means either the Tier 1 Leverage Ratio, or Total Capital Ratio, as the circumstances require.

"Second Restated MAA" means that certain Second Amended and Restated Market Access Agreement, dated December 14, 2011, among the Banks and the Funding Corporation.

"Scorekeeper" is defined in Section 1.01.

"System" means the Farm Credit System.

"System Disclosure Agent" means the Funding Corporation or such other disclosure agent as all Banks shall unanimously agree upon, to the extent permitted by law or regulation. For purposes of this definition, "Banks" shall include any System bank in conservatorship or receivership.

"Tier 1 Leverage Ratio" is defined in 12 CFR 628.10(c)(4).

"Total Capital Ratio" is defined in 12 CFR 628.10(c)(3).

In witness whereof, the Parties have caused this Restated Agreement to be executed by their duly authorized officers as of the date first above written.

[end of Draft Third Amended and Restated MAA]

Dated: January 12, 2017.

Dale L. Aultman,

Secretary, Farm Credit Administration Board.

[FR Doc. 2017-01054 Filed 1-17-17; 8:45 am]

BILLING CODE 6705-01-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 13, 2017.

A. Federal Reserve Bank of Atlanta (Chapelle Davis, Assistant Vice President) 1000 Peachtree Street NE., Atlanta, Georgia 30309. Comments can also be sent electronically to Applications.Comments@atl.frb.org:

1. *People Independent Bancshares, Inc.*, Boaz, Alabama; to acquire 100

percent of the outstanding shares of Horizon Bank, Fyffe, Alabama.

Board of Governors of the Federal Reserve System, January 12, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

[FR Doc. 2017-01045 Filed 1-17-17; 8:45 am]

BILLING CODE 6210-01-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than February 1, 2017.

A. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001:

1. *Dennis Schardt, Kearney, Nebraska; Brian Schardt, Grand Island, Nebraska; and Christina Nokelby, Marquette, Nebraska*; to acquire voting shares of Bank Management, Inc., and thereby acquire shares of First Bank of Nebraska, both of Wahoo, Nebraska. In addition, Christina Nokelby Trust No. 2, Kimberly Schardt Porter Trust No. 2, Rebecca Rathjen Trust No. 2, Brian Schardt Trust No. 2, Brian Schardt, Kimberly Schardt Porter, Rebecca Rathjen, Grand Island, Nebraska, and Christina Nokelby, Marquette, Nebraska, individually, and as trustees of the trusts listed, and Dennis Schardt, Kearney, Nebraska, for approval as members of the Schardt Family Group acting in concert, and thereby acquire shares of Bank Management, Inc.

Board of Governors of the Federal Reserve System, January 12, 2017.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210-01-P

GOVERNMENT ACCOUNTABILITY OFFICE

Request for Medicare Payment Advisory Commission Nominations

AGENCY: U.S. Government Accountability Office (GAO).

ACTION: Request for letters of nomination and resumes.

SUMMARY: The Balanced Budget Act of 1997 established the Medicare Payment Advisory Commission (MedPAC) and gave the Comptroller General responsibility for appointing its members. GAO is now accepting nominations for MedPAC appointments that will be effective May 1, 2017. Letters of nomination and resumes should be submitted no later than March 10, 2017 to ensure adequate opportunity for review and consideration of nominees prior to appointment of new members. Acknowledgement of submissions will be provided within a week of submission. Please contact Greg Giusto at (202) 512-8268 if you do not receive an acknowledgment.

ADDRESSES:

Email: MedPACappointments@gao.gov.

Mail: U.S. GAO, Attn: MedPAC Appointments, 441 G Street NW., Washington, DC 20548.

FOR FURTHER INFORMATION CONTACT: GAO Office of Public Affairs, (202) 512-4800. 42 U.S.C. 1395b-6.

Gene L. Dodaro,

Comptroller General of the United States.

BILLING CODE 1610-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC-2017-0003]

Notice of Availability of the Draft Programmatic Environmental Assessment (Draft PEA) for Mosquito Control Activities Funded by HHS/CDC To Combat Zika Virus Transmission in the United States

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of Availability; request for comment.

SUMMARY: The Centers for Disease Control and Prevention (CDC), within the Department of Health and Human

Services (HHS), is issuing this notice to request public comment on a draft Programmatic Environmental Assessment (Draft PEA) for mosquito control activities funded by HHS/CDC to Combat Zika Virus transmission in the United States. HHS/CDC prepared the draft PEA in accordance with the National Environmental Policy Act of 1969 (NEPA) as amended (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality (CEQ) implementing regulations (40 CFR parts 1500-1508) and the HHS General Administration Manual (GAM) Part 30 *Environmental Procedures*, dated February 25, 2000.

DATES: Written comments must be received on or before March 20, 2017.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2017-xxxx by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail:* Clint A. Liveoak, Deputy Director, Division of Issues Management, Analysis, and Coordination, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D13, Atlanta, GA 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

The draft PEA is available at HHS/CDC's Zika Web site, <https://www.cdc.gov/zika> and at the docket (www.regulations.gov). A copy of the draft PEA can also be requested from Clint A. Liveoak, Deputy Director, Division of Issues Management, Analysis, and Coordination, Centers for Disease Control and Prevention, 1600 Clifton Road, NE., MS-D13, Atlanta, GA 30329.

SUPPLEMENTARY INFORMATION: The Centers for Disease Control and Prevention (CDC), within the Department of Health and Human Services (HHS), has prepared a draft Programmatic Environmental Assessment (Draft PEA) to assess the potential impacts associated with supporting mosquito control activities funded by HHS/CDC to combat Zika Virus transmission in the United States. The Draft PEA analyzes the effect of the *Enhanced Support for Integrated Mosquito Management* (Proposed Alternative) and the *No Action Alternative*. The draft PEA evaluates the potential impacts to the environment

from the proposed activities and outlines the steps that would be taken to mitigate any adverse impacts and ensure that the public is informed prior to any actions in a specific location.

HHS/CDC will review all comments received to the docket and issue a final Programmatic Environmental Assessment that will be announced in the **Federal Register**.

Dated: January 12, 2017.

Lauren Hoffmann,

Acting Executive Secretary, Centers for Disease Control and Prevention.

[FR Doc. 2017-01027 Filed 1-17-17; 8:45 am]

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers CMS-10169]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by February 17, 2017.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured

consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395-5806 or Email: OIRA_submission@omb.eop.gov.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of the following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.
2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.
3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT:

Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a previously approved collection;

Title of Information Collection: Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Competitive Bidding Program; Change of Ownership Forms; *Use:* The MMA requires the Secretary to recompetes contracts not less often than once every 3 years. The Round 1 Rebid contract period for all product categories except mail-order diabetic supplies expired on December 31, 2013. (Round 1 Rebid contracts for mail-order diabetic testing supplies ended on December 31, 2012.) The competition

for the Round 1 Recompetes began in August of 2012. The Round 1 Recompetes contracts and prices became effective on January 1, 2014 and will expire on December 31, 2016. Round 2 and National Mail-Order contracts and prices will expire on June 30, 2016. The most recent approval for this information collection request (ICR) was issued by OMB on June 10, 2013. That ICR included the estimated burden to collect the information in bidding Forms A and B for the Round 1 Recompetes. We are now seeking approval to collect the information in Forms A and B for competitions that will occur before 2017. For these upcoming competitions CMS will publish a slightly modified version of the RFB instructions and accompanying Forms A and B so that suppliers will be better able to identify and understand the requirements of the program. We decided to modify the RFB instructions and forms based on our experience from the last round of competition. The end result is expected to produce more complete and accurate information to evaluate suppliers. No new collection requirements have been added to the modified RFB instructions or Form A or B. Finally, we are retaining without change the Change of Ownership (CHOW) Purchaser Form and the CHOW Contract Supplier Notification Form, the Subcontracting Disclosure Form, and Forms C, and D and their associated burden under this ICR. We intend to continue use of these Forms on an ongoing basis. *Form Number:* CMS-10169 (OMB Control Number: 0938-1016); *Frequency:* Yearly; *Affected Public:* Private Sector; Business or other for-profit, Not-for-profit institutions; *Number of Respondents:* 70,213; *Total Annual Responses:* 53,811; *Total Annual Hours:* 162,134. (For policy questions regarding this collection contact James Cowher at 410-786-1948)

Dated: January 12, 2017.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2017-D-0154]

Considerations in Demonstrating Interchangeability With a Reference Product; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “Considerations in Demonstrating Interchangeability With a Reference Product.” This guidance is intended to assist sponsors in demonstrating that a proposed therapeutic protein product (*proposed interchangeable product* or *proposed product*) is interchangeable with a reference product for the purposes of submitting a marketing application or supplement under the Public Health Service Act (PHS Act). This guidance is one in a series of guidances that FDA has developed to implement the Biologics Price Competition and Innovation Act of 2009 (BPCI Act).

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by March 20, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that

identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2017-D-0154 for “Considerations in Demonstrating Interchangeability With a Reference Product; Draft Guidance for Industry; Availability.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in

accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002; or to the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Sandra Benton, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6340, Silver Spring, MD 20993-0002, 301-796-1042; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Considerations in Demonstrating Interchangeability With a Reference Product.” This guidance is intended to assist sponsors in demonstrating that a proposed therapeutic protein product (*proposed interchangeable product* or *proposed product*) is interchangeable with a reference product for the purposes of submitting a marketing application or supplement under section 351(k) of the PHS Act (42 U.S.C. 262(k)). The BPCI Act amends the PHS Act and other statutes to create an

abbreviated licensure pathway in section 351(k) for biological products shown to be biosimilar to or interchangeable with an FDA-licensed biological reference product (see sections 7001 through 7003 of the Patient Protection and Affordable Care Act Of 2010 (Affordable Care Act) (Pub. L. 111-148)).

Section 351(k) of the PHS Act sets forth the requirements for an application for a proposed biosimilar product and an application or a supplement for a proposed interchangeable product. Specifically, section 351(k)(4) provides that upon review of an application submitted under section 351(k), or any supplement to such an application, FDA will determine the biological product to be interchangeable with the reference product if FDA determines that the information submitted in the application (or supplement) is sufficient to show that the biological product is biosimilar to the reference product and can be expected to produce the same clinical result as the reference product in any given patient; and for a biological product that is administered more than once to an individual, the risk in terms of safety or diminished efficacy of alternating or switching between use of the biological product and the reference product is not greater than the risk of using the reference product without such alternation or switch. Section 351(i) of the PHS Act states that the term *interchangeable* or *interchangeability*, in reference to a biological product that is shown to meet the standards described in subsection 351(k)(4), means that the biological product may be substituted for the reference product without the intervention of the health care provider who prescribed the reference product.

This guidance gives an overview of important scientific considerations in demonstrating interchangeability, including:

- The data and information needed to support a demonstration of interchangeability;
- Considerations for the design and analysis of a switching study or studies to support a demonstration of interchangeability;
- Recommendations regarding the use of U.S.-licensed reference products in a switching study or studies; and
- Considerations for developing presentations, container closure systems, and delivery device constituent parts for proposed interchangeable products.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115).

The draft guidance, when finalized, will represent the current thinking of FDA on topics sponsors should consider when seeking to demonstrate that a proposed therapeutic protein product is interchangeable with a reference product. It does not establish any rights for any person and is not binding on FDA or the public.

II. Topics for Comment

In addition to comment on the draft guidance, we also invite general comments on interchangeability, including comments on regulation of an interchangeable product over its lifecycle, as well as comments on the following topics:

1. Since the mid-1990s, FDA has approved manufacturing changes for biological products based on data from comparability assessments comparing the pre-change and post-change product using comparative analytical, and, when necessary, animal and/or clinical (e.g., pharmacokinetic, immunogenicity) studies. A demonstration of comparability between pre- and post-change product supports a determination that the safety and efficacy profile remains the same for the product. With respect to interchangeable products, are there considerations in addition to comparability assessments that FDA should consider in regulating post-approval manufacturing changes of interchangeable products? Your comments should include the scientific rationale and justification for your recommendations, as well as recommendations for processes and systems (including key logistics) to implement your recommendations.

2. As explained in the guidance "Considerations in Demonstrating Interchangeability With a Reference Product," FDA expects that sponsors seeking an interchangeability determination will submit data and information to support a showing that the proposed interchangeable product can be expected to produce the same clinical result as the reference product in all of the reference product's licensed conditions of use. How, if at all, should the Agency consider conditions of use that are licensed for the reference product after an interchangeable product has been licensed? Your comments should include the scientific rationale and justification for your recommendations, as well as recommendations for processes and systems (including key logistics) to implement your recommendations.

III. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3520). The collections of information under 21 CFR part 312 have been approved under OMB control number 0910-0014; the collections of information under 21 CFR part 601 have been approved under OMB control number 0910-0338; and the collections of information under section 351(k) of the PHS Act have been approved under OMB control number 0910-0719.

IV. Electronic Access

Persons with access to the Internet may obtain the draft guidance at <http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, <http://www.fda.gov/BiologicsBloodVaccines/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>, or <https://www.regulations.gov>.

Dated: January 12, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2016-P-2469]

Determination That SYMMETREL (Amantadine Hydrochloride), Syrup, 50 Milligrams/5 Milliliters, Was Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that SYMMETREL (amantadine hydrochloride), Syrup, 50 milligrams/5 milliliters (50 mg/5 mL), was not withdrawn from sale for reasons of safety or effectiveness. This determination means that FDA will not begin procedures to withdraw approval of abbreviated new drug applications (ANDAs) that refer to SYMMETREL, and it will allow FDA to continue to approve ANDAs that reference SYMMETREL if all other legal and regulatory requirements are met.

FOR FURTHER INFORMATION CONTACT:

Stefanie S. Kraus, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6215, Silver Spring, MD 20993-0002, 301-796-9585.

SUPPLEMENTARY INFORMATION: In 1984, Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) (the 1984 amendments), which authorized the approval of duplicate versions of drug products under an ANDA procedure. ANDA applicants must, with certain exceptions, show that the drug for which they are seeking approval contains the same active ingredient in the same strength and dosage form as the “listed drug,” which is a version of the drug that was previously approved. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

The 1984 amendments include what is now section 505(j)(7) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)(7)), which requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the “Approved Drug Products With Therapeutic Equivalence Evaluations,” which is known generally as the “Orange Book.” Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug’s NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, is the subject of NDAs 016023 and 017118, held by Endo Pharmaceuticals, and initially approved on February 14, 1968, and July 20, 1976, respectively. SYMMETREL is indicated for the prophylaxis and treatment of signs and symptoms of infection caused by various strains of influenza A virus. SYMMETREL is also indicated for the treatment of parkinsonism and drug-induced extrapyramidal reactions.

In a letter dated March 19, 2009, Endo Pharmaceuticals notified FDA that SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, was being discontinued and requested withdrawal of NDA016023 for that product. FDA moved the drug product to the “Discontinued Drug Product List” section of the Orange Book and announced in the **Federal Register** of July 21, 2010 (75 FR 42455), that FDA was withdrawing approval of NDA 016023, effective August 20, 2010.

Hyman, Phelps & McNamara submitted a citizen petition dated August 3, 2016 (Docket No. FDA-2016-P-2469), under 21 CFR 10.30, requesting that the Agency determine whether SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, was withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, was not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that this drug product was withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have reviewed the available evidence and determined that this drug product was not withdrawn from sale for reasons of safety or effectiveness.¹

Accordingly, the Agency will continue to list SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, in the “Discontinued Drug Product List” section of the Orange Book. The “Discontinued Drug Product List” delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. FDA will not begin procedures to withdraw approval of approved ANDAs that refer

¹ Due to high levels of resistance to currently circulating Influenza A viruses, the Centers for Disease Control and Prevention currently recommends against using amantadine to treat Influenza A. Given the potential for viral reassortment, however, amantadine may be effective against future Influenza A viruses. Consistent with this, the current label for SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, was revised to caution prescribers to consider susceptibility and clinical benefit when deciding whether to use amantadine to treat Influenza A.

to SYMMETREL. Additional ANDAs that refer to SYMMETREL (amantadine hydrochloride), Syrup, 50 mg/5 mL, may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: January 12, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2010-D-0026]

Assessment of Abuse Potential of Drugs; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a guidance for industry entitled “Assessment of Abuse Potential of Drugs.” This guidance is intended to assist sponsors of investigational new drugs and applicants for approval of a new drug in evaluating whether their new drug product has abuse potential. Specifically, this guidance provides recommendations for assessing the abuse potential of central nervous system (CNS)-active new drugs. Drug products with abuse potential generally contain drug substances that are active within the CNS and produce psychoactive effects such as euphoria and hallucinations. Thus, if a drug substance is CNS-active, the new drug product containing that drug substance will likely need to undergo a thorough assessment of its abuse potential and may be subject to control under the Controlled Substances Act (CSA). This guidance finalizes the draft guidance of the same name issued on January 27, 2010.

DATES: Submit either electronic or written comments on Agency guidances at any time.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2010-D-0026 for "Assessment of Abuse Potential of Drugs; Guidance for Industry; Availability." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS

CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT:

Dominic Chiapperino, Controlled Substance Staff, Center for Drug Evaluation and Research, Bldg. 51, Rm. 5148, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 301-796-1183.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled "Assessment of Abuse Potential of Drugs." Under the Federal Food, Drug, and Cosmetic Act, an abuse potential assessment is part of the general evaluation of the safety and efficacy of a new drug to be used under medical

supervision. Additionally, if a new drug has abuse potential, the Secretary of Health and Human Services (HHS) is required under the CSA (21 U.S.C. 801 *et seq.*) to make a recommendation for scheduling to the Drug Enforcement Administration (DEA). The regulatory responsibilities for this process are described in Title 21, United States Code (U.S.C.) 811. FDA, in consultation with the National Institute on Drug Abuse (NIDA) conducts the medical and scientific analysis on behalf of HHS. Specifically, the Controlled Substance Staff of FDA performs this scientific evaluation of the abuse potential of a drug for FDA, in consultation with NIDA, as described in a Memorandum of Understanding (MOU) of March 8, 1985 (50 FR 9518) (available at; <http://www.fda.gov/AboutFDA/PartnershipsCollaborations/MemorandaofUnderstandingMOUs/DomesticMOUs/ucm116365.htm>). When an applicant submits a New Drug Application (NDA) for a drug with abuse potential to FDA for review, the applicant is required to propose a CSA schedule for the new drug (21 CFR 314.50(d)(5)(vii)). The applicant's proposal is considered by the Agency during its evaluation of the drug's abuse potential. FDA prepares a scientific analysis with a recommendation for scheduling the drug under the CSA, as warranted, based on consideration of all relevant and available data. This recommendation is forwarded by the HHS Assistant Secretary for Health to DEA for their consideration in the decision on final scheduling of the drug.

Under new legislation enacted in 2015, the Improving Regulatory Transparency for New Medical Therapies Act (Pub. L. 114-89), upon receipt of both: (1) Notification from FDA that a marketing application has been approved by FDA and (2) the scheduling recommendation of HHS with respect to the subject drug in the marketing application, DEA shall within 90 days schedule the drug by rulemaking, thus establishing the effective date of approval for the drug product. See 21 U.S.C. 355(x); see also Public Law 114-89 (November 25, 2015). Control under Schedules II, III, IV, or V results in schedule-specific regulatory requirements relating to the drug's labeling, prescribing, dispensing, advertising, manufacturing, distribution, importation/exportation, promotion, marketing, and legitimate use in medical treatment. See generally 21 U.S.C. 821-831 and 21 CFR 1300-1321. Scheduling of a substance in the CSA is for the purpose of reducing abuse and diversion.

This guidance provides important recommendations to sponsors, applicants, and potential applicants in the approaches to collecting data that should comprise the abuse potential assessment submitted in the marketing application to FDA if one is required pursuant to § 314.50(d)(5)(vii).

In the **Federal Register** of January 27, 2010 (75 FR 4400), FDA issued the draft guidance for industry “Assessment of Abuse Potential of Drugs.” Based on the 2010 draft guidance, and consideration of comments received from the public, this guidance provides the Agency’s current thinking with respect to the scientific methods recommended to assess abuse potential. The guidance also adds more detailed discussion about key questions and decision points to consider during drug development that will likely determine the appropriate studies for sponsors and applicants to conduct to address the abuse potential of their new drug, inform appropriate labeling of the product upon its approval, and allow a thorough scientific and medical evaluation to support scheduling decisions in accordance with the CSA. In addition, this guidance takes into consideration other guidance issued and legislation enacted since 2010.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on assessment of abuse potential of drugs. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collection of information in part 314, including § 314.50(d)(5)(vii), has been approved under OMB control number 0910–0001. The collection of information in 21 CFR part 312 for investigational drugs has been approved under OMB control number 0910–0014. The collection of information in the guidance “Formal Meetings Between the FDA and Sponsors or Applicants of PDUFA Products” has been approved under OMB control number 0910–0429. The collection of information in 21 CFR 201.56 and 201.57, prescription drug labeling, has been approved under OMB control number 0910–0572. The collection of information in 21 CFR part

58, Good Laboratory Practice for Nonclinical Studies, has been approved under OMB control number 0910–0119.

III. Electronic Access

Persons with access to the Internet may obtain the guidance at either <http://www.fda.gov/Drugs/Guidance/ComplianceRegulatoryInformation/Guidances/default.htm> or <https://www.regulations.gov>.

Dated: January 12, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–D–0113]

The Prohibition of Distributing Free Samples of Tobacco Products; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “The Prohibition of Distributing Free Samples of Tobacco Products; Draft Guidance for Industry.” The draft guidance, when finalized, would provide information intended to assist manufacturers, distributors, and retailers in complying with the regulations prohibiting the distribution of free samples of tobacco products.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by February 17, 2017.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are

solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2017–D–0113 for “The Prohibition of Distributing Free Samples of Tobacco Products.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Division of Dockets

Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <http://www.fda.gov/regulatoryinformation/dockets/default.htm>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Submit written requests for single copies of the draft guidance to the Center for Tobacco Products, Food and Drug Administration, Document Control Center, Bldg. 71, Rm. G335, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist the office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Paul Hart or Samantha Loh Collado, Center for Tobacco Products, Food and Drug Administration, Document Control Center, Bldg. 71, Rm. G335, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002, 1–877–287–1373, AskCTP@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “The Prohibition of Distributing Free Samples of Tobacco Products; Draft Guidance for Industry.” Title 21 of the Code of Federal Regulations (CFR) section 1140.16(d)(1) prohibits, with a limited exception, tobacco product manufacturers, distributors, and retailers from distributing or causing to be distributed any free samples of cigarettes, smokeless tobacco, or other tobacco products. The draft guidance describes, among other things, how the prohibition of distributing free samples of tobacco products applies to non-monetary exchanges, coupons and

discounts, membership and rewards programs, contests and games of chance, and the business-to-business exchange of free samples. FDA requests that interested parties submit comments concerning its draft interpretation of the prohibition of distributing free samples.

II. Significance of Draft Guidance

FDA is issuing this draft guidance consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “The Prohibition of Distributing Free Samples of Tobacco Products.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons with access to the Internet may obtain an electronic version of the draft guidance at either <https://www.regulations.gov> or <http://www.fda.gov/TobaccoProducts/Labeling/RulesRegulationsGuidance/default.htm>.

Dated: January 11, 2017.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; NURSE Corps Loan Repayment Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB).

DATES: Comments on this ICR should be received no later than March 20, 2017.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N–39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: NURSE Corps Loan Repayment Program OMB No. 0915–0140—Revision

Abstract: The NURSE Corps Loan Repayment Program (NURSE Corps LRP), formerly known as the Nursing Education Loan Repayment Program, assists in the recruitment and retention of professional Registered Nurses (RNs), including advanced practice RNs (e.g., nurse practitioners, certified registered nurse anesthetists, certified nurse-midwives, clinical nurse specialists), dedicated to working at eligible health care facilities with a critical shortage of nurses (i.e., a Critical Shortage Facility) or working as nurse faculty in eligible, accredited schools of nursing, by decreasing the financial barriers associated with pursuing a nursing education. The NURSE Corps LRP provides loan repayment assistance to these nurses to repay a portion of their qualifying educational loans in exchange for full-time service at a public or private nonprofit Critical Shortage Facility or in an eligible, accredited school of nursing.

Need and Proposed Use of the Information: The need and purpose of this information collection is to obtain information for NURSE Corps LRP applicants and participants. The information is used to consider an applicant for a NURSE Corps LRP contract award and to monitor a participant’s compliance with the service requirements. Individuals must submit an application to participate in the program. The application asks for personal, professional, educational, and financial information required to determine the applicant’s eligibility to participate in the NURSE Corps LRP. The semi-annual employment verification form asks for personal and employment information to determine if a participant is in compliance with the service requirements. The Authorization to Release Employment Information form is now a self-certification within the NURSE Corps LRP application process with applicants clicking a box. This decreases the overall time burden by eliminating a form and not increasing

the “average” time required to complete the NURSE Corps LRP application.

Likely Respondents: Professional RNs or advanced practice RNs who are interested in participating in the NURSE Corps LRP, and official representatives at their service sites.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information

requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review

the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the tables below.

Total Estimated Annualized Burden Hours:

The estimates of reporting burden for applicants are as follows:

Instrument	Number of respondents	Responses/ respondents	Total responses	Hours per response	Total burden hours
NURSE Corps LRP Application *	5,500	1	5,500	2.0	11,000
Authorization to Release Information Form	5,500	1	5,500	.10	550
Total	5,500	11,000	11,550

* Please note that the burden hours associated with this instrument account for both new and continuation applications. Additional (uploaded) supporting documentation is included as part of this instrument and reflected in the burden hours.

The estimates of reporting burden for participants are as follows:

Instrument	Number of respondents	Responses/ respondents	Total responses	Hours per response	Total burden hours
Participant Semi-Annual Employment Verification Form	2,300	2	4,600	.5	2,300
Total	2,300	4,600	2,300
Total for Applicants and Participants	7,800	15,600	13,850

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jason E. Bennett,

Director, Division of the Executive Secretariat.

[FR Doc. 2017-00998 Filed 1-17-17; 8:45 am]

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Reimbursement Rates for Calendar Year 2017

AGENCY: Indian Health Service, HHS.

ACTION: Notice.

Notice is given that the Principal Deputy Director of the Indian Health Service (IHS), under the authority of sections 321(a) and 322(b) of the Public Health Service Act (42 U.S.C. 248 and

249(b)), Public Law 83-568 (42 U.S.C. 2001(a)), and the Indian Health Care Improvement Act (25 U.S.C. 1601 *et seq.*), has approved the following rates for inpatient and outpatient medical care provided by IHS facilities for Calendar Year 2017 for Medicare and Medicaid beneficiaries, beneficiaries of other Federal programs, and for recoveries under the Federal Medical Care Recovery Act (42 U.S.C. 2651-2653). The Medicare Part A inpatient rates are excluded from the table below as they are paid based on the prospective payment system. Since the inpatient per diem rates set forth below do not include all physician services and practitioner services, additional payment shall be available to the extent that those services are provided.

Inpatient Hospital Per Diem Rate (Excludes Physician/Practitioner Services)

Calendar Year 2017

Lower 48 States: \$2,933

Alaska: \$3,235

Outpatient Per Visit Rate (Excluding Medicare)

Calendar Year 2017

Lower 48 States: \$391

Alaska: \$616

Outpatient Per Visit Rate (Medicare)

Calendar Year 2017

Lower 48 States: \$349

Alaska: \$577

Medicare Part B Inpatient Ancillary Per Diem Rate

Calendar Year 2017

Lower 48 States: \$679

Alaska: \$1,046

Outpatient Surgery Rate (Medicare)

Established Medicare rates for freestanding Ambulatory Surgery Centers.

Effective Date for Calendar Year 2017 Rates

Consistent with previous annual rate revisions, the Calendar Year 2017 rates will be effective for services provided on/or after January 1, 2017, to the extent consistent with payment authorities including the applicable Medicaid State plan.

Dated: January 11, 2017.

Elizabeth A. Fowler,

Deputy Director for Management Operations, Indian Health Service.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Project: Assessment of the Communities Talk: Town Hall Meetings To Prevent Underage Drinking—(OMB No. 0930-0288)—Revision

The Substance Abuse and Mental Health Services Administration/Center for Substance Abuse Prevention (SAMHSA/CSAP) is requesting a revision from the Office of Management and Budget (OMB) of the information collection regarding the Assessment of the Communities Talk: Town Hall Meetings to Prevent Underage Drinking. The current data collection has approval under OMB No. 0930-0288, Assessment of the Town Hall Meetings on Underage Drinking Prevention, which expires on January 31, 2017. Revisions were made to the two existing data collection instruments: the Organizer Survey and the Participant Form (English and Spanish versions). SAMHSA is requesting to add a new data collection instrument titled the Organizer Survey—6 month Follow-up, in which hosts of the Communities Talk events will opt in to provide information on any actions that were taken as result of the Communities Talk event.

Changes

Under the current approval, the Organizer Survey consists of 30 items. Under this revision, the Organizer Survey includes 20 items about the Communities Talk event. The following table provides a summary of the proposed changes to the instrument.

Current question/item	Changes
Wording change for THM	Changed throughout to 'Communities Talk'.
q2—Location of event	Added Zip Code as a response option (new q2).
q4—Length of event	Question updated and entry field [(fill in)] (new q3),
q8—Other topics discussed (fill in)	Slight wording change of question; added the words 'non-alcohol-related' (What non-alcohol-related topics . . .); added as a secondary question to new q12.
q9—Promotion of the event	Dropped 'in the community' from the question and updated the response options (new q8).

Current question/item	Changes
q10—Number of event attendees	Provided clarification for physical and virtual attendees (new q9).
q13—Topics discussed at the event	Slight wording change of question; added the words 'alcohol-related' (. . . following alcohol-related topics . . .); response options updated (new q13).
q14—Use of materials from <i>www.stopalcoholabuse.gov</i>	Updated Web site address (new q17).
q16—Planned activities as a result of the event	Updated question and response options (new q15).
q17—Satisfaction with event	Question deleted.
q18/q19—Participation in event-related webinar and identification of that event.	Question deleted.
q20/q21—Viewing of online training and identification of that training	Question deleted.
q22—Utility of training to organization's prevention work	Updated lead-in to statements; updated wording to be properly aligned with the training and technical assistance performance measures for science and service activities (changed from . . . my organization's [to] . . . your organization's . . .) (new q18).
q23—Improved capacity due to the training received	Updated wording to be properly aligned with the training and technical assistance performance measures for science and service activities (added the word 'that' to . . . training that I received . . .) (new q18).
q24/q25—Technical assistance (TA) received and how submitted request for TA.	Question deleted.
q26—Utility of TA to organization's prevention work	Updated lead-in to statements; wording to be properly aligned with the training and technical assistance performance measures for science and service activities (changed from . . . my organization's . . . [to] . . . your organization's . . .) (new q18).
q27—Improved capacity due to the TA received	Updated wording to be properly aligned with the training and technical assistance performance measures for science and service activities (added the word 'that' to . . . TA that I received . . .) (new q18).
q28—Share additional information about event	Removed the word 'us' (. . . share with any other . . .) (new q19).
q29/q30—Data collected about event and sharing of data with SAMHSA, including information on where to send the data.	Updated questions and mailing information (new q20 and secondary question to new q20).

Three new questions were added pertaining to what influenced the decision to host an event (new q5), perception of how important UAD and its consequences is to the community (new q14), and agreement with mobilization actions statements (new q16).

The revisions were necessary to better align the data gathered to the short-term and long-term outcomes of the Communities Talk for event hosts, specifically—

Short-Term

- Increase utility of training
- Increase utility of technical assistance

Long-Term

- Increase national conversations about UAD
- Increase youth involvement in UAD
- Increase community mobilization for UAD prevention
- Increase organization capacity for prevention

- Increase use of evidence-based approaches to UAD prevention

Changes were also made to the Participant Form. Under the current approval, the Participant Form consists of 14 items. Under this revision, the Participant Form includes 17 items about the Communities Talk event. The following table provides a summary of the proposed changes to the instrument, in English and Spanish.

Current question/item	Changes
Wording change for THM	Changed throughout to 'Communities Talk'.
q2—Location of event	Added Zip Code as a response option (new q2).
q3—Most important UAD issues facing community	Question wording change and response options updated (new q3).
q5—Learn anything about UAD and its associated problems before attending the event.	Slight wording change of question, added the word 'new' (. . . learn anything new . . .) (new q5).
q7—Sharing of materials or lessons learned from the event	Response options updated (new q8).
q9—How will become more involved in decreasing UAD in community	Question wording change and response options updated (new q11).
q10—Gender	Updated to say 'sex' (new q13).
q13—Race	Updated order of response options (new q16).

Three new questions were added surrounding how often respondents are involved in UAD prevention in the community (new q9), likelihood will become more involved in UAD prevention in the community (new q10), and agreement with mobilization actions statements (new q12).

The revisions were necessary to better align the data gathered to the short-term and long-term outcomes of the Communities Talk, specifically—

Short-Term

- Increase knowledge of UAD prevention
- Increase intentions to share information on UAD prevention

Long-Term

- Increase national conversations about UAD
 - Increase youth involvement in UAD
 - Increase community mobilization for UAD prevention
- CBOs that opt in to be contacted 6 months after completing the Organizer

Survey for SAMHSA to follow up on any actions that were taken as a result of the Communities Talk event in their community will be provided with the Organizer Survey—6 month Follow-up. This survey will allow SAMHSA to measure progress towards the short- and long-term outcomes of the Communities Talk, specifically—

Short-Term

- Increase utility of training
- Increase utility of technical assistance

Long-Term

- Increase national conversations about UAD
- Increase youth involvement in UAD prevention
- Increase community mobilization for UAD prevention
- Increase capacity for prevention organizers
- Increase use of evidence-based approaches to UAD prevention

The Organizer Survey—6 month Follow-up consists of 13 items and captures information on—

- Where the Communities Talk event was held;
- Awareness of UAD activities that have taken place as a result of the event;
- Community mobilization and collaboration efforts;
- Perception of the importance of UAD and its consequences to the community; and
- Increase in youth involvement in UAD prevention activities in the community.

SAMHSA supports nationwide Communities Talk events every other year. Collecting data on each round of Communities Talk events, and using this information to inform policy and measure impact, supports SAMHSA's strategic initiative number 1: Prevention of substance use and mental illness. A specific goal under this initiative is to prevent or reduce the consequences of UAD and adult problem drinking; a

specific objective is to establish the prevention of UAD as a priority issue for states, territories, tribal entities, colleges and universities, and communities.

SAMHSA will use the information collected to document the implementation efforts of this nationwide initiative, determine if the federally sponsored Communities Talk events lead to additional activities within the community that are aimed at preventing and reducing UAD, identify what these activities may possibly include, and help plan for future rounds of Communities Talk events. SAMHSA intends to post online a summary document of each round of Communities Talk events and present findings at national conferences attended by CBOs that have hosted these events and might host future events. Similarly, SAMHSA plans to share findings with the Interagency Coordinating Committee on the Prevention of Underage Drinking. Agencies within this committee encourage their grantees to participate as the event hosts.

Additionally, the information collected will support performance measurement for SAMHSA programs under the Government Performance Results Act (GPRA).

Data Collection Component

SAMHSA/CSAP will use a web-based method to collect data through the

Organizer Survey and Organizer Survey—6 month Follow-up, and a paper-and-pencil approach to collect data through the Participant Form. The web-based application will comply with the requirements of Section 508 of the Rehabilitation Act to permit accessibility to people with disabilities.

Every 2 years, the Organizer Survey will be completed by an estimated 500 Communities Talk event organizers and will require only one response per respondent. It will take an average of 10 minutes (0.167 hours) to review the instructions and complete the survey. Similarly, the Organizer Survey—6 month Follow-up will be completed by an estimated 500 Communities Talk event organizers and will require only one response per respondent. It will take an average of 15 minutes (0.25 hours) to review the instructions and complete the survey. This burden estimate is based on comments from three 2016 Communities Talk event hosts who reviewed the survey and provided comments on how long it would take them to complete it.

The Participant Form will be completed by an average of 30 participants per sampled community-based organization (n=400) and will require only one response per respondent. It will take an average of 5 minutes (0.083 hours) to review the instructions and complete the form.

ESTIMATED ANNUALIZED BURDEN TABLE

Form name	Number of respondents	Responses per respondent	Total responses	Hours per response	Total hour burden
Organizer survey	500	1	500	0.167	83.50
Organizer Survey—6 month Follow-up	500	1	500	0.25	125.00
Participant Form	4,500	1	4,500	0.083	373.50
Total	5,500	5,500	582.00

Written comments and recommendations concerning the proposed information collection should be sent by February 17, 2017 to the SAMHSA Desk Officer at the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). To ensure timely receipt of comments, and to avoid potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@omb.eop.gov. Although commenters are encouraged to send their comments via email, commenters may also fax their comments to: 202-395-7285. Commenters may also mail them to:

Office of Management and Budget,
Office of Information and Regulatory
Affairs, New Executive Office Building,
Room 10102, Washington, DC 20503.

Summer King,

Statistician.

BILLING CODE 4162-20-P

DEPARTMENT OF HOMELAND SECURITY**U.S. Citizenship and Immigration Services**

[OMB Control Number 1615-0037]

**Agency Information Collection
Activities: Refugee/Asylee Relative
Petition, Form I-730; Extension,
Without Change, of a Currently
Approved Collection**

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and

Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments. DATES: Comments are encouraged and will be accepted for 60 days until March 20, 2017.

ADDRESSES: All submissions received must include the OMB Control Number 1615-0037 in the body of the letter, the agency name and Docket ID USCIS-2007-0030. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at <http://www.regulations.gov> under e-Docket ID number USCIS-2007-0030;

(2) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529-2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529-2140, telephone number 202-272-8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at <http://www.uscis.gov>, or call the USCIS National Customer Service Center at 800-375-5283 (TTY 800-767-1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS-2007-0030 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking

Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Refugee/Asylee Relative Petition.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I-730; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or households. Form I-730 is used by a refugee or asylee to file on behalf of his or her spouse and/or children for follow-to-join benefits provided that the relationship to the refugee/asylee existed prior to their admission to the United States.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information

collection I-730 is 6,039 and the estimated hour burden per response is .667 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 4,028 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is 739,778.

Dated: January 12, 2017.

Samantha Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111-97-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6012-N-01]

Allocations, Common Application, Waivers, and Alternative Requirements for Community Development Block Grant Disaster Recovery Grantees

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice allocates \$1,805,976,000 in Community Development Block Grant disaster recovery (CDBG-DR) funds appropriated by the Further Continuing and Security Assistance Appropriations Act, 2017 for the purpose of assisting long-term recovery in Florida, Louisiana, North Carolina, South Carolina, Texas, and West Virginia. This allocation of CDBG-DR supplements funds appropriated by the Continuing Appropriation Act, 2017. It provided \$500 million in CDBG-DR funding that has been allocated to Louisiana, Texas, and West Virginia in response to qualifying disasters. In HUD's **Federal Register** notice published on November 21, 2016, at 81 FR 83254 (the Prior Notice), HUD described that allocation and applicable waivers and alternative requirements, relevant statutory and regulatory requirements, the grant award process, criteria for action plan approval, and eligible disaster recovery activities. Grantees receiving an allocation of funds under this notice are subject to the requirements of the Prior Notice, including provisions of the Prior Notice amended herein.

DATES: Effective Date: January 23, 2017.

I. Allocations

Section 101 of the Further Continuing and Security Assistance Appropriations Act, 2017 (division A of Pub. L. 114–

254, approved December 10, 2016) amended the Continuing Appropriations Act, 2017 (division C of Pub. L. 114–223) by adding a new section 192 that makes available \$1,808,976,000 in Community Development Block Grant (CDBG) funds for necessary expenses for activities authorized under title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared in 2016 and occurring prior to December 10, 2016. Qualifying major disasters are declared by the President pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act of 1974 (42 U.S.C. 5121 *et seq.*) (Stafford Act). The following allocations of funds appropriated by section 192 are in addition to the \$500 million appropriated by section 145(a) and allocated in the Prior Notice. Section 192 specifies that these additional funds are subject to the same authority and conditions as those in section 145(a),

except the major disaster must have occurred prior to December 10, 2016.

Section 145(a) provides that grants shall be awarded directly to a State or unit of general local government at the discretion of the Secretary. The Secretary has elected to award funds only to States in this notice. Unless noted otherwise, the term "grantee" refers to the State receiving an award from HUD under this notice. To comply with the statutory requirement that funds be used for disaster-related expenses in the most impacted and distressed areas, HUD allocates funds using the best available data that cover all of the eligible affected areas.

Section 192(b) permits HUD to use up to \$3,000,000 of the appropriated amount for necessary costs, including information technology costs, of administering and overseeing the obligation and expenditure of amounts made available by sections 145(a) and 192. The Department is deducting the full \$3,000,000, resulting in a total of \$1,805,976,000 available for allocation.

Based on further review of the impacts from the eligible disasters, and estimates of unmet need, HUD is making the following allocations:

TABLE 1—ALLOCATIONS UNDER PUBLIC LAW 114–245

Disaster No.	Grantee	Allocation	Minimum amount that must be expended for recovery in the HUD-identified "most impacted and distressed" areas
4263, 4277	State of Louisiana	\$1,219,172,000	(\$975,337,600) East Baton Rouge, Livingston, Ascension, Tangipahoa, Ouachita, Lafayette, Vermilion, Acadia, Washington, and St. Tammany Parishes.
4266, 4269, 4272	State of Texas	177,064,000	(\$141,651,200) Harris, Newton, Montgomery, Fort Bend, and Brazoria Counties.
4273	State of West Virginia	87,280,000	(\$69,824,000) Kanawha and Greenbrier Counties.
4285	State of North Carolina	198,553,000	(\$158,842,400) Robeson, Cumberland, Edgecombe, and Wayne Counties.
4286	State of South Carolina	65,305,000	(\$52,244,000) Marion County.
4280, 4283	State of Florida	58,602,000	(\$46,881,600) St. Johns County.
Total	1,805,976,000	

Use of funds for all grantees is limited to unmet recovery needs from the major disasters identified in Table 1. Please note that in addition to the FEMA disaster numbers listed in the Prior Notice for the State of Texas, the State may also expend its allocation of funds from the Prior Notice on FEMA disaster number DR–4272.

Table 1 also shows the HUD-identified "most impacted and distressed" areas impacted by the disasters. At least 80 percent of the total funds provided to each State under this notice must address unmet needs within the HUD-identified "most impacted and distressed" areas, as identified in the last column in Table 1. For grantees that received an allocation under the Prior

Notice, 80 percent of both allocations may be used to address unmet needs within the HUD-identified "most impacted and distressed" areas that are identified in Table 1 of this notice. Grantees may determine where the remaining 20 percent may be spent by identifying areas it determines to be "most impacted and distressed." A detailed explanation of HUD's allocation methodology is provided at Appendix A.

II. Use of Funds

Funds allocated under this notice and funds allocated pursuant to the Prior Notice are subject to the requirements of the Prior Notice, including the provisions of the Prior Notice as

amended herein. As a reminder, section 145(a) requires that prior to the obligation of CDBG–DR funds, a grantee shall submit a plan to HUD for approval detailing the proposed use of all funds, including criteria for eligibility, and how the use of these funds will address long-term recovery and restoration of infrastructure and housing and economic revitalization in the most impacted and distressed areas. This action plan for disaster recovery must describe uses and activities that: (1) Are authorized under title I of the Housing and Community Development Act of 1974 (HCD Act) or allowed by a waiver or alternative requirement (see section IV., below); and (2) respond to disaster-

related impact to infrastructure, housing, and economic revitalization in the most impacted and distressed areas. To inform the plan, grantees must conduct an assessment of community impacts and unmet needs to guide the development and prioritization of planned recovery activities, pursuant to paragraph A.2.a. in section VI of the Prior Notice, as amended in this notice.

Pursuant to the Prior Notice, each grantee is required to expend 100 percent of its allocation of CDBG-DR funds on eligible activities within 6 years of HUD's execution of the grant agreement.

III. Overview of Grant Process

To begin expenditure of CDBG-DR funds, grantees must complete the expedited steps outlined in Section V. Overview of Grant Process in the Prior Notice. As stated below at paragraph IV.1.a, the deadlines established by the Prior Notice are now determined by the effective date of this notice.

IV. Applicable Rules, Statutes, Waivers, and Alternative Requirements

This section of the notice describes rules, statutes, waivers, and alternative requirements that apply to grantees receiving an allocation under this notice. All funds allocated by the Prior Notice and this notice are subject to the requirements of the Prior Notice, including provisions of the Prior Notice as amended herein. Further, the Secretary has determined that good cause exists for each waiver and alternative requirement established in the Prior Notice and that the waivers and alternative requirements are not inconsistent with the overall purpose of the HCD Act. The Secretary's determination extends to each waiver or alternative requirement amended by this notice.

Grantees may request additional waivers and alternative requirements from the Department as needed to address specific needs related to their recovery activities. Except where noted, waivers and alternative requirements described below apply to all grantees under this notice. Waivers and alternative requirements are effective five days after they are published in the **Federal Register**.

1. Incorporation of waivers, alternative requirements, and statutory changes previously described. The waivers and alternative requirements provided in the Prior Notice apply to the awards under this notice, except as modified herein. These waivers and alternative requirements provide additional flexibility in program design and implementation to support full and

swift recovery following the disasters, while also ensuring that statutory requirements are met. The requirements of the Prior Notice and this notice apply only to the CDBG-DR funds appropriated in sections 145(a) and 192.

The following clarifications or modifications apply to grantees in receipt of an allocation under this notice and to funds allocated under the Prior Notice:

a. All deadlines for the submission of the Secretary's certification, risk analysis, or the action plan referenced in the Prior Notice are now determined by the effective date of this notice. This means that the deadlines established by the Prior Notice for the submission of the Secretary's certification, risk analysis and action plan, as well as other deadlines, are extended to deadlines established by this notice. This allows grantees receiving an allocation of funds under both the Prior Notice and this notice to submit a single action plan and other documents governing both allocations.

b. Paragraph VI.A.2.a.6 of the Prior Notice at 81 FR 83258 is amended by revising the action plan requirement to identify a maximum amount of assistance available to beneficiaries under each program. In addition to the requirement described in the Prior Notice, for any residential rehabilitation or reconstruction program, grantees must establish a process by which it assesses the cost effectiveness of each rehabilitation or reconstruction project undertaken to assist a household. The requirement is amended by adding the following:

A description of the maximum amount of assistance available to a beneficiary under each of the grantee's disaster recovery programs. Additionally, for any residential rehabilitation or reconstruction program funded under this notice, each grantee must have policies and procedures to assess the cost effectiveness of each proposed project undertaken to assist a household, including criteria for determining when the cost of the rehabilitation or reconstruction of the unit will not be cost-effective relative to other means of assisting the property-owner, including through buyout or acquisition of the property, or the construction of area-wide protective infrastructure, rather than individual building mitigation solutions designed to protect individual structures. For example, as the grantee is designing its program, it might choose as comparison criteria the rehabilitation costs derived from the RS Means Residential Cost Data and costs to buyout or acquire the property as a means of determining whether or not to fund a rehabilitation project.

A grantee may find it necessary to provide exceptions on a case-by-case basis to the maximum amount of assistance or cost effectiveness criteria and must describe the

process it will use to make such exceptions in its policies and procedures. Each grantee must adopt policies and procedures that communicate how it will analyze the circumstances under which an exception is needed and how it will demonstrate that the amount of assistance is necessary and reasonable. All CDBG-DR expenditures remain subject to the cost principles in 2 CFR part 200, including the requirement that costs be necessary and reasonable for the performance of the grantee's CDBG-DR grant.

c. Paragraph VI.A.2.a.7 of the Prior Notice at 81 FR 83258 is amended by rewriting and clarifying the action plan requirements for the descriptions of long-term recovery and hazard mitigation planning and addressing specific predevelopment principles as outlined in the Federal Resource Guide for Infrastructure Planning and Design, as follows:

A description of how the grantee plans to:

(a) Promote sound, sustainable long-term recovery planning informed by a post-disaster evaluation of hazard risk, especially land-use decisions that reflect responsible flood plain management and take into account continued sea level rise, if applicable. This information should be based on the history of FEMA flood mitigation efforts, and take into account projected increase in sea level (if applicable) and frequency and intensity of precipitation events, which are not considered in current FEMA maps and National Flood Insurance Program premiums;

(b) Adhere to the advanced elevation requirements established in paragraph B. of section VI of the Prior Notice;

(c) Coordinate with local and regional planning efforts to ensure consistency, including how the grantee will promote community-level and/or regional (e.g., multiple local jurisdictions) post-disaster recovery and mitigation planning;

(d) For infrastructure allocations, the grantee must also describe:

i. How mitigation measures will be integrated into rebuilding activities and the extent to which infrastructure activities funded through this grant will achieve objectives outlined in regionally or locally established plans and policies that are designed to reduce future risk to the jurisdiction;

ii. How infrastructure activities will be informed by a consideration of the costs and benefits of the project;

iii. How the State will seek to ensure that infrastructure activities will avoid disproportionate impact on vulnerable communities and create opportunities to address economic inequities facing local communities;

iv. How the State align investments with other planned state or local capital improvements and infrastructure development efforts, and will work to foster the potential for additional infrastructure funding from multiple sources, including existing state and local capital improvement projects in planning, and the potential for private investment; and

v. The extent to which the State will employ adaptable and reliable technologies to guard against premature obsolescence of infrastructure.

Additional guidance on predevelopment principles are described in the Federal Resource Guide for Infrastructure Planning and Design: (<http://portal.hud.gov/hudportal/documents/huddoc?id=BAInfraResGuideMay2015.pdf>)

The action plan must also provide for the use of CDBG–DR funds to develop a disaster recovery and response plan that addresses long-term recovery and pre- and post-disaster hazard mitigation, if one does not currently exist.

V. Duration of Funding

Section 192 directs that these funds be available until expended. However, consistent with OMB Circular A–11, if the Secretary or the President determines that the purposes for which the appropriation has been made have been carried out and no disbursements have been made against the appropriation for two consecutive fiscal years, any remaining unobligated balance will be made unavailable for obligation or expenditure.

VI. Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers for the disaster recovery grants under this notice are as follows: 14.218; 14.228.

VII. Finding of No Significant Impact

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)). The FONSI is available for public inspection between 8 a.m. and 5 p.m. weekdays in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street, SW., Room 10276, Washington, DC 20410–0500. Due to security measures at the HUD Headquarters building, an advance appointment to review the docket file must be scheduled by calling the Regulations Division at 202–708–3055 (this is not a toll-free number). Hearing- or speech-impaired individuals may access this number through TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

Dated: January 9, 2017.

Nani A. Coloretti,
Deputy Secretary.

Appendix A—Allocation of CDBG–DR Funds to Most Impacted and Distressed Areas Due to 2016 Federally Declared Disasters Thru December 10, 2016

Background

Section 145(a) of Division C of the Continuing Appropriations Act, 2017 (P. L. 114–223, Division C), enacted on September 29, 2016, appropriated \$500,000,000 through the Community Development Block Grant disaster recovery (CDBG–DR) program for necessary expenses for authorized activities related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared in 2016 but prior to September 29, 2016. Section 145(a) of P. L. 114–223, Division C stated:

SEC. 145. (a) In addition to the amount otherwise provided by section 101 for the “Community Planning and Development, Community Development Fund,” there is appropriated \$500,000,000 for an additional amount for fiscal year 2016, to remain available until expended, for necessary expenses for activities authorized under title I of the Housing and Community Development Act of 1974 (42 U.S.C. 5301 *et seq.*) related to disaster relief, long-term recovery, restoration of infrastructure and housing, and economic revitalization in the most impacted and distressed areas resulting from a major disaster declared in 2016, and which the disaster occurred prior to the date of enactment of this Act, pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*): Provided, That funds shall be awarded directly to the State or unit of general local government at the discretion of the Secretary: . . .

Subsequently, section 101 of the Further Continuing and Security Assistance Appropriations Act, 2017 (division A of Pub. L. 114–254, approved December 10, 2016) (Appropriations Act) amended the Continuing Appropriations Act, 2017 (division C of Public Law 114–223) by adding a new section 192. Section 192(a) appropriates \$1,808,976,000 in CDBG–DR funding for the same purposes, authorities and conditions as section 145(a) for major disasters declared in 2016 but prior to December 10, 2016. Section 192(b) authorizes HUD to deduct \$3,000,000 from this amount for the cost of administering both appropriations, resulting in a total of \$1,805,976,000 available for allocation.

Combined, the two appropriations make \$2,305,976,000 available for allocation, effectively matching HUD’s November 2016 estimate for serious unmet repair or replacement needs.

Most Impacted and Distressed Areas

As with prior CDBG–DR appropriations, HUD is not obligated to allocate section 192 funds for all major disasters declared in 2016 but prior to December 10, 2016. Relying on

the language of section 145(a), HUD is directed to use the funds “in the most impacted and distressed areas.” HUD has implemented this directive by limiting CDBG–DR formula allocations to jurisdictions with major disasters that meet three standards:

(1) Individual Assistance/IHP designation. HUD has limited allocations to those disasters where FEMA had determined the damage was sufficient to declare the disaster as eligible to receive Individual and Households Program (IHP) funding. President Obama signed P.L. 114–254 into law on December 10, 2016, and 45 disasters had received major declarations in calendar year 2016 by that date. Only 17 of 45 disasters that were declared in 2016 have an IHP designation.

(2) Concentrated damage. HUD has limited the allocations to counties with high levels of damage. For this allocation, HUD is using the amount of serious unmet housing need as its measure of concentrated damage and limits the data used for the allocation only to counties exceeding a “natural break” in the data for their total amount of serious unmet housing needs. For purposes of this allocation, the serious unmet housing needs break at the county level occurs at \$13 million. Serious unmet housing needs are calculated as the additional cost to repair the most damaged homes after subtracting out insurance, FEMA, and SBA assistance.

(3) Natural break. Among disasters with data meeting the first two thresholds, HUD identifies a natural break in calculated serious unmet recovery needs and funds only the jurisdictions that have substantially higher unmet needs than other jurisdictions. The jurisdictions clearing this threshold as a result of major disasters declared since January 1, 2016 now includes Florida, North Carolina, and South Carolina as a result of Hurricane Hermine or Hurricane Matthew, as well as Louisiana, Texas, and West Virginia which were qualified for funds appropriated by section 145(a) as a result of major disasters declared prior to September 29, 2016.

These allocations are thus based on the unmet costs to repair seriously damaged properties and infrastructure in the counties with more than \$13 million of serious unmet housing needs. These do not capture expected resiliency costs, although grantees may choose to use the CDBG funds for resiliency expenses. The estimated damage is based on the following factors:

(1) Seriously damaged owner occupied units without insurance repair estimate in Most Impacted Counties after FEMA, Insurance, and SBA;

(2) Seriously damaged rental units occupied by renters with income less than \$20,000 repair estimate in Most Impacted Counties after FEMA, Insurance, and SBA;

(3) Small businesses denied by SBA repair estimate; and

(4) The state match requirement to address the FEMA estimates for repair of permanent infrastructure in the FEMA Public Assistance program (categories C to G).

Methods for Estimating Unmet Needs for Housing

The data HUD staff have identified as being available to calculate unmet needs for

qualifying disasters come from the FEMA Individual Assistance program data on housing-unit damage as of December 9, 2016.

The core data on housing damage for both the unmet housing needs calculation and the concentrated damage are based on home inspection data for FEMA's Individual Assistance program. HUD calculates "unmet housing needs" as the number of housing units with unmet needs times the estimated cost to repair those units less repair funds already provided by FEMA, where:

Each of the FEMA inspected owner units are categorized by HUD into one of five categories:

- Minor-Low: Less than \$3,000 of FEMA inspected real property damage.
- Minor-High: \$3,000 to \$7,999 of FEMA inspected real property damage.
- Major-Low: \$8,000 to \$14,999 of FEMA inspected real property damage.
- Major-High: \$15,000 to \$28,800 of FEMA inspected real property damage and/or 4 to 6 feet of flooding on the first floor.
- Severe: Greater than \$28,800 of FEMA inspected real property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

To meet the statutory requirement of "most impacted" in this legislative language, homes are determined to have a high level of damage if they have damage of "major-low" or higher. That is, they have a real property FEMA inspected damage of \$8,000 or flooding over 1 foot. Furthermore, a homeowner is determined to have unmet needs if they reported damage and no insurance to cover that damage.

FEMA does not inspect rental units for real property damage so personal property damage is used as a proxy for unit damage. Each of the FEMA inspected renter units are categorized by HUD into one of five categories:

- Minor-Low: Less than \$1,000 of FEMA inspected personal property damage.
- Minor-High: \$1,000 to \$1,999 of FEMA inspected personal property damage.
- Major-Low: \$2,000 to \$3,499 of FEMA inspected personal property damage.
- Major-High: \$3,500 to \$7,499 of FEMA inspected personal property damage or 4 to 6 feet of flooding on the first floor.
- Severe: Greater than \$7,500 of FEMA inspected personal property damage or determined destroyed and/or 6 or more feet of flooding on the first floor.

For rental properties, to meet the statutory requirement of "most impacted" in this legislative language, homes are determined to have a high level of damage if they have damage of "major-low" or higher. That is, they have a FEMA personal property damage assessment of \$2,000 or greater or flooding over 1 foot. Furthermore, landlords are presumed to have adequate insurance coverage unless the unit is occupied by a renter with income of \$20,000 or less. Units are occupied by a tenant with income less than \$20,000 are used to calculate likely unmet needs for affordable rental housing.

The average cost to fully repair a home for a specific disaster to code within each of the damage categories noted above is calculated using the average real property damage repair costs determined by the Small Business

Administration for its disaster loan program for the subset of homes inspected by both SBA and FEMA for 2011 to 2013 disasters. Because SBA is inspecting for full repair costs, it is presumed to reflect the full cost to repair the home, which is generally more than the FEMA estimates on the cost to make the home habitable.

For each household determined to have unmet housing needs (as described above), their estimated average unmet housing need less assumed assistance from FEMA, SBA, and insurance was calculated at \$27,455 for major damage (low); \$45,688 for major damage (high); and \$59,493 for severe damage.

Methods for Estimating Unmet Infrastructure Needs

To best proxy unmet infrastructure needs, HUD uses data from FEMA's Public Assistance program on the expected State match requirement (usually 25 percent of the estimated public assistance needs, it is 10 percent for DR-4277 in Louisiana). This allocation uses only a subset of the Public Assistance damage estimates reflecting the categories of activities most likely to require CDBG funding above the Public Assistance and State match requirement. Those activities are categories: C, Roads and Bridges; D, Water Control Facilities; E, Public Buildings; F, Public Utilities; and G, Recreational—Other. Categories A (Debris Removal) and B (Protective Measures) are largely expended immediately after a disaster and reflect interim recovery measures rather than the long-term recovery measures for which CDBG funds are generally used.

Methods for Estimating Unmet Economic Revitalization Needs

Based on SBA disaster loans to businesses, HUD calculates the median real estate and content loss by the following damage categories for each state:

- Category 1: Real estate + content loss = below 12,000
- Category 2: Real estate + content loss = 12,000–30,000
- Category 3: Real estate + content loss = 30,000–65,000
- Category 4: Real estate + content loss = 65,000–150,000
- Category 5: Real estate + content loss = above 150,000

For properties with real estate and content loss of \$30,000 or more, HUD calculates the estimated amount of unmet needs for small businesses by multiplying the median damage estimates for the categories above by the number of small businesses denied an SBA loan, including those denied a loan prior to inspection due to inadequate credit or income (or a decision had not been made), under the assumption that damage among those denied at pre-inspection have the same distribution of damage as those denied after inspection.

Allocation Calculation

Once eligible entities are identified using the above criteria, the allocation to individual grantees represents their proportional share of the estimated unmet needs. For the formula allocation, HUD

calculates total serious unmet recovery needs as the aggregate of:

- Serious unmet housing needs in most impacted counties.
- Serious unmet business needs.
- The estimated local match requirement for the repair of infrastructure estimated for FEMA's Public Assistance program.

Natural break for most impacted disasters. HUD limits funded disasters to those with that have substantially higher unmet needs than other jurisdictions. Florida, Louisiana, North Carolina, South Carolina, Texas, and West Virginia each have aggregate unmet needs in excess of \$50,000,000, an amount that is higher than other jurisdictions affected by major disasters declared between January 1 and December 10, 2016.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[FWS–R8–FHC–2016–N196;
FXFR1334088TWG0W4–123–FF08EACT00]

Renewal of the Trinity River Adaptive Management Working Group

AGENCY: Office of the Secretary, Interior.
ACTION: Notice.

SUMMARY: The Secretary of the Interior (Secretary), after consultation with the General Services Administration, has renewed the Trinity River Adaptive Management Working Group (Working Group) for 2 years. The Working Group provides recommendations on all aspects of the implementation of the Trinity River Restoration Program and affords stakeholders the opportunity to give policy, management, and technical input concerning Trinity River restoration efforts.

ADDRESSES: For more information on the Trinity River Adaptive Management Working Group and the Trinity River Restoration Program, see <https://www.fws.gov/arcata/fisheries/tamwg.html> and <http://www.trrp.net/>.

FOR FURTHER INFORMATION CONTACT: Joseph Polos, U.S. Fish and Wildlife Service, 1655 Heindon Road; Arcata, CA 95521; 707–822–7201.

SUPPLEMENTARY INFORMATION: The Working Group conducts its operations in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. Appendix). It reports to the Trinity River Management Council (TMC) and functions solely as an advisory body. The TMC reports to the Secretary through the Mid-Pacific Regional Director of the Bureau of Reclamation and the Pacific Southwest Regional Director for the U.S. Fish and Wildlife Service. The Working Group

provides recommendations and advice to the TMC on: (1) The effectiveness of management actions in achieving restoration goals and alternative hypotheses (methods and strategies) for study, (2) the priority for restoration projects, (3) funding priorities, and (4) other components of the Trinity River Restoration Program.

We have filed a copy of the Working Group's charter with the Committee Management Secretariat, General Services Administration; the Committee on Environment and Public Works, United States Senate; the Committee on Natural Resources, United States House of Representatives; and the Library of Congress.

Certification

I hereby certify that the Trinity River Adaptive Management Working Group is necessary and in the public interest in connection with the performance of duties imposed on the Department of the Interior by Public Laws 84-386 and 96-335 (Trinity River Stream Rectification Act), 98-541 and 104-143 (Trinity River Basin Fish and Wildlife Management Act of 1984), and 102-575 (Central Valley Project Improvement Act). The Working Group will assist the Department of the Interior by providing advice and recommendations on all aspects of implementation of the Trinity River Restoration Program.

Dated: December 13, 2016.

Sally Jewell,

Secretary of the Interior.

Information Collection Request Sent to the Office of Management and Budget (OMB) for Approval; Import of Sport-Hunted African Elephant Trophies

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (the U.S. Fish and Wildlife Service) have sent an Information Collection Request (ICR) to OMB for review and approval. We summarize the ICR below and describe the nature of the collection and the estimated burden and cost. This information collection is scheduled to expire on January 31, 2017. We may not conduct or sponsor and a person is not required to respond to a collection of

information unless it displays a currently valid OMB control number. However, under OMB regulations, we may continue to conduct or sponsor this information collection while it is pending at OMB.

DATES: You must submit comments on or before February 17, 2017.

ADDRESSES: Send your comments and suggestions on this information collection to the Desk Officer for the Department of the Interior at OMB-OIRA at (202) 395-5806 (fax) or *OIRA_Submission@omb.eop.gov* (email). Please provide a copy of your comments to Madonna L. Baucum, Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041-3803 (mail); or *madonna_baucum@fws.gov* (email). Please include "1018-0164" in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Madonna L. Baucum, Information Collection Clearance Officer, U.S. Fish and Wildlife Service at *madonna_baucum@fws.gov* (email), or (703) 358-2503 (telephone). You may review the ICR online at <http://www.reginfo.gov>. Follow the instructions to review Department of the Interior collections under review by OMB.

SUPPLEMENTARY INFORMATION:

I. Abstract

Applications for permits for import of African elephant sport-hunted trophies from Appendix-I populations under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) are approved under OMB Control Number 1018-0093, which expires May 31, 2017. Under newly revised regulations at 50 CFR 17.40(e), import permits must now also be obtained for import of African elephant sport-hunted trophies from CITES Appendix-II populations. Based on this change, we expect to receive an additional 300 applications for permits per year. The burden associated with these additional applications is the basis of this information collection. If OMB grants regular approval, we will include the burden associated with the expected 300 additional applications in OMB Control Number 1018-0093 when we renew the approval in May 2017.

II. Data

OMB Control Number: 1018-0164.

Title: Import of Sport-Hunted African Elephant Trophies, 50 CFR 17.

Service Form Number: 3-200-19, Importing African elephant trophies from Appendix-II populations.

Type of Request: Extension of a currently approved collection.

Description of Respondents: Individuals.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Number of Respondents: 300.

Number of Annual Responses: 300.

Completion Time per Response: 20 minutes.

Total Annual Burden Hours: 100 hours.

Estimated Annual Non-hour Burden Cost: \$30,000, primarily associated with application fees. The application fee is \$100 per application.

III. Comments

On June 9, 2016, we published in the **Federal Register** (81 FR 37207) a notice of our intent to request that OMB renew approval for this information collection. In that notice, we solicited comments for 60 days, ending on August 8, 2016. We received the following substantive comments in response to this request.

Comment 1: The International Fund for Animal Welfare and the Natural Resources Defense Council submitted a joint response to the notice. They expressed their strong support for the permit requirement for import of sport-hunted trophies from all African elephant populations (both Appendix-I and Appendix-II populations) and the associated collection of information. They said that prospective trophy importers should be required to provide information on the specific elephant and population, which should be added to section E2 and/or E3 of FWS Form 3-200-19. Such information should include but not be limited to (1) sex and approximate age of the elephant and (2) approximate status of the individual within the herd's hierarchy. In addition, they stated that section E5 of FWS Form 3-200-19 should be rephrased to require trophy hunters to provide information regarding "how the funds from license/trophy fees will be spent [and] what portion of the hunting fee will support conservation," because they believe that the current language on the FWS form suggests that hunters may provide this information at their own discretion. They also assert that in section E5, the Service should include specific subquestions and "require supporting documentation that places an increased burden on hunters to prove that their trophy meets the enhancement standard."

Response to Comment 1: We believe that Form 3-200-19 requests the

information we need from applicants. Hunters often apply for import permits before leaving on safari and therefore are not in a position to provide information on the specific elephant and population. In addition, hunters are not necessarily in a position to know what portion of their hunting fees will support conservation. This is information that we acquire from the countries of origin, not from permit applicants.

Comment 2: With regard to the cost burden, the International Fund for Animal Welfare and the Natural Resources Defense Council claim that the permit application fee is too small and that it should be increased to fully compensate FWS for costs associated with performing individualized (as opposed to country-wide) enhancement findings. They note that the 2015 market rate for an African elephant hunting package was between \$25,000 and \$60,000, and add that the \$100 permit application fee “imposes trivial additional costs on the importer.”

Response to Comment 2: We are currently reevaluating our permit fees and may, in the future, publish a proposed rule to revise our fee structure.

Comment 3: The Humane Society of the United States and Humane Society International jointly submitted comments in support of the request for extension of approval for information collection through FWS Form 3–200–19 from all importers of African elephant sport-hunted trophies. They stated their belief that it is critically important that this information is collected from applicants for import permits under the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*), because the information “is essential for FWS to comply with its statutory duties to protect African elephants from threats that jeopardize the species’ continued existence.” They also believe that FWS Form 3–200–19 requests the “bare minimum information needed” from an applicant.

These joint commenters also stated that the current “paltry” applicant fee of \$100 for an African elephant sport-hunted trophy import permit is too low and should be increased. They assert that the \$100 application fee for import of trophies “cannot possibly reimburse the agency for all of its costs associated with ensuring that applicants are eligible for permits,” and they “urge OMB to formally request that FWS amend this fee structure.”

Response to Comment 3: See our response to Comment 2.

Comment 4: Conservation Force submitted comments in opposition to the information collection, stating that “it is unnecessary and over burdensome

for both the U.S. Fish and Wildlife Service . . . and permit applicants/ tourist safari hunters, and it will not provide any useful information.” They contend that it is “a burden without a benefit” and that the burden cannot be reduced unless the permit requirement is removed. Conservation Force also asserts that the burden estimate is inaccurate, because the Service has not considered its current backlog of applications in assessing its ability to process another 300 permits, the additional costs and demands for seizures and law enforcement actions, and the permit renewal fee.

Response to Comment 4: Our newly revised regulations require that we issue an ESA import permit for import of all African elephant sport-hunted trophies. We are seeking authorization to collect the information necessary for us to issue these permits. The burden estimates are developed in accordance with the Paperwork Reduction Act. In estimating the burden to the Service, we consider the time required to process an application, the cost of processing an application, including the salaries of the people doing the work, and the estimated number of applications. In estimating the burden to the applicant, we consider the time it takes to complete an application, including gathering the necessary information, an estimate of the salary of the person completing the form, and the permit fee. Based on our experience, we believe our burden estimates are accurate.

We again invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: January 11, 2017.

Tina A. Campbell,

Chief, Division of Policy and Directives Management, U.S. Fish and Wildlife Service.

Notice of Intent To Prepare a Comprehensive Conservation Plan for the National Bison Range, Moiese, Montana

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), intend to gather information necessary to prepare a draft Comprehensive Conservation Plan (CCP) for the National Bison Range (NBR), a unit of the National Wildlife Refuge System. We are furnishing this notice in compliance with Service Refuge Planning policy to advise other agencies and the public of our intentions, and to obtain suggestions and information on the scope of issues to be considered in the planning process. Participation in the planning process will be encouraged and facilitated by various means, including news releases and public meetings. Notification of all such meetings will be announced in the local press and on the NBR Web site.

DATES: To ensure consideration, written comments must be received or postmarked on or before February 17, 2017.

ADDRESSES: If you wish to comment on the scope of the CCP/EIS, you may submit your comments by the following method: You may mail or hand-deliver comments to Toni Griffin, Refuge Planner, NBR CCP, 134 Union Boulevard, Lakewood, CO 80228.

FOR FURTHER INFORMATION CONTACT: Toni Griffin, Refuge Planner, NBR CCP, 134 Union Boulevard, Lakewood, CO 80228, or by telephone (303) 236–4378.

SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we initiate our process for developing a CCP for the National Bison Range, with headquarters in Moiese, MT. The notice complies with our CCP policy to (1) advise other Federal and State agencies,

Tribes, and the public of our intention to conduct planning on this refuge complex and (2) to obtain suggestions and information on the scope of additional issues to consider during development of the CCP. Through the CCP, the Service intends to evaluate both how NBR is managed and who manages it.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966, (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), requires us to develop a CCP for each national wildlife refuge. The purpose of a CCP is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System (NWRS), consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Each unit of the NWRS was established for specific purposes. We use these purposes as the foundation for developing and prioritizing the management goals and objectives for each refuge within the NWRS mission, and to determine how the public can use each refuge. The planning process is a way for us and the public to evaluate management goals and objectives that will ensure the best possible approach to wildlife, plant, and habitat conservation, while providing for wildlife-dependent recreation opportunities that are compatible with each refuge's establishing purposes and the mission of the NWRS.

We will conduct environmental review pursuant to the provisions of the National Environmental Policy Act of 1969 (42 U.S.C 4321 *et seq.*), by preparing an environmental impact statement (EIS). The Service intends to invite the Confederated Salish and Kootenai Tribes (CSKT) to participate as a cooperating agency as provided by 40 CFR 1508.5.

The Service will prepare a CCP and EIS which will describe management of the NBR over the next 15 years. To facilitate sound planning and environmental assessment, the Service intends to gather information necessary for the preparation of the CCP/EIS and obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the CCP/EIS. The Service will separately consider CCPs for Pablo, Ninepipe, and Lost Trail National Wildlife Refuges, and the Northwest Montana Lake County Wetland Management District and the waterfowl production areas therein, which are also part of the National Bison Range Complex. The Service will publish a notice of intent to prepare these CCPs at a later date.

The National Bison Range

In 1855, the United States entered into the Hell Gate Treaty with the Salish and Kootenai Tribes of Western Montana to establish the Flathead Indian Reservation. Just over 50 years later, on May 23, 1908, Congress enacted legislation that used its power of eminent domain to establish the refuge. The overall mission of the NBR is to maintain a representative herd of bison, under reasonably natural conditions, to ensure the preservation of the species for continued public enjoyment. The NBR is 18,800 acres and supports between 350 and 500 bison. The National Bison Range lies entirely within the boundary of the Flathead Indian Reservation of the Confederated Salish and Kootenai Tribes. Members of the CSKT have a cultural, historical, or geographic connection to the land and resources of the Range. There are significant cultural sites located on the Range and the land was formerly owned in trust for the CSKT. The bison at the range today are descendants of bison owned and preserved by CSKT members over a century ago.

Additional Information

The draft CCP/EIS for NBR will include detailed information about the planning process, refuge, issues, and desired resource conditions. Based on determination of desired conditions, regardless of which management option is selected, the final CCP/EIS will outline resource management activities and visitor recreational activities. To facilitate sound judgment of environmental impacts, the Service is gathering information necessary for the preparation of a CCP/EIS. Based on public input over the years, the Service believes that the range of management alternatives should include, at a minimum:

- *Alternative A (Current Management):* This alternative represents continuing current management and serves as a baseline for comparing the other alternatives. Under this alternative, we would continue our current habitat and visitor services management activities on existing refuge lands. The Service would continue to be responsible for the overall administration of the NBR and the day-to-day on-site activities. The Service would be responsible for implementation of the NBR CCP.

- *Alternative B (Preferred Management Option):* In this alternative, the Service intends to evaluate the preferred management option of a Congressional transfer of lands comprising of the NBR unit of the National Wildlife Refuge System to the CSKT of the Flathead Reservation, to be held in trust by the Secretary of the Interior for the benefit of the CSKT. In addition to the management of the herd of bison, the CSKT will conserve the natural resources and provide for public visitation and educational opportunities on such lands. Resources would be managed to perpetuate and protect the natural environment and to preserve cultural and historic resources and values. The alternative returns to the tribe control of their traditional lands and cultural resources.

- *Alternative C:* The Service would execute and carry out a draft negotiated Annual Funding Agreement (AFA) per the Tribal Self Governance Act, wherein the CSKT would be responsible for implementing the provisions of the AFA.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: December 20, 2016.

Noreen Walsh,

Regional Director, U.S. Fish and Wildlife Service, Denver, Colorado.

**Notice of Filing of Plats of Survey;
Arizona**

AGENCY: Bureau of Land Management,
Interior.

ACTION: Notice of Filing of Plats of
Survey; Arizona.

SUMMARY: The plats of survey of the
described lands were officially filed in
the Arizona State Office, Bureau of Land
Management, Phoenix, Arizona, on
dates indicated.

SUPPLEMENTARY INFORMATION:**The Gila and Salt River Meridian,
Arizona:**

The plat representing the dependent
resurvey of a portion of the Gila and Salt
River Meridian, the north boundary of
the Gila River Indian Community, a
portion of the northeast boundary of the
Gila River Indian Community, and a
portion of the subdivisional lines,
Township 1 North, Range 1 East,
accepted November 22, 2016, and
officially filed November 23, 2016, for
Group 1153, Arizona.

This plat was prepared at the request
of the Bureau of Indian Affairs.

The plat representing the survey of a
portion of the Ninth Standard Parallel
North (south boundary), Township 37
North, Range 7 East, the survey of the
east boundary, the survey of a portion
of the subdivisional lines, and the
subdivision of certain sections,
Township 36 North, Range 7 East,
accepted April 29, 2016, and officially
filed May 3, 2016, for Group 1147,
Arizona.

This plat was prepared at the request
of the Bureau of Indian Affairs.

The plat representing the survey of a
portion of the subdivisional lines, and
the subdivision of certain sections,
Township 36 North, Range 8 East,
accepted April 29, 2016, and officially
filed May 3, 2016, for Group 1147,
Arizona.

This plat was prepared at the request
of the Bureau of Indian Affairs.

The plat representing the dependent
resurvey of a portion of the
subdivisional lines, and the dependent
resurvey of Homestead Entry Survey No.
97, Township 14 North, Range 10 East,
accepted August 31, 2016, and officially
filed September 2, 2016, for Group 1123,
Arizona.

This plat was prepared at the request
of the United States Forest Service.

The plat representing the dependent
resurvey of a portion of the south

boundary, the dependent resurvey of a
portion of the subdivisional lines, and
the subdivision of section 29, Township
18 North, Range 26 East, accepted April
29, 2016, and officially filed May 3,
2016, for Group 1146, Arizona.

This plat was prepared at the request
of the National Park Service.

The plat representing the dependent
resurvey of a portion of the Arizona-
Utah State Line (north boundary), the
survey of the subdivisional lines, and
the subdivision of certain sections,
Township 41 North, Range 26 East,
accepted September 20, 2016, and
officially filed September 21, 2016, for
Group 1150, Arizona.

This plat was prepared at the request
of the Bureau of Indian Affairs.

The supplemental plat showing the
correction to the location of Mineral
Survey No. 542, and the subsequent
amended lotting, section 33, Township
24 North, Range 18 West, accepted
September 9, 2015, and officially filed
September 10, 2015, for Supplemental
Group 9109, Arizona.

This plat was prepared at the request
of the Bureau of Land Management.

A person or party who wishes to
protest against any of these surveys
must file a written protest with the
Arizona State Director, Bureau of Land
Management, stating that they wish to
protest.

A statement of reasons for a protest
may be filed with the notice of protest
to the State Director, or the statement of
reasons must be filed with the State
Director within thirty (30) days after the
protest is filed.

FOR FURTHER INFORMATION CONTACT:

These plats will be available for
inspection in the Arizona State Office,
Bureau of Land Management, One North
Central Avenue, Suite 800, Phoenix,
Arizona 85004-4427. Persons who use a
telecommunications device for the deaf
(TDD) may call the Federal Information
Relay Service (FIRS) at 1-800-877-8339
to contact the above individual during
normal business hours. The FIRS is
available 24 hours a day, 7 days a week,
to leave a message or question with the
above individual. You will receive a
reply during normal business hours.

Gerald T. Davis,

Chief Cadastral Surveyor of Arizona.

**Notice of Availability of the Record of
Decision for the Proposed Vantage to
Pomona Heights 230 kV Transmission
Line Project in Grant, Kittitas, and
Yakima Counties, Washington**

AGENCY: Bureau of Land Management,
Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land
Management (BLM) announces the
availability of the Record of Decision
(ROD) authorizing the issuance of a
right-of-way grant (ROW) to Pacific
Power to construct, operate, and
maintain an electric transmission line
on land administered by the BLM for
the Vantage to Pomona Heights 230
kilovolt (kV) Transmission Line Project
(Project). The Coeur d'Alene and
Spokane District Manager signed the
ROD on January 13, 2017, which
constitutes the final decision by the
BLM.

ADDRESSES: The BLM has sent copies of
the ROD to cooperating agencies
(identified below), public libraries in
the Project area, and interested parties
who previously requested a copy.
Copies of the ROD are available upon
request and for public inspection at the
addresses listed in the **SUPPLEMENTARY
INFORMATION** section. The ROD and
supporting documents are also available
electronically on the National ePlanning
National Environmental Policy Act
(NEPA) Register at: <http://1.usa.gov/1S4ssrO>.

FOR FURTHER INFORMATION CONTACT:

Robin Estes, BLM Project Manager, at
(541) 416-6728, by email at blm_or_vantage_pomona@blm.gov, or at the
following address: BLM Spokane
District Office, 1103 North Fancher
Road, Spokane Valley, WA 99212-1275.
Persons who use a telecommunications
device for the deaf (TDD) may call the
Federal Relay Service at 1-800-877-
8339 to contact the above individual
during normal business hours. The
service is available 24 hours a day, 7
days a week, to leave a message or
question with the above individual. You
will receive a reply during normal
business hours.

SUPPLEMENTARY INFORMATION: Pacific
Power filed Federal applications for
ROWs with the BLM, the U.S.
Department of the Army Joint Base
Lewis-McChord Yakima Training Center

(JBLM YTC), and the U.S. Bureau of Reclamation (Reclamation) for the construction, operation, and maintenance of a 230 kV transmission line. The transmission line would run from Pacific Power's Pomona Heights Substation located east of Selah, Washington, in Yakima County to the Bonneville Power Administration (BPA) Vantage Substation located just east of the Wanapum Dam in Grant County, Washington. Pacific Power's stated interest in the new transmission line is to reduce the risk of service interruptions and ensure continued reliable, efficient, and coordinated service to the Yakima Valley.

The NEPA analysis for the Project fully describes Project alternatives; identifies direct, indirect, and cumulative impacts; and identifies mitigation measures that could avoid, minimize, or offset potential impacts. In accordance with 40 CFR 1501.5, the BLM was the Lead Agency for conducting the NEPA analysis. The cooperating agencies (40 CFR parts 1508.5 and 1501.6) in the NEPA process were the JBLM YTC; Reclamation; BPA; Federal Highway Administration; U.S. Fish and Wildlife Service; Washington Department of Archaeology and Historic Preservation; Washington Department of Fish and Wildlife; Washington Department of Natural Resources; Washington State Department of Transportation; and Grant, Kittitas, and Yakima Counties. To address any unavoidable impacts of the Project to Greater Sage-grouse, a project-specific Framework for Development of a Greater Sage-Grouse Compensatory Mitigation Plan (Mitigation Framework) was developed. The Mitigation Framework provides the guidance to facilitate Pacific Power's development of a Greater Sage-grouse Compensatory Mitigation Plan. The Mitigation Framework is included as an appendix in the Final Environmental Impact Statement (EIS) and in the ROD.

Pursuant to NEPA implementing regulation 40 CFR 1501.7, the Notice of Intent (NOI) to prepare an EIS for the proposed Project was published in the **Federal Register** on January 5, 2010 (75 FR 429). The publication of the NOI initiated the public scoping comment period that concluded on March 8, 2010.

On January 4, 2013, the BLM published the Notice of Availability (NOA) for the Draft EIS in the **Federal Register** (78 FR 756), starting the 90-day public comment period. As a result of the comments received at public meetings and submitted in writing during the Draft EIS comment period, a new alternative route, the New Northern

Route (NNR) Alternative, was identified. The NNR Alternative is 40.5 miles in length. The BLM determined that a Supplemental Draft EIS was required in order to assess the effects of the NNR Alternative. On January 2, 2015, the BLM published the NOA for the Supplemental Draft EIS in the **Federal Register** (80 FR 50).

The BLM was the Lead Federal Agency for the NEPA analysis process and preparation of the EIS. On October 21, 2016, the BLM published the NOA for the Final EIS in the **Federal Register** (81 FR 72821). Printed and electronic copies of the Draft EIS, Supplemental Draft EIS, and Final EIS are available at the Spokane District Office and, electronically, on the National ePlanning NEPA Register at: <http://1.usa.gov/1S4ssrO>.

The BLM purpose and need for the action is to respond to a ROW application submitted under Section 501 of the Federal Land Policy and Management Act (43 U.S.C. 1761(a)) to use public lands for an electric transmission system and related facilities. The BLM adopted the Agency Preferred Alternative, the NNR Alternative—Overhead Design Option, from the Final EIS. The ROD approves issuance of a ROW to Pacific Power over approximately 4 miles of land administered by the BLM crossed by the NNR Alternative—Overhead Design Option in Yakima and Kittitas Counties. The BLM Coeur d'Alene and Spokane District Manager signed the ROD, which constitutes the final decision of the BLM and makes the decision to issue a ROW effective immediately. Copies of the ROD are available for public inspection during normal business hours at the following BLM offices: Bureau of Land Management, Wenatchee Field Office, 915 Walla Walla Ave., Wenatchee, Washington; and Bureau of Land Management, Spokane District Office, 1103 N. Fancher Rd., Spokane Valley, Washington.

Appeal Information: This decision may be appealed to the Interior Board of Land Appeals in accordance with the regulations contained in 43 CFR part 4. Appeal and stay procedures are outlined in Form 1842–1.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Linda Clark,

Spokane District Manager and Authorizing Officer.

[FR Doc. 2017–01000 Filed 1–17–17; 8:45 am]

BILLING CODE 4310–33–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2016–0045]

Atlantic Wind Lease Sale 7 (ATLW–7) for Commercial Leasing for Wind Power on the Outer Continental Shelf Offshore Kitty Hawk, North Carolina—Final Sale Notice; MMAA104000

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Final Sale Notice for Commercial Leasing for Wind Power on the Outer Continental Shelf Offshore Kitty Hawk, North Carolina.

SUMMARY: This document is the Final Sale Notice (FSN) for the sale of one commercial wind energy lease on the Outer Continental Shelf (OCS) offshore Kitty Hawk, North Carolina, pursuant to 30 CFR 585.216. The Bureau of Ocean Energy Management (BOEM) will offer Lease OCS–A 0508 for sale using an ascending bidding auction format. The FSN contains information pertaining to the area available for leasing, provisions and conditions, auction details, the lease form, criteria for evaluating competing bids, award procedures, appeal procedures, and lease execution. The issuance of the lease resulting from this sale would not constitute an approval of project-specific plans to develop offshore wind energy. Such plans, if submitted by the lessee, would be subject to subsequent environmental, technical, and public reviews prior to a decision to authorize any such development.

DATES: BOEM will hold a mock auction for the bidders starting at 9:00 a.m. Eastern Standard Time (EST) on March 14, 2017. The monetary auction will be held online and will begin at 9:00 a.m. EST on March 16, 2017. Additional details are provided in the section entitled “Deadlines and Milestones for Bidders.”

FOR FURTHER INFORMATION CONTACT: Will Waskes, BOEM Office of Renewable Energy Programs, 45600 Woodland Road, VAM–OREP, Sterling, Virginia 20166, (703) 787–1320 or Will.Waskes@boem.gov.

Authority: This FSN is published pursuant to subsection 8(p) of the OCS Lands Act (43 U.S.C. 1337(p)), as amended by section 388 of the Energy Policy Act of 2005, and the implementing regulations at 30 CFR part 585, including sections 211 and 216.

Background: BOEM proposed this lease sale on August 16, 2016, in the *Proposed Sale Notice and Request for Interest (PSN/RFI) for Commercial*

Leasing for Wind Power on the Outer Continental Shelf (OCS) Offshore North Carolina (Kitty Hawk), which was published in the **Federal Register** (81 FR 54591). A 60-day comment period followed. BOEM received 19 comment submissions in response to the PSN/RFI, which are available on regulations.gov (Docket ID: BOEM-2016-0045) at: <https://www.regulations.gov/docket?D=BOEM-2016-0045>. BOEM has posted a document containing responses to comments submitted during the PSN/RFI comment period. The document, entitled *Response to Comments*, can be found through BOEM's Web site at: <http://www.boem.gov/North-Carolina>.

In response to the Request for Interest, BOEM received one affirmation of interest from an existing legally, technically, and financially qualified entity. In addition to this affirmation of interest, eight new entities submitted qualifications in response to the PSN and have been determined to be qualified to participate in the North Carolina (Kitty Hawk) lease sale. Accordingly, BOEM has determined that competitive interest in OCS-A 0508 continues to exist, and BOEM is proceeding with a competitive leasing process as set forth in 30 CFR 585.211 through 585.225.

Environmental Reviews

On January 23, 2015, BOEM published a Notice of Availability (NOA) of an Environmental Assessment (EA) for commercial wind lease issuance and site assessment activities on the Atlantic OCS offshore North Carolina with a 30-day public comment period (80 FR 3621). In response to the NOA, BOEM received 195 comments, which are available at <http://www.regulations.gov>, Docket No. BOEM-2015-0001. Many of the comments focused on mitigation measures to protect wildlife, specifically marine mammals. Based on the comments received in response to the EA, public outreach, information meetings, and new information received, BOEM made revisions to the EA originally published in January 2015. As a result of the analysis in the revised EA, BOEM issued a Finding of No Significant Impact (FONSI) on September 18, 2015, (80 FR 56494). The revised EA and FONSI can be found at: <http://www.boem.gov/North-Carolina/>.

In addition, BOEM has concluded consultations under the Endangered Species Act (ESA) with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service (NMFS), and under the Magnuson-Stevens Fishery Conservation and Management Act with NMFS, relating to the lease sale,

associated site characterization surveys, and subsequent site assessment activities. In October 2016, the States of North Carolina and Virginia concurred with BOEM's consistency determination under the Coastal Zone Management Act.

On May 23, 2013, BOEM executed a programmatic agreement (PA) with the State Historic Preservation Officer of North Carolina and the Advisory Council on Historic Preservation to guide consultation under section 106 of the National Historic Preservation Act for renewable energy activities offshore North Carolina. The PA provides for consultation to continue throughout BOEM's commercial leasing process and the decision-making process regarding the approval, approval with modification, or disapproval of a lessee's Site Assessment Plan (SAP) and/or Construction and Operations Plan (COP). In addition, the PA allows for phased identification and evaluation of historic properties. The PA can be found at: <http://www.boem.gov/South-Atlantic-Renewable-Energy-Activities/>.

On May 7, 2015, BOEM completed its section 106 review for issuing commercial leases within the North Carolina Wind Energy Areas (WEA) and published a *Finding of No Historic Properties Affected For the Issuance of Commercial Leases within the Kitty Hawk, Wilmington East and Wilmington West Wind Energy Areas For Wind Energy Development on the Outer Continental Shelf Offshore North Carolina*. The Finding can be found at: <http://www.boem.gov/NC-WEAs-Lease-Issuance/>.

Through its environmental review process, and in consideration of the comments received in response to the EA, BOEM developed measures to mitigate potential impacts from site characterization surveys and site assessment activities. Mitigation measures designed to reduce or eliminate impacts from survey activities will be enforced through the terms, conditions, and stipulations included in Addendum "C" of Lease OCS-A 0508. Mitigation measures related to the installation and operation of meteorological towers and/or buoys would be included as terms and conditions of the eventual lessee's SAP approval. This suite of mitigation measures was developed using the best available science, and BOEM will continue to work with affected stakeholders and assess ongoing and future research relating to potential survey, site assessment, and construction and operations impacts, including potential mitigation measures. Additional environmental reviews and

consultations will be conducted as necessary upon receipt of the lessee's SAP and COP.

List of Eligible Bidders: BOEM has determined that pursuant to 30 CFR 585.106 and 107, the following entities are legally, technically, and financially qualified to hold a commercial wind lease offshore North Carolina, and therefore may participate in this lease sale as bidders subject to meeting the requirements outlined in this notice.

Company name	Company No.
Avangrid Renewables, LLC	15019
Enbridge Holdings (Green Energy) L.L.C	15065
Shell WindEnergy Inc	15066
Northland Power America Inc	15068
Wind Future LLC	15067
Outer Banks Ocean Energy, LLC	15008
PNE Wind USA, Wind Inc	15056
Statoil Wind US LLC	15058
wpd offshore Alpha LLC	15060

Deadlines and Milestones for Bidders: This section describes the major deadlines and milestones in the auction process from publication of this FSN to execution of the lease pursuant to this sale. These are organized into various stages: the FSN Waiting Period; Conducting the Auction; and From the Auction to Lease Execution.

• FSN Waiting Period

• *Bidder's Financial Form (BFF):* Each bidder must submit a BFF to BOEM in order to participate in the auction. BOEM must receive each bidder's BFF no later than February 2, 2017. BOEM will consider extensions to this deadline only if BOEM determines that the failure to timely submit a BFF was caused by events beyond the bidder's control. The BFF can be downloaded at: <http://www.boem.gov/North-Carolina/>. Once the BFF has been processed, bidders may log into pay.gov and submit a bid deposit. For purposes of this auction, BOEM will not consider any BFFs submitted by bidders for previous lease sales. BOEM will only accept an originally executed paper copy of the BFF. The BFF must be executed by an authorized representative as shown on the bidder's legal qualifications. Each bidder is required to sign the self-certification in the BFF, in accordance with 18 U.S.C. 1001 (Fraud and False Statements).

• *Bid Deposit:* Each bidder must provide a bid deposit of \$450,000 no later than February 16, 2017, in order to participate in the mock auction and the monetary auction. BOEM will consider extensions to this deadline only if BOEM determines that the failure to

timely submit the bid deposit was caused by events beyond the bidder's control. Further information about bid deposits can be found in the "Bid Deposit" section of this notice.

- **Mock Auction:** BOEM will hold a Mock Auction on March 14, 2017, beginning at 9:00 a.m. EST. The Mock Auction will be held online. BOEM will contact each bidder that has timely filed a BFF and bid deposit and provide instructions for participation. Only bidders that have timely submitted BFFs and bid deposits will be permitted to participate in the Mock Auction.

- **Conducting the Auction:** BOEM, through its contractor, will hold an auction as described in this notice.

- **Auction:** On March 16, 2017, BOEM, through its contractor, will hold the auction. The first round of the auction will start at 9:00 a.m. EST. The auction will proceed electronically according to a schedule to be distributed by the BOEM Auction Manager at the time of the auction. BOEM anticipates that the auction will last one business day, but it may continue on consecutive business days, as necessary, until the auction ends in accordance with the procedures described in the "Auction Format" section of this notice. The monetary bidding will end in the first round in which BOEM receives one or zero bids at the asking price.

- **Announce Provisional Winner:** BOEM will announce the provisional winner of the lease sale after the auction ends.

- **From the Auction to Lease Execution**

- **Refund Non-Winners:** Once the provisional winner has been announced, BOEM will provide the non-winners a written explanation of why they did not win and return their bid deposits.

- **Department of Justice (DOJ) Review:** DOJ will have 30 days in which to conduct an antitrust review of the auction, pursuant to 43 U.S.C § 1337(c).

- **Delivery of the Lease:** BOEM will send three lease copies to the winner, with instructions on how to execute the lease. The first year's rent is due 45 calendar days after the winner receives the lease copies for execution.

- **Return the Lease:** Within 10 business days of receiving the lease copies, the auction winner must post financial assurance, pay any outstanding balance of its bonus bid (*i.e.*, winning monetary bid minus applicable bid deposit), and sign and return the three executed lease copies. The winner may request extensions to the 10-day deadline, and BOEM may grant such extensions if BOEM determines the delay to be caused by

events beyond the winner's control, pursuant to 30 CFR 585.224(e).

- **Execution of Lease:** Once BOEM has received the lease copies and verified that all other required materials have been received, BOEM will make a final determination regarding its issuance of the lease and will execute the lease, if appropriate.

- **Area Offered for Leasing:** The area available for sale will be auctioned as one lease, Lease OCS-A 0508, (Kitty Hawk Lease Area (LA)). The Kitty Hawk LA consists of 122,405 acres. The Kitty Hawk LA is the same as the Kitty Hawk WEA that BOEM announced on August 11, 2014, and published in the PSN. A description of the Kitty Hawk LA can be found in Addendum "A" of the lease, which along with the Area Identification announcement and PSN, are available with this notice on the BOEM Web site at: <http://www.boem.gov/North-Carolina/>.

Map of the Area Offered for Leasing

A map of the Kitty Hawk LA, and GIS spatial files X, Y (eastings, northings) UTM Zone 18, NAD83 Datum, and geographic X, Y (longitude, latitude), NAD83 Datum can be found on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>.

A large scale map of the Kitty Hawk LA, showing boundaries of the area with numbered blocks, is available from BOEM upon request at the following address: Bureau of Ocean Energy Management, Office of Renewable Energy Programs, 45600 Woodland Road, VAM-OREP, Sterling, Virginia 20166, Phone: (703) 787-1300, Fax: (703) 787-1708.

Withdrawal of Blocks: BOEM reserves the right to withdraw all or portions of the Kitty Hawk LA prior to executing the lease with the winning bidder, based upon relevant information provided to BOEM.

Lease Terms and Conditions: BOEM has included terms, conditions, and stipulations for the OCS commercial wind lease to be offered through this sale. After the lease is issued, BOEM reserves the right to require compliance with additional terms and conditions associated with approval of a SAP or COP. The lease is available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>. The lease includes the following seven attachments:

- Addendum "A" (Description of Leased Area and Lease Activities);
- Addendum "B" (Lease Term and Financial Schedule);
- Addendum "C" (Lease Specific Terms, Conditions, and Stipulations);
- Addendum "D" (Project Easement);

- Addendum "E" (Rent Schedule post-COP approval);

- Appendix A to Addendum "C" (Incident Report: Protected Species Injury or Mortality); and

- Appendix B to Addendum "C" (Required Data Elements for Protected Species Observer Reports).

Addenda "A," "B," and "C" provide detailed descriptions of lease terms and conditions. Addenda "D" and "E" will be completed at the time of COP approval or approval with modifications.

The most recent version of BOEM's renewable energy commercial lease form (BOEM-0008) is available on BOEM's Web site at: <http://www.boem.gov/BOEM-OCS-Operation-Forms/>.

Potential bidders should note that BOEM and the Bureau of Safety and Environmental Enforcement (BSEE) are in the process of reassigning regulations relating to safety and environmental oversight and enforcement responsibilities for offshore renewable energy projects from BOEM to BSEE. Once this administrative reassignment is finalized, BOEM may make ministerial and non-substantive amendments to the lease to conform it to the regulatory revisions.

Plans: Pursuant to 30 CFR 585.601, the leaseholder wishing to submit a SAP must do so within 12 months of lease issuance. If the lessee intends to continue its commercial lease with an operations term, the lessee must submit a COP at least 6 months before the end of the site assessment term.

Financial Terms and Conditions: This section provides an overview of the annual payments required of the lessee that will be fully described in the lease, and the financial assurance requirements that will be associated with the lease.

Rent: Pursuant to 30 CFR 585.224(b) and 585.503, the first year's rent payment of \$3 per acre is due within 45 calendar days of the date the lessee receives the lease for execution. Thereafter, annual rent payments are due on the anniversary of the Effective Date of the lease (the "Lease Anniversary"). Once commercial operations under the lease begin, BOEM will charge rent only for the portions of the lease not authorized for commercial operations, *i.e.*, not generating electricity. However, instead of geographically dividing the leased area into acreage that is "generating" and "non-generating," the fraction of the lease accruing rent will be based on the fraction of the total nameplate capacity of the project that is not yet in operation. This fraction is calculated by

dividing the nameplate capacity not yet authorized for commercial operations at the time payment is due by the anticipated nameplate capacity after full installation of the project (as described in the COP). The annual rent due for a given year is then derived by multiplying this fraction by the amount of rent that would have been due for the lessee's entire LA at the rental rate of \$3 per acre.

For a 122,405 acre lease (the size of the Kitty Hawk LA), the rent payment will be \$367,215 per year if no portion of the LA is authorized for commercial operations. If 300 megawatts (MW) of a project's nameplate capacity is operating (or authorized for operation), and the approved COP specifies a maximum project size of 500 MW, the rent payment will be \$146,886. This payment is based on the 200 MW of nameplate capacity BOEM has not yet authorized for commercial operations. For the above example, this would be calculated as follows: $200\text{MW}/500\text{MW} \times (\$3/\text{acre} \times 122,405 \text{ acres}) = \$146,886$.

If the lessee submits an application for relinquishment of a portion of its leased area within the first 45 calendar

days following the date that the lease is received by the lessee for execution, and BOEM approves that application, no rent payment will be due on the relinquished portion of the Kitty Hawk LA. Later relinquishments of any portion of the Kitty Hawk LA will reduce the lessee's rent payments starting in the year following BOEM's approval of the relinquishment.

The lessee also must pay rent for any project easement associated with the lease, commencing on the date that BOEM approves the COP (or modification thereof) that describes the project easement. Annual rent for a project easement that is 200 feet wide and centered on the transmission cable is \$70 per statute mile. For any additional acreage required, the lease must also pay the greater of \$5 per acre per year or \$450 per year.

Operating Fee: For purposes of calculating the initial annual operating fee payment and pursuant to 30 CFR 585.506, an operating fee rate is applied to a proxy for the wholesale market value of the electricity expected to be generated from the project during its first twelve months of operations. This

initial payment will be prorated to reflect the period between the commencement of commercial operations and the Lease Anniversary. The initial annual operating fee payment is due within 45 days of the commencement of commercial operations. Thereafter, subsequent annual operating fee payments are due on or before each Lease Anniversary.

The subsequent annual operating fee payments are calculated by multiplying the operating fee rate by the imputed wholesale market value of the projected annual electric power production. For the purposes of this calculation, the imputed market value is the product of the project's annual nameplate capacity, the total number of hours in the year (8,760), the capacity factor, and the annual average price of electricity derived from a historical regional wholesale power price index. For example, the annual operating fee for a 100 MW wind facility operating at a 40% capacity (*i.e.*, capacity factor of 0.4) with a regional wholesale power price of \$40/MWh and an operating fee rate of 0.02 would be calculated as follows:

$$\text{Annual Operating Fee} = 100\text{MW} \times 8,760 \frac{\text{hrs}}{\text{year}} \times 0.4 \times \frac{\$40}{\text{MWh}} \text{Power Price} \times 0.02 = \$280,320$$

Operating Fee Rate: The operating fee rate is the share of imputed wholesale market value of the projected annual electric power production due to the Office of Natural Resources Revenue as an annual operating fee. For the Kitty Hawk LA, BOEM will set the fee rate at 0.02 (*i.e.*, 2%) for the entire life of commercial operations.

Nameplate Capacity: Nameplate capacity is the maximum rated electric output, expressed in MW, that the turbines of the wind facility under commercial operations can produce at their rated wind speed as designated by the turbine's manufacturer. The lessee will specify in its COP the nameplate capacity available at the start of each year of commercial operations on the lease. For example, if the lessee specifies 20 turbines in its COP, and each is rated by the manufacturer at 5 MW, the nameplate capacity of the wind facility is 100 MW.

Capacity Factor: The capacity factor compares the amount of energy delivered to the grid during a period of time to the amount of energy the wind facility would have produced at full capacity. The amount of power delivered in a year will always be less than the theoretical 100% capacity, largely because of the variability of

wind speeds, transmission line loss, and downtime for maintenance or other purposes.

The capacity factor is expressed as a decimal between zero and one, and represents the share of anticipated generation of the wind facility that is delivered to the interconnection grid (*i.e.*, where the lessee's facility interconnects with the electric grid) relative to the wind facility's generation at continuous full power operation at nameplate capacity. BOEM has set the capacity factor for the year in which commercial operations commence and the six full years thereafter at 0.4 (*i.e.*, 40%). At the end of the sixth year, BOEM may adjust the capacity factor to reflect the performance over the previous five years based upon the actual metered electricity generation at the delivery point to the electrical grid. BOEM may make similar adjustments to the capacity factor once every five years thereafter. The maximum change in the capacity factor from one period to the next will be limited to plus or minus 10 percent of the previous period's value.

Wholesale Power Price Index: Pursuant to 30 CFR 585.506(c)(2)(i), the wholesale power price, expressed in dollars per MW-hour, is determined at the time each annual operating fee

payment is due, based on the weighted average of the inflation-adjusted peak and off-peak spot price indices for the PJM Dominion zone for the most recent year of spot price data available. The wholesale power price is adjusted for inflation from the year associated with the published spot price indices to the year in which the operating fee is to be due, based on the lease anniversary and using annual implicit price deflators as reported by the U.S. Department of Commerce, Bureau of Economic Analysis.

Financial Assurance: Within 10 business days after receiving the lease copies and pursuant to 30 CFR 585.515–516, the provisional winner of the Kitty Hawk LA must provide an initial lease-specific bond or other approved means of meeting the lessor's initial financial assurance requirements. The provisional winner may meet financial assurance requirements by posting a surety bond or by setting up an escrow account with a trust agreement giving BOEM the right to withdraw the money held in the account on demand. BOEM encourages the provisionally winning bidder to discuss the financial assurance requirement with BOEM as soon as possible after the auction has concluded.

BOEM will base the amount of all SAP, COP, and decommissioning financial assurance requirements on cost estimates for meeting all accrued lease obligations at the respective stages of development. The required amount of supplemental and decommissioning financial assurance will be determined on a case-by-case basis.

The financial terms described above can be found in Addendum "B" of the lease, which BOEM has made available with this notice on its Web site at: <http://www.boem.gov/North-Carolina/>.

Bidder's Financial Form: Each bidder must fill out the BFF referenced in this FSN. BOEM has also made a copy of the form available with this notice on its Web site at: <http://www.boem.gov/North-Carolina/>. BOEM recommends that each bidder designate an email address in its BFF that the bidder will then use to create an account in *pay.gov* (if it has not already done so).

BOEM will not consider BFFs submitted by bidders for previous lease sales to satisfy the requirements of this auction. BOEM will also only consider BFFs submitted after the deadline if BOEM determines that the failure to timely submit the BFF was caused by events beyond the bidder's control. BOEM will only accept an original, executed paper copy of the BFF. The BFF must be executed by an authorized representative who has been identified in the qualifications package on file with BOEM as authorized to bind the company.

Bid Deposit: A bid deposit is an advance cash payment submitted to BOEM in order to participate in the auction. After creating an account in *pay.gov* (if necessary), bidders may use the Bid Deposit Form on the *pay.gov* Web site to leave a deposit. Each bidder must submit a bid deposit of \$450,000 no later than February 16, 2017. Any bidder who fails to submit the bid deposit by this deadline may be disqualified from participating in the auction.

Following the auction, bid deposits will be applied against bonus bids or other obligations owed to BOEM. If the bid deposit exceeds a bidder's total financial obligation, the balance of the bid deposit will be refunded to the bidder. BOEM will refund bid deposits to non-winners once BOEM has announced the provisional winner.

If BOEM offers a lease pursuant to a provisionally winning bid, and that bidder fails to timely return the signed lease form, establish financial assurance, and/or pay the balance of its bid, BOEM will retain the bidder's \$450,000 bid deposit. BOEM reserves the right to determine which bid would

have won in the absence of the bid previously-determined to be the winning bid, and to offer a lease pursuant to this next highest bid.

Minimum Bid: The minimum bid is the lowest bid BOEM will accept as a winning bid and it is where BOEM will start the monetary bidding. BOEM has established a minimum bid of \$2.00 per acre, or \$244,810, for this lease sale.

Auction Procedures

Ascending Bidding With Cash Bid Variable

As authorized under 30 CFR 585.220(a)(2) and 585.221(a)(1), BOEM will use an ascending bidding auction with cash as the bid variable for this sale. Using an online bidding system to host the auction, BOEM will start the bidding for Lease OCS-A 0508 at \$244,810, and increase that price incrementally until no more than one active bidder remains in the auction.

The Auction

The auction will be conducted in a series of rounds. At the start of each round, BOEM will state an asking price for the LA. If a bidder is willing to meet that asking price for the LA, it will indicate this by submitting a bid equal to the asking price, *i.e.*, a live bid.

To participate in any round of the auction, a bidder must have submitted a live bid in the previous round. As long as there are two or more live bids for the LA, the auction will proceed to the next round. Between rounds, BOEM will raise the asking price for the LA by an increment that it determines appropriate. Asking price increments are within BOEM's sole discretion, but may be based on a number of factors, including the number of bidders still active in the auction and BOEM's best estimate of how many rounds may remain before the auction is resolved.

As the auction proceeds, a bidder will retain its eligibility to continue bidding as long as that bidder submitted a live bid in the previous round. Between rounds, BOEM will release information indicating the number of live bids in the previous round of the auction (*i.e.*, the level of demand) and the asking price in the upcoming round of the auction. Bidders may be bound by any of their bids until the auction results are finalized.

Exit Bidding

In any round after the first round of the auction, a bidder may submit an exit bid that is higher than the previous round's asking price, but less than the current round's asking price. If a bidder submits an exit bid, it is not eligible to participate in any subsequent rounds of

the auction. During the auction, exit bids will be seen only by BOEM and not by other bidders.

If the LA receives only exit bids in a round, no bidders will be eligible to bid in the next round, and the auction will conclude.

Determining the Provisional Winner

The auction will end in the first round in which at most one live bid is received. If there is one live bid in the final round, that bid is the provisionally winning bid. If there are no live bids, the highest exit bid is the provisionally winning bid. If there is a tie for the highest exit bid, BOEM's tie-breaking procedures will resolve the tie. If BOEM receives no live or exit bids, then there is a tie among all bidders that had submitted live bids in the previous round and BOEM's tie-breaking procedures will determine the provisionally winning bid.

Ties are resolved by a random process. The auction system generates a random number for each bidder. In the event of a tie, these numbers are compared, and the tied bidder with the highest random number is deemed the provisional winner.

Additional Information Regarding the Auction Format

Bidder Authentication

For the online auction, BOEM will require two-factor authentication. After BOEM has processed the bid deposits, the auction contractor sends several bidder authentication packages to the bidders. One package will contain digital authentication tokens necessary for allowing access to the auction Web site. As a general practice, tokens are mailed to the Primary Point of Contact indicated on the BFF. This individual is responsible for distributing the tokens to the individuals authorized to bid for that company. *Bidders are to ensure that each token is returned within three business days following the auction.* An addressed, stamped envelope will be provided to facilitate this process. In the event that a bidder fails to submit a bid deposit or does not participate in the auction, BOEM will de-activate that bidder's tokens and login information, and the bidder will be asked to return its tokens.

The second package contains login credentials for authorized bidders. The login credentials are mailed to the address provided in the BFF for each authorized individual. Bidders can confirm these addresses by calling 703-787-1320. This package will contain user login information and instructions for accessing the Bidder Manual for the

auction system, the Auction System Technical Supplement (ASTS) and the Alternative Bidding Form, all of which are available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>. The login information, along with the tokens, will be tested during the Mock Auction.

Timing of Auction

The auction will begin at 9:00 a.m. EST on March 16, 2017. Bidders may log in as early as 8:30 a.m. on that day. We recommend that bidders log in earlier than 9:00 a.m. on that day to ensure that any login issues are resolved prior to the start of the auction. Once bidders have logged in, they should review the auction schedule, which lists the anticipated start times, end times, and recess times of each round in the auction. Each round is structured as follows:

- Round bidding begins;
- Bidders enter their bids;
- Round bidding ends and the Recess begins;
- During the Recess, previous Round results are posted;
- Bidders review the previous Round results and prepare their next Round bids; and
- Next Round bidding begins.

The first round will last about 30 minutes, though subsequent rounds may be shorter. Recesses are anticipated to last approximately 10 minutes. The description of the auction schedule included with this FSN is tentative. Bidders should consult the auction schedule on the bidding Web site during the auction for updated times. Bidding may continue until about 6:00 p.m. each day. BOEM anticipates that the auction will last one business day, but bidders are advised to prepare to continue bidding for additional business days as necessary to resolve the auction.

BOEM and the auction contractors will use the auction platform messaging service to keep bidders informed on issues of interest during the auction. For example, BOEM may change the schedule at any time, including during the auction. When BOEM changes the schedule during an auction, it uses the messaging feature to notify bidders that a revision has been made, and directs bidders to the relevant page. BOEM also uses the messaging system for other changes and updates during the auction.

Bidders may place bids at any time during the round. At the top of the bidding page, a countdown clock shows how much time remains in the round. Bidders have until the scheduled time to place bids. Bidders should do so according to the procedures described in this notice, and the ASTS. No

information about the round results is available until the round has closed and results have been posted, so there is no strategic advantage to placing bids early or late in the round.

The timing of the auction will be elaborated on and clarified in the ASTS. The ASTS describes auction procedures that are incorporated by reference in this notice, unless the procedures described in the ASTS directly contradict this notice. In the event of an inconsistency between the ASTS and the FSN, the FSN is controlling.

Prohibition on Communications Between Bidders During Auction

During the auction, bidders are prohibited from communicating with each other regarding their participation in the auction. Additionally, during the auction, bidders are prohibited from communicating to the general public, including, but not limited to, through social media, updated Web sites, or press releases, regarding any aspect of their participation or lack thereof in the auction.

Alternate Bidding Procedures

Alternate Bidding Procedures enable a bidder who is having difficulty accessing the Internet to submit its bid via fax using an Alternate Bidding Form available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>.

In order to be authorized to use an Alternate Bidding Form, a bidder must call the help desk number listed in the Auction Manual *before* the end of the round. BOEM will authenticate the caller to ensure he/she is authorized to bid on behalf of the bidder. The bidder must explain the reasons for which he/she is forced to place a bid using the Alternate Bidding Procedures. BOEM may, in its sole discretion, permit or refuse to accept a request for the placement of a bid using the Alternate Bidding Procedures.

Rejection or Non-Acceptance of Bids: BOEM reserves the right and authority to reject any and all bids that do not satisfy the requirements and rules of the auction, the FSN, or applicable regulations and statutes.

Anti-Competitive Review: Bidding behavior in this sale is subject to Federal antitrust laws. Accordingly, following the auction, but before the acceptance of bids and the issuance of leases, BOEM will "allow the Attorney General, in consultation with the Federal Trade Commission, 30 days to review the results of the lease sale." 43 U.S.C. 1337(c). If a bidder is found to have engaged in anti-competitive behavior in connection with its participation in the competitive bidding

process, BOEM may reject the provisionally winning bid. Compliance with BOEM's auction procedures and regulations is not an absolute defense to violations of antitrust laws.

Anti-competitive behavior determinations are fact-specific. However, such behavior may manifest itself in several different ways, including, but not limited to:

- An express or tacit agreement among bidders not to bid in an auction, or to bid a particular price;
- An agreement among bidders not to bid;
- An agreement among bidders not to bid against each other; or
- Other agreements among bidders that have the potential to affect the final auction price.

BOEM will decline to award a lease pursuant to 43 U.S.C. 1337(c) if the Attorney General, in consultation with the Federal Trade Commission, determines that awarding the lease would be inconsistent with the antitrust laws.

For more information on whether specific communications or agreements could constitute a violation of Federal antitrust law, please see: <http://www.justice.gov/atr/public/business-resources.html>, or consult legal counsel.

Process for Issuing the Lease: Once all post-auction reviews have been completed to BOEM's satisfaction, BOEM will issue three unsigned copies of the lease to the provisionally winning bidder. Within 10 business days after receiving the lease copies, the provisionally winning bidder must:

1. Sign and return the lease copies on the bidder's behalf;
2. File financial assurance, as required under 30 CFR 585.515–537; and
3. Pay by electronic funds transfer (EFT) the balance (if any) of the bonus bid (winning bid less the bid deposit). BOEM requires bidders to use EFT procedures (not *pay.gov*, the Web site bidders used to submit bid deposits) for payment of the balance of the bonus bid, following the detailed instructions contained in the "Instructions for Making Electronic Payments" available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>.

BOEM will not execute a lease until the three requirements above have been satisfied. BOEM has accepted the provisionally winning bidder's financial assurance pursuant to 30 CFR 585.515, and BOEM has processed the provisionally winning bidder's payment.

BOEM may extend the 10 business day deadline for signing the lease, filing the required financial assurance, and/or paying the balance of the bonus bid if

BOEM determines the delay was caused by events beyond the provisionally winning bidder's control.

If the provisionally winning bidder does not meet these requirements or otherwise fails to comply with applicable regulations or the terms of the FSN, BOEM reserves the right not to issue the lease to that bidder. In such a case, the provisionally winning bidder will forfeit its bid deposit. In such an event, BOEM reserves the right to identify the next highest bid submitted during the lease sale and offer the lease pursuant to that bid.

Within 45 calendar days of the date that the provisionally winning bidder receives copies of the lease, it must pay the first year's rent using the *pay.gov* Renewable Energy Initial Rental Payment form available at: <https://www.pay.gov/public/form/start/27797604/>. Subsequent annual rent payments must be made following the detailed instructions contained in the "Instructions for Making Electronic Payments," available on BOEM's Web site at: <http://www.boem.gov/North-Carolina/>.

Non-Procurement Debarment and Suspension Regulations: Pursuant to regulations at 43 CFR part 42, subpart C, an OCS renewable energy lessee must comply with the Department of the Interior's non-procurement debarment and suspension regulations at 2 CFR 180 and 1400. The lessee must also communicate this requirement to persons with whom the lessee does business relating to this lease, by including this term as a condition in their contracts and other transactions.

Force Majeure: The Program Manager of BOEM's Office of Renewable Energy Programs has the discretion to change any auction details specified in the FSN, including the date and time, in case of a *force majeure* event that the Program Manager deems may interfere with a fair and proper lease sale process. Such events may include, but are not limited to: natural disasters (e.g., earthquakes, hurricanes, floods, blizzards), wars, riots, acts of terrorism, fire, strikes, civil disorder or other events of a similar nature. In case of such events, BOEM will notify all qualified bidders via email or phone, or through the BOEM Web site at: <http://www.boem.gov/Renewable-Energy-Program/index.aspx>. Bidders should call 703-787-1320 if they have concerns.

Appeals: The appeals procedures are provided in BOEM's regulations at 30 CFR 585.225 and 585.118(c). Pursuant to 30 CFR 585.225:

(a) If BOEM rejects your bid, BOEM will provide a written statement of the reasons and refund any money

deposited with your bid, without interest.

(b) You will then be able to ask the BOEM Director for reconsideration, in writing, within 15 business days of bid rejection, under 30 CFR 585.118(c)(1). We will send you a written response either affirming or reversing the rejection.

The procedures for appealing final decisions with respect to lease sales are described in 30 CFR 585.118(c).

Protection of Privileged or Confidential Information: BOEM will protect privileged or confidential information that you submit, as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to "trade secrets and commercial or financial information that you submit that is privileged or confidential." 5 U.S.C. 552(b)(4). If you wish to protect the confidentiality of such information, clearly mark it "Contains Privileged or Confidential Information" and consider submitting such information as a separate attachment. BOEM will not disclose such information, except as required by FOIA. Information that is not labeled as privileged or confidential will be regarded by BOEM as suitable for public release. Further, BOEM will not treat as confidential aggregate summaries of otherwise confidential information.

Dated: January 10, 2017.

Walter D. Cruickshank,

Acting Director, Bureau of Ocean Energy Management.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR85854000; XXXR4524KS;
RR.4888TR11.0040001]

Agency Information Collection Activities Under OMB Review; Proposed New Collection

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation has forwarded the following Information Collection Request to the Office of Management and Budget (OMB) for review and approval: Collection and Compilation of Water Pipeline Field Performance Data (OMB Control Number 1006-XXXX). The Information Collection Request describes the nature of the information collection and its expected cost burden.

DATES: OMB has up to 60 days to approve or disapprove this information collection request, but may respond after 30 days; therefore, public comment must be received on or before February 17, 2017.

ADDRESSES: Send written comments to the Desk Officer for the Department of the Interior at the Office of Management and Budget, Office of Information and Regulatory Affairs, via facsimile to (202) 395-5806, or email to oir_submission@omb.eop.gov. A copy of your comments should also be directed to Dr. Lee Sears, Materials and Corrosion Laboratory, 86-68540, Bureau of Reclamation, P.O. Box 25007, Denver, Colorado 80225; or via email to lsears@usbr.gov. Please reference OMB Control Number: 1006-XXXX in your comments.

FOR FURTHER INFORMATION CONTACT: Dr. Lee Sears at 303-445-2392. You may also view the Information Collection Request at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Bureau of Reclamation (Reclamation) has obtained the services of an outside entity to survey water utilities and collect data on water pipeline performance. The information being collected is required to comply with a request from Congress for Reclamation to assemble data on pipeline reliability for specific types of pipes.

From 2013 through 2015, Reclamation worked with Water Research Foundation and Battelle Memorial Institute (Battelle) on a draft information collection request (ICR) to collect high-quality field performance data on pipeline reliability for water pipelines of different material and vintage. A **Federal Register** notice announcing the availability of this draft collection of this information was initiated on February 26, 2014 (79 FR 10842), offering the public a 60-day public comment period. A summary of comments received during the 60-day comment period, disposition of comments, and revised draft information collection were published in the **Federal Register** on October 1, 2014 (79 FR 59291) and the public comment period was reopened for another 30 days. In response to the public's request for additional time to comment, a third notice was published in the **Federal Register** on October 30, 2014 (79 FR 64622), extending the comment period another 30 days. In total, the public was provided 120 days to comment on the draft ICR. Also at the

public's request, all draft supporting documents were made available to the public for consideration. The contract between Reclamation and its partners was terminated in July 2015 before the ICR could be finalized.

Reclamation signed an agreement in November 2015 with Virginia Polytechnic Institute and State University (Virginia Tech) to develop a new ICR to collect buried water pipe performance data. The notice announcing the new draft ICR was published in the **Federal Register** on July 14, 2016 (81 FR 45533) to start the 60-day public comment period. The public comment period for this ICR ended on September 12, 2016. Information gathered from Reclamation's earlier attempt to develop an ICR to collect pipeline reliability data was incorporated into this current ICR.

II. Summary of Proposed Changes, Comments and Responses

Comments on this ICR were received from two entities. Responses to the public comments are addressed in Supporting Statement A of this ICR and are available for public review at www.reginfo.gov. Copies of the comments have also been uploaded at this same web address.

III. Data

Title: Collection and Compilation of Water Pipeline Field Performance Data.

OMB Control Number: 1006-XXXX.

Description of respondents: Water utility and Federal facility pipe data managers.

Frequency: One-time collection.

Estimated completion time: 10 minutes (making participation decision), 30 minutes (introductory webinar); and 110 minutes (uploading data). The total estimated time is 150 minutes for each respondent.

Estimated Total Number of Respondents: 500 (making participation decision).

Estimated Number of Responses per Respondent: 1.

Estimated Total of Annual Responses: 250.

Estimated Total Annual Burden Hours on Respondents: 83 hours (making participation decision); 126 hours (introductory webinar); and 459 hours (uploading data), for a combined total of 668 hours.

IV. Request for Comments

We invite your comments on:

(a) Whether the proposed collection of information is necessary for the proper performance of our functions, including whether the information will have practical use;

(b) the accuracy of our burden estimate for the proposed collection of information;

(c) ways to enhance the quality, usefulness, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Reclamation will display a valid OMB control number on the survey.

V. Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: January 10, 2017.

Richard W. LaFond,

*Chief, Civil Engineering Services Division,
Bureau of Reclamation.*

[FR Doc. 2017-01002 Filed 1-17-17; 8:45 am]

BILLING CODE 4332-90-P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Claim for Reimbursement of Benefit Payments and Claims Expense Under the War Hazards Compensation Act

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Office of Workers' Compensation Programs (OWCP) sponsored information collection request (ICR) revision titled, "Claim for Reimbursement of Benefit Payments and Claims Expense Under the War Hazards Compensation Act," to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 *et seq.*). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before February 17, 2017.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the [RegInfo.gov](http://www.reginfo.gov) Web site at http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201609-1240-003 or by contacting Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL-OWCP, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202-395-5806 (this is not a toll-free number); or by email: OIRA_submission@omb.eop.gov. Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: DOL_PRA_PUBLIC@dol.gov.

FOR FURTHER INFORMATION CONTACT: Contact Michel Smyth by telephone at 202-693-4129, TTY 202-693-8064, (these are not toll-free numbers) or sending an email to DOL_PRA_PUBLIC@dol.gov.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Claim for Reimbursement of Benefit Payments and Claims Expense Under the War Hazards Compensation Act (WHCA), Form CA-278, information collection. The OWCP is responsible for administering the WHCA (42 U.S.C. 1701 *et seq.*). WHCA section 104(a) (42 U.S.C. 1704(a)) provides that an insurance carrier or self-insured who has paid workers' compensation benefits to or on account of any person for a war-risk hazard may seek reimbursement for benefits paid (plus expenses) out of the Federal Employees' Compensation Fund. *See also* 5 U.S.C. 8147. Insurance carriers and the self-insured file a Form CA-278 to request reimbursement. Regulations implementing the WHCA permit the OWCP to collect the information needed to consider the reimbursement request of an insurance carrier or self-insured. *See* 20 CFR 61.101 and 61.104. This

information collection has been classified as a revision, because of clarifications to a statement about accommodations available to persons with disabilities who file the form. WHCA section 104(a) authorizes this information collection. See 42 U.S.C. 1704(a).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1240-0006. The DOL notes that existing information collection requirements submitted to the OMB remain in effect while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on October 12, 2016 (81 FR 70443).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1240-0006. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Agency: DOL-OWCP.

Title of Collection: Claim for Reimbursement of Benefit Payments and Claims Expense Under the War Hazards Compensation Act.

OMB Control Number: 1240-0006.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 7.

Total Estimated Number of Responses: 345.

Total Estimated Annual Time Burden: 173 hours.

Total Estimated Annual Other Costs Burden: \$542.

Dated: January 11, 2017.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510-CH-P

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Notice of Proposed Information Collection Requests: Museums for All Program Evaluation

AGENCY: Institute of Museum and Library Services, National Foundation for the Arts and the Humanities.

ACTION: Notice, request for comments, and collection of information.

SUMMARY: The Institute of Museum and Library Services (IMLS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act. This pre-clearance consultation program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. By this notice, IMLS is soliciting comments concerning a proposed survey to collect information to monitor the use, expectations of and satisfaction with cultural programs and services, most especially library and museum services.

A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before March 17, 2017.

ADDRESSES: Send comments to: Christopher J. Reich, Chief Administrator, Office of Museum Services, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW., Suite 4000, Washington, DC 20024-2135. Mr. Reich can be reached by Telephone: 202-653-4685, Fax: 202-653-4608, or by email at creich@imls.gov, or by teletype (TTY/TDD) for persons with hearing difficulty at 202-653-4614.

SUPPLEMENTARY INFORMATION:

I. Background

The Institute of Museum and Library Services is the primary source of federal support for the Nation's 123,000 libraries and 35,000 museums. The Institute's mission is to inspire libraries and museums to advance innovation, learning and civic engagement. The Institute works at the national level and in coordination with state and local organizations to sustain heritage, culture, and knowledge; enhance learning and innovation; and support professional development. IMLS is responsible for identifying national needs for and trends in museum, library, and information services; measuring and reporting on the impact and effectiveness of museum, library and information services throughout the United States, including programs conducted with funds made available by IMLS; identifying, and disseminating information on, the best practices of such programs; and developing plans to improve museum, library and information services of the United States and strengthen national, State, local, regional, and international communications and cooperative networks (20 U.S.C. Chapter 72, 20 U.S.C. 9108).

II. Current Actions

The purpose of this collection is to assess institutional and individual outcomes from participation in the *Museums for All* program. *Museums for All* is a voluntary program inviting museums to invite EBT card holders to receive reduced-price admission to their facilities.

A summative evaluation will be conducted to measure participating institutions' understanding of the program's value, structural strengths and difficulties, partnership implications, financial implications, and community support and engagement. The evaluation is intended

to provide insight for future changes and programmatic improvements. Methods will include online surveys and in-depth interviews.

The institutional online survey, expected to require an average of 10 minutes to complete, will consist of 1–3 questions focused on the *Museums for All* program's implications for participating museums, allowing for a broad understanding of the program's institutional participants, their perceptions of the program, and potential future directions. In-depth interviews with 15–18 survey participants, each projected to require 20 minutes to complete, will add depth and clarity of understanding to the online survey. An additional online survey, projected to require 10 minutes to complete, will be conducted with a sampling of adult museum participants in the program to gauge the level of awareness of the program and its influence on their museum experience.

IMLS is particularly interested in comments that help the agency:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques, or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

Agency: Institute of Museum and Library Services.

Title: Museum Assessment Program Evaluation.

OMB Number: To Be Determined.

Frequency: One-time collection anticipated.

Affected Public: The target population is museums that have chosen to participate in the *Museums for All* program and their visitors.

Number of Respondents: 150 museum staff to respond to institutional survey; 18 museum staff to respond to institutional interview; and 200 museum visitors.

Estimated Average Burden per Response: The burden per respondent is estimated to be an average of 10 minutes for the museum survey, 20 minutes for

the in-depth interview, and 10 minutes for the visitor survey.

Estimated Total Annual Burden: 64.33 hours (that is 10 minutes times 350 respondents plus 20 minutes per respondent times 18 interview respondents, equaling 3,860 minutes or 64.33 hours).

Total Annualized capital/startup costs: n/a.

Total Annual costs: To be determined.

Public Comments Invited: Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

FOR FURTHER INFORMATION CONTACT:

Stephanie Burwell, Chief Information Officer, Office of the Chief Information Officer, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW., Suite 4000, Washington, DC 20024–2135. Mrs. Burwell can be reached by Telephone: 202–653–4684, Fax: 202–653–4625, or by email at sburwell@imls.gov or by teletype (TTY/TDD) at 202–653–4614. Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

Dated: January 11, 2017.

Kim Miller,

Grants Management Specialist, Office of Chief Information Officer.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Submission for OMB Review, Comment Request, Proposed Collection: “Museums Empowered: Professional Development and Capacity Building Opportunities for Museums”—A Museums for America Special Initiative

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Submission for OMB Review, Comment Request.

SUMMARY: The Institute of Museum and Library Service (“IMLS”) as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 et. seq.). This program helps to ensure that

requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **FOR FURTHER INFORMATION CONTACT** section below on or before February 17, 2017.

ADDRESSES: Stephanie Burwell, Chief Information Officer, Office of the Chief Information Officer, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW., Suite 4000, Washington, DC 20024–2135. Mrs. Burwell can be reached by Telephone: 202–653–4684, Fax: 202–653–4625, or by email at sburwell@imls.gov or by teletype (TTY/TDD) at 202–653–4614. Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services is the primary source of federal support for the Nation's 123,000 libraries and 35,000 museums. The Institute's mission is to inspire libraries and museums to advance innovation, learning, and civic engagement. The Institute works at the national level and in coordination with state and local organizations to sustain heritage, culture, and knowledge; enhance learning and innovation; and support professional development. IMLS is responsible for identifying national needs for and trends in museum, library, and information services; measuring and reporting on the impact and effectiveness of museum, library and information services throughout the United States, including programs conducted with funds made available by IMLS; identifying, and disseminating information on, the best practices of such programs; and developing plans to improve museum, library, and information services of the United States and strengthen national, State, local, regional, and international communications and cooperative networks (20 U.S.C. 72, 20 U.S.C. 9108).

The purpose of this survey is to administer a special initiative in the Museums for America (MFA) grant program titled “Museums Empowered: Professional Development and Capacity Building Opportunities for Museums”—A Museums for America Special Initiative.

Museums for America (MFA) grants support projects that strengthen the ability of an individual museum to serve its public. This special MFA initiative will provide professional development and capacity building opportunities for eligible museums.

As centers of innovation and discovery, as well as catalysts of community revitalization, museums are at the forefront of change in our communities. Like any other institution, museums need to remain dynamic to respond to fast-evolving technological advances and changing demographics. Museums also need to generate and share outcomes-based data and results of their community impact and develop sustainable organizational structures and strategies for continued growth and vitality. Professional Development is critical for museums to deliver on these areas of need.

To support and empower museums of all sizes and disciplines in responding to the evolving needs and changes, this MFA special initiative has four areas of focus for professional development and capacity building 1. Diversity and Inclusion 2. Digital Technology 3. Evaluation 4. Organizational Management. Potential projects will address one of these four priority areas and help strengthen the capability of an individual museum to better serve its public.

Funded projects may support a wide variety of training opportunities for museum staff at a variety of levels (senior leadership, middle management, front-line staff, interns and volunteers) and in various lines of museum work or a combination of (education and outreach, interpretation, curation, registration, conservation, exhibition design, administration, finance, marketing, public relations, community engagement, visitor services security and other).

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic,

mechanical, or other technological collection techniques or other forms of information technology, e.g. permitting electronic submissions of responses.

Current Actions: This notice proposes clearance of the "Museums Empowered: Professional Development and Capacity Building Opportunities for Museums"—A Museums for America Special Initiative, was published in the **Federal Register** on October 13, 2016 (FR vol. 81, No. 198, pgs. 70707–70708). There were no public comments.

Agency: Institute of Museum and Library Services.

Title: "Museums Empowered: Professional Development and Capacity Building Opportunities for Museums"—A Museums for America Special Initiative.

OMB Number: TBD.

Agency Number: 3137.

Frequency: One time.

Affected Public: Museums that meet the IMLS Museums for America institutional eligibility criteria.

Number of Respondents: 100.

Estimated Time per Respondent: 40 hours.

Total Burden Hours: 4,000.

Total Annualized cost to respondents: \$109,600.00.

Total Annualized capital/startup costs: 0.

Total Annualized Cost to Federal Government: \$13,651.84.

BILLING CODE 7036–01–P

NATIONAL MEDIATION BOARD

Notice of Proposed Information Collection Requests

AGENCY: National Mediation Board.

SUMMARY: The Assistant Chief of Staff, Administration invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments within 30 days from the date of this publication.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (U.S.C. Chapter 35) requires that

the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Assistant Chief of Staff, Administration publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection contains the following: (1) Type of review requested, e.g. new, revision extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Record keeping burden. OMB invites public comment.

Currently, the National Mediation Board is soliciting comments concerning the proposed extension of the Application for Alternative Dispute Resolution (ADR) Services and is interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the agency; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the agency enhance the quality, utility, and clarity of the information to be collected; and (5) how might the agency minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: January 11, 2017.

Samantha Jones,

Assistant Chief of Staff, Administration, National Mediation Board.

A. Application for ADR Services

Type of Review: Extension.

Title: Application for ADR Services.

Frequency: On occasion.

Affected Public: Union Officials and Officials of Railroads and Airlines.

Reporting and Recordkeeping Hour Burden:

Responses: Estimate about 45 annually.

Burden Hours: 9.

Abstract: The Railway Labor Act, 45 U.S.C., 151 a. General Purposes, provides that the purposes of the Act are (1) to avoid any interruption to commerce or to the operation of any carrier engaged therein. * * * (4) to

provide for the prompt and orderly settlement of all disputes concerning rates of pay, rules, or working conditions, and (5) to provide for the prompt and orderly settlement of all disputes growing out of grievances or out of the interpretation or application of agreements concerning rates of pay, rules, or working conditions. In fulfilling its role to administer the Act, the National Mediation Board offers the parties to disputes mediation and arbitration services. On a voluntary basis, training programs in Alternative Dispute Resolution (ADR) and facilitation services are also available. These ADR programs are designed to enhance the bargaining and grievance handling skill level of the disputants and to assist the parties in the resolution of disputes. The impact of these ADR programs is that mediation and arbitration can be avoided entirely or the scope and number of issues brought to mediation or arbitration is significantly reduced. This collection is necessary to confirm the voluntary participation of the parties in the ADR process. The information provided by the parties is used by the NMB to schedule the parties for ADR training and facilitation. Based on a recent survey of those who participated in the NMB's ADR Programs, 94.6% said they were satisfied with the ADR Programs and said they recommend the program for all negotiators. Collecting the brief information on the Application for ADR Services form allows the parties to voluntarily engage the services of the NMB in the orderly settlement of all disputes and fulfill the purposes of the Act.

Requests for copies of the proposed information collection request may be accessed from www.nmb.gov or should be addressed to Denise Murdock, NMB, 1301 K Street NW., Suite 250 E, Washington, DC 20005 or addressed to the email address murdock@nmb.gov or faxed to 202-692-5081. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be directed to Samantha Jones at 202-692-5010 or via internet address jones@nmb.gov. Individuals who use a telecommunications device for the deaf (TDD/TDY) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

BILLING CODE 7550-01-P

NEIGHBORHOOD REINVESTMENT CORPORATION

Audit Committee Meeting: Sunshine Act

TIME AND DATE: 2:30 p.m., Monday, January 23, 2017.

PLACE: NeighborWorks America—Gramlich Boardroom, 999 North Capitol Street NE., Washington DC 20002.

STATUS: Open (with the exception of Executive Session).

CONTACT PERSON: Jeffrey Bryson, General Counsel/Secretary, (202) 760-4101; jbryson@nw.org.

AGENDA:

I. CALL TO ORDER

II. Executive Session with Chief Audit Executive

III. Internal Audit Reports with Management's Response

IV. FY 2017 Internal Audit Plan—Proposed Change

V. Internal Audit Status Reports

VI. Audit of Retirement Plan Year Ending 2015 and 2014

VII. Adjournment

The General Counsel of the Corporation has certified that in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552 (b)(4) permit closure of the following portions of this meeting:

- Executive Session with the External Auditor

Jeffrey T. Bryson,

EVP & General Counsel/Corporate Secretary.

[FR Doc. 2017-01157 Filed 1-13-17; 11:15 am]

BILLING CODE 7570-02-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-022 and 52-023; NRC-2013-0261]

Duke Energy Progress; Combined License Application for Shearon Harris Nuclear Power Plant Units 2 and 3

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to an October 13, 2016, letter from Duke Energy Progress (DEP), which requested an exemption from certain regulatory requirements that requires DEP to submit an update to the final safety analysis report (FSAR) included in their combined license (COL) application for Shearon Harris Nuclear Power Plant (Harris) Units 2 and 3 by December 31, 2016. The NRC

staff reviewed this request and determined that it is appropriate to grant the exemption, but stipulated that the update to the FSAR must be submitted prior to, or coincident with the resumption of the COL application review or by December 31, 2019, whichever comes first.

DATES: The exemption is effective on January 18, 2017.

ADDRESSES: Please refer to Docket ID NRC-2013-0261 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2013-0261. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if that document is available in ADAMS) is provided the first time that the document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Brian Hughes, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6582; email: Brian.Hughes@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On February 18, 2008, DEP, submitted to the NRC a COL application for two units of Westinghouse Electric Company's AP1000 advanced pressurized water reactors to be constructed and operated at the existing Shearon Harris Nuclear Plant (Harris) site (ADAMS Accession No.

ML080580078). The NRC docketed the Shearon Harris Units 2 and 3 COL application (Docket Nos. 52–022 and 52–023) on April 23, 2008. On April 15, 2013, (ADAMS Accession No. ML13112A761) DEP submitted Revision 5 to the COL application including updates to the FSAR, per Subsection 50.71(e)(3)(iii) of title 10 of the *Code of Federal Regulations* (10 CFR). On May 2, 2013 (ADAMS Accession No. ML13123A344), DEP requested that the NRC suspend review of the Shearon Harris Nuclear Plant Units 2 and 3 COL application. On August 7, 2013 (ADAMS Accession No. ML13220B004), DEP requested an exemption from the 10 CFR 50.71(e)(3)(iii) requirements to submit the COL application FSAR update, which NRC granted through December 31, 2014. On August 1, 2014 (ADAMS Accession No. ML14216A431), DEP requested another exemption from the 10 CFR 50.71(e)(3)(iii) requirements to submit the COL application FSAR update which the NRC granted through December 31, 2015. On August 12, 2015 (ADAMS Accession No. ML15226A353), DEP requested another exemption from the 10 CFR 50.71(e)(3)(iii) requirements to submit the COL application FSAR update which NRC granted through by December 31, 2016. On October 13, 2016 (ADAMS Accession No. ML16288A815), DEP requested another exemption from the 10 CFR 50.71(e)(3)(iii) requirements to submit annual updates to the FSAR during the years 2016, 2017, and 2018. In this exemption request, DEP indicated that it would provide an update to the FSAR, or take other appropriate action, no later than December 31, 2019.

II. Request/Action

Paragraph 50.71(e)(3)(iii) requires that an applicant for a COL under Subpart C of 10 CFR part 52, submit updates to their FSAR annually during the period from docketing the application to the Commission making its 10 CFR 52.103(g) finding.

Pursuant to 10 CFR 50.71(e)(3)(iii) the next annual update of the FSAR included in the Harris Units 2 and 3 COL application would be due by December 31, 2016. In a letter dated October 13, 2016 (ADAMS Accession No. ML16288A815), DEP requested that the Harris Units 2 and 3 COL application be exempt from the 10 CFR 50.71(e)(3)(iii) requirements during the years of 2016, 2017, and 2018 until December 31, 2019, or prior to a request to reactivate the Harris Units 2 and 3 COL application review.

The exemption would allow DEP to submit the next FSAR update at a later date, but still in advance of NRC's

reinstating its review of the application and in any event, by December 31, 2019. The current requirement to submit an FSAR update could not be changed, absent the exemption.

III. Discussion

Pursuant to 10 CFR 50.12 the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 50, including 10 CFR 50.71(e)(3)(iii) when: (1) The exemption(s) are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) special circumstances are present. As relevant to the requested exemption, special circumstances exist if: [a]pplication of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule (10 CFR 50.12(a)(2)(ii)) and if: [t]he exemption would provide only temporary relief from the applicable regulation and the licensee or applicant has made good faith efforts to comply with the regulation (10 CFR 50.12(a)(2)(v)).

The purpose of 10 CFR 50.71(e)(3)(iii) is to ensure that the NRC has the most up to date information regarding the COL application, in order to perform an efficient and effective review. The rule targeted those applications that are being actively reviewed by the NRC. Because DEP requested the NRC suspend its review of the Harris Units 2 and 3 COL application, compelling DEP to submit its FSAR on an annual basis is not necessary as the FSAR will not be changed or updated until the review is restarted. Requiring the updates would result in undue hardship on DEP, and the purpose of 10 CFR 50.71(e)(3)(iii) would still be achieved if the update is submitted prior to restarting the review and in any event by December 31, 2019.

The requested exemption to defer submittal of the next update to the FSAR included in the Harris Units 2 and 3 COL application would provide only temporary relief from the regulations in 10 CFR 50.71(e)(3)(iii). As evidenced by the proper submittal of annual updates on June 23, 2009 (ADAMS Accession No. ML091810540), April 12, 2010 (ADAMS Accession No. ML101120592), April 14, 2011 (ADAMS Accession No. ML111170902), April 12, 2012 (ADAMS Accession No. ML12122A656), and April 15, 2013 (ADAMS Accession No. ML13112A761), DEP has made good faith efforts to comply with 10 CFR 50.71(e)(3)(iii)

prior to requesting suspension of the review. In its subsequent requests dated August 1, 2014, August 12, 2015, and October 13, 2016, DEP asked the NRC to grant exemption from 10 CFR 50.71(e)(3)(iii) until December 31, 2019, or prior to any request to reactivate Harris Units 2 and 3 COL application review. For the reasons stated above, the application of 10 CFR 50.71(e)(3)(iii) in this particular circumstance can be deemed unnecessary and the granting of the exemption would allow only temporary relief from a rule that the applicant had made good faith efforts to comply with, therefore special circumstances are present.

Authorized by Law

The exemption is a schedule exemption from the requirements of 10 CFR 50.71(e)(3)(iii). The exemption would allow DEP to submit the next Harris Units 2 and 3 COL application FSAR update on or before December 31, 2019, in lieu of the required scheduled submittals on December 31, 2016, December 31, 2017, and December 31, 2018. As stated above, 10 CFR 50.12 allows the NRC to grant exemptions from the requirements of 10 CFR part 50. The NRC staff has determined that granting DEP the requested exemption from the requirements of 10 CFR 50.71(e)(3)(iii) will provide only temporary relief from this regulation and will not result in a violation of the Atomic Energy Act of 1954, as amended, or the NRC's regulations. Therefore, the exemption is authorized by law.

No Undue Risk to Public Health and Safety

The underlying purpose of 10 CFR 50.71(e)(3)(iii) is to provide for a timely and comprehensive update of the FSAR associated with a COL application in order to support an effective and efficient review by the NRC staff and issuance of the NRC staff's safety evaluation report. The requested exemption is solely administrative in nature, in that it pertains to the schedule for submittal to the NRC of revisions to an application under 10 CFR part 52, for which a license has not been granted. In addition, since the review of the application has been suspended, any update to the application submitted by DEP will not be reviewed by the NRC at this time. Plant construction cannot proceed until the NRC's review of the application is completed, a mandatory hearing is completed, and a license is issued. Additionally, based on the nature of the requested exemption as described above, no new accident precursors are created by the exemption; thus neither

the probability, nor the consequences of postulated accidents are increased. Therefore, there is no undue risk to public health and safety.

Consistent With Common Defense and Security

The requested exemption would allow DEP to submit the next FSAR update prior to requesting the NRC to resume the review and, in any event, on or before December 31, 2019. This schedule change has no relation to security issues. Therefore, the common defense and security is not impacted.

Special Circumstances

Special circumstances, in accordance with 10 CFR 50.12(a)(2)(ii) are present whenever: (1) Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule (10 CFR 50.12(a)(2)(ii)). The underlying purpose of 10 CFR 50.71(e)(3)(iii) is to ensure that the NRC has the most up-to date information in order to perform its review of a COL application efficiently and effectively. Because the requirement to annually update the FSAR was intended for active reviews and the Harris Units 2 and 3 COL application review is now suspended, the application of this regulation in this particular circumstance is unnecessary in order to achieve its underlying purpose. If the NRC were to grant this exemption, and DEP was then required to update its FSAR by December 31, 2019, or prior to any request to restart of their review, the purpose of the rule would still be achieved.

Special circumstances in accordance with 10 CFR 50.12(a)(2)(v) are present whenever the exemption would provide only temporary relief from the regulation and the applicant has made good faith efforts to comply with this regulation. Because of the assumed and imposed new deadline of December 31, 2016, DEP's exemption request seeks only temporary relief from the requirement that it file an update to the FSAR included in the Harris Units 2 and 3 COL application. Additionally DEP submitted the required annual updates to its FSAR throughout the application process until asking for suspension of its review.

Therefore, since the relief from the requirements of 10 CFR 50.71(e)(3)(iii) would be temporary and the applicant has made good faith efforts to comply with the rule, and the underlying purpose of the rule is not served by application of the rule in this circumstance, the special circumstances

required by 10 CFR 50.12(a)(2)(ii) and 50.12(a)(2)(v) for the granting of an exemption from 10 CFR 50.71(e)(3)(iii) exist.

Eligibility for Categorical Exclusion From Environmental Review

With respect to the exemption's impact on the quality of the human environment, the NRC has determined that this specific exemption request is eligible for categorical exclusion as identified in 10 CFR 51.22(c)(25) provided that:

(i) There is no significant hazards consideration;

The criteria for determining whether there is no significant hazards consideration are found in 10 CFR 50.92. The proposed action involves only a schedule change regarding the submission of an update to the application for which the licensing review has been suspended. Therefore, there is no significant hazards consideration because granting the proposed exemption would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

(ii) There is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite;

The proposed action involves only a schedule change which is administrative in nature, and does not involve any changes to be made in the types or significant increase in the amounts of effluents that may be released offsite.

(iii) There is no significant increase in individual or cumulative public or occupational radiation exposure;

Since the proposed action involves only a schedule change which is administrative in nature, it does not contribute to any significant increase in occupational or public radiation exposure.

(iv) There is no significant construction impact;

The proposed action involves only a schedule change which is administrative in nature; the application review is suspended until further notice, and there is no consideration of any construction at this time, and hence the proposed action does not involve any construction impact.

(v) There is no significant increase in the potential for or consequences from radiological accidents;

The proposed action involves only a schedule change which is administrative in nature, and does not impact the probability or consequences of accidents.

(vi) The requirements from which an exemption is sought involve:

(B) Reporting requirements;

The exemption request involves submitting an updated FSAR by DEP; and

(G) Scheduling requirements;

The proposed exemption relates to the schedule for submitting FSAR updates to the NRC.

IV. Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also special circumstances are present. Therefore, the Commission hereby grants DEP a one-time exemption from the requirements of 10 CFR 50.71(e)(3)(iii) pertaining to the Harris Units 2 and 3 COL application to allow submittal of the next FSAR update prior to any request to the NRC to resume the review, and in any event no later than December 31, 2019.

Pursuant to 10 CFR 51.22, the Commission has determined that the exemption request meets the applicable categorical exclusion criteria set forth in 10 CFR 51.22(c)(25), and the granting of this exemption will not have a significant effect on the quality of the human environment.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 9th day of January 2017.

For the Nuclear Regulatory Commission.

Francis M. Akstulewicz,

*Director, Division of New Reactor Licensing,
Office of New Reactors.*

BILLING CODE 7590-01-P

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

Summary: In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of

the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

1. *Title and purpose of information collection:* Application and Claim for Unemployment Benefits and Employment Service; OMB 3220-0022.

Section 2 of the Railroad Unemployment Insurance Act (RUIA), provides unemployment benefits for qualified railroad employees. These benefits are generally payable for each day of unemployment in excess of four

during a registration period (normally a period of 14 days).

Section 12 of the RUIA provides that the RRB establish, maintain and operate free employment facilities directed toward the reemployment of railroad employees. The procedures for applying for the unemployment benefits and employment service and for registering and claiming the benefits are prescribed in 20 CFR 325. 20 CFR 321 provides for applying and filing claims for unemployment benefits electronically.

The RRB utilizes the following forms to collect the information necessary to pay unemployment benefits. Form UI-1 (or its Internet equivalent, Form UI-1 (Internet)), *Application for Unemployment Benefits and Employment Service*, is completed by a claimant for unemployment benefits once in a benefit year, at the time of first

registration. Completion of Form UI-1 or UI-1 (Internet) also registers an unemployment claimant for the RRB's employment service.

The RRB also utilizes Form UI-3 (or its Internet equivalent Form UI-3 (Internet)), *Claim for Unemployment Benefits*, for use in claiming unemployment benefits for days of unemployment in a particular registration period, normally a period of 14 days.

Completion of Forms UI-1, UI-1 (Internet), UI-3, and UI-3 (Internet) is required to obtain or retain benefits. The number of responses required of each claimant varies, depending on their period of unemployment. The RRB proposes no changes to the forms in this information collection.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
UI-1	8,003	10	1,334
UI-1 (Internet)	5,542	10	924
UI-3	37,584	6	3,758
UI-3 (Internet)	45,011	6	4,501
Total	96,140	10,517

2. *Title and purpose of information collection:* Public Service Pension Questionnaires; OMB 3220-0136.

Public Law 95-216 amended the Social Security Act of 1977 by providing, in part, that spouse or survivor benefits may be reduced when the beneficiary is in receipt of a pension based on employment with a Federal, State, or local governmental unit. Initially, the reduction was equal to the full amount of the government pension. Public Law 98-21 changed the reduction to two-thirds of the amount of the government pension.

Public Law 108-203 amended the Social Security Act by changing the

requirement for exemption to a public service offset, so that Federal Insurance Contributions Act (FICA) taxes are deducted from the public service wages for the last 60 months of public service employment, rather than just the last day of public service employment.

Sections 4(a)(1) and 4(f)(1) of the Railroad Retirement Act (RRA) provides that a spouse or survivor annuity should be equal in amount to what the annuitant would receive if entitled to a like benefit from the Social Security Administration. Therefore, the public service pension (PSP) provisions apply to RRA annuities. RRB regulations pertaining to the collection of evidence

relating to public service pensions or worker's compensation paid to spouse or survivor applicants or annuitants are prescribed in 20 CFR 219.64c.

The RRB utilizes Form G-208, Public Service Pension Questionnaire, and Form G-212, Public Service Monitoring Questionnaire, to obtain information used to determine whether an annuity reduction is in order. Completion of the forms is voluntary. However, failure to complete the forms could result in the nonpayment of benefits. One response is requested of each respondent. The RRB proposes no changes to the forms in the collection.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
G-208	70	16	19.0
G-212	1,100	15	275.0
Total	1,170	294.0

3. *Title and purpose of information collection:* Report of Medicaid State Office on Beneficiary's Buy-In Status; OMB 3220-0185.

Under Section 7(d) of the Railroad Retirement Act, the RRB administers the Medicare program for persons covered by the railroad retirement system. Under Section 1843 of the Social Security Act,

states may enter into "buy-in agreements" with the Secretary of Health and Human Services for the purpose of enrolling certain groups of low-income individuals under the

Medicare medical insurance (Part B) program and paying the premiums for their insurance coverage. Generally, these individuals are categorically needy under Medicaid and meet the eligibility requirements for Medicare Part B. States can also include in their buy-in agreements, individuals who are

eligible for medical assistance only. The RRB utilizes Form RL-380-F, *Report of Medicaid State Office on Beneficiary's Buy-In Status*, to obtain information needed to determine if certain railroad beneficiaries are entitled to receive Supplementary Medical Insurance program coverage under a state buy-in

agreement in the states in which they reside. Completion of Form RL-380-F is voluntary. One response is received from each respondent. The RRB proposes no changes to Form RL-380-F.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form No.	Annual responses	Time (minutes)	Burden (hours)
RL-380-F	600	10	100

Additional Information or Comments:

To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, contact Dana Hickman at (312) 751-4981 or Dana.Hickman@RRB.GOV. Comments regarding the information collection should be addressed to Brian Foster, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611-1275 or emailed to Brian.Foster@rrb.gov. Written comments should be received within 60 days of this notice.

Brian D. Foster,
Clearance Officer.

BILLING CODE 8011-01-P

changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members⁵ and non-members of the Exchange pursuant to EDGX Rules 15.1(a) and (c) to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect.

The text of the proposed rule change is available at the Exchange's Web site at www.bats.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

³ 15 U.S.C. 78s(b)(3)(A)(ii).

⁴ 17 CFR 240.19b-4(f)(2).

⁵ The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94-409, that the Securities and Exchange Commission will hold a closed meeting on Thursday, January 19, 2017 at 2 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

The General Counsel of the Commission, or her designee, has certified that, in her opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (7), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(7), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matter at the closed meeting.

Chair White, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting will be:

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79774; File No. SR-BatsEDGX-2017-02]

Self-Regulatory Organizations; Bats EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Fees for Connectivity and Its Communication and Routing Service Known as Bats Connect

January 11, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 5, 2017, Bats EDGX Exchange, Inc. ("Exchange" or "EDGX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect. Each of these proposed changes are described below.

Physical Ports

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers:

(i) The primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System⁶ via 1 gigabyte circuit; and \$4,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$4,000 per month to \$6,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services. The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month.

Logical Ports

The Exchange currently charges for logical ports (including Multicast PITCH

Spin Server and GRP ports) \$500 per port per month. A logical port represents a port established by the Exchange within the Exchange's system for trading and billing purposes. Each logical port established is specific to a Member or non-Member and grants that Member or non-Member the ability to operate a specific application, such as FIX order entry or PITCH data receipt. Logical port fees are limited to logical ports in the Exchange's primary data center and no logical port fees are assessed for redundant secondary data center ports. The Exchange assesses the monthly per logical port fees to all Members' and non-Members' logical ports. The Exchange now proposes to increase charges for logical ports (including Multicast PITCH Spin Server and GRP ports) from \$500 per port per month to \$550 per month. Like as for the proposed fee increase for physical ports described above, the proposed increase in logical port fees is intended to cover increased infrastructure costs associated with establishing ports to connect to the Exchange's Systems and to enable the Exchange to continue to maintain and improve its market technology and services.

Bats Connect

The Exchange proposes to increase select fees related to the use of Bats Connect. Bats Connect is offered by the Exchange on a voluntary basis in a capacity similar to a vendor.⁷ In sum, Bats Connect is a communication service that provides subscribers an additional means to receive market data from and route orders to any destination connected to the Exchange's network. Bats Connect does not provide any advantage to subscribers for connecting to the Exchange's affiliates⁸ as compared to other methods of connectivity. The servers of the subscriber need not be located in the same facilities as the Exchange in order

to subscribe to Bats Connect. Subscribers may also seek to utilize Bats Connect in the event of a market disruption where other alternative connection methods become unavailable.

The Exchange charges a monthly connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and broker-dealers that are connected to the Exchange's network via unicast access. The amount of the connectivity fee varies based solely on the bandwidth selected by the subscriber. Specifically, as set forth under the Unicast Access—Order Entry section of the fee schedule, the Exchange charges \$350 for 1 Mb, \$700 for 5 Mb, \$950 for 10 Mb, \$1,500 for 25 Mb, \$2,500 for 50 Mb, and \$3,500 for 100 Mb. The Exchange proposes to increase those fees as follows: \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The proposed increases are designed to cover increased costs related to hardware, installation, and testing, as well as increased expenses involved in maintaining and managing the service. The Exchange does not propose to increase the fees for the 25 Mb, 50 Mb and 100 Mb connections as those fees will remain \$1,500, \$2,500, and \$3,500, respectively.

Bats Connect also allows subscribers to receive market data feeds from the exchanges connected to the Exchange's network. In such case, the subscriber pays the Exchange a connectivity fee, which are set forth under the Market Data Connectivity section of the fee schedule and vary based solely on the amount of bandwidth required to transmit the selected data product to the subscriber.⁹ The proposed connectivity fees currently range from no charge to \$11,500 based on the market data product the subscriber selects. The Exchange proposes to increase select connectivity fees for market data as follows:

Data feed	Current fee	Proposed fee
UQDF/UTDF/OMDF	\$650	\$1,200
CQS/CTS	1,000	1,400
OPRA	3,500	4,500
Nasdaq TotalView	1,300	1,500
Nasdaq BX TotalView	650	1,000
Nasdaq PSX TotalView	350	750
NYSE Integrated	11,500	14,500
NYSE ArcaBook	1,000	1,250
NYSE MKT OpenBook Ultra	150	500
NYSE Alerts	250	500
NYSE Imbalances	100	500

⁶ The term "System" is defined as "the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when

applicable, routing away." See Exchange Rule 1.5(cc).

⁷ See Exchange Rule 13.9.

⁸ The Exchange's affiliated exchanges are Bats EDGA Exchange, Inc. ("EDGA"), Bats BYX

Exchange, Inc. ("BYX"), and Bats BZX Exchange, Inc. ("BZX").

⁹ Subscribers pay any fees charged by the exchange providing the market data feed directly to that exchange.

Data feed	Current fee	Proposed fee
NYSE Arca Trades	250	500
BBDS/TDDS	100	500

The proposed increases are designed to allow the Exchange to cover the increased costs related to the amount of bandwidth required to provide connectivity to receive market data as well as the costs of maintaining that infrastructure.

The Exchange also charges a discounted fee of \$4,160 per month for subscribers who purchase connectivity to a bundle of select market data products, known as the U.S. Equities Select + SIP Bundle. The following market data products are included in the bundle: UQDF/UTDF/OMDF, CQS/CTS, Nasdaq TotalView, Nasdaq BX TotalView, Nasdaq PSX TotalView, NYSE ArcaBook, NYSE MKT OpenBook Ultra, and BBDS/TDDS.¹⁰ Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would currently pay a total monthly fee of \$5,200. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$4,160, which represents a 20% discount. The Exchange proposes to add NYSE OpenBook Ultra to the bundle. Also, in light of the proposed changes outlined above, the Exchange proposes to increase the discounted rate of the bundle to \$5,910 per month, which would now represent a 40% discount from the rate of \$9,850 a subscriber purchasing connectivity through Bats Connect for each of these market data products would be charged under the proposed rule change.

Lastly, the Exchange proposes to charge a discounted fee of \$6,390 per month for subscribers who purchase connectivity to the OPRA, UQDF/UTDF/OMDF, and CQS/CTS data feeds, to be known as the OPRA + SIP Bundle. Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would pay a total monthly fee of \$7,100. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$6,390, which represents a 10% discount.

¹⁰ The Exchange also proposes to correct a typographical error in referencing BBDS/TDDS in its description of the U.S. Equity Select + SIP bundle.

Implementation Date

The Exchange proposes to implement this amendment to its fee schedule on January 3, 2017.¹¹

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,¹² in general, and furthers the objectives of Section 6(b)(4),¹³ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that

¹¹ The Exchange initially filed the proposed rule change on December 27, 2016. (SR-BatsEDGX-2016-74). On January 5, 2017, the Exchange withdrew SR-BatsEDGX-2016-74 and submitted this filing.

¹² 15 U.S.C. 78f.

¹³ 15 U.S.C. 78f(b)(4).

this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fees will also enable the Exchange to continue to maintain and improve its market technology and services.

Physical Ports

The Exchange believes that the proposed fees for a 10 gigabyte circuit of \$6,000 per month is reasonable in that they are less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000–\$15,000 per month for 10 gigabyte circuits.¹⁴ The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members and non-Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Exchange Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

Logical Ports

The Exchange believes that the increase of fees for logical ports represents an equitable allocation of reasonable dues, fees and other charges. The Exchange believes that its proposed changes to logical port fees are reasonable in light of the benefits to Exchange participants of direct market access and receipt of data. The Exchange believes its proposed fees are reasonable because Nasdaq and NYSE

¹⁴ See Nasdaq Rule 7034(b) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016).

Arca charge comparable rates for logical ports to access such markets.¹⁵

Bats Connect

The Exchange also believes that its proposed fees for Bats Connect provide for the equitable allocation of reasonable dues, fees and other charges among members and other persons using its facilities. First, the Exchange charges a connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and market centers that are connected to the Exchange's network, which varies based solely on the amount of bandwidth selected by the subscriber. The proposed increased connectivity fees remain reasonable and competitive as compared to similar fees charged by other exchanges. For purposes of order routing, the Exchange proposes to now charge \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The New York Stock Exchange, Inc. ("NYSE") currently charges \$300 for 1 Mb, \$700 for 5 Mb, and \$900 for 10 Mb.¹⁶ In addition, the proposed rates continue to be less than what a subscriber would pay to connect directly to another exchange.¹⁷ The Exchange notes that, overall, the connectivity fee for routing of orders to other market centers proposed by the Exchange is similar to that charged by the NYSE.

Second, with regard to utilizing Bats Connect to receive market data products from other exchanges, the Exchange only charges subscribers a connectivity fee, the amount of which is based solely on the amount of bandwidth required to transmit that specific data product to the subscribers. The Exchange believes it is necessary to increase the rates for select market data feeds as described herein to address changes in bandwidth necessary to receive such feeds. The increased fees will also enable the Exchange to continue to cover the increased infrastructure costs while also enabling it to continue to maintain and improve the service.

The amounts of the connectivity fees continue to be reasonable as compared to similar fees charged by other

exchanges. For example, for market data connectivity, Nasdaq charges \$1,412 per month for CQS/CTS data feed, and the Exchange proposes to charge \$1,400 per month connectivity for CQS/CTS data feed.¹⁸

The Exchange believes it is reasonable to offer such discounted pricing to subscribers who purchase connectivity to a bundle of market data products as it would enable them to reduce their overall connectivity costs for the receipt of market data. The Exchange is not required by any rule or regulation to make Bats Connect available; nor are subscribers required by any rule or regulation to utilize Bats Connect. Accordingly, subscribers can discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Moreover, the Exchange believes the proposed fees are reasonable and equitable because they continue to be based on the Exchange's costs to cover the amount of bandwidth required to provide connectivity to the select bundle of data feeds. The proposed fees will continue to allow the Exchange to recoup this cost, while providing subscribers with an alternative means to connect to the select bundle of data feeds at a discounted rate.

Lastly, the Exchange believes the proposed fees are reasonable and equitable because they are based on the Exchange's costs to cover hardware, installation, testing and connection, as well as expenses involved in maintaining and managing the service. The proposed fees allow the Exchange to recoup these costs, while providing subscribers with an alternative means to connect to other exchange and market centers. The Exchange believes that the proposed fees are reasonable and equitable in that they reflect the costs and the benefit of providing alternative connectivity.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by

the Exchange's competitors.

Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

Lastly, the Exchange does not believe the proposed fees for Bats Connect will result in any burden on competition. The proposed rule change is designed to provide subscribers with an alternative means to access other market centers on the Exchange's network if they choose or in the event of a market disruption where other alternative connection methods become unavailable. Bats Connect is not the exclusive method to connect to these market centers and subscribers may utilize alternative methods to connect to the product if they believe the Exchange's proposed pricing is unreasonable or otherwise. Therefore, the Exchange does not believe the proposed rule change will have any effect on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁹ and paragraph (f) of Rule 19b-4 thereunder.²⁰ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

¹⁵ See Nasdaq Rule 7015(b) (charging a fee of \$575 per month for FIX Trading Ports) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016) (charging a fee of \$550 per month for ports for order/quote entry).

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BatsEDGX-2017-02 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BatsEDGX-2017-02. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsEDGX-2017-02 and should be submitted on or before February 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²¹

Eduardo A. Aleman,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-79773; File No. SR-BatsEDGX-2017-01]

Self-Regulatory Organizations; Bats EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Modify Fees for Connectivity and Its Communication and Routing Service Known as Bats Connect

January 11, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on January 5, 2017, Bats EDGA Exchange, Inc. ("Exchange" or "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act³ and Rule 19b-4(f)(2) thereunder,⁴ which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange filed a proposal to amend the fee schedule applicable to Members⁵ and non-members of the Exchange pursuant to EDGA Rules 15.1(a) and (c) to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect.

The text of the proposed rule change is available at the Exchange's Web site at www.bats.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements

concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to modify its fees for physical ports, logical ports, and for the use of a communication and routing service known as Bats Connect. Each of these proposed changes are described below.

Physical Ports

A physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently maintains a presence in two third-party data centers: (i) the primary data center where the Exchange's business is primarily conducted on a daily basis, and (ii) a secondary data center, which is predominantly maintained for business continuity purposes. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,000 per physical port that connects to the System⁶ via 1 gigabyte circuit; and \$4,000 per physical port that connects to the System via 10 gigabyte circuit. The Exchange proposes to increase the fee per physical port that connects to the System via a 10 gigabyte circuit from \$4,000 per month to \$6,000 per month in order to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems and enable it to continue to maintain and improve its market technology and services. The Exchange does not propose to amend the fee for a 1 gigabyte circuit, which will remain \$2,000 per month.

Logical Ports

The Exchange currently charges for logical ports (including Multicast PITCH Spin Server and GRP ports) \$500 per port per month. A logical port

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A)(ii).

⁴ 17 CFR 240.19b-4(f)(2).

⁵ The term "Member" is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

⁶ The term "System" is defined as "the electronic communications and trading facility designated by the Board through which securities orders of Users are consolidated for ranking, execution and, when applicable, routing away." See Exchange Rule 1.5(cc).

²¹ 17 CFR 200.30-3(a)(12).

represents a port established by the Exchange within the Exchange's system for trading and billing purposes. Each logical port established is specific to a Member or non-Member and grants that Member or non-Member the ability to operate a specific application, such as FIX order entry or PITCH data receipt. Logical port fees are limited to logical ports in the Exchange's primary data center and no logical port fees are assessed for redundant secondary data center ports. The Exchange assesses the monthly per logical port fees to all Members' and non-Members' logical ports. The Exchange now proposes to increase charges for logical ports (including Multicast PITCH Spin Server and GRP ports) from \$500 per port per month to \$550 per month. Like as for the proposed fee increase for physical ports described above, the proposed increase in logical port fees is intended to cover increased infrastructure costs associated with establishing ports to connect to the Exchange's Systems and to enable the Exchange to continue to maintain and improve its market technology and services.

Bats Connect

The Exchange proposes to increase select fees related to the use of Bats

Connect. Bats Connect is offered by the Exchange on a voluntary basis in a capacity similar to a vendor.⁷ In sum, Bats Connect is a communication service that provides subscribers an additional means to receive market data from and route orders to any destination connected to the Exchange's network. Bats Connect does not provide any advantage to subscribers for connecting to the Exchange's affiliates⁸ as compared to other methods of connectivity. The servers of the subscriber need not be located in the same facilities as the Exchange in order to subscribe to Bats Connect. Subscribers may also seek to utilize Bats Connect in the event of a market disruption where other alternative connection methods become unavailable.

The Exchange charges a monthly connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and broker-dealers that are connected to the Exchange's network via unicast access. The amount of the connectivity fee varies based solely on the bandwidth selected by the subscriber. Specifically, as set forth under the Unicast Access—Order Entry section of the fee schedule, the Exchange charges \$350 for 1 Mb, \$700

for 5 Mb, \$950 for 10 Mb, \$1,500 for 25 Mb, \$2,500 for 50 Mb, and \$3,500 for 100 Mb. The Exchange proposes to increase those fees as follows: \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The proposed increases are designed to cover increased costs related to hardware, installation, and testing, as well as increased expenses involved in maintaining and managing the service. The Exchange does not propose to increase the fees for the 25 Mb, 50 Mb and 100 Mb connections as those fees will remain \$1,500, \$2,500, and \$3,500, respectively.

Bats Connect also allows subscribers to receive market data feeds from the exchanges connected to the Exchange's network. In such case, the subscriber pays the Exchange a connectivity fee, which are set forth under the Market Data Connectivity section of the fee schedule and vary based solely on the amount of bandwidth required to transmit the selected data product to the subscriber.⁹ The proposed connectivity fees currently range from no charge to \$11,500 based on the market data product the subscriber selects. The Exchange proposes to increase select connectivity fees for market data as follows:

Data feed	Current fee	Proposed fee
UQDF/UTDF/OMDF	\$650	\$1,200
CQS/CTS	1,000	1,400
OPRA	3,500	4,500
Nasdaq TotalView	1,300	1,500
Nasdaq BX TotalView	650	1,000
Nasdaq PSX TotalView	350	750
NYSE Integrated	11,500	14,500
NYSE ArcaBook	1,000	1,250
NYSE MKT OpenBook Ultra	150	500
NYSE Alerts	250	500
NYSE Imbalances	100	500
NYSE Arca Trades	250	500
BBDS/TDDS	100	500

The proposed increases are designed to allow the Exchange to cover the increased costs related to the amount of bandwidth required to provide connectivity to receive market data as well as the costs of maintaining that infrastructure.

The Exchange also charges a discounted fee of \$4,160 per month for subscribers who purchase connectivity to a bundle of select market data products, known as the U.S. Equities Select + SIP Bundle. The following

market data products are included in the bundle: UQDF/UTDF/OMDF, CQS/CTS, Nasdaq TotalView, Nasdaq BX TotalView, Nasdaq PSX TotalView, NYSE ArcaBook, NYSE MKT OpenBook Ultra, and BBDS/TDDS.¹⁰ Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would currently pay a total monthly fee of \$5,200. Instead, a subscriber who purchases connectivity to each of the above market data products is charged

a monthly fee of \$4,160, which represents a 20% discount. The Exchange proposes to add NYSE OpenBook Ultra to the bundle. Also, in light of the proposed changes outlined above, the Exchange proposes to increase the discounted rate of the bundle to \$5,910 per month, which would now represent a 40% discount from the rate of \$9,850 a subscriber purchasing connectivity through Bats Connect for each of these market data

its description of the U.S. Equity Select + SIP bundle.

⁷ See Exchange Rule 13.9.

⁸ The Exchange's affiliated exchanges are Bats EDGX Exchange, Inc. ("EDGX"), Bats BYX Exchange, Inc. ("BYX"), and Bats BZX Exchange, Inc. ("BZX").

⁹ Subscribers pays any fees charged by the exchange providing the market data feed directly to that exchange.

¹⁰ The Exchange also proposes to correct a typographical error in referencing BBDS/TDDS in

products would be charged under the proposed rule change.

Lastly, the Exchange proposes to charge a discounted fee of \$6,390 per month for subscribers who purchase connectivity to the OPRA, UQDF/UTDF/OMDF, and CQS/CTS data feeds, to be known as the OPRA + SIP Bundle. Absent the discount, a subscriber purchasing connectivity through Bats Connect for each of these market data products would pay a total monthly fee of \$7,100. Instead, a subscriber who purchases connectivity to each of the above market data products is charged a monthly fee of \$6,390, which represents a 10% discount.

Implementation Date

The Exchange proposes to implement this amendment to its fee schedule on January 3, 2017.¹¹

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,¹² in general, and furthers the objectives of Section 6(b)(4),¹³ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

The Exchange believes that the proposal represents an equitable allocation of reasonable dues, fees, and other charges as its fees for physical connectivity are reasonably constrained by competitive alternatives. If a particular exchange charges excessive fees for connectivity, affected Members and non-Members may opt to terminate their connectivity arrangements with that exchange, and adopt a possible

range of alternative strategies, including routing to the applicable exchange through another participant or market center or taking that exchange's data indirectly. Accordingly, if the Exchange charges excessive fees, it would stand to lose not only connectivity revenues but also revenues associated with the execution of orders routed to it, and, to the extent applicable, market data revenues. The Exchange believes that this competitive dynamic imposes powerful restraints on the ability of any exchange to charge unreasonable fees for connectivity.

Furthermore, the proposed rule change is also an equitable allocation of reasonable dues, fees, and other charges as the Exchange believes that the increased fees obtained will enable it to cover its increased infrastructure costs associated with establishing physical ports to connect to the Exchange's Systems. The additional revenue from the increased fees will also enable the Exchange to continue to maintain and improve its market technology and services.

Physical Ports

The Exchange believes that the proposed fees for a 10 gigabyte circuit of \$6,000 per month is reasonable in that they are less than analogous fees charged by the Nasdaq Stock Market LLC ("Nasdaq") and NYSE Arca, Inc. ("Arca"), which range from \$10,000—\$15,000 per month for 10 gigabyte circuits.¹⁴ The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members and non-Members. Members and non-Members will continue to choose whether they want more than one physical port and choose the method of connectivity based on their specific needs. All Exchange Members that voluntarily select various service options will be charged the same amount for the same services. As is true of all physical connectivity, all Members and non-Members have the option to select any connectivity option, and there is no differentiation with regard to the fees charged for the service.

Logical Ports

The Exchange believes that the increase of fees for logical ports represents an equitable allocation of reasonable dues, fees and other charges. The Exchange believes that its proposed changes to logical port fees are reasonable in light of the benefits to

Exchange participants of direct market access and receipt of data. The Exchange believes its proposed fees are reasonable because Nasdaq and NYSE Arca charge comparable rates for logical ports to access such markets.¹⁵

Bats Connect

The Exchange also believes that its proposed fees for Bats Connect provide for the equitable allocation of reasonable dues, fees and other charges among members and other persons using its facilities. First, the Exchange charges a connectivity fee to subscribers utilizing Bats Connect to route orders to other exchanges and market centers that are connected to the Exchange's network, which varies based solely on the amount of bandwidth selected by the subscriber. The proposed increased connectivity fees remain reasonable and competitive as compared to similar fees charged by other exchanges. For purposes of order routing, the Exchange proposes to now charge \$500 for 1 Mb, \$1,000 for 5 Mb, and \$1,250 for 10 Mb. The New York Stock Exchange, Inc. ("NYSE") currently charges \$300 for 1 Mb, \$700 for 5 Mb, and \$900 for 10 Mb.¹⁶ In addition, the proposed rates continue to be less than what a subscriber would pay to connect directly to another exchange.¹⁷ The Exchange notes that, overall, the connectivity fee for routing of orders to other market centers proposed by the Exchange is similar to that charged by the NYSE.

Second, with regard to utilizing Bats Connect to receive market data products from other exchanges, the Exchange only charges subscribers a connectivity fee, the amount of which is based solely on the amount of bandwidth required to transmit that specific data product to the subscribers. The Exchange believes it is necessary to increase the rates for select market data feeds as described herein to address changes in bandwidth necessary to receive such feeds. The increased fees will also enable the Exchange to continue to cover the increased infrastructure costs while also enabling it to continue to maintain and improve the service.

¹⁵ See Nasdaq Rule 7015(b) (charging a fee of \$575 per month for FIX Trading Ports) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016) (charging a fee of \$550 per month for ports for order/quote entry).

¹⁶ See Section 3.6.1 of NYSE's SFTI Americas Product and Service List available at <http://www.nyxdata.com/docs/connectivity>.

¹⁷ See e.g., Nasdaq Rule 7034(b) and the Co-Location section of the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016).

¹¹ The Exchange initially filed the proposed rule change on December 27, 2016. (SR-BatsEDGA-2016-33). On January 5, 2017, the Exchange withdrew SR-BatsEDGA-2016-33 and submitted this filing.

¹² 15 U.S.C. 78f.

¹³ 15 U.S.C. 78f(b)(4).

¹⁴ See Nasdaq Rule 7034(b) and the NYSE Arca fee schedule available at https://www.nyse.com/publicdocs/nyse/markets/nyse-arca/NYSE_Arca_Marketplace_Fees.pdf (dated December 2, 2016).

The amounts of the connectivity fees continue to be reasonable as compared to similar fees charged by other exchanges. For example, for market data connectivity, Nasdaq charges \$1,412 per month for CQS/CTS data feed, and the Exchange proposes to charge \$1,400 per month connectivity for CQS/CTS data feed.¹⁸

The Exchange believes it is reasonable to offer such discounted pricing to subscribers who purchase connectivity to a bundle of market data products as it would enable them to reduce their overall connectivity costs for the receipt of market data. The Exchange is not required by any rule or regulation to make Bats Connect available; nor are subscribers required by any rule or regulation to utilize Bats Connect. Accordingly, subscribers can discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Moreover, the Exchange believes the proposed fees are reasonable and equitable because they continue to be based on the Exchange's costs to cover the amount of bandwidth required to provide connectivity to the select bundle of data feeds. The proposed fees will continue to allow the Exchange to recoup this cost, while providing subscribers with an alternative means to connect to the select bundle of data feeds at a discounted rate.

Lastly, the Exchange believes the proposed fees are reasonable and equitable because they are based on the Exchange's costs to cover hardware, installation, testing and connection, as well as expenses involved in maintaining and managing the service. The proposed fees allow the Exchange to recoup these costs, while providing subscribers with an alternative means to connect to other exchange and market centers. The Exchange believes that the proposed fees are reasonable and equitable in that they reflect the costs and the benefit of providing alternative connectivity.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, the Exchange believes that fees for connectivity are constrained by the robust competition for order flow among exchanges and non-exchange markets. The Exchange does not believe that the

proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange's competitors.

Additionally, Members may opt to disfavor the Exchange's pricing if they believe that alternatives offer them better value. Further, excessive fees for connectivity would serve to impair an exchange's ability to compete for order flow rather than burdening competition.

Lastly, the Exchange does not believe the proposed fees for Bats Connect will result in any burden on competition. The proposed rule change is designed to provide subscribers with an alternative means to access other market centers on the Exchange's network if they choose or in the event of a market disruption where other alternative connection methods become unavailable. Bats Connect is not the exclusive method to connect to these market centers and subscribers may utilize alternative methods to connect to the product if they believe the Exchange's proposed pricing is unreasonable or otherwise. Therefore, the Exchange does not believe the proposed rule change will have any effect on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁹ and paragraph (f) of Rule 19b-4 thereunder.²⁰ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BatsEDGA-2017-01 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BatsEDGA-2017-01. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BatsEDGA-2017-01 and should be submitted on or before February 8, 2017.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²¹

Eduardo A. Aleman,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-32422; File No. 812-14568]

Owl Rock Capital Corporation, et al.; Notice of Application

January 11, 2017.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the "Act") and rule 17d-1 under the Act permitting certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and under rule 17d-1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain business development companies (each, a "BDC") and certain closed-end investment companies to co-invest in portfolio companies with each other and with affiliated investment funds.

APPLICANTS: Owl Rock Capital Corporation (the "Company"); Owl Rock Capital Corporation II ("BDC II") and together with the Company, the "Existing Regulated Funds"); and Owl Rock Capital Advisors LLC ("Owl Rock Adviser").

FILING DATES: The application was filed on October 19, 2015, and amended on March 9, 2016, and December 7, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on February 6, 2017, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F St. NE., Washington, DC 20549-1090. Applicants: Alan Kirshenbaum, Owl Rock Capital Corporation, 245 Park Avenue, 41st Floor, New York, NY 10167.

FOR FURTHER INFORMATION CONTACT: Kieran G. Brown, Senior Counsel, at

(202) 551-6773 or James M. Curtis, Branch Chief, at (202) 551-6712 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090.

Applicants' Representations

1. The Company, a Maryland corporation, is organized as a closed-end management investment company that has elected to be regulated as a BDC under section 54(a) of the Act.¹ Applicants state that the Company seeks to generate current income, and to a lesser extent, capital appreciation by targeting investment opportunities with favorable risk adjusted returns.

2. BDC II, a Maryland corporation, was organized on October 15, 2015, for the purpose of operating as an externally managed, closed-end management investment company which will elect to be regulated as a BDC under section 54(a) of the Act. Applicants state that BDC II seeks to generate current income, and to a lesser extent, capital appreciation by targeting investment opportunities with favorable risk adjusted returns.

3. Owl Rock Adviser, a Delaware limited liability company, is registered with the Commission as an investment adviser under the Investment Advisers Act of 1940 (the "Advisers Act"). Owl Rock Adviser serves as investment adviser to the Company and will serve as investment adviser to BDC II.

4. Applicants seek an order ("Order") to permit one or more Regulated Funds² and/or one or more Affiliated Funds³ to

¹ Section 2(a)(48) defines a BDC to be any closed-end investment company that operates for the purpose of making investments in securities described in sections 55(a)(1) through 55(a)(3) of the Act and makes available significant managerial assistance with respect to the issuers of such securities.

² "Regulated Fund" means any of the Existing Regulated Funds and any Future Regulated Fund. "Future Regulated Fund" means any closed-end management investment company (a) that is registered under the Act or has elected to be regulated as BDC, (b) whose investment adviser is an Adviser, and (c) that intends to participate in the Co-Investment Program. The term "Adviser" means (a) Owl Rock Adviser and (b) any future investment adviser that controls, is controlled by, or is under common control with Owl Rock Adviser and is registered as an investment adviser under the Advisers Act.

³ "Affiliated Fund" means any entity (a) whose investment adviser is an Adviser, (b) that would be an investment company but for section 3(c)(1) or 3(c)(7) of the Act, and (c) that intends to participate in the Co-Investment Program.

participate in the same investment opportunities through a proposed co-investment program (the "Co-Investment Program") where such participation would otherwise be prohibited under section 57(a)(4) and rule 17d-1 by (a) co-investing with each other in securities issued by issuers in private placement transactions in which an Adviser negotiates terms in addition to price;⁴ and (b) making additional investments in securities of such issuers, including through the exercise of warrants, conversion privileges, and other rights to purchase securities of the issuers ("Follow-On Investments"). "Co-Investment Transaction" means any transaction in which a Regulated Fund (or its Wholly-Owned Investment Sub, as defined below) participated together with one or more other Regulated Funds and/or one or more Affiliated Funds in reliance on the requested Order. "Potential Co-Investment Transaction" means any investment opportunity in which a Regulated Fund (or its Wholly-Owned Investment Sub) could not participate together with one or more Affiliated Funds and/or one or more other Regulated Funds without obtaining and relying on the Order.⁵

5. Applicants state any of the Regulated Funds may, from time to time, form one or more Wholly-Owned Investment Subs.⁶ A Wholly-Owned Investment Sub would be prohibited from investing in a Co-Investment Transaction with any Affiliated Fund or Regulated Fund because it would be a company controlled by its parent Regulated Fund for purposes of section 57(a)(4) and rule 17d-1. Applicants request that each Wholly-Owned Investment Sub be permitted to participate in Co-Investment Transactions in lieu of its parent Regulated Fund and that the Wholly-Owned Investment Sub's participation in any such transaction be treated, for

⁴ The term "private placement transactions" means transactions in which the offer and sale of securities by the issuer are exempt from registration under the Securities Act of 1933 (the "Securities Act").

⁵ All existing entities that currently intend to rely upon the requested Order have been named as applicants. Any other existing or future entity that subsequently relies on the Order will comply with the terms and conditions of the application.

⁶ The term "Wholly-Owned Investment Sub" means an entity (i) that is wholly-owned by a Regulated Fund (with the Regulated Fund at all times holding, beneficially and of record, 100% of the voting and economic interests); (ii) whose sole business purpose is to hold one or more investments on behalf of the Regulated Fund; (iii) with respect to which the board of directors of the Regulated Fund (the "Board") has the sole authority to make all determinations with respect to the entity's participation under the conditions of the application; and (iv) that would be an investment company but for section 3(c)(1) or 3(c)(7) of the Act.

purposes of the requested order, as though the parent Regulated Fund were participating directly. Applicants represent that this treatment is justified because a Wholly-Owned Investment Sub would have no purpose other than serving as a holding vehicle for the Regulated Fund's investments and, therefore, no conflicts of interest could arise between the Regulated Fund and the Wholly-Owned Investment Sub. The Regulated Fund's Board would make all relevant determinations under the conditions with regard to a Wholly-Owned Investment Sub's participation in a Co-Investment Transaction, and the Regulated Fund's Board would be informed of, and take into consideration, any proposed use of a Wholly-Owned Investment Sub in the Regulated Fund's place. If the Regulated Fund proposes to participate in the same Co-Investment Transaction with any of its Wholly-Owned Investment Subs, the Board will also be informed of, and take into consideration, the relative participation of the Regulated Fund and the Wholly-Owned Investment Sub.

6. When considering Potential Co-Investment Transactions for any Regulated Fund, the applicable Adviser will consider only the Objectives and Strategies, investment policies, investment positions, capital available for investment as described in the application ("Available Capital"), and other pertinent factors applicable to that Regulated Fund.⁷ The Board of each Regulated Fund, including the directors that are not "interested persons" within the meaning of section 2(a)(19) of the Act (the "Non-Interested Directors"), has (or will have prior to relying on the requested Order) determined that it is in the best interests of the Regulated Fund to participate in Co-Investment Transactions.⁸

7. Other than pro rata dispositions and Follow-On Investments as provided in conditions 7 and 8, and after making the determinations required in conditions 1 and 2(a), the Adviser will present each Potential Co-Investment Transaction and the proposed allocation to the directors of the Board eligible to vote under section 57(o) of the Act ("Eligible Directors"), and the "required majority," as defined in section 57(o) of

the Act ("Required Majority")⁹ will approve each Co-Investment Transaction prior to any investment by the participating Regulated Fund.

8. With respect to the pro rata dispositions and Follow-On Investments provided in conditions 7 and 8, a Regulated Fund may participate in a pro rata disposition or Follow-On Investment without obtaining prior approval of the Required Majority if, among other things: (i) The proposed participation of each Regulated Fund and Affiliated Fund in such disposition is proportionate to its outstanding investments in the issuer immediately preceding the disposition or Follow-On Investment, as the case may be; and (ii) the Board of the Regulated Fund has approved that Regulated Fund's participation in pro rata dispositions and Follow-On Investments as being in the best interests of the Regulated Fund. If the Board does not so approve, any such disposition or Follow-On Investment will be submitted to the Regulated Fund's Eligible Directors. The Board of any Regulated Fund may at any time rescind, suspend or qualify its approval of pro rata dispositions and Follow-On Investments with the result that all dispositions and/or Follow-On Investments must be submitted to the Eligible Directors.

9. No Non-Interested Director of a Regulated Fund will have a financial interest in any Co-Investment Transaction, other than through share ownership in one of the Regulated Funds.

10. If an Adviser or its principal owners (the "Principals"), or any person controlling, controlled by, or under common control with an Adviser or the Principals, and the Affiliated Funds (collectively, the "Holders") own in the aggregate more than 25 percent of the outstanding voting shares of a Regulated Fund (the "Shares"), then the Holders will vote such Shares as required under condition 14. Applicants believe that this condition will ensure that the Non-Interested Directors will act independently in evaluating the Co-Investment Program, because the ability of an Adviser or the Principals to influence the Non-Interested Directors by a suggestion, explicit or implied, that the Non-Interested Directors can be removed if desired by the Holders will be limited significantly. The Non-Interested Directors will evaluate and approve any such independent party, taking into account its qualifications,

reputation for independence, cost to the shareholders, and other factors that they deem relevant.

Applicants' Legal Analysis

1. Section 57(a)(4) of the Act prohibits certain affiliated persons of a BDC from participating in joint transactions with the BDC or a company controlled by a BDC in contravention of rules as prescribed by the Commission. Under section 57(b)(2) of the Act, any person who is directly or indirectly controlling, controlled by, or under common control with a BDC is subject to section 57(a)(4). Applicants submit that each of the Regulated Funds and Affiliated Funds could be deemed to be a person related to each Regulated Fund in a manner described by section 57(b) by virtue of being under common control. Section 57(i) of the Act provides that, until the Commission prescribes rules under section 57(a)(4), the Commission's rules under section 17(d) of the Act applicable to registered closed-end investment companies will be deemed to apply to transactions subject to section 57(a)(4). Because the Commission has not adopted any rules under section 57(a)(4), rule 17d-1 also applies to joint transactions with Regulated Funds that are BDCs. Section 17(d) of the Act and rule 17d-1 under the Act are applicable to Regulated Funds that are registered closed-end investment companies.

2. Section 17(d) of the Act and rule 17d-1 under the Act prohibit affiliated persons of a registered investment company from participating in joint transactions with the company unless the Commission has granted an order permitting such transactions. In passing upon applications under rule 17d-1, the Commission considers whether the company's participation in the joint transaction is consistent with the provisions, policies, and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants.

3. Applicants state that in the absence of the requested relief, the Regulated Funds would be, in some circumstances, limited in their ability to participate in attractive and appropriate investment opportunities. Applicants believe that the proposed terms and conditions will ensure that the Co-Investment Transactions are consistent with the protection of each Regulated Fund's shareholders and with the purposes intended by the policies and provisions of the Act. Applicants state that the Regulated Funds' participation in the Co-Investment Transactions will be consistent with the provisions,

⁷ "Objectives and Strategies" means a Regulated Fund's investment objectives and strategies, as described in the Regulated Fund's registration statement on Form N-2 or Form 10, as applicable, other filings the Regulated Fund has made with the Commission under the Securities Act, or under the Securities Exchange Act of 1934, and the Regulated Fund's reports to shareholders.

⁸ The Regulated Funds, however, will not be obligated to invest, or co-invest, when investment opportunities are referred to them.

⁹ In the case of a Regulated Fund that is a registered closed-end fund, the Board members that make up the Required Majority will be determined as if the Regulated Fund were a BDC subject to section 57(o).

policies, and purposes of the Act and on a basis that is not different from or less advantageous than that of other participants.

Applicants' Conditions

Applicants agree that the Order will be subject to the following conditions:

1. Each time an Adviser considers a Potential Co-Investment Transaction for an Affiliated Fund or another Regulated Fund that falls within a Regulated Fund's then-current Objectives and Strategies, the Regulated Fund's Adviser will make an independent determination of the appropriateness of the investment for such Regulated Fund in light of the Regulated Fund's then-current circumstances.

2. (a) If the Adviser deems a Regulated Fund's participation in any Potential Co-Investment Transaction to be appropriate for the Regulated Fund, it will then determine an appropriate level of investment for the Regulated Fund.

(b) If the aggregate amount recommended by the applicable Adviser to be invested by the applicable Regulated Fund in the Potential Co-Investment Transaction, together with the amount proposed to be invested by the other participating Regulated Funds and Affiliated Funds, collectively, in the same transaction, exceeds the amount of the investment opportunity, the investment opportunity will be allocated among them pro rata based on each participant's Available Capital, up to the amount proposed to be invested by each. The applicable Adviser will provide the Eligible Directors of each participating Regulated Fund with information concerning each participating party's Available Capital to assist the Eligible Directors with their review of the Regulated Fund's investments for compliance with these allocation procedures.

(c) After making the determinations required in conditions 1 and 2(a), the applicable Adviser will distribute written information concerning the Potential Co-Investment Transaction (including the amount proposed to be invested by each participating Regulated Fund and Affiliated Fund) to the Eligible Directors of each participating Regulated Fund for their consideration. A Regulated Fund will co-invest with one or more other Regulated Funds and/or one or more Affiliated Funds only if, prior to the Regulated Fund's participation in the Potential Co-Investment Transaction, a Required Majority concludes that:

(i) The terms of the Potential Co-Investment Transaction, including the consideration to be paid, are reasonable and fair to the Regulated Fund and its

shareholders and do not involve overreaching in respect of the Regulated Fund or its shareholders on the part of any person concerned;

(ii) the Potential Co-Investment Transaction is consistent with:

(A) The interests of the shareholders of the Regulated Fund; and

(B) the Regulated Fund's then-current Objectives and Strategies;

(iii) the investment by any other Regulated Funds or Affiliated Funds would not disadvantage the Regulated Fund, and participation by the Regulated Fund would not be on a basis different from or less advantageous than that of other Regulated Funds or Affiliated Funds; provided that, if any other Regulated Fund or Affiliated Fund, but not the Regulated Fund itself, gains the right to nominate a director for election to a portfolio company's board of directors or the right to have a board observer or any similar right to participate in the governance or management of the portfolio company, such event shall not be interpreted to prohibit the Required Majority from reaching the conclusions required by this condition (2)(c)(iii), if:

(A) The Eligible Directors will have the right to ratify the selection of such director or board observer, if any;

(B) the applicable Adviser agrees to, and does, provide periodic reports to the Regulated Fund's Board with respect to the actions of such director or the information received by such board observer or obtained through the exercise of any similar right to participate in the governance or management of the portfolio company; and

(C) any fees or other compensation that any Affiliated Fund or any Regulated Fund or any affiliated person of any Affiliated Fund or any Regulated Fund receives in connection with the right of the Affiliated Fund or a Regulated Fund to nominate a director or appoint a board observer or otherwise to participate in the governance or management of the portfolio company will be shared proportionately among the participating Affiliated Funds (who each may, in turn, share its portion with its affiliated persons) and the participating Regulated Funds in accordance with the amount of each party's investment; and

(iv) the proposed investment by the Regulated Fund will not benefit the Advisers, the Affiliated Funds or the other Regulated Funds or any affiliated person of any of them (other than the parties to the Co-Investment Transaction), except (A) to the extent permitted by condition 13, (B) to the extent permitted by section 17(e) or

57(k) of the Act, as applicable, (C) indirectly, as a result of an interest in the securities issued by one of the parties to the Co-Investment Transaction, or (D) in the case of fees or other compensation described in condition 2(c)(iii)(C).

3. Each Regulated Fund has the right to decline to participate in any Potential Co-Investment Transaction or to invest less than the amount proposed.

4. The applicable Adviser will present to the Board of each Regulated Fund, on a quarterly basis, a record of all investments in Potential Co-Investment Transactions made by any of the other Regulated Funds or Affiliated Funds during the preceding quarter that fell within the Regulated Fund's then-current Objectives and Strategies that were not made available to the Regulated Fund, and an explanation of why the investment opportunities were not offered to the Regulated Fund. All information presented to the Board pursuant to this condition will be kept for the life of the Regulated Fund and at least two years thereafter, and will be subject to examination by the Commission and its staff.

5. Except for Follow-On Investments made in accordance with condition 8,¹⁰ a Regulated Fund will not invest in reliance on the Order in any issuer in which another Regulated Fund, Affiliated Fund, or any affiliated person of another Regulated Fund or Affiliated Fund is an existing investor.

6. A Regulated Fund will not participate in any Potential Co-Investment Transaction unless the terms, conditions, price, class of securities to be purchased, settlement date, and registration rights will be the same for each participating Regulated Fund and Affiliated Fund. The grant to an Affiliated Fund or another Regulated Fund, but not the Regulated Fund, of the right to nominate a director for election to a portfolio company's board of directors, the right to have an observer on the board of directors or similar rights to participate in the governance or management of the portfolio company will not be interpreted so as to violate this condition 6, if conditions 2(c)(iii)(A), (B) and (C) are met.

7. (a) If any Affiliated Fund or any Regulated Fund elects to sell, exchange or otherwise dispose of an interest in a security that was acquired in a Co-Investment Transaction, the applicable Advisers will:

¹⁰ This exception applies only to Follow-On Investments by a Regulated Fund in issuers in which that Regulated Fund already holds investments.

(i) notify each Regulated Fund that participated in the Co-Investment Transaction of the proposed disposition at the earliest practical time; and

(ii) formulate a recommendation as to participation by each Regulated Fund in the disposition.

(b) Each Regulated Fund will have the right to participate in such disposition on a proportionate basis, at the same price and on the same terms and conditions as those applicable to the participating Affiliated Funds and Regulated Funds.

(c) A Regulated Fund may participate in such disposition without obtaining prior approval of the Required Majority if: (i) The proposed participation of each Regulated Fund and each Affiliated Fund in such disposition is proportionate to its outstanding investments in the issuer immediately preceding the disposition; (ii) the Board of the Regulated Fund has approved as being in the best interests of the Regulated Fund the ability to participate in such dispositions on a pro rata basis (as described in greater detail in the application); and (iii) the Board of the Regulated Fund is provided on a quarterly basis with a list of all dispositions made in accordance with this condition. In all other cases, the Adviser will provide its written recommendation as to the Regulated Fund's participation to the Eligible Directors, and the Regulated Fund will participate in such disposition solely to the extent that a Required Majority determines that it is in the Regulated Fund's best interests.

(d) Each Affiliated Fund and each Regulated Fund will bear its own expenses in connection with any such disposition.

8. (a) If any Affiliated Fund or any Regulated Fund desires to make a Follow-On Investment in a portfolio company whose securities were acquired in a Co-Investment Transaction, the applicable Advisers will:

(i) Notify each Regulated Fund that participated in the Co-Investment Transaction of the proposed transaction at the earliest practical time; and

(ii) formulate a recommendation as to the proposed participation, including the amount of the proposed Follow-On Investment, by each Regulated Fund.

(b) A Regulated Fund may participate in such Follow-On Investment without obtaining prior approval of the Required Majority if: (i) The proposed participation of each Regulated Fund and each Affiliated Fund in such investment is proportionate to its outstanding investments in the issuer immediately preceding the Follow-On

Investment; and (ii) the Board of the Regulated Fund has approved as being in the best interests of the Regulated Fund the ability to participate in Follow-On Investments on a pro rata basis (as described in greater detail in the application). In all other cases, the Adviser will provide its written recommendation as to the Regulated Fund's participation to the Eligible Directors, and the Regulated Fund will participate in such Follow-On Investment solely to the extent that a Required Majority determines that it is in the Regulated Fund's best interests.

(c) If, with respect to any Follow-On Investment:

(i) The amount of the opportunity is not based on the Regulated Funds' and the Affiliated Funds' outstanding investments immediately preceding the Follow-On Investment; and

(ii) the aggregate amount recommended by the applicable Adviser to be invested by the applicable Regulated Fund in the Follow-On Investment, together with the amount proposed to be invested by the other participating Regulated Funds and Affiliated Funds, collectively, in the same transaction, exceeds the amount of the investment opportunity; then the investment opportunity will be allocated among them pro rata based on each participant's Available Capital, up to the maximum amount proposed to be invested by each.

(d) The acquisition of Follow-On Investments as permitted by this condition will be considered a Co-Investment Transaction for all purposes and subject to the other conditions set forth in this application.

9. The Non-Interested Directors of each Regulated Fund will be provided quarterly for review all information concerning Potential Co-Investment Transactions and Co-Investment Transactions, including investments made by other Regulated Funds or Affiliated Funds that the Regulated Fund considered but declined to participate in, so that the Non-Interested Directors may determine whether all investments made during the preceding quarter, including those investments that the Regulated Fund considered but declined to participate in, comply with the conditions of the Order. In addition, the Non-Interested Directors will consider at least annually the continued appropriateness for the Regulated Fund of participating in new and existing Co-Investment Transactions.

10. Each Regulated Fund will maintain the records required by section 57(f)(3) of the Act as if each of the Regulated Funds were a BDC and each of the investments permitted under

these conditions were approved by the Required Majority under section 57(f) of the Act.

11. No Non-Interested Director of a Regulated Fund will also be a director, general partner, managing member or principal, or otherwise an "affiliated person" (as defined in the Act) of an Affiliated Fund.

12. The expenses, if any, associated with acquiring, holding or disposing of any securities acquired in a Co-Investment Transaction (including, without limitation, the expenses of the distribution of any such securities registered for sale under the Securities Act) will, to the extent not payable by the Advisers under their respective investment advisory agreements with Affiliated Funds and the Regulated Funds, be shared by the Regulated Funds and the Affiliated Funds in proportion to the relative amounts of the securities held or to be acquired or disposed of, as the case may be.

13. Any transaction fee¹¹ (including break-up or commitment fees but excluding broker's fees contemplated by section 17(e) or 57(k) of the Act, as applicable), received in connection with a Co-Investment Transaction will be distributed to the participating Regulated Funds and Affiliated Funds on a pro rata basis based on the amounts they invested or committed, as the case may be, in such Co-Investment Transaction. If any transaction fee is to be held by an Adviser pending consummation of the transaction, the fee will be deposited into an account maintained by such Adviser at a bank or banks having the qualifications prescribed in section 26(a)(1) of the Act, and the account will earn a competitive rate of interest that will also be divided pro rata among the participating Regulated Funds and Affiliated Funds based on the amounts they invest in such Co-Investment Transaction. None of the Affiliated Funds, the Advisers, the other Regulated Funds or any affiliated person of the Regulated Funds or Affiliated Funds will receive additional compensation or remuneration of any kind as a result of or in connection with a Co-Investment Transaction (other than (a) in the case of the Regulated Funds and the Affiliated Funds, the pro rata transaction fees described above and fees or other compensation described in condition 2(c)(iii)(C); and (b) in the case of an Adviser, investment advisory fees paid in accordance with the agreement

¹¹ Applicants are not requesting and the staff is not providing any relief for transaction fees received in connection with any Co-Investment Transaction.

between the Adviser and the Regulated Fund or Affiliated Fund.

14. If the Holders own in the aggregate more than 25 percent of the Shares of a Regulated Fund, then the Holders will vote such Shares as directed by an independent third party when voting on (1) the election of directors; (2) the removal of one or more directors; or (3) any other matter under either the 1940 Act or applicable state law affecting the Board's composition, size or manner of election.

For the Commission, by the Division of Investment Management, under delegated authority.

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011-01-P

SMALL BUSINESS ADMINISTRATION

Interest Rates

The Small Business Administration publishes an interest rate called the optional "peg" rate (13 CFR 120.214) on a quarterly basis. This rate is a weighted average cost of money to the government for maturities similar to the average SBA direct loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. This rate will be 2.00 percent for the January-March quarter of FY 2017.

Pursuant to 13 CFR 120.921(b), the maximum legal interest rate for any third party lender's commercial loan which funds any portion of the cost of a 504 project (see 13 CFR 120.801) shall be 6% over the New York Prime rate or, if that exceeds the maximum interest rate permitted by the constitution or laws of a given State, the maximum interest rate will be the rate permitted by the constitution or laws of the given State.

Dianna Seaborn,

Acting Director, Office of Financial Assistance.

BILLING CODE P

SMALL BUSINESS ADMINISTRATION

Meeting of the Interagency Task Force on Veterans Small Business Development

AGENCY: U.S. Small Business Administration.

ACTION: Notice of open Federal Interagency Task Force Meeting.

SUMMARY: The U.S. Small Business Administration (SBA) is issuing this

notice to announce the location, date, time and agenda for the next meeting of the Interagency Task Force on Veterans Small Business Development. The meeting is open to the public.

DATES: Wednesday, March 8, 2017, from 1:00 p.m. to 4:00 p.m.

ADDRESSES: Eisenhower Conference Room B, located on the concourse level, U.S. Small Business Administration, 409 3rd Street SW., Washington, DC 20416.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C., Appendix 2), SBA announces the meeting of the Interagency Task Force on Veterans Small Business Development (Task Force). The Task Force is established pursuant to Executive Order 13540 to coordinate the efforts of Federal agencies to improve capital, business development opportunities, and pre-established federal contracting goals for small business concerns owned and controlled by veterans and service-disabled veterans.

Moreover, the Task Force shall coordinate administrative and regulatory activities and develop proposals relating to "six focus areas": (1) Improving capital access and capacity of small business concerns owned and controlled by veterans and service-disabled veterans through loans, surety bonding, and franchising; (2) ensuring achievement of the pre-established Federal contracting goals for small business concerns owned and controlled by veterans and service-disabled veterans through expanded mentor-protégé assistance and matching such small business concerns with contracting opportunities; (3) increasing the integrity of certifications of status as a small business concern owned and controlled by a veteran or service-disabled veteran; (4) reducing paperwork and administrative burdens on veterans in accessing business development and entrepreneurship opportunities; (5) increasing and improving training and counseling services provided to small business concerns owned and controlled by veterans; and (6) making other improvements relating to the support for veterans business development by the Federal Government.

Additional Information: This meeting is open to the public. Advance notice of attendance is requested. Anyone wishing to attend and/or make comments to the Task Force must contact SBA's Office of Veterans Business Development no later than March 6, 2017 at veteransbusiness@sba.gov.

sba.gov. Comments for the record should be applicable to the "six focus areas" of the Task Force and will be limited to five minutes in the interest of time and to accommodate as many participants as possible. Written comments should also be sent to the above email no later than March 6, 2017. Special accommodations requests should also be directed to SBA's Office of Veterans Business Development at (202) 205-6773 or to veteransbusiness@sba.gov. For more information on veteran owned small business programs, please visit www.sba.gov/veterans.

Dated: January 11, 2017.

Miguel J. L'Heureux,

SBA Committee Management Officer.

BILLING CODE 8025-01-P

DEPARTMENT OF STATE

[Public Notice: 9857]

Notice of Determinations; Culturally Significant Objects Imported for Exhibition Determinations: "The Medici's Painter: Carlo Dolci and 17th-Century Florence" Exhibition

Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), E.O. 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236-3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257 of April 15, 2003), I hereby determine that the objects to be included in the exhibition "The Medici's Painter: Carlo Dolci and 17th-Century Florence," imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at the Davis Museum at Wellesley College, Wellesley, Massachusetts, from on or about February 9, 2017, until on or about July 9, 2017, at the Nasher Museum of Art at Duke University, Durham, North Carolina, from on or about August 24, 2017, until on or about January 14, 2018, and at possible additional exhibitions or venues yet to be determined, is in the national interest. I have ordered that Public Notice of these Determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of the imported objects, contact the Office of Public Diplomacy and Public Affairs in the Office of the Legal Adviser, U.S. Department of State (telephone: 202–632–6471; email: section2459@state.gov). The mailing address is U.S. Department of State, L/PD, SA–5, Suite 5H03, Washington, DC 20522–0505.

Mark Taplin,

Principal Deputy Assistant Secretary, Bureau of Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

DEPARTMENT OF STATE

[Public Notice: 9846; No. 2016–04]

Determination Pursuant to the Foreign Missions Act

Pursuant to the authority vested in the Secretary of State under the Foreign Missions Act, 22 U.S.C. 4301 *et seq.* (“the Act”), and delegated pursuant to Department of State Delegation of Authority No. 214 of September 20, 1994, I hereby determine it is reasonably necessary to achieve one or more of the proposes set forth in section 204(b) of the Act (22 U.S.C. 4304(b)) to designate 115 Town Point Lane, Centerville, MD 21617, which is owned by the Government of the Russian Federation, as a location and facilities for which entry or access is strictly prohibited by all individuals, including but not limited to representatives or employees of the Russian Government and their dependents, without first obtaining written permission from the Department of State’s Office of Foreign Mission (OFM). Such prohibitions will take effect as of noon on December 30, 2016.

As a result, all persons on said property are required to depart the premises no later than the date and time stated above.

For purposes of this determination, 115 Town Point Lane, Centerville, MD 21617 includes both:

- A 45.52 acre parcel, owned by the Russian Federation, and documented in the records of the Maryland Department of Assessments and Taxation for the Queen Anne’s County as account number 03–017249; and

- A 39,300 square foot parcel, owned by the Russian Federation, and documented in the records of the Maryland Department of Assessments and Taxation for Queen Anne’s County as account number 03–002829.

Access to the property will be subject to terms and conditions set forth by the Office of Foreign Missions.

Gentry O. Smith,

Director, The Office of Foreign Missions, Department of State.

BILLING CODE 4710–43–P

DEPARTMENT OF STATE

[Public Notice: 9847; No. 2016–05]

Determination Pursuant to the Foreign Missions Act

Pursuant to the authority vested in the Secretary of State under the Foreign Missions Act, 22 U.S.C. 4301 *et seq.* (“the Act”), and delegated pursuant to Department of State Delegation of Authority No. 214 of September 20, 1994, I hereby determine it is reasonably necessary to achieve one or more of the proposes set forth in section 204(b) of the Act (22 U.S.C. 4304(b)) to designate 136 Mill River Road, Upper Brookville, NY, which is owned by the Government of the Russian Federation, as a location and facilities for which entry or access is strictly prohibited by all individuals, including but not limited to representatives or employees of the Russian Government and their dependents, without first obtaining written permission from the Department of State’s Office of Foreign Mission (OFM). Such prohibitions will take effect as of noon on December 30, 2016.

As a result, all persons on said property are required to depart the premises no later than the date and time stated above.

For purposes of this determination, 136 Mill River Road, Upper Brookville, NY includes both:

- A 14.06 acre parcel, owned by the Russian Federation, and documented in the records of Nassau County, NY as NYS SWIS Code number 282427;
- Comprised of lot grouping 164A, 164C & 296–297.

Access to the property will be subject to terms and conditions set forth by the Office of Foreign Missions.

Gentry O. Smith,

Director, The Office of Foreign Missions, Department of State.

BILLING CODE 4710–43–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

[Docket No. FTA–2015–0017]

Z RIN 2132–ZA04

National Public Transportation Safety Plan

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice of availability and response to comments.

SUMMARY: The Federal Transit Administration has placed in the docket and on its Web site, the final National Public Transportation Safety Plan that establishes performance measures to improve the safety of public transportation systems that receive FTA Federal financial assistance. Transit agencies will set performance targets based on the measures in order to monitor and assess the safety performance of their public transportation systems.

FOR FURTHER INFORMATION CONTACT: For program matters, James Bartell, Office of Transit Safety and Oversight, (202) 366–4050 or James.Bartell@dot.gov. For legal matters, Candace Key, Office of Chief Counsel, (202) 366–4011 or Candace.Key@dot.gov.

SUPPLEMENTARY INFORMATION:

Availability of Final Plan

This notice provides a summary of the final changes to the National Public Transportation Safety Plan and responses to comments. The final Plan itself is not included in this notice; instead, an electronic version is available on FTA’s Web site, at www.transit.dot.gov, and in the docket, at www.regulations.gov. Paper copies of the final Plan may be obtained by contacting FTA’s Administrative Services Help Desk, at (202) 366–4865.

Table of Contents

- I. Background
- II. Summary of Public Comments and FTA’s Responses

I. Background

Congress first directed FTA to create and implement a National Public Transportation Safety Plan (National Safety Plan) under the Moving Ahead for Progress in the 21st Century (MAP–21) Act, which authorized a new Public Transportation Safety Program (Safety Program) at 49 U.S.C. 5329. Public Law 112–141 (2012). The Safety Program was reauthorized by the Fixing America’s Surface Transportation (FAST) Act. Public Law 114–94 (December 4, 2015).

On October 3, 2013, FTA introduced the transit industry to fundamental changes to the Federal transit program authorized by MAP-21 with a consolidated advance notice of proposed rulemaking (ANPRM). *78 FR 61251*. FTA issued the consolidated ANPRM to provide the public with an understanding of FTA's proposed approach to implementing the requirements for transit asset management and safety.

In the ANPRM, FTA sought specific comment on the statutorily required components of the National Safety Plan. Pursuant to 49 U.S.C. 5329(b) a National Safety Plan must include: (1) Safety performance criteria for all modes of public transportation; (2) the definition of the term "state of good repair" established under a rulemaking to implement a National Transit Asset Management System pursuant to 49 U.S.C. 5326(b); (3) minimum safety performance standards for public transportation vehicles used in revenue operations that are not otherwise regulated by any other Federal agency, and that, to the extent practicable, take into account relevant recommendations of the National Transportation Safety Board and other industry best practices and standards; (4) minimum safety standards to ensure the safe operation of public transportation systems that are not related to vehicle performance standards;¹ and (5) a safety certification training program.

On February 5, 2016, FTA published a **Federal Register** notice (81 FR 6372) seeking comment on a proposed National Safety Plan. FTA conducted a number of public outreach sessions and a webinar series related to the proposed National Safety Plan and the Public Transportation Agency Safety Plan notice of proposed rulemaking (Agency Safety Plan rule) that also was published in the **Federal Register** on February 5, 2016. 81 FR 6343. Specifically, on February 12, 2016, FTA conducted public outreach for tribes and hosted a Tribal Technical Assistance Workshop wherein FTA presented its proposed National Safety Plan and Agency Safety Plan rule and responded to technical questions from tribes. FTA subsequently delivered the same presentation during a webinar series open to the public on February 24, March 1, March 2, and March 3, 2016. On March 7, 2016, FTA delivered the same presentation at an outreach session hosted by the National Rural

Transit Assistance Program, which also was open to the public.

During each of these public outreach sessions and the public webinar series, FTA received and responded to numerous technical questions regarding the proposed Plan and NPRM. FTA recorded the presentations, including the question and answer sessions, and made available the following documents on the public docket for this Notice: (1) FTA's PowerPoint Presentation from the public outreach sessions and public webinar series; (2) a written transcript of FTA's public webinar of March 1, 2016; (3) a consolidated list of Questions and Answers from the public outreach sessions and public webinar; and (4) the results of polling questions from FTA's public outreach sessions. FTA also uploaded an audiovisual recording of its webinar from March 1, 2016. The video is available at the following link: <https://www.youtube.com/watch?v=FBj5HRatwGA&feature=youtu.be>.

The National Safety Plan is FTA's primary tool for communicating with the transit industry about its safety performance. FTA expects to update the National Safety Plan, from time to time, in response to trends in risk management in the transit industry, emerging technologies, best practices, findings from research, and other industry developments. FTA will issue substantive revisions to any future iterations of the National Safety Plan through a public notice-and-comment process.

The National Safety Plan is based on the principles and methods of Safety Management Systems (SMS): A formal, top-down, data-driven organization-wide approach to managing safety risks and ensuring the effectiveness of a public transportation agency's safety risk mitigations. On August 11, 2016, FTA published a final rule for the Public Transportation Safety Program that formally adopted SMS as the basis for FTA's development and implementation of the Safety Program. 81 FR 53046.

II. Summary of Public Comments and FTA's Responses

The public comment period for the proposed National Safety Plan closed on April 5, 2016. FTA received comment submissions from 119 entities, including States, transit agencies, trade associations, and individuals. FTA reviewed all of the comments and took them into consideration when developing today's final National Safety Plan.

Some comments received were outside of the scope of the proposed National Safety Plan. For example, FTA

received a number of comments related to the definitions of "injury" and "serious injury." FTA defined "injury" in the proposed National Safety Plan to provide clarity regarding the performance measure for injuries. In this Notice FTA responds to comments received regarding the definition of "injury" to the extent it relates to the National Safety Plan, but does not respond to comments related to reporting thresholds for certain injuries under the final State Safety Oversight rule at 49 CFR part 674.

Similarly, FTA received several comments related to the definition of the term "state of good repair," a term FTA was required to define in a rulemaking for transit asset management pursuant to 49 U.S.C. 5326. On July 26, 2016, FTA issued a final rule for Transit Asset Management wherein FTA defines the term "state of good repair," and FTA has adopted that definition in the final National Safety Plan. See the preamble of the Transit Asset Management final rule for FTA's responses to comments received related to the proposed definition of "state of good repair" (<https://www.gpo.gov/fdsys/pkg/FR-2016-07-26/pdf/2016-16883.pdf>).

Relatedly, a number of commenters noted inconsistencies with certain definitions found throughout FTA's several safety rulemakings. In response, FTA has aligned the definitions in the final National Safety Plan with other safety rulemakings and the Transit Asset Management final rule to ensure consistency.

FTA made a number of clarifying, organizational, and substantive revisions to the final National Safety Plan which are discussed below in the summary of public comments and FTA's responses. Comments and responses are subdivided by their corresponding sections of the proposed National Safety Plan and subject matter.

A. Chapter I: Introduction

Comments

General

A number of commenters provided general support for the proposed National Safety Plan. Of these commenters, several broadly supported efforts by FTA to improve transportation safety. Multiple commenters stated that while they support FTA's efforts to develop a safety plan, they would prefer that FTA not impose significant regulatory and implementation burdens on States and others under an "already extremely safe public transportation system."

¹ The requirement for operational standards was added by the FAST Act. However, the ANPRM did include a discussion on operational standards.

SMS

Several commenters supported FTA's proposal to incorporate SMS into a National Safety Plan, however, a few did not support FTA's application of SMS as a mandated approach to safety, especially for that portion of the nation's transit network that is delivered by State DOT subrecipients.

A couple of commenters stated that encouraging agencies to compare and contrast safety data results with other agencies when creating their safety plans runs contrary to the premise of SMS, where agencies are encouraged to improve their individual performance without regard to others.

Two commenters recommended that the National Safety Plan be consistent with Military Standard 882.

Workforce Development and Training

An individual commenter while commenting that the National Safety Plan is a rehash of 49 CFR part 659, questioned how FTA will handle and address workforce development issues stemming from the Agency Safety Plan rule and the National Safety Plan.

Multiple commenters requested that FTA issue technical assistance tools and non-binding guidance with templates to State agencies and transit operators to help agencies create a safety plan in line with the National Safety Plan.

Figures and Tables

Several commenters stated that the figures and tables in the National Safety Plan are not well labeled, specifically indicating that Table 5-1, as referenced in the text, does not exist.

Updates to the National Safety Plan

Several commenters provided suggestions on the frequency of updates to the National Safety Plan. One commenter stated that the National Safety Plan must be continually updated to reflect trends in risk management and best practices, and should be updated no less than once every two years. One commenter stated that future National Safety Plan updates should be accomplished through additional and periodic guidance regarding the minimum mandatory standards created in the rulemaking process. An additional commenter requested more information from FTA concerning the frequency of anticipated National Safety Plan updates and what the expectations, process, and timeline will be for transit agencies to respond or adapt their Public Transportation Agency Safety Plans' accordingly.

Two commenters requested that FTA clarify whether or not the National

Safety Plan will ultimately be turned into a regulation.

Public Transportation Safety Certification Training Program

Several commenters requested more information about the Safety Certification Training Program. One commenter indicated that the National Safety Plan references the training program, but does not explain the program's details.

Reporting Systems
